All Offerors

Subject: Discussions Closed

Reference: Electrical Systems Engineering Services (ESES II) Procurement
Solicitation No. NNG11375927R

Discussions under the referenced procurement are hereby closed. In accordance with FAR 15.307 and NFS 1815.307, you are invited to submit a Revised Final Proposal Revision (RFPR) for the ESES II procurement. The general instructions for the RFPR are provided in Amendment #5 (see Enclosure 1). Additionally, a Request for Proposal incorporating all Amendment 5 changes (Enclosure 2), Attachment C – Addendum (Enclosure 3), Attachment L – IT Applicable Documents List and Enclosure A, Incumbent Rates are enclosed.

Please be advised that the RFPR shall be the final opportunity for you to clarify or make changes to your proposal. Your proposal shall include all changes that you believe are required or appropriate as a result of discussions. Please be advised that any information provided during discussions, either verbally or in writing, cannot be considered in the evaluation. Only the RFPR (consisting of the unchanged portion of the FPR, together with the Offeror's submitted changes) will be evaluated. Offerors are advised, however, that the Government does not accept responsibility for finding changed information in the RFPR that is not specifically called out or otherwise identified as new or changed, and as such, such information may not be evaluated. Offerors are also cautioned against unsubstantiated changes to their RFPR.

The final proposal shall comply with the instructions for formatting as set forth in Clause L.14 of the Request for Proposal (RFP), through Amendment 5. The page limitations are shown in Section L.14(b) of the RFP.

As a reminder, the Government's position on the following item for your consideration in your RFPR is as follows:

1. Contract year pricing as of May 1, 2013, shall be utilized in the completion of all cost exhibits.

Additionally, any exceptions to the solicitation (including new terms, conditions, clauses, or instructions), may result in a determination of proposal unacceptability.

Offerors shall complete and execute the "model" contract. The entire model contract (the SF33 and Sections B through K with all fill-ins completed) shall be included in the Offer Volume. Please ensure that all clauses which require the Offeror to provide fill-in information have been completed. Additionally, the Government anticipates the effective date of the resulting ESES II contract to commence on/about **May 1, 2013**.

Your revised proposal is due no later than **February 26, 2013 at 1:00 pm** local time in Greenbelt, Maryland. Proposal revisions received after the due date and time will be considered late and will not be evaluated. Receipt of the revised final proposal revisions will be handled in the same manner as the initial proposal and the FPR (see L.19 Proposal Marking and Delivery (NOV 2012) in the ESES II solicitation). Significant subcontractors may submit proprietary cost data, under separate cover, directly to the Government no later than the date and time specified above. Revised Final Proposal Revisions shall be in writing and the Government intends to make award without obtaining further revisions. Offerors are encouraged to submit their most favorable and realistic cost proposal, explaining all cost in detail in the cost narrative. RTO cost updates to Exhibit 4 are not required. However, any changes to the technical or staffing approach associated with RTOs shall be identified within the Mission Suitability Volume and/or BOEs as appropriate.

Thank you for your sustained interest and attention to this procurement. If you have any questions regarding this letter, or require a clarification, please contact me by email at Michelle.D.McIntyre@nasa.gov.

Best regards,

Michelle D. McIntyre
Contracting Officer
