ATTACHMENT J-02

DATA REQUIREMENTS LIST/DATA REQUIREMENTS DESCRIPTION (DRL/DRD)

FOR

KENNEDY ENVIRONMENTAL AND MEDICAL CONTRACT (KEMCON)

DATA REQUIREMENTS LIST/DATA REQUIREMENTS DESCRIPTION (DRL/DRD)

The Contractor shall comply with the data requirements descriptions (DRDs) as listed in Table J-02.1

Additional Information:

A. The Government reserves the right to reasonably defer the date of delivery of any or all line items of data specified in the DRL. Such right may be exercised at no increase in the contract amount. The Government also reserves the right to terminate the requirement for any or all line items of data specified in the DRL. In the event the Government exercises this latter right, the contract amount shall be subject to equitable adjustment in accordance with the clause hereof entitled "Changes – Cost Reimbursement." (FAR 52.243-2 Alt II).

B. In the event of conflict between the identity and description of data called for by specific provisions of this contract and the DRL or DRDs, the DRL and DRDs shall control the data to be furnished.

C. Nothing contained in this DRL provision shall relieve the Contractor from furnishing data called for by, or under the authority of, other provisions of this contract which are not identified and described in the DRL attached to this contract. Whenever such data are identified, either by the Contractor or the Government, they will be listed on a DRL and described on DRDs.

D. Except as otherwise provided in this contract, the cost of data to be furnished in response to the DRL attached to this contract is included in the price of this contract if it is a fixed-price contract; or, if this is a cost-type contract, the cost is included in the estimated cost and shall be reimbursed in accordance with FAR 52.216-7, "Allowable Cost and Payment" clause.

TABLE J-02.1 - LIST OF DRDS

DRD#	Description
1.1-001	Performance Assessment Report
1.2-001	Risk Management Plan
1.3.2-001	Advance Notification of Workforce Reductions Report
1.3.2-002	Quarterly Contractor Workforce Report
1.3.2-003	Quarterly Summary of 3rd Step Grievances and Arbitrations Report
1.3.3-001	Purchase Order Report
1.3.4-001	Program and Performance Metrics Report
1.3.4-002	Workload Indicators, Work Backlogs, and Deferred Work Report
1.4.2-001	Reconciliation of Incurred Costs to Reported Costs Report
1.4.2-002	Contractor Financial Management Analysis, NASA Form 533M & NASA Form 533Q Report
1.4.2-003	NF533M Flat File
1.4.2-004	Annual Phased Contract Operating Plan
1.4.2-005	Rate-Volume Variance Analysis & Fund Source Explanation by Major Customer Report
1.4.2-006	Direct and Indirect Rates Report
1.4.2-007	Prime and Subcontractor Contract Value (CV) Status Report
1.4.2-008	Phased Negotiated Estimated Cost (NEC) Baseline Report
1.4.2-009	Annual IT NASA Headquarters and Special IT Budget Report
1.4.2-010	Biennial Geographical Economic Impact Report
1.5.5-001	IT Security Management Plan
1.5.5-002	IT System Security Documents (ITSSD)
1.5.6-001	Records Management Program Plan
1.5.6-002	File Plan and Summary of Record Holdings and Transfers Reports
1.6.2-001	Asset Capitalization Report
1.6.3-001	Motor Vehicle Utilization Plan and Reports
1.6.4-001	Export Control Plan
1.7.1-001	Safety and Health Plan
1.7.2-001	Safety Statistics Report
1.7.2-002	Safety Anomaly Report
1.8.2-001	Certifications and Licensure Report
2.1-001	Medical Quality Assurance Program Plan
2.9-001	Aerospace Medicine Medical Quality Operations Support Plan
3.4-001	Emergency Management Plan
4.5-001	Waste Management and Sampling Plan
4.5.2-001	Annual KSC On-Site Hazardous Waste Treatment, Disposal, and Recycling Report
4.5.2-002	Quarterly Hazardous and Controlled Waste Report
4.5.2-003	NASA-KSC Annual PCB Report
4.5.2-004	NASA-KSC Biennial Hazardous Waste Report
4.5.2-005	Off-Site Hazardous Waste Transporters and Facilities Report
4.5.2-006	Off-Site Treatment, Disposal, and Recycling Facility Audit Report
4.7-001	Environmental Sampling Plan

DRD#	Description
4.8-001	Annual Ecological Monitoring Plan
4.8-002	Annual Summary of Animal Use Report
4.8-003	Long-Term Air Quality Monitoring Plan
4.10-001	Post-Launch Ecological Impact Report
5.2-001	Medical Services Provided to the USAF Report
5.3-001	Air Force Environmental Health Services Report
5.4-001	USAF On-Site Hazardous Waste Disposal Report
5.4-002	USAF Waste Disposal and Treatment Cost Report
5.4-003	USAF Waste Recycling Report
5.4-004	USAF Waste Sampling Cost Summary Report
5.4-005	USAF Waste Analysis Cost Summary Report
5.4-006	USAF Waste Characterization Cost Summary Report
5.4-007	USAF Detailed Hazardous, Universal and Controlled Waste Labor Costs Report
5.4-008	USAF Waste Stream Pricing Report

INSTRUCTIONS FOR COMPLETING CONTRACT APPLICATION INFORMATION

A. LINE ITEM NO. Sequentially number line items beginning with number 001.

B. LINE ITEM TITLE - Enter the title of the data item, as shown in the Statement of Work (SOW), the RFP, and/or as directed by the CTM.

C. OPR (OFFICE OF PRIMARY RESPONSIBILITY) - Enter the organization designated to exercise technical and or administrative control over the data requirement. Use approved organizational code.

D. TYPE - Enter “Type of Data” code as follows:

CODE	DESCRIPTION
1	Data requiring written approval by the procuring activity prior to implementation into the procurement or development program.
2	Data submitted to the procuring activity for review not later than three weeks prior to project implementation. Data shall be considered approved unless the contractor has been notified of disapproval prior to project implementation.
3	Data submitted to the procuring activity for coordination, surveillance, or information.
4	Data retained by the contractor to be made available to the procuring activity upon request. The contractor shall furnish a list to the procuring activity.
5	Data to be retained by the contractor and reviewed by NASA on request.

