Reply to Attn of: BJ4-12-093

October 28, 2011

**TO: PROSPECTIVE OFFERORS**

**FROM: BJ4/Contracting Officer**

**SUBJECT: Request for Proposal (RFP) NNJ11061911R Aircraft Maintenance and Operational Support (AMOS)**

The National Aeronautics and Space Administration (NASA) Lyndon B. Johnson Space Center (JSC), is hereby issuing the RFP which replaces the Draft RFP issued on September 9, 2011.

Offerors are advised to read all requirements contained herein and in the RFP.

The following information should be considered in proposals preparation.

#### ACQUISITION STRUCTURE

AMOS has been assigned NAICS code 488190 with a size standard of \$7.0M.

Subject RFP is a full and open competition.

The contract will be a combination of Cost Plus Award Fee (CPAF) Level of Effort (LOE), and Fixed Price Award Fee (FPAF) contract types. The award fee associated with the fixed price portion of this procurement is set at 4% of the Offeror's cost exclusive of profit.

The period of performance consists of a phase-in-period of April 24, 2012, through May 30, 2012; a base period of June 1, 2012, through September 30, 2013; an option period of October 1, 2013, through September 30, 2015; and an option period of October 1, 2015, through May 31, 2017.

All Offerors must have a Top Secret Clearance in accordance with Federal Acquisition Regulation clause 52.204-2, Security Requirements, NASA FAR Supplement (NFS) clause 1852.204-75, Security Classification Requirements, and Section J, Attachment J-5, DD Form 254, Contract Security Specification, at the time of submittal of their proposal.

The Contracting Officer has determined that this acquisition may give rise to an organizational conflict of interest. Therefore, Offerors must submit an acceptable mitigation plan in accordance with Data Requirement Deliverable (M20) entitled "Organizational Conflict of Interest Mitigation Plan" and accept a reasonable limitation on future contracting in accordance with NFS clause 1852.209-71, Limitation of Future Contracting, to be eligible for award.

## ELECTRONIC ACCESS

The RFP, a technical library, and other information about this solicitation can be accessed electronically at the following address:

<http://procurement.jsc.nasa.gov/amos/>.

## PROPOSAL SUBMISSIONS

Proposals submitted in response to this solicitation shall include the Offeror's name and complete address, including street, city, county, state, and 9-digit zip code. Also, the telephone and fax numbers and e-mail address of the contact person responsible for the proposal shall be included in the proposal.

Offerors are required to have a cage code that matches the corporate address submitted with its proposal. The cage code is to be inserted in Block 15A (Code) on Standard Form (SF) 33.

Offerors must deliver their proposal in accordance with Section L-26, PROPOSAL MARKING AND DELIVERY (Applies to Fixed-Price and Cost).

- Volume II, Past Performance, and the Cognizant Audit Office Template (CAOT) are requested early, (see Table L-3 Proposal Copies and Due Dates) but are not officially due until November 30, 2011.
- Proposals are due at NASA/JSC no later than 2:00 p.m., local time on November 30, 2011.

In accordance with the proposal instructions in Section L, the proposals are to be submitted in hard copy and CD ROM. To expedite proposal evaluations, Offerors are requested to provide a copy of their cost proposal to the cognizant Defense Contract Audit Agency (DCAA) Office at the time proposals are submitted to NASA/JSC.

Proposals that arrive after the prescribed time for receipt of proposals will be considered late and treated in accordance with FAR 52.215-1, Instructions to Offerors-Competitive Acquisitions.

## QUESTIONS RELATED TO THE RFP

All questions and comments related to the enclosed RFP shall be submitted in writing via the e-mail addresses listed below under the section entitled E-MAIL CORRESPONDENCE.

Please title the e-mail note "Questions/Comments-AMOS RFP" in the subject block and make sure to include a name and daytime phone number of the person submitting questions or comments in the body of the email. Offerors shall submit all questions by close of business, November 15, 2011. Answers to questions will be posted to the NASA Acquisition Internet Service (NAIS) through an amendment to this solicitation.

BJ4-12-093

E-MAIL CORRESPONDENCE

All e-mail correspondence related to this solicitation shall be submitted to the following e-mail addresses:

[roger.m.roberts@nasa.gov](mailto:roger.m.roberts@nasa.gov)  
[alice.j.pursell@nasa.gov](mailto:alice.j.pursell@nasa.gov)

AMENDMENTS TO THE RFP

It is the Offeror's responsibility to monitor the NAIS website at the following web address for any changes to the schedule or posting of amendments to this RFP:

<http://prod.nais.nasa.gov/cgi-bin/eps/bizops.cgi?gr=D&pin=73>

Offerors are encouraged to ensure that they have submitted the required documentation and their company is listed on the on-line database for the following.

