

**NASA SAFETY CENTER TECHNICAL SERVICES
SOLICITATION NNC11ZCH002R
GOVERNMENT REPSONSES TO ADDITIONAL INDUSTRY QUESTIONS/COMMENTS**

1. Based on RFP section F.3 PLACE OF PERFORMANCE - SERVICES, does the NASA expect the Cost responses to be formulated using only Onsite rates? If not, please provide the locations where NASA will not be able to provide work sites, as well as the approximate numbers of staff to be located at contractor facilities.

The Government is providing 'on-site' facilities as listed in the appropriate section of the solicitation for Contractor use in performance of the contract. Should the Offeror elect to utilize these facilities in performance of the contract, the Offeror may utilize on-site indirect rates. Should the Offeror elect to utilize facilities not provided the Government, the Offeror should utilize off-site indirect rates.

2. Based on the PM being key personnel and in light of Section C.5.1 "The Contractor shall institute and maintain an effective, efficient, and responsive management organization responsible for management and oversight of Contractor personnel, subcontractors, other contract resources, Government Furnished Software and Data, contract performance, deliverables, and costs as applicable." it is our assumption that management and administrative oversight is a part of our direct contract costs. Please confirm.

That is correct.