E. INSPECT/ACCEPT - Enter Inspection Acceptance code as follows:

CODE	INSPECTION	ACCEPTANCE	CODE	INSPECTION	ACCEPTANCE
1	Source	Source	4	Certificate of Conformance	(Mandatory)
2	Destination (OPR)	Destination (OPR)	5	Certificate of Conformance	(Optional)
3	Source	Destination (OPR)	6	No Inspection Required	No Acceptance
Required					

F. FREQ. OF SUBM. - Enter the frequency of submission code as follows:

CODE	DESCRIPTION	CODE	DESCRIPTION	CODE	DESCRIPTION
AD	AS DIRECTED	PC	PER CONTRACT	PV	PER VEHICLE
AN	ANNUAL	PD	PER FAILURE	QU	QUARTERLY
AR	AS REQUIRED	PE	PER EVENT	RD	AS RELEASED
BE	BIENNIAL	PF	PER FACILITY	RT	ONE TIME & REVISIONS
BM	BIMONTHLY (every two months)	PG	PER PROGRAM	SA	SEMI ANNUALLY
BW	BIWEEKLY (every two weeks)	PI	PER EQUIPMENT END ITEM	SM	SEMI MONTHLY
DA	DAILY	PJ	PER PROJECT	TY	THREE YEAR PERIOD
DD	DEFERRED DELIVERY	PL	PER LAUNCH FLIGHT MISSION	UR	UPON REQUEST
MO	MONTHLY	PS	PER SYSTEM	WK	WEEKLY
OT	ONE TIME	PT	PER TEST		

G. INITIAL SUBMITTAL - Enter date of initial submittal as follows: Month, Day, Year. If calendar date is not scheduled, enter number of days preceding, or following, event to which the data requirement is related (e.g., 90 days prior to launch). Amplify in REMARKS, Item J, if necessary.

H. AS OF DATE - For “Onetime Only” submittals, enter date by month/day/year. For recurring submittals, enter number coding (e.g., 30/10, 90/10, 15/5, etc.). The first digit(s) indicate the number of calendar days from the reporting period’s (Block F) start to the data preparation cut off. The second digit(s), after the slash, indicate the number of calendar days from the cut off to the submittal date. Example: If Block F were “MO” and Block H were “30/10”, the data would include the entire month and would be submitted within 10 days thereafter.

J. REMARKS: Enter in this space:

a. Minor exceptions to the DRD.
b. Stipulation of specific forms when multiple forms are authorized on the DRD.
c. The paragraph, page, etc., in an existing contract where the data requirement is specified. (This data may be removed at final approval.)
d. Additional submittal information, if necessary.

K. DISTRIBUTION - Enter organizational symbol, number of copies, and type of copy code(s) (in parenthesis) required for each office. Type of copy codes are as follows:

CODE	DEFINITION	CODE	DEFINITION
A	Regular	C	Microfilm, Aperture Cards
B	Reproducible	D	Other, (Explain in remarks, Item J).

EXAMPLE ENTRIES: IS-PRO-2 (1A) = One regular copy. IS-PRO-3 (5 A, 1B) = Five Regular copies, One Reproducible copy.

Enter the total number of copies by type in the space provided

INSTRUCTIONS FOR COMPLETING DATA REQUIREMENT DESCRIPTION

GENERAL - The Data Requirement Description (DRD) will be prepared to describe the content and provide preparation information for data required in support of NASA programs.

1. TITLE - Enter the title or type of document required. The first word of the title should be a principal noun which best established the basic concept of the data. Subsequent words should be appropriate modifiers.
   Examples: Plan, Project Development (SIVB)
   Specification, Test (GSE)
   Report, Quarterly Progress
   Proposal, Engineering change (ECP)
2. NUMBER - Enter the appropriate number assigned to the DRD. This number will identify the appropriate data category.
3. USE - Enter a synopsis of the use of the document, stating reason for the requirement.
4. DATE - Enter date of preparation.
5. ORGANIZATION - Identify the installation preparing the DRD.
6. REFERENCES - List applicable documents by number, (NASA Management Manual, Mil Specifications, Federal Standards, NASA Procurement Regulation, etc.,) to which the preparing office (e.g., NASA installations, contractors, etc.) may refer for additional information concerning the data requirement.
7. INTERRELATIONSHIP - Enter all affected approved DRDs within the scope of the program when the DRD under preparation creates a significant impact or interface relationship with existing DRDs. Include a brief narrative of the impact or relationship created and a statement that the new DRD does not cause a conflict with other DRDs.
8. PREPARATION INFORMATION - Provide ample information for preparation of the data required by the data requirements description; include all necessary details of preparation to satisfy the originator’s formal requirements.

Data Requirement

3. Use	4. Date
To be used in assessing KEMCON Contractor performance	
	5. Organization
	TA-A4
7. Interrelationship	6. References

8. Preparation Information

A semiannual report of KEMCON activities summarizing all elements in the PWS to support the Government's Performance Evaluation Plan will be provided. The purpose of this report is to provide a Contractor/NASA senior management basis for discussion on the status of contract activity.

The report will be in the form of briefing charts and a briefing that addresses the summary level highlights of the past 6-months' activity. The briefing should address the status of the performance standards provided in Attachment J-13, Performance Standards. The briefing should also provide a discussion of planned versus actual costs and any actions required or proposed to assure performance to the cost plan. The KEMCON Contractor shall also present issues of concern and operational successes. If the COR has specific management issues for the Contractor to discuss, they will be provided 2 weeks prior to the scheduled briefing.

7. Interrelationship	6. References

8. Preparation Information

Prepare and maintain a current Risk Management Plan for the identification and elimination of performance issues.

The plan shall provide:

a. Risk identification processes and procedures;
b. Method to be used to train the Contractor and support personnel in risk identification and mitigation;
c. Procedures to progress from risk identification through risk mitigation;
d. Methods to measure the success of a risk mitigation;
e. How Contractor will provide status to NASA of on-going risk mitigation efforts.

8. Preparation Information

The Contractor shall notify, in writing, the Industrial Relations Officer (IRO) and the CO, at least 15 calendar days in advance of notification to employees of any planned reduction of permanent, full-time, and part-time employees that exceeds 10% of the total contract workforce or 25 employees, whichever is less. In addition, if Workforce Adjustment and Retraining Notification (WARN) Act is required, the Contractor shall provide to the IRO and the CO the information required by the WARN Act, section 639.7(c) and a listing of all organizations to be notified including those required by section 639.6(a), (c), and (d) at least 5 days prior to issuance of the notification.

The notification shall include the reason for the reduction in workforce, the number of employees impacted, their labor classifications, their physical location, and their location within contract organization structure. The notification shall also identify the expected date of the first separation and the anticipated schedule for making separations, as well as the name and telephone number of a company official to contact for further information.