Central Contractor Registration: <http://www.ccr.gov>  
EEO National Pre-Award Registry: <http://www.dol-esa.gov/preaward>  
VETS 100: <http://www.dol.gov/vets/programs/fcp/main.htm>

MAJOR DIFFERENCES (Draft RFP vs. RFP)

1. Several items were added to the RFP to address Organizational Conflicts of Interest issues. These items include Clause H.29, Limitation of Future Contracting, Clause H.30, Limitation of Future Contracting, Mitigation of Organizational Conflicts of Interest, Clause H.31, Disclosure of Organizational Conflict of Interest After Contract Award, and the requirement for an OCI Plan to be submitted in accordance with Data Requirement Deliverable (M20) entitled "Organizational Conflict of Interest Mitigation Plan" at time of proposal submittal.
2. The overall projected flight hours were increased for the Base, Option 1, and Option 2 periods in Section C, Description/Specification/Statement of Work of the RFP. Tables 6-1A&B in Section 6.1.1, Projected Flight Hours, and Table 6-2 in Section 6.1.1.2, Weekly Flight Schedule, were adjusted to address the increase.
3. The number of key personnel/functions required to be submitted at the time of proposal submission was reduced as reflected in Sub-heading F, Submission, of DRD-M17, Key Personnel.

/Original Signed by/

Alice Jean Pursell  
Contracting Officer

Enclosures:

1) RFP NNJ11061911R

<b>SOLICITATION, OFFER AND AWARD</b>		1. THIS CONTRACT IS A RATED ORDER UNDER DPAS (15 CFR 700)	RATING DO-C9	PAGE OF PAGES 1   3,210	
2. CONTRACT NUMBER		3. SOLICITATION NUMBER NNJ11061911R	4. TYPE OF SOLICITATION <input type="checkbox"/> SEALED BID (IFB) <input checked="" type="checkbox"/> NEGOTIATED (RFP)	5. DATE ISSUED 10/28/2011	6. REQUISITION/PURCHASE NUMBER

Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

**B.2.1.2** The estimated cost, fixed price phase in only, and maximum award fee of this contract at Langley Research Center are as follows:

Phase-in (Fixed Price):	<u>\$(OFI)</u>	<u>\$0.00</u>
Estimated Cost	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

**B.2.1.3** The costing of LOE task orders for this contract shall be in accordance with the negotiated and fully burdened composite labor rates as shown in Table B-1. The rates shall be a fully burdened composites of the Team(s)’ rates by skill exclusive of fee. These rates shall tie to the Contract Rates Section of the Summary Cost Template (SCT) Table for LOE. Note that the bottom of Table B-1 allows for indirect rates to be applied, if applicable, to non-labor resources (for example, an application of material handling rate on materials.)

(End of clause)

**B.3 FUNDING (Applies to Cost)**

Funds for the cost portion of the contract shall be provided for JSC in B.4 below. For LaRC, Task Orders with funding shall be issued by the Administrative Contracting Officer for that Center. Funds shall be allotted by the Task Order and subsequent modifications, if required. The “Limitation of Funds” clause applies individually to each Center.

**B.4 1852.232-81 CONTRACT FUNDING. (JUN 1990) (Applies to Cost)**

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is \$(Government Fill In). This allotment is for the Aircraft Maintenance and Operational Support Contract covers the following estimated period of performance: [Government Fill In].

(b) An additional amount of \$(Government Fill In) is obligated under this contract for payment of fee.

## Preface

During the period of performance of the Aircraft Maintenance and Operational Support (AMOS) contract, National Aeronautics and Space Administration (NASA) aircraft operations will be in a period of transition with the retirement of the Space Shuttle Program and the beginning of new NASA missions. Although there are few certainties during this transition period, this contract will support a core astronaut competency which includes aircraft spaceflight readiness training. Additionally, this contract will continue to support NASA airborne science research. Although it is anticipated that some areas of the contract will see a reduction in effort, such as the retirement of some aircraft, NASA anticipates that other areas of the contract may see an increase in effort such as airborne science research.

Given this changing climate, it is imperative that the Contractor maintain a dynamic and creative workforce in order to adapt quickly to the evolving NASA mission.

This page intentionally left blank.

# 1.0 Introduction

## 1.1 Overview

This Statement of Work (SOW) describes the work to be performed and the deliverables to be provided by the Contractor under the Aircraft Maintenance and Operational Support (AMOS) contract. The Contractor shall manage its workforce to ensure that quality products and safe services are provided to NASA and NASA customers for the life of the contract.

## 1.2 Requirements Definition

The following definitions differentiate between requirements and other statements contained in this statement of work:

<b>Shall</b>	This is the only verb used for binding requirements.
<b>Should/May</b>	These verbs are used for stating non-mandatory goals.
<b>Will</b>	This verb is used for stating facts or declaration of purpose.

