PROCUREMENT QUALITY REQUIREMENTS

Q-26 Baseline / Counterfeit Electronic Parts

Test and Inspection Requirements for Electronic Parts

The supplier shall establish and implement test and inspection activities necessary to assure the authenticity of purchased product, including:

- Traceability and documentation verification
- Visual examination

Upon request, the supplier shall provide inspection and test reports demonstrating product conformance to specified criteria.

Only personnel trained and qualified in the detection of counterfeit parts will perform test and inspection activities.

Supply Chain Traceability for Electronic Parts

The supplier shall maintain a method of item traceability that ensures tracking of the supply chain back to the manufacturer of all Electrical, Electronic, and Electromechanical (EEE) parts included in assemblies and subassemblies being delivered per this order. This traceability method shall clearly identify the name and location of all of the supply chain intermediaries from the manufacturer to the direct source of the product for the supplier and shall include the manufacturer's batch identification for the item(s) such as date codes, lot codes, serializations, or other batch identification.