Contractor format is acceptable.

8. Preparation Information

Provide a written report to the NASA-KSC Industrial Relations Officer summarizing the quarterly 3rd Step Labor Grievances and Arbitrations. The report shall include:

a. The number of open 3rd Step Labor Grievances at the beginning of the current quarter;
b. The number of 3rd Step Labor Grievances resolved during the quarter (without arbitration);
c. The number of open 3rd Step Labor Grievances at the end of the quarter;
d. A summary paragraph of the most common grievances experienced during the quarter;
e. A separate section reporting how many arbitrations they were involved in during the quarter, a brief description of each arbitration, and a summary of the arbitrator's decision.

8. Preparation Information

The monthly Purchase Order reports shall address the following information:

a. A list of procurement activity at the WBS level during the month that includes vendor name, purchase order number, purchase order amount, order date, and a total amount.

b. The report shall include a summary depicting the total dollar amount and percentage of total dollar amount and percentage of total procurements placed with large, small disadvantaged, women-owned, and HUB zone businesses. The summary shall be shown for the current month and contract year cumulative amount with totals.

8. Preparation Information

The Contractor shall notify the Government within 5 working days upon detection of significant errors in their accounting system that impact work orders or costs reported in any one period. Report is required when variances exceed $50,000 in a single month.

Reconciliation of Incurred Costs to Reported Costs. The Contractor shall submit a Reconciliation of the Incurred Costs to Reported Cost by 1st Level WBS in its general ledger system, to the costs reported to the Government in the NF 533M. Content of the report shall be to identify the value, nature, and source of direct incurred costs that have not been reported to the Government. Sample report format attached.

7. Interrelationship	6. References NPR 9501.2

8. Preparation Information

1. Scope

This DRD establishes the requirements for the content and format of financial and cost-related management reports. NF 533's shall report cost data for all customers of the KEMCON.

2. Contents

a. Reporting requirements are for the NASA Form 533M and 533Q. These reports shall be prepared in accordance with instructions in NPR 9501.2, NASA Contractor Financial Management Reporting.

b. The Contractor shall submit an initial report in the NF 533Q format within 30 days after authorization to proceed has been granted. The initial report shall reflect the original contract value detailed by negotiated reporting categories.

c. The Contractor's cost accounting system shall be capable of accumulating, segregating, and reporting costs by each of the categories listed below:

Category
WBS – down to the lowest level of the WBS structure
Prime Contractor
Major Sub-Contractors
Element of Cost
Fiscal Period (Month, Government Fiscal Year)
NASA Customers
Air Force Customers

Data Requirement

d. Labor Hours, Work Year Equivalents, and Elements of Cost Data to be reported on the 533Q and 533M reports are to be consistent with the Elements of Cost listed in Attachment 1. The Table of Contents for required NF 533M views and supplemental reports is shown in Attachment 2.

e. Due dates reflect the date that the 533M and 533Q reports are to be received by personnel on the distribution list, not the date the reports are generated or mailed by the Contractor.

f. Uncompensated overtime hours worked should be reported on NF 533M reports as a separate line item per attached Format C.

g. Monthly NF 533M reporting shall begin no later than 30 days after the incurrence of costs.

h. Amounts shall be stated to the nearest whole dollar, and productive hours to the nearest whole number.

i. At contract award and annually thereafter, the Contractor shall furnish an accounting calendar based on a quarterly reporting cycle of 4/4/5 week months and included in the initial submission of the annual operating plan. This cycle shall start on October 1, and end on September 30 of each fiscal year. The Contractor's accounting calendar shall also identify the number of work hours and non-productive hours in each month of the fiscal year.

j. For any indirect rates (such as fringe benefits, overheads, G&A, etc.), charged to the contract, the Contractor shall identify in the narrative of the 533M, the provisional billing rates, ceiling rates, and cumulative actual applied rates for the contract period, and any changes to these rates from current operating plan rates (Format M).

k. With the initial submission of the 533M, and annually thereafter, the contractor will attach as an addendum a Work Breakdown Structure (WBS) Dictionary. This dictionary will adequately describe the work content being performed within each WBS at the lowest reportable level to the government. This document/addendum should be updated when approved changes to the WBS have been made. Contractor format is acceptable.

l. The Contractor shall provide, on an annual basis, an Element of Cost Dictionary describing the content of each element of cost. Contractor format is acceptable.

m. Electronic files for distribution shall be in Microsoft Office Compatible format.

(Continued on Attachment)

Cost Elements	Definitions
Regular Labor	Reported to NASA as hours are incurred for both prime and major subcontractors. Includes full time, part time and temporary employees' time, not to exceed 40 hours per week.
Overtime Labor	Reported to NASA as hours are incurred both prime and major subcontractors. Includes full time, part time and temporary employees' time, exceeding 40 hours per week.
Premium Labor	Amount paid for cost associated with labor shift premiums. Includes both prime and major subcontractors.
Equipment	Generally reported to NASA when received and accepted by the contractor. Cost is greater than $5,000 per item.
Depreciation	Includes all depreciation cost associated with the capitalization of contractor property.
Leases	Reported to NASA using a proration over the life of the lease and includes capital and non-capital equipment. Examples are heavy equipment, machinery, cranes, and laboratory.
Training	Related costs are registration fees, airfare, lodging, transportation, meals, auto rental, mileage, certifications, and licenses.
Misc Other Direct Costs	Includes other charges such as contract labor obtained though an outside agency, freight, postage, dues, memberships, subscriptions, courier services.
Travel	Examples are airfare, lodging, transportation, auto rental, meals, moving expenses and other incidentals associated with specific travel or permanent relocation requirements. Reported to NASA as costs are incurred.
Subcontracts	Actual and estimated costs reported by prime contractors shall include subcontractors' incurred costs for the same accounting period. The prime contractor shall include in the total cost of each subdivision of work the accrued cost (including fee, if any) of related subcontractor effort. Subcontractors should, therefore, be required to report cost to the prime contractor, using the accrual method of accounting. If the G&A and fee reported by a subcontractor are at the total subcontractor level, these costs must be allocated to specific sub- divisions of work. Data submitted by the subcontractor should be structured similar to the prime contractor's NF533M to enable the prime contractor to properly report to NASA. For Firm Fixed Price subcontracts with a contract value greater than $500,000, the prime contractor is required to document the methodology used to generate the sub-contractor costs reported, the WYE's associated with the sub-contracts, and provide this information to the Government.
Materials & Supplies	Examples are supplies such as office supplies, toner cartridges, binders, lumber, electrical, plumbing, paint supplies. Cost is less than $5000 per item.
Leased Vehicle Cost	Cost associated with GSA, commercial vehicles, autos, trucks, vans, tankers, other and includes lease costs, mileage, fuel and maintenance.
Fee	Should be accrued as earned using a consistent and auditable method to determine the amount. For example: an acceptable method would be to use historical data to determine the amount to accrue each month. Fee should be reported on the NF533M following the "Total Cost" line. Award fee must be reported by the following categories: Base Fee, Fee Earned, Interim Fee, Provisional Fee, Potential Additional Fee, and Total Fee. If any of the above fee categories do not pertain, they should not be included in the NF533M.