## 1.3 Contract Structure

The AMOS contract is a hybrid contract comprised of two contract types, a fixed-price (FP) award fee portion and a cost-reimbursable (Cost) award fee portion. The Contractor shall:

- 1) Execute the contract in accordance with the requirement categories and definitions identified in Table 1-1 below. Requirement categories are listed under each applicable paragraph heading in the statement of work beginning in SOW Subsection 4.0.
- 2) Ensure that work performed under the fixed-price portion of the contract is not charged to the cost-reimbursable portion of the contract.

**Table 1-1: Requirement Categories**

Category	Definition
<b>FP</b>	<ul style="list-style-type: none"> <li>• The Contractor shall perform all labor under the fixed-price (FP) portion of the contract.</li> <li>• All <i>non-labor resources</i><sup>1</sup> shall be cost-reimbursable.</li> </ul>
<b>FP/Cost</b>	<ul style="list-style-type: none"> <li>• For all support equipment, aviators life support equipment, and T-38 aircraft:               <ul style="list-style-type: none"> <li>- The Contractor shall perform all organizational, intermediate, and depot level labor <u>supported by approved technical data</u><sup>2, 3</sup> under the fixed-price portion of the contract.<sup>4</sup></li> <li>- The Contractor shall perform all labor <u>not supported by approved technical data</u><sup>2</sup> under the cost-reimbursable portion of the contract</li> </ul> </li> <li>• For all other aircraft:               <ul style="list-style-type: none"> <li>- The Contractor shall perform all labor under the cost-reimbursable portion of the contract.</li> </ul> </li> <li>• All non-labor resources shall be cost-reimbursable.</li> </ul>
<b>Cost</b>	<ul style="list-style-type: none"> <li>• The Contractor shall perform all labor under the cost-reimbursable portion of the contract.</li> <li>• All non-labor resources shall be cost-reimbursable.</li> </ul>
<b>General</b>	<ul style="list-style-type: none"> <li>• General contract requirement or background information not suited for a specific category assignment</li> </ul>

<sup>1</sup> See SOW Appendix B for a definition of the term “non-labor resources.”

<sup>2</sup> See SOW Subsection 1.4 for definitions of the terms “supported” and “not supported” by approved technical data.

<sup>3</sup> See SOW Subsection 1.4 for a definition of the term “approved technical data.”

<sup>4</sup> See SOW Appendix B for definitions of the terms “organizational,” “intermediate,” and “depot” level maintenance.

## 1.4 Work Supported or Not Supported by Approved Technical Data

### 1.4.1 Definitions

For the purposes of this statement of work, the Contractor shall use the following definitions:

- 1) *Approved Technical Data* is defined as Government or original equipment manufacturer (OEM) approved and released items listed in Appendix C, engineering work orders (EWOs), fleet modification instructions (FMIs), engineering drawings, test procedure – flight research project (TP-FRP) instructions, Federal Aviation Authority (FAA)-approved OEM standards, aircraft change directives (ACDs) (e.g. airworthiness directives, service bulletins, etc) and any other subscriptions, data, and specifications necessary in order to service, repair, and keep aircraft and their related systems in an airworthy and serviceable condition.
- 2) *Supported by approved technical data* is defined as any maintenance activity where approved technical data exists.<sup>5</sup>
- 3) *Not supported by approved technical data* is any maintenance activity where:
  - a. Approved technical data does not exist per Appendix C;
  - b. Technical data prohibits repair in-house; or
  - c. The technical data instructs the Contractor to seek additional subject matter expert guidance (e.g. <sup>6</sup> AOD Form 14, *Engineering Work Order*) before the maintenance action can be completed.<sup>7</sup>
- 4) *Touch Labor* is defined as hands-on labor related directly to maintaining, manufacturing, upgrading, processing, or testing.

---

<sup>5</sup> For example, labor to replace the T-38 44% spar attachment fitting per Technical Order (T.O.) IT-38A-3, Paragraph 2.116 would be performed under the fixed-price portion of the contract.

<sup>6</sup> The abbreviation “e.g.” as used in this statement of work means “for example.”

<sup>7</sup> For example, an aircraft structural crack has exceeded T.O. limits for the repair and engineering must be contacted for disposition.

## 1.4.2 Process<sup>8</sup>

For all Johnson Space Center requirements that are:

- 1) T-38 aircraft touch labor (e.g. SOW Subsection 7.4.1);
- 2) Support equipment touch labor (e.g. SOW Subsections 7.4.3 and 7.6.3); or
- 3) Aviator's life support systems touch labor (e.g. SOW Subsection 7.4.2).

That is:

- 1) Believed by the Contractor to be “not supported” by approved technical data; and
- 2) Is a requirement categorized as “FP” or “FP/Cost” per SOW Subsection 1.3.

