

NASA Dryden Flight Research Center
PROCUREMENT QUALITY REQUIREMENTS

Q-4 Revision B / Quality of New Aircraft Assemblies, Parts and Materials

The supplier shall only deliver aircraft assemblies, parts and materials that have Certificates of Conformance and comply with the following requirements for new articles. Concessions to these requirements may be granted, but only by written authorization following review by the NASA Dryden's Engineering, Quality Assurance and Contracting Officer's Technical Representatives.

Unless otherwise specified for delivery to NASA Dryden, all applicable material test reports, processing, inspection, test and non-destructive examination results shall be retained for at least 10 years by the supplier, and made available upon request.

Supplier shall ensure that articles conform to all original design and manufacturing requirements for materials, processing, inspection, test, non-destructive examination, marking, packaging, preservation and transportation.

For each article, the supplier shall identify:

- Manufacturer's part number, and heat, batch or serial number (when applicable).
- Manufacturer's name, date of manufacture and street address of manufacturer's production facility.
- Proof of serviceability by the appropriate depot/organization serviceable tag or by FAA Parts Manufacturing Approval (PMA) or Technical Standard Order Authorization (TSO) Form 8130 accompanying each article.

Approved
