#	Reference	Industry Question/Comment	Government Response
19	Section L.9(d)(a)	The table in Section L.9 (d) (a) states the following items will be required in Volume II, "Standard Form (SF) 33 and *completed Sections B-J of Model Contract*, including completed Representations and Certifications (Section K) and *all required Exhibits* to be proposed by the offeror". Specifically referring to *"...completed Sections B-J of Model Contract..."* and *"...all required Exhibits..."*. Both of these statements include the completion and submission of Exhibit D, "Small Business Subcontracting Plan" in Volume II. In addition, the answer to Question No. 7 in RFP Amendment 000001, dated 8/31/15, indicates the Small Business Subcontracting Plan will also be included in Volume No. I. Therefore, in accordance with this RFP information, it appears the Small Business Subcontracting Plan will be submitted as part of both Volumes I and II. Could you please verify specifically which proposal Volume (I or II) should the Small Business Subcontracting Plan be part of, or if the document is to be included in both Volumes I and II, so indicate?	Small Business Subcontracting Plan shall be submitted in Volume I, Technical Proposal. See revised Section L.9.
20	Attachment 1 - Cost Forms	In the pricing template, the ODC cells in Form 2 are locked and cannot be changed or deleted. So for each subcontractor that completes the template, the ODC value will show up on Form 2. Consequently, on Form 1, it will artificially add $10M to each subcontractor's total price. Are subcontractors permitted to zero out the ODCs on Form 1 in their sealed packages? Will the government amend the form to eliminate possible pricing inaccuracies?	Not only are subcontractors permitted to zero out the ODCs in Form 1, they SHALL zero out the ODCs in Form 1. See revised Attachment 1 Form 2-Price Breakdown by CLIN the cells for CLINs 3 & 5 have been unlocked.