The Contractor shall:

- 1) Follow the process outlined in SOW Subsection 10.2.2 to determine that the work is “not supported” by approved technical data;
- 2) Complete an applicable AOD form (e.g. AOD Form 14, *Engineering Work Order*) to include technical requirements and labor hour estimates, and receive NASA signature approval prior to performing any touch labor under the cost-reimbursable portion of the contract;<sup>9</sup>
- 3) Archive the applicable AOD form in the NASA Aircraft Management Information System (NAMIS) per SOW Subsection 7.2.1; and
- 4) Perform only that portion of the touch labor approved to be “not supported” by approved technical data under the cost-reimbursable portion of the contract. Perform all other touch labor under the fixed-price portion of the contract.<sup>10</sup>

## 1.4.3 Engineering Projects

The Contractor shall work all NASA approved engineering projects that have been designated as Not Mission Capable Engineering Project (NMCEP)<sup>11</sup> per AOD WI 34100, Table 1, Aircraft Status Code under the cost-reimbursable portion of the contract.

---

<sup>8</sup> This process does not apply to Langley Research Center.

<sup>9</sup> AOD forms will be prepared by either the Contractor or NASA per NASA directive. In either case, the Contractor shall be required to review the AOD form content and provide labor hour estimates and project code to complete the work. The project code and Contractor reporting system shall support cost and labor hour data broken out by aircraft tail number, project task, technical directive number and work center.

<sup>10</sup> For example, during a T-38 maintenance inspection, a structural crack is detected on step 10 of a 20 step process. The crack's dimensions are found to exceed the approved technical data repair limits. Consequently, an AOD Form 14, *Engineering Work Order (EWO)* is generated to provide instructions to repair the crack. The touch labor to complete the steps noted as “cost” on the engineering work order will be accomplished under the cost-reimbursable portion of the contract, while the steps noted as “fixed-price” will be accomplished under the fixed-price portion of the contract. The touch labor for the remaining inspection steps, 11 through 20, will be accomplished under the fixed-price portion of the contract.

<sup>11</sup> Use of NMCEP shall not apply to maintenance/repair dispositions provided by Engineering utilizing the AOD Form 14, *Engineering Work Order*.

# 1.5 Background

## 1.5.1 Johnson Space Center

Located in Houston, Texas, Ellington Field, shown in Figure 1-1, was built in 1917 to train pilots for combat in the First World War. Since then, the airfield has functioned in a variety of operational roles; as an active duty base, an Air Force Reserve base, and an Air National Guard base. Since 1962, Ellington Field has been the home for all NASA Johnson Space Center (JSC) astronaut flight training. In 1984, the city of Houston purchased Ellington Field and the airfield remains active today serving NASA, military, commercial, and general aviation needs.