Recovery Plan	For those cases where cost incurred exceeds the planned amount, the contractor shall propose operating plan content trade offs or identify other proposed actions to stay within the approved operating plan.
Contract Value	The original contract value baseline amount plus definitized changes. Includes fee.
Negotiated Estimated Costs	Includes the estimated cost baseline amount plus definitized changes, and authorized adjustments to the baseline that have not been definitized. Does not include fee.
Direct Costs	Elements of cost associated with providing a service which can be identified to a benefiting customer.

Format J: NARRATIVE

This is an opportunity to provide a narrative discussion to the Government on contract status and performance.

Disclosures;
Accomplishments;
Any ground rules/clarifications;
Accounting period schedule for the next 12 months;
Definitions/generic calculations for each element of cost used in 533 (**ex.** hours, ODCs, O/H, G&A, etc.);
Methodology for estimates;
Prior period adjustments made during current period;
Noteworthy management decisions that occurred during the reporting period to make the government aware of actions that will affect technical or financial performance.

Examples . Analytical remarks on items materially affecting historical or projected costs; identify present causes of problems and their effects on cost and schedule, along with corrective actions; effects of technical problems, changes, or deficiencies regarding current performance and projected resource requirements.

Format N: Estimate at Completion

This report shall be provided on the following schedule and as/of dates:

15 July	as of 30 June
15 Aug	as of 31 July
15 Sep	as of 31 Aug

Format of the report will be as partnered with the government. Minimum content shall be as follows:

View 1	**WBS**	**CUSTOMER**	**OPERATING PLAN**	**ACTUAL COSTS YTD**	**EST COST TO 30 SEP**
View 2	**CUSTOMER**	**WBS**	**OPERATING PLAN**	**ACTUAL COSTS YTD**	**EST COST TO 30 SEP**

Shall include descriptions of how EAC's were developed, and a list of key assumptions made in developing the EAC.

Data Requirement Description

1. Title	2. Number
Flat File, NF533M	1.4.2-003
3. Use	4. Date
Provides NASA with monthly and cumulative accumulated expenditures and projections of contract costs.	
	5. Organization
	NASA/KSC GG-B
7. Interrelationship	6. References
	NPR 9501.2D

8. Preparation Information

A flat file shall be provided that contains detail information for each Reporting Category (RC). An RC correlates to a task order, delivery order, or Work Breakdown Structure (WBS), and is the level at which cost is reported. Each RC can have Sub-Reporting Category line items (detailed cost elements) that add up to a RC. The Contractor is required to coordinate with the NASA Resource Analyst assigned to the Contract in order to establish and maintain the RC that the Contractor shall use to comply with this data requirement. The chart below describes the data elements to be included in this section of the flat file (see attached Exhibit A, Agency Defined File Format for specific layout details).

Data Element Name	Description
Reporting Category (RC)	Task, Delivery Order, Work Breakdown Structure
Cost Incurred for Month (7a)	Prior month actual cost incurred for each RC (column 7a on NF533M)
HR/WYE Incurred for Month (7a)	Prior month actual HR/WYE incurred for each RC (column 7a on NF533M)
Contract prior month planned cost (7b)	Planned cost for prior month for each RC (column 7b on NF533M)
Contract ITD cost (7c)	Contract ITD cost for each RC (column 7c on NF533M)
Contract planned ITD cost (7d)	Contract planned ITD cost for each RC (column 7d on NF533M)
Current month estimated cost (8a)	Cost estimate for the current month for each RC (column 8a on NF533M)
Current month estimated HR/WYE (8a)	HR/WYE estimate for the current month for each RC (column 8a on NF533M)
Next month estimated cost (8b)	Estimated cost for next month for each RC (column 8b on NF533M)
Balance of Contract	Balance of contract for the remaining estimate to complete for each RC (column 8c on NF533M)
Contractor Estimate	Contractor estimate for the total estimate to complete entire scope of contract for each RC (column 9a on NF533M)
Contract Value	Contract value based upon contract modifications for each RC (column 9c on NF533M)
Unfilled orders outstanding	Unfilled orders outstanding at the end of the reporting period for each RC (column 10 on NF533M)
Reporting Category level	Used by NASA's accounting system to determine the RC level
Reporting Category Identifier	Identifies if the RC is a actual Reporting Category or a Sub-Reporting.

The flat file (see Exhibit A below) shall be saved as a text file with no extension (do not include .txt after the file name) and named in strict accordance with the specific format described in the attached Agency Defined File Format document.

A) EXAMPLE FLAT FILE FOR DISTRIBUTION

File names must be provided in a specific format. Each file name will begin with the SAP 2 Character center abbreviation listed below. The contract number and date will be included in the file name as well. Below is a sample:

MACFPS001_NAS00-0001_yyyy_mm_dd

8. Preparation Information

The Contractor shall develop and manage an annual Contract Operating Plan by government fiscal year on the basis of customer, WBS, and element of cost, with monthly execution and variance analysis to ensure total contract costs have been reconciled. The Government will require several views of this data, and may require updates to the plan during the operating year. The operating plan shall be transmitted by a letter, detailing operating plan assumptions, manifest used to develop the plan, and other information considered in developing the plan.

Plan shall include an attachment showing a reconciliation of contract value to the operating plan value, including the detailed reconciling items such as negotiated adjustments and undefinitized adjustments. Contractor format is acceptable as coordinated and agreed upon by the Government. A sample report is provided.

