

NNG10345935Q  
WALLOPS FLIGHT FACILITY BULK LIQUID PROPANE  
QUESTIONS/ANSWERS

1) Question: Can delivery be accepted by rail?

Answer: In accordance with section 52.212-4 (a) of the RFP, the Contractor is responsible for all costs associated with delivering propane to the tank farm at Wallops regardless of method of delivery (i.e. rail, truck, boat, or any combination thereof). The point of acceptance for propane delivery is the tank farm at Building N159 Wallops Flight Facility, Wallops Island, Virginia 23337. The closest rail is approximately four miles away and the Government does not intend to participate by providing labor or materials required to transfer propane from the rail to its tanks at Wallops.