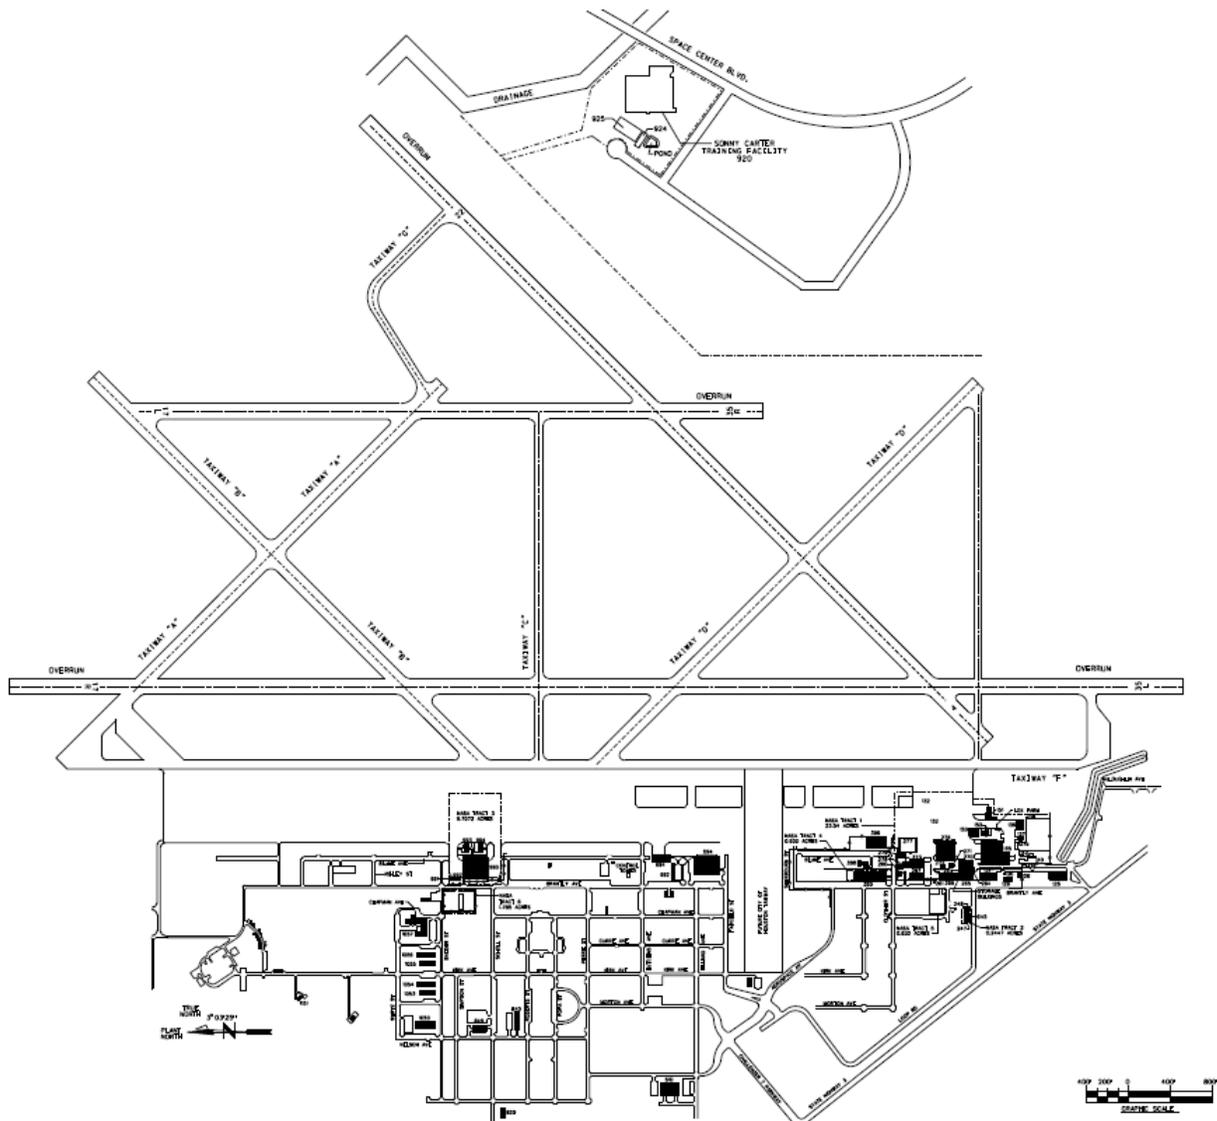

Figure 1-1: Ellington Field

### 1.5.1.1 JSC Managed Facilities

The facilities and shops listed in Table 1-2 through Table 1-4 are managed by the Johnson Space Center (JSC):

**Table 1-2: Ellington Field (EFD) Facilities**

Shop or Facility	Location and Building	Remarks
Administration Office	EFD, Building 273	NASA Maintenance, IT, Contractor Administration
Aircraft Test Article Facility	EED, Building 142	
Battery Shop	EFD, Building 135	
Corrosion/Paint Shop	EFD, Building 136	
Egress Shop	EFD, Building 271	Maintain T-38/WB-57 pyrotechnics for egress systems
Electric Shop	EFD, Building 135	
Electronics Lab	EFD, Building 135	
Engine Shop	EFD, Building 135	
Engineering	EFD, Building 135	
Flight Line/Ramp	EFD, EDW, ELP	
Fuel Cell Maintenance	EFD, Building 150	
Ground Support Equipment Shop	EFD, Building 278	
Hangar 135	EFD, Building 135	G-III, Maintenance, QC/QA, Engineering
Hangar/Docks 276	EFD, Building 276	T-38 Maintenance
Hangar 990	EFD, Building 990	DC-9, WB-57F Maintenance, and WB-57 Program Office
Hydraulic Shop	EFD, Building 276	
Jet Engine Test Facility	EFD, Building 140	
Mechanical Accessories Shop	EFD, Building 272	
NASA Division Office, Flight Operations and Safety Office	EFD, Building 276	
Nondestructive Inspection (NDI) Testing Lab	EFD, Building 150	
Personal Equipment Shop	EFD, Building 276	Maintain aircrew pyrotechnics
Pressure Suit Shop	EFD, Building 990	
Production Control	EFD, Building 276	
Quality Offices	EFD, Building 267	NASA Government Quality Assurance (QA), Contractor Quality Control (QC)
Sound Suppression Facility	EFD, Building 151	
Sheet Metal Shop	EFD, Building 135	

Shop or Facility	Location and Building	Remarks
Supply Building 333	JSC Site, Building 333—Partial Use/Shared with other NASA Contractors	
Supply Building 338	JSC Site, Building 338—Partial Use/Shared with other NASA Contractors	
Supply Building 993	EFD, Building 993 (Reduced Gravity Facility)	
Supply Building 994	EFD, Building 994 (WB-57 Special Projects)	
Supply- Class B And C Explosives	EFD, Building E270	Storage for pyrotechnics
T-38 Simulator	JSC Site, Building 5	
Tire and Wheel Shop	EFD, Building 137	
Tire and Wheel Storage	EFD, Building 137B	
Warehouse, Building 265	EFD, Building 265	Storage for pyrotechnics
Warehouse, Building 266	EFD, Building 266	
Warehouse, Building 270	EFD, Building 270	
Warehouse, Building 380	EFD, Building 380	
Welding Shop	EFD, Building 279	
Aircraft Wash Rack	EFD, Building 280	