Report, Direct and Indirect Rates	1.4.2-006
3. Use Monitor trends for direct & indirect rate actual costs against contract value to understand variances. Assess cost/budget impacts for current & future contract years. Determine the basis for changes & to determine whether rate changes are within or outside the contractor's control.	4. Date
	5. Organization NASA/KSC TA-A1
7. Interrelationship	6. References

8. Preparation Information
For each sub-element listed below, the contractor shall identify the basis for any change, assess the estimated cost impact (up or down) by contract year, and provide rationale and a risk/cost analysis to justify cost increases that cannot be offset without impact to the Government for changes within their control. Sample formats with contact & submission milestones are attached. Any Contractor format changes and/or briefing formats shall be partnered with the Government to ensure products and reviews meet the needs of both parties. Sub-elements and data to be reviewed shall include, but not be limited to, the following:

INDIRECT RATES:
Fringe Benefits/Non-Productive Pool Expenses: holiday, other paid absence, personal/sick leave, vacation
Fringe Benefits/Payroll Pool Expenses: FICA SS, FICA medical, state unemployment federal unemployment, workers compensation
Fringe Benefits/Other Expenses: group insurance, insurance disability, life insurance, pension, company match 401K, tuition reimbursement.
Total fringe benefit expense, total labor base, total fringe application rate.

DIRECT RATES: Productive/non-productive hours, regular/overtime/premium hours, and average unloaded wage rate for IHA and, if available, for each subcontractor. Level of staffing by WBS. Other date to be provided includes the basis for labor rates (e.g. CBA, DOL, management action) and escalation factor(s) by labor category or skills code. Each reporting period, the report shall contain an itemized list of any wage rate changes since the previous report by labor category or skills code to reflect old and new unloaded labor rate with explanation of the basis of change and any impact or offsets to contract value. The Government reserves the right to drill down to WBS or labor category level for analysis.

G&A RATE: Labor and non-labor elements, total G&A, G&A base, G&A rate.

Data Requirement
OVERHEAD RATE (excluding Direct Reallocation): Labor and non-labor elements (e.g. equipment, subcontracts, miscellaneous other direct costs, supply/material). Total overhead value, overhead base and overhead rate. Sample Formats Attached

7. Interrelationship	6. References

8. Preparation Information

Within 30 days after start of the government fiscal year (which begins October 1st), the Contractor shall submit a time-phased NEC baseline report detailing, in six-month intervals, how costs are projected to be incurred. The total estimated cost and direct labor hours reflected in the baseline report must equal the contract value for the total contract period. The report shall be at the lowest level of the WBS structure and shall reflect data for all elements of cost identified in DRD 1.4.2-002, Contractor Financial Management Analysis, NASA Form 533M & NASA Form 533Q Reports. The report shall be revised each time a contract modification is executed that increases or decreases the contract estimated cost. The report shall be updated, as necessary, during the contract performance by submission of revised pages for approval by the Contracting Officer.

The report shall be revised annually capturing all contract modifications executed in preceding report periods that increases or decreases that contract estimated cost. The reports shall conform to the attached format, but may be in contractor format as coordinated and agreed upon by the Government.

Plan, IT Security Management	1.5.5-001
3. Use To provide the Government insight into the Contractor's methodology for managing all aspects of information security and to ensure appropriate security of IT resources are addressed.	4. Date
	5. Organization NASA-KSC
7. Interrelationship IT System Security Documents (ITSSD), DRD 1.5.5-002	6. References

8. Preparation Information

The Information Technology (IT) Security Management Plan shall cover the Contractor's proposed management approach for meeting and complying with the Federal Information Security Management Act (FISMA) and NFS 1852.204-76, Security Requirements for Unclassified Information Technology Resources.

The Information Security Management Plan shall include, at a minimum, the following to ensure appropriate security for IT resources:

1. Contractor's information security POC(s) including roles, responsibilities, and contact information.
2. A description of approaches, policies, processes, and/or procedures for:
   a. Meeting all applicable security authorization requirements, including but not limited to development and maintenance of IT System Security Documents (ITSSDs) including external IT systems, implementation and validation of controls, security assessments, remediation, authorization, and continuous monitoring in accordance with NASA directives and guidance.
   b. Addressing all applicable information security requirements at all phases of the system development life cycle (SDLC), including vulnerability scanning and mitigation, maintaining secure system configurations, patch/configuration management and reporting, malware protection, data protection, and encryption requirements.
   c. Information security, privacy, incident management and response, including coordination with NASA Security Operations Center (SOC), the KSC Chief Information Security Officer (CISO), the KSC Incident Response Manager (IRM), and Center Privacy Manager (CPM).
   d. Ensuring that Contractor employees meet information security requirements, such as information security awareness and other required training, and that Contractor employees are knowledgeable of NASA information security policies and procedures.

Product shall be compatible with the Microsoft Office suite of software.

8. Preparation Information
The Contractor shall establish, maintain,, and implement IT System Security Documents for all IT Systems provided and operated in performance of this contract in NPR 2810.1, Security of Information Technology; NPR 1382.1, NASA Privacy Procedural Requirements; in accordance with the IT Security Handbooks (ITS-HBKs) which provide implementation details.

The IT System Security Documents shall include, at a minimum, the following:

1. Federal Information Processing Standards (FIPS) 199 System Categorization of Federal Information and Information Systems
2. Risk Assessment Report (RAR)
3. System Security Plan (SSP)
4. Contingency Plan (CP)
5. Security Assessment Report (SAR)
6. Rules of Behavior (ROB)
7. Authorizing Official Decision Letter
8. Initial Privacy Threshold Analysis (IPTA)/ Privacy Impact Assessment (PIA)
9. Vulnerability, scanning, assessment and remediation
10. Automated inventory report and/or manual inventory report

Refer to the ITS-HBKs for the required formats and mandated repositories of this documentation

The Contractor shall ensure regulatory compliance as it pertains to medical and privacy information as defined in Health Information Technology for Economic and Clinical Health (HITECH) Act (within the American Recovery and Reinvestment Act of 2009).

