FROM: OP/Director, Procurement Office

SUBJECT: Engineering Services Contract (ESC) Temporary Suspension of the Blackout Period Request for Proposal (RFP) NNN10294259R

The ESC RFP has been amended with a new proposal due date of April 13, 2010. With the changes to the Limitation in Future Contracting clause stated in the amendment and the recent cancellation of the EGLS RFP, the previously imposed blackout period is temporarily lifted until close of business March 3, 2010.

The ESC acquisition represents a significant business opportunity for the private sector, and intense competition is expected. The goal of this action is to ensure that each offeror will have an equal opportunity to effectively compete on this procurement.

If there are any questions or requests for information that NASA personnel are hesitant to reply to, please contact the Contracting Officer, Mary Kiss, 321-867-6264 or e-mail Mary.Kiss-2@nasa.gov.