**Table 1-3: El Paso (ELP) Facilities<sup>12</sup>**

Shop or Facility	Location and Building	Remarks
Hangar 8101	ELP, Building 8101	T-38, G-III, and 377 Super Guppy Maintenance
Hangar 8102	ELP, Building 8102	T-38 Maintenance (depot)

**Table 1-4: Edwards Air Force Base (EDW) Facilities**

Shop or Facility	Location and Building	Remarks
Building 4859	EDW/DFRC	Administration
Shuttle Handling Area “Area-A”	EDW/DFRC	Shuttle Support (747 aircraft)

<sup>12</sup> See SOW Subsection 7.8.1 regarding El Paso depot requirements.

### 1.5.1.2 JSC Assigned Aircraft

Aircraft currently assigned to JSC are shown in Table 1-5.<sup>13</sup>

**Table 1-5: JSC Aircraft and Engine Assignments**

Qty	Type Aircraft	Mission	Type Engine	Location
21 - 16 <sup>14, 15, 16</sup>	Northrop T-38N	Program Support Aircraft, Space Flight Readiness Training	General Electric J-85-5	JSC, Houston, Texas (Ellington Field)
3 <sup>17</sup>	General Dynamics WB-57F	Program Support Aircraft, Life Science	Pratt and Whitney TF-33-P11	JSC, Houston, Texas (Ellington Field)
1	B377 SGT Super Guppy	Program Support Aircraft, Life Sciences	Allison 501-D22C	El Paso, Texas
2 <sup>18</sup>	Boeing 747	Program Support Aircraft, Shuttle Carrier Aircraft (SCA)	Pratt and Whitney JT9D-7J	DFRC, Edwards Air Force Base (EDW), California
1	Boeing DC-9	Program Support Aircraft	Pratt and Whitney JT-8D-9	JSC, Houston, Texas (Ellington Field)
1	Gulfstream G-III	Program Support, Mission Management Aircraft	Rolls Royce Spey MK511-8	JSC, Houston, Texas (Ellington Field)

<sup>13</sup> JSC may add or remove aircraft during the contract period of performance. The added or removed aircraft may be the same aircraft types shown in Table 1-5 or different aircraft types. If T-38 aircraft are decreased, refer to Section F, Subsection F.8.3 for contract options. If aircraft other than T-38's are added, these aircraft will be included in the cost-reimbursable portion of the contract until an evaluation can be made by both NASA and the Contractor to determine if the aircraft type is appropriate for the fixed-price portion of the contract. See SOW Subsection 1.3 for a description of the contract structure.

<sup>14</sup> NASA anticipates that at contract start there will be twenty-one (21) T-38 aircraft. NASA estimates that one (1) T-38 aircraft may be retired for preservation per year down to a minimum of sixteen (16) aircraft.

<sup>15</sup> NASA anticipates the T-38 utilization rate will be no more than thirty (30) flight hours per aircraft per month.

<sup>16</sup> One (1) T-38 aircraft will initially be reserved by NASA as a dedicated project aircraft. The Contractor shall not rely on this aircraft for normal flight operations scheduling.

<sup>17</sup> NASA anticipates that a 3<sup>rd</sup> WB-57 will become fully operational during the 4th quarter of calendar year 2012. Prior to this date, NASA expects that the Contractor shall be required to support some activities (e.g. maintenance, logistics and quality control) to assist in the 3<sup>rd</sup> aircraft's refurbishment.

<sup>18</sup> NASA anticipates that the Boeing 747s will be retired or reassigned following the end of the Space Shuttle program and the relocation of the Shuttle Orbiters to their final exhibition locations.

### **1.5.1.2.1 Northrop T-38N**

The T-38A “Talon” is a two-place, twin turbojet, swept-wing, supersonic aircraft originally designed for the United States Air Force as a high performance trainer. NASA currently uses a modified version of the Air Force T-38A aircraft designated the T-38N shown in Figure 1-2. The T-38N is used for astronaut space flight readiness training, and is fully aerobatic.

NASA currently operates twenty-one T-38N aircraft based at Ellington Field in Houston, Texas.

**Figure 1-2: Northrop T-38N**

**1.5.1.2.2 General Dynamics WB-57**

The WB-57, shown in Figure 1-3, is a mid-wing, long range aircraft capable of operation for extended periods of time from sea level to altitudes well in excess of 60,000 feet. The WB-57 can fly for approximately 6.5 hours and has a range of approximately 2,600 miles. The WB-57 can carry up to 8,800 pounds (lbs) of payload. Two crewmembers are positioned at separate tandem locations with the pilot sitting in the front and sensor equipment operator sitting in the rear.

