

RFQ NNK0929478Q Amendment 04
Cryogenic Vacuum Jacketed Pipe Spools
Questions and Answers

Question 1:

Please confirm that per NASA's answer to Q1 provided in Amendment 03, the total revised number of pumpouts on the isometrics represent the total number of spool sections that each bidder is to include in his quote, and that none of the pumpouts on the isometrics are for field joint closures.

From Amendment 03:

Q1: What is the maximum allowable spool length?

A1: The maximum spool length is forty (40) foot lengths with a maximum variance of +/- ten (10) feet. Each bidder should utilize the same number of spools to be fabricated / delivered to KSC as the number of pump out ports specified per isometric drawing.

Answer 1:

Yes, the total revised number of pumpouts provided on the table accompanying the isometrics represent the total number of spool sections that each bidder is to include in his quote. None of the pumpout ports on the figures provided are for field joint closures.

(See attachment "Isometric Drawings" provided in Amendment 03)

Question 2:

The quantities of pumpouts in Attachment 04 - Price Proposal Sheet for NNK0928478Q agree with all isometrics except Fig.6 (12 pumpouts on spreadsheet, 17 on isometric) and Fig. 7 (10 on spreadsheet, 17 on isometric). Which quantities should we use for bid?

Answer 2:

All bidders should bid the quantities of pumpout ports shown on the revised Attachment 04 - Price Proposal Sheet for NNK0928478Q.