8. Preparation Information

The Records Management Plan (RMP) shall describe the implementation of a records management program in accordance with the documents referenced in this DRD. The RMP shall provide sufficient detail to demonstrate an understanding of the compliance requirements including the following areas:

I. Program Management
- a. Program authorization and organization
- b. Guidance and training
- c. Internal Evaluations
- d. Procedures and Processes

II. Records Creation/Recordkeeping Requirements
- a. Creation of records/adequacy of documentation
- b. Contractor Records

III. Records Maintenance (General)
- a. General
- b. Paper-based Records
- c. Electronic Records
- d. Legacy Records

IV. Maintenance of Special Records
- a. Electronic Records
- b. Audiovisual Records
- c. Cartographic and Architectural Records
- d. Micrographic Records

V. Records Disposition
- a. Records Disposition Schedule Implementation

VI. Vital Records

Data Requirement

The following definitions are provided for clarification purposes:

1. Government Records

a. Except as provided in 2. of this requirement, all records acquired, generated or maintained by the Contractor in its performance of this Contract including, but not limited to, documentation of those actions, policies, decisions, operations, reviews, and activities necessary to perform or continue the work performed under the contract, shall be the property of the Government and shall be delivered to the Government or otherwise disposed of by the Contractor either as the Contracting Officer or the KSC Records Manager may from time to time direct or, as the Contracting Officer shall direct upon completion or termination of the contract. This sub-paragraph (a) shall not apply to documents owned by third parties that are in the possession of the Contractor (e.g. documents containing trade secrets of third parties).

b. To the extent Government records are in the possession of the Contractor (e.g., Government-owned, Contractor-held), the Government shall have full and prompt access to the same. The Government's full and prompt access to data or records generated (or otherwise produced or prepared) at, by, or for KSC endure irrespective of form or medium of the data and apply to all such data or records without regard to the date or origination of such data or records, and without regard to ownership.

c. The Government shall have unlimited rights in information incidental to Contract administration including administrative and management information created under the Contract by the Contractor and specified for delivery to NASA in performance of the Contract, expressly excluding Confidential Contractor financial information. The Government shall also have the right to release such administrative and management information to any third party to satisfy the Government's requirements.

d. The Government Agency owns the rights to all electronic information (electronic data, electronic information systems, electronic databases, etc.) and all supporting documentation created as part of this contract. Contractor shall deliver sufficient technical documentation with all data deliverables to permit the agency to use the data.

e. Contractor shall provide capabilities to comply with Federal and Agency records management policies. These policies include the preservation of all records created or received regardless of format or mode of creation/transmission (e-mail, collaborative environments, etc.) or state of completion (draft, final, etc.).

2. Contractor-owned records. Not all records created or received by the Contractor are Government records; NASA recognizes the right of the Contractor to retain ownership to certain records. Contractor-owned records include:

a. Personal notes, logs, memoranda, or other similar documents created by an employee of the Contractor for the employee's own personal convenience and which are not intended for distribution through the normal course of the Contractor's business; and legal records, including legal opinions, litigation files, and documents covered by the attorney-client (i.e., facts confidentially communicated to an attorney from a client for the purpose of seeking legal assistance and opinions given by an attorney based on those facts) and documents covered by the attorney work product privileges.

b. Employment-related records containing personally identifying information concerning employees (e.g., personnel, payroll, and medical records maintained on individual employees of the Contractor).

c. Employment-related records not containing personally identifying information concerning employees.

d. Confidential Contractor financial information, and correspondence between the Contractor and other segments of the Contractor located away from the NASA facility (i.e., the Contractor's corporate headquarters).

e. Contractor procurement-related records (confidential financial information and correspondence obtained by the Contractor for use in its subcontracts; source selection and other confidential, pre-decisional, or similar documents relating to the Contractor's deliberative process in selecting subcontractors) except for records that fall under 48 CFR Chapter 18 that may apply to NASA.

f. Pre-decisional documents that are a direct part of the Contractor's deliberative process in that they make recommendations or express opinions on matters of policy directly affecting the Contractor's business operations.

Data Requirement

g. The following categories of records maintained pursuant to the technology transfer clause of this contract.

(1) Executed license agreements, including exhibits or appendices containing information on royalties, royalty rates, other financial information, or commercialization plans, and all related documents, notes and correspondence.

(2) The contractor's protected Cooperative Research and Development Agreement (CRADA) information and appendices to a CRADA that contain licensing terms and conditions, or royalty or royalty rate information.

(3) Patent, copyright, mask work, and trademark application files and related contractor invention disclosures, documents and correspondence, where the contractor has elected rights or has permission to assert rights and has not relinquished such rights or turned such rights over to the Government.

3. Rights in Data. Ownership of documents by either the Government or the Contractor shall not in any way affect the respective rights the parties may otherwise have to data contained on or in the documents under other provisions in the Contract.

4. Metadata. Metadata as defined by ISO 15489 3.12 is "data describing context, content, and structure of records and their management through time."

Report, Asset Capitalization	1.6.2-001
3. Use This report is used to document the current period monthly and cumulative costs incurred in the acquisition or fabrication of Government owned/Contractor Held capital assets in an accurate and timely manner.	4. Date
	5. Organization NASA-KSC/GG-B
7. Interrelationship	6. References NPR 9250.1B

8. Preparation Information
The contractor shall report the actual monthly costs and the actual cumulative costs incurred for each new capital asset acquisition (Government Owned Contractor Held capital asset - Real and Personal Property) to the NASA Financial Accounting Office Property Accountant. The contractor shall support the accumulation of the cost for each item of NASA-defined capitalized PP&E as required by NASA based on a unique Reporting Category/Job Order Number (JON). This DRD report shall include the property number, property description, current month actual costs, cumulative actual costs, and contractor's 533 Reporting Category/JON for each capital asset. Additionally, the contractor shall include a copy of the corresponding page of the monthly NF 533 for the applicable Reporting Category/JON as a component of this DRD report. Please see below for the capitalization criteria (NPR 9250.1B, Property, Plant, and Equipment) and the values that should be included in the total cost.

A. Capitalization Criteria

1. The following capitalization criteria apply to PP&E, including acquisitions, fabrications, modifications, and improvements. NASA shall capitalize individual items of PP&E acquired by construction, purchase, transfer, donation, or exchange which meet all of the following criteria:

a. Have an acquisition cost of $100,000 or more (except internal use software which has a capitalization threshold of $1,000,000).
b. Have an estimated useful life of two years or more (except internal use software with a useful life of five years).
c. Are not intended for sale in the ordinary course of operations.
d. Have been acquired or constructed with the intention of being used, or being available for use, by the Agency.
e. Have a current or planned alternative future use on another project with a separate objective. Institutional acquisitions that are not defined as maintenance are presumed to have an alternative future use.

Items not meeting the above criteria or those specifically identified as prototypes or test articles, including ST and STE, are considered R&D costs and are expensed in the period incurred.