**Figure 1-3: General Dynamics WB-57**

### ***1.5.1.2.3 Airbus Industries Super Guppy Transport***

The Super Guppy Transport (SGT) aircraft, shown in Figure 1-4, was acquired by NASA from the European Space Agency and was manufactured by Airbus Industries in 1983. The SGT is the latest version in a long line of Guppy cargo aircraft used by NASA, and is designed to transport oversized cargo.

The SGT, also designated 377SGT-F, has a cargo compartment that is 25 feet tall, 25 feet wide and 111 feet long. The aircraft has a unique hinged nose that can open more than 100 degrees, allowing large pieces of cargo to be loaded and unloaded from the front. The maximum takeoff weight is 170,000 lbs, and maximum range is 1,730 NM.

**Figure 1-4: Airbus Industries Super Guppy**

#### **1.5.1.2.4 Boeing 747 – Shuttle Carrier Aircraft**

NASA operates two Shuttle Carrier Aircraft (SCAs). These aircraft, one shown in Figure 1-5, are extensively modified Boeing 747 airliners. NASA maintains one 747-100 model and one short range 747-100SR.

The SCAs are used to ferry space shuttles from landing sites back to the launch complex at the Kennedy Space Center. The orbiters are placed on top of the SCAs by large gantry-like structures that hoist the orbiters off the ground for post-flight servicing, and then mate them with the SCAs for ferry flights.

Flying with the additional drag and weight of the Orbiter imposes significant fuel and altitude penalties. The range is reduced to 1,000 nautical miles, compared to a commercial non-stop range of 5500 nautical miles, requiring an SCA to stop several times to refuel on a transcontinental flight. The SCA has an altitude ceiling of 15,000 feet and a maximum cruise speed of Mach 0.6 with the orbiter attached.

**Figure 1-5: Boeing 747 Shuttle Carrier Aircraft**

#### **1.5.1.2.5 McDonnell Douglas DC-9**

The DC-9, shown in Figure 1-6, was acquired by NASA from the U.S. Navy in 2003. It is the military version of the McDonnell Douglas DC-9 used for many years by the commercial airlines. The U.S. Navy utilized the DC-9 aircraft in support of passenger transportation, medical evacuation and special missions.

The primary mission of the NASA DC-9 is to provide support for the movement of the shuttle from landing sites in California and New Mexico back to Kennedy Space Center, Trans-Atlantic Landing support and the Emergency Mission Control Move mission. Future use of the aircraft will include movement of cargo both domestically and internationally in support of US space operations.

The NASA DC-9 has a maximum gross take-off weight of 110,000 lb and will be fitted with auxiliary fuel tanks installed in the lower cargo hold to augment the aircraft's range to nearly 2,600 nautical miles for overseas missions.

**Figure 1-6: McDonnell Douglas DC-9**

#### **1.5.1.2.6 Gulfstream III – Mission Management Aircraft**

JSC operates one program support/mission management aircraft (MMA), shown in Figure 1-7, in support of US space operations. The Gulfstream III was built by Gulfstream Aerospace Corp. In its commercial versions, the G-III's basic role is that of an executive business aircraft that can carry up to 15 passengers. The C-20B version currently flown by the Air Force serves in a similar capacity for high-level Government and military officials.

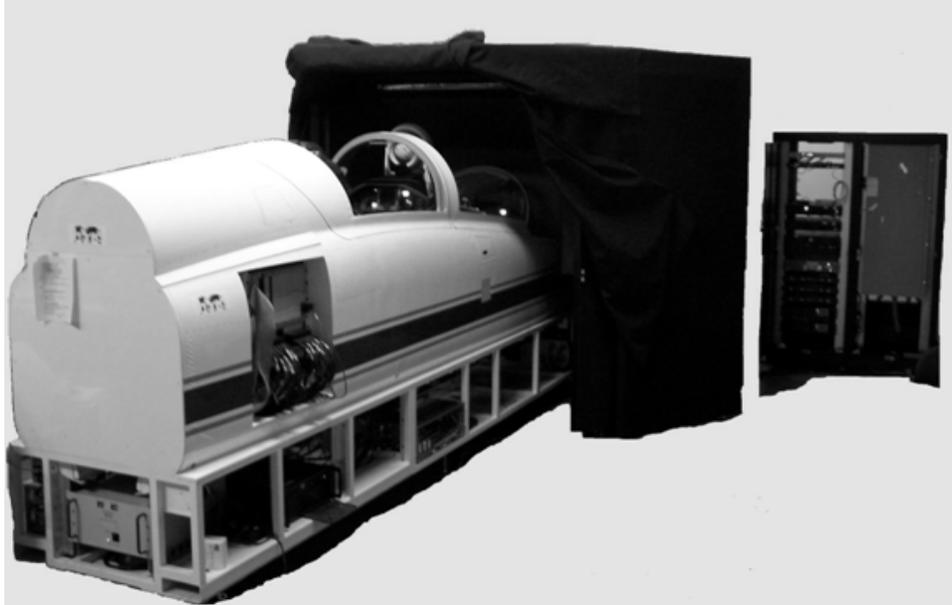

The G-III's maximum takeoff weight with full fuel and passengers/cargo is 69,700 lbs. Empty, the unmodified airplane weighs about 38,000 lbs. The aircraft has a wingspan of just over 77 feet, is about 83 feet long and just over 24 feet tall. Normal cruise for the aircraft is 459 knots, and its top speed is 501 knots (Mach 0.85). Its maximum operating altitude is 45,000 feet. The Gulfstream-III has a range with a full load of passengers or equipment of about 3,400 nautical miles.

