All Offerors

Subject: Discussions Closed

Reference: Electrical Systems Engineering Services (ESES II) Procurement
Solicitation No. NNG11375927R

Discussions under the referenced procurement are hereby closed. In accordance with FAR 15.307 and NFS 1815.307, you are invited to submit a Final Proposal Revision (FPR) for the ESES II procurement. The general instructions for the FPR are provided in Amendment #3 (see Enclosure 1). Additionally, a revised Request for Proposal incorporating all Amendment 3 changes (Enclosure 2) and Attachment C – Addendum (Enclosure 3) are enclosed.

Please be advised that the FPR shall be the final opportunity for you to clarify or make changes to your proposal. Your proposal shall include all changes that you believe are required or appropriate as a result of discussions. Please be advised that any information provided during discussions, either verbally or in writing, cannot be considered in the evaluation. **Only the final proposal revision (consisting of the unchanged portion of the initial proposal, together with the Offeror's submitted changes) will be evaluated. Offerors are advised however, that the Government does not accept responsibility for finding changed information in the revised proposal that is not specifically called out or otherwise identified as new or changed, and as such, such information may not be evaluated. Offerors are also cautioned against unsubstantiated changes to their proposals.**

The revised proposal shall comply with the instructions for formatting as set forth in Clause L.14 of the Request for Proposal (RFP). The page limitations are shown in Section L.14(b) of the RFP. **For any change pages submitted, you must highlight what the change is by shading and underlining to enable ready identification of the changes.**

As a reminder, the Government's position on the following item for your consideration in your Final Proposal Revision (FPR) is as follows:

1. Contract year pricing as of February 1, 2013, shall be utilized in the completion of all cost exhibits.

Additionally, any exceptions to the solicitation (including new terms, conditions, clauses, or instructions), may result in a determination of proposal unacceptability.

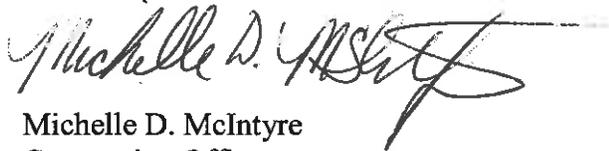

Offerors shall complete and execute the "model" contract. The entire model contract (the SF33 and Sections B through K with all fill-ins completed) shall be included in the offer volume. Please ensure that all clauses which require the Offeror to provide fill-in information have been

completed. Additionally, the Government anticipates the effective date of the resulting ESES II contract to commence on **February 1, 2013**.

Your revised proposal is due no later than **October 5, 2012 at 1:00 pm** local time in Greenbelt, Maryland. Proposal revisions received after the due date and time will be considered late and will not be evaluated. Significant subcontractors may submit proprietary cost data, under separate cover, directly to the Government no later than the date and time specified above. Final proposal revisions shall be in writing and the Government intends to make award without obtaining further revisions. Offerors are encouraged to submit their most favorable and realistic cost proposal. Receipt of the final proposal revisions will be handled in the same manner as initial proposals (see L.19 Proposal Marking and Delivery (JAN 2010) in the ESES II solicitation).

Thank you for your sustained interest and attention to this procurement. If you have any questions regarding this letter, or require a clarification, please contact me by email at Michelle.D.McIntyre@nasa.gov.

Best regards,

Michelle D. McIntyre
Contracting Officer