2. PP&E items acquired as part of a bulk purchase that individually meet the capitalization criteria shall be capitalized in accordance

with the policies established in this NPR. If the cost per item purchased in bulk does not meet the capitalization threshold, the bulk purchase will be expensed in the period acquired.

a. Internal Use Software Bulk Purchases of the same software acquired under the same contract shall be accounted for as a group. If the same software package is purchased under two or more contracts, costs shall be accounted for and thresholds applied separately. Software acquired through separate contracts shall be accounted for separately.

3. Collateral equipment includes building-type equipment, built-in equipment, and large substantially affixed equipment normally installed as a part of a facility project such as, construction or modification. Such a project is considered a single event for the purposes of determining whether the PP&E meets the capitalization criteria.

a. Collateral equipment is not severable and is considered part of the facility project through which it is installed. Therefore, the cost of collateral equipment shall be included in the value of the project in making the determination as to whether the project meets the capitalization criteria specified above. If the project meets the capitalization criteria, the value of the collateral equipment will be included in the capitalized value.

b. The replacement cost of collateral equipment or the addition of collateral equipment to an existing facility shall be treated as either a capital improvement or maintenance, depending on the circumstances.

c. Non-collateral equipment, when acquired and used in a facility or test apparatus, can be severed and removed after construction without substantial loss of value or damage to the equipment or the premises where it is installed.

d. Non-collateral equipment shall be considered separately in relation to the capitalization criteria, and non-collateral equipment which meets the capitalization criteria will be recorded in the general ledger PP&E accounts.

4. Modifications to existing PP&E shall be capitalized and defined as capital improvements if the modification meets certain criteria.

a. NASA shall capitalize individual modifications as capital improvements which have a cost of $100,000 or more, and meet one of the following criteria:

1) Extend the useful life of the asset by 2 years or more.

2) Enlarge or improve its capacity.

Otherwise upgrade it to serve needs different from, or significantly greater than, those originally intended.

5. Replacements due to maintenance shall be expensed.

a. Maintenance. Expenses incurred to maintain an asset in a useable condition do not meet the criteria for capitalization and are thus expensed in the accounting period in which the costs were incurred. SFFAS No. 6 states the following: "For purposes of this standard, maintenance is described as the act of keeping fixed assets in acceptable condition. It includes preventive maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve the asset so that it continues to provide acceptable services and achieves its expected life. Maintenance excludes activities aimed at expanding the capacity of an asset or otherwise upgrading it to serve needs different from, or significantly greater than, those originally intended."

B. Valuation

1. Capitalized values shall include all costs incurred to bring General PP&E to a form and location suitable for its intended use, (i.e., the total cost to NASA). For example, the cost may include the following, as appropriate for the type of General PP&E capitalized:

a. Labor and other direct or indirect production costs.
b. Amounts paid to vendors or contractors, including fees.
c. Transportation charges to the point of initial use.
d. Handling and storage charges (for assets produced or constructed).
e. Engineering, architectural, and other outside services for designs, plans, specifications, and surveys.
f. Acquisition and preparation costs of buildings and other facilities.
g. An appropriate share of the cost of the equipment and facilities used in construction work.
h. Fixed equipment and related installation costs required for activities in a building or facility.
i. Direct costs of inspection, supervision, and administration of construction contracts and construction work.
j. Legal and recording fees and damage claims.
k. Fair values of facilities and equipment donated to the Government.
l. Material amounts of interest costs paid.

2. Costs of extended warranties should be expensed at the time of payment and not be included in the capitalized value. Where capitalized equipment is traded in for another piece of capitalized equipment, the capitalized value of the new asset will be the acquisition cost including the amount received for the trade-in. Capitalized value will be net of discounts taken.

7. Interrelationship	6. References

8. Preparation Information

The Motor Vehicle Utilization Plan shall describe the Contractor's approach to ensure the proper utilization of GSA, commercial rental, and/or Government vehicles in accordance with the compliance documents listed below. The plan shall:

a. Include a copy of the Contractor's motor vehicle insurance policy indicating the Contractor maintains bodily injury and property damage coverage with limits of liability as required by NFS 1852.228-75, Minimum Insurance Coverage;
b. Establish a schedule of periodic checks by the Contractor, GSA or other vehicle provider, and NASA to ensure the vehicles are being used exclusively for the contract;
c. Address operator requirements and describe operator discipline for improper use of vehicles;
d. Include the process for obtaining preventive maintenance and for reporting accidents;
e. List the type and quantity of vehicles approved by the NASA Transportation Office for use on the contract. The list shall include the FSC Codes, Government license plate number, and a point of contact for each vehicle;
f. Address plans to reduce petroleum use and increase alternative fuel use per the reference Executive Orders;
g. Specify the use of KSC Form 7-490, KSC Vehicle Use Record. Upon request, provide the NASA KSC Transportation Office with copies of the Vehicle Use Records.

For the plan, Contractor format is acceptable.

In addition to the plan, the Contractor shall provide the NASA KSC Motor Vehicle Fleet Officer with the following information and reports:

a. The Contractor shall ensure that all NASA rolling stock is titled to NASA and not the Contractor, and that the original Certificate of Title for all NASA rolling stock (existing and newly purchased) is provided to NASA;
b. A copy of the monthly GSA billing statement;
c. An electronic report of all vehicle damage including a copy of the repair invoice. Include management corrective action taken. This report is due when damage occurs.

7. Interrelationship	6. References

8. Preparation Information
#3. (con't): have a safe work environment/conditions throughout the performance of this contract.

The S&H Plan shall describe task and activities of the S&H management at each site where the contractor is operational to assure identification, evaluation, and elimination/control of S&H concerns. At a minimum, the plan shall include the following:
a. All requirements specified in NFS 1852.223-73 and NPR 8715.3 Appendix E.
b. Organization charts(s) which illustrates the functional relationships and lines of communication between Safety, the S&H organization, and other organizational elements.
c. Descriptions of the S&H management functions within the organization including the process through which management decisions will be made, including notification to the local NASA S&H organization of critical and catastrophic hazards, corrective actions, mishaps, and deviations or waivers to NASA S&H requirements.
d. Description of the responsibility, authority, and accountability of S&H personnel, other contractor organizational elements involved in the S&H effort, and subcontractor S&H personnel. Include the organizational unit responsible for the execution of S&H tasks and the position with the authority to resolve all identified S&H issues.
e. Description of the management controls that will be used to ensure compliance with S&H regulations.
f. Cross-reference of safety program requirements (e.g., OSHA, NASA, local NASA Center, State) and contractor procedures to avoid duplication of effort.
g. Description of the safety program measurement system, including measurements, metrics, and trend analysis methods. The performance measurement system should describe responsibility for identifying and implementing remedial action, recurrence control, and corrective actions that are necessary to improve performance as indicated by the performance measurement system.
h. Format: Microsoft Word or PDF. Contractor format is acceptable. Maintenance: Changes shall be incorporated as required by change page or complete revision. NASA approval required.

