

Q & A's Round three 4-25-11

AAI080975-11-006

- 1) Is the replication between different manufactures for migration purposes, DR purposes or some kind of ILM? Is this one time functionality? **Replication is for production bi-directional file transfer. One side has existing NAS equipment and prefers to use rsync via a fibre channel link.**
- 2) You've told us what you need from a capacity standpoint. What do you need from a performance standpoint IOPs and MB/s? **Per the Requirements: This storage must support enterprise level IOPS support (>50,000 IOPS). Equipment must be SAS-2.0 drive compatible with 6 Gb/sec or better signaling rate.**
- 3) Are technologies that provide equivalent or better performance acceptable as a replacement for a requirement. **We will review and evaluate all data submitted.**