3. Use	4. Date
The Safety Statistics Report provides information on mishaps and close calls affecting the contractor's performance.	5. Organization NASA/KSC SA-E
7. Interrelationship	6. References

8. Preparation Information

The contractor will ensure that the submitted Safety Statistics Report (KSC Form 6-22) is accurate at the time of submittal. This includes ensuring that cases that escalate, changes in property damage, and changes in previous year's data are noted on the following months Safety Statistics Report. In addition, include explanations of the changes, and ensure that these cases and changes are updated in the Agency automated data system for mishap reporting.

Report, Safety Anomaly	1.7.2-002
3. Use	4. Date
To provide an immediate description of equipment or system failure or anomaly, an accident, a close call, or a personal injury.	
	5. Organization
	NASA/KSC TA-C
7. Interrelationship	6. References
	8715.3 KNPR

8. Preparation Information

1. An Anomaly Report shall be prepared and distributed per Block J not later than 4 hours after the anomaly occurs and shall include but not be limited to:

a. Date, time, location, and nature of the anomaly;
b. System or Systems involved;
c. Number, and if possible, nature of any injuries;
d. Probable cause of occurrence and events leading up to anomaly;
e. Actions taken to eliminate or minimize any hazards or further damage;
f. Planned corrective actions to prevent recurrence, if known;
g. Persons notified;
h. Photograph, if available.

2. Anomalies meeting NASA Mishap criteria for Type A through Type D as defined in KNPR 8715.3, shall be upgraded to Mishaps and electronically entered into the Agency automated data system for mishap reporting database within 24 hours or by the end of the next regular duty day if the incident occurs after 1500 hours on the last work day before a holiday or weekend or anytime on weekends or holidays. In addition, all anomalies with the potential to have been a Type A through Type D Mishap shall also be entered. Data entered shall contain as much detail as available and when appropriate shall include details such as root cause analysis, measures to prevent recurrence, photographs, etc.

3. The format for the Anomaly Report is at the discretion of the Contractor. The report shall be compatible with the Microsoft Office product suite.

7. Interrelationship	6. References

8. Preparation Information

Prepare plans which provide descriptions of the activities to meet medical operations requirements for human spacecraft launch support. These plans shall emphasize both routine and emergency medical support as well as any ancillary support, e.g., laboratory services. They shall consist of the following documentation:

1. KSC Medical Operations Support Implementation Plan (MOSIP). Frequency: Initial plan and Government approval signature within 1 year after contract start, then as needed thereafter.
2. KSC Emergency Medical Services (EMS) Plan. Frequency: Initial plan and Government approval signature within 1 year of NASA crewed launch, then as needed thereafter.
3. Medical Package for Launch:
   a. Frequency: Prior to each launch in support of the Medical Readiness Meeting and prior to Terminal Count Down Test.
   b. Provide plans for confirming all necessary medical preparations for launch, including:
      (1) Launch time lines
      (2) General mission information
      (3) Launch deployment staging maps
      (4) General communications listing
      (5) Personnel duty, notification tree, and on-call schedules
      (6) Triage site maps
      (7) Hospital emergency contacts and resources
      (8) Flight crew identification, seating, and configuration
      (9) Special preparations and unique requirements

4. Mission Report. Frequency: Within 30 days of conclusion of human spacecraft mission.

Report, USAF On-Site Hazardous Waste Disposal	5.4-001
3. Use To provide insight and accountability of hazardous waste disposed of under the USAF USEPA ID number.	4. Date 5. Organization 45 CES/CEIE
7. Interrelationship	6. References

8. Preparation Information

The Contractor shall submit an annual report on the amount of hazardous waste treated on-site. Report to include:
- waste description;
- date of treatment;
- type of treatment;
- quantities treated and disposed of.

Data Requirement

Contract Application Information for DRL KEMCON	A. Item Number 5.4-002

B. Line Item Title
USAF Waste Disposal and Treatment Cost Report

Report, USAF Waste Disposal and Treatment Cost Report	5.4-002
3. Use To provide insight and accountability into the cost for each waste stream waste disposed of under the USAF USEPA ID number.	4. Date
	5. Organization 45 CES/CEIE
7. Interrelationship	6. References

8. Preparation Information

The Contractor shall submit a quarterly cost report for hazardous, universal, and controlled wastes shipped off-site for treatment, disposal, and recycling. The wastes shall be independently documented by type: hazardous, universal, controlled, or recycled waste.

Report to include:
- description of the waste stream (including any/all waste codes associated with the waste stream);
- number and size of containers by waste stream;
- total weight shipped in pounds;
- total (burdened) treatment/disposal cost per waste stream shipped within the quarter.

7. Interrelationship	6. References

8. Preparation Information

The Contractor shall submit a quarterly report for the following:

1. Antifreeze
- Gallons of antifreeze recycled by month and location (facility number, POC, phone number, and installation).
- When picked-up/delivered (date).

2. Industrial Wipes (rags)
- Number of rags delivered monthly by location (facility number, POC, phone number, and installation).
- When rags picked-up/delivered (date).

3. Used Oil
- Gallons of used oil recycled by month and location (facility number, POC, phone number, and installation).
- When picked-up/delivered (date).

7. Interrelationship	6. References

8. Preparation Information

The Contractor shall submit a quarterly report identifying all analyses conducted on USAF waste samples by the Contractor. Report to include:
- location where the waste stream originated (organization and facility number);
- number of containers samples;
- response time from receipt of request to date the waste was sampled;
- total burdened cost to complete each sampling request (including equipment and labor).

Data Requirement

Contract Application Information for DRL KEMCON	A. Item Number 5.4-005

B. Line Item Title
USAF Waste Analysis Cost Summary Report

C. OPR	D. Type	E. Inspect / Accept	F. Frequency	G. Initial Sub.	H. As of Date

7. Interrelationship	6. References

8. Preparation Information

The Contractor shall submit a quarterly report identifying all analyses conducted on USAF waste samples by the Contractor. Report to include:
- Location where the waste stream originated (organization and facility number);
- Time from sample turn in to the lab to receipt of analyses results;
- sample analytes;
- Total burdened cost for each sample (including prime and subcontracted laboratory costs if applicable).