**Figure 1-7: Gulfstream GIII**

**1.5.1.2.7 T-38N Simulator**

The T-38N simulator, shown in Figure 1-8 and Figure 1-9, is ground based (no motion) and is located on-site at Johnson Space Center in Building 5. The simulator is configured with a cockpit taken from a NASA T-38 aircraft and modified to meet simulator training requirements.

**Figure 1-8: T-38N Simulator**

**Figure 1-9: T-38N Simulator, Cockpit View**

### 1.5.2.1 LaRC Managed Facilities

The facilities and shops listed in Table 1-6 are managed by the Langley Research Center (LaRC).

**Table 1-6: LaRC Facilities**

Shop/Facility	Location/Building	Remarks
Administration Office	LaRC Building 1244	NASA Maintenance, Contract Administration
Battery Shop	LaRC Building 1244	
Electric Shop	LaRC Building 1244	
Fabrication Shop	LaRC Building 1244	
Flight Line/Ramp	LaRC	
Ground Support Equipment Shop	LaRC Building 1244	
Personnel Equipment Shop	LaRC Building 1244	
Quality Assurance Office	LaRC Building 1244	
Supply	LaRC Building 1244	

### 1.5.2.2 LaRC Assigned Aircraft

Aircraft currently assigned to LaRC are shown in Table 1-7.<sup>19</sup>

**Table 1-7: LaRC Aircraft and Engine Assignments**

Qty	Type Aircraft	Mission	Type Engine	Location
1	Beechcraft King Air B200	Program Support Aircraft	Pratt & Whitney PT6A-42	LaRC
1	Beechcraft UC-12B Huron	Research Aircraft	Pratt & Whitney PT6A-42	LaRC
1	Cessna 206	Research and Development Aircraft	Lycoming IO-540-AC1A	LaRC
1	Cirrus SR-22	Research and Development Aircraft	Continental IO-550	LaRC
1	Bell UH-1H (in flyable storage)	Program Support Aircraft	Lycoming T-53-L-13B	LaRC
1	Lancair Columbia LC-40 (in flyable storage)	Program Support Aircraft	Continental IO-550	LaRC
1	North American Rockwell OV-10A (in flyable storage)	Research and Development Aircraft	Garrett-AiResearch T-76	LaRC
2	North American Rockwell OV-10G (in flyable storage)	Research and Development Aircraft	Garrett-AiResearch T-76	LaRC

<sup>19</sup> LaRC may add or remove aircraft during the contract period of performance. The added or removed aircraft may be the same aircraft types shown in Table 1-7 or different aircraft types.

**1.5.2.2.1 Beechcraft B200 King Air and UC-12B Huron**

The NASA-Langley B200 King Air (NASA 529) and UC-12B Huron, shown in Figure 1-11, are turbine, twin-engine research aircraft. Pressurized for flight above 30,000 ft, their fuel endurance can take them halfway across the United States. The aircraft are fully IFR capable. These aircraft are excellent platform aircraft for low-medium altitude programs.

**Figure 1-11: Beechcraft B200 King Air and UC-12B Huron**

### **1.5.2.2.2 Cessna 206H Stationair**

The Cessna 206H Stationair, shown in Figure 1-12, is an all-metal, six place, high-wing, single-engine airplane equipped with tricycle landing gear and is designed for general utility purposes. The Model 206H is certified to the requirements of U.S. FAA Federal Aviation Regulation Part 23, including day, night, VFR and IFR. The aircraft has been reconfigured to accommodate a crew of three: a subject pilot, a safety pilot, and a researcher. The subject pilot may sit in either of the two front seats as required by the experiment. The researcher sits in the right aft seat at a researcher workstation.

**Figure 1-12: Cessna 206H Stationair**

### 1.5.2.2.3 Cirrus SR22

The Cirrus SR22, shown in Figure 1-13, is a composite construction, single-engine, four-place production general aviation (GA) aircraft manufactured by Cirrus Design of Duluth, Minnesota. The SR22 is one of several new-generation GA aircraft making use of the latest in materials, aerodynamics, avionics, and manufacturing technology. The SR22 aircraft received Federal Aviation Administration (FAA) certification in 2000, with over 600 aircraft having been delivered since that time. One of the innovative design features of the SR22 aircraft is the Cirrus Airframe Parachute System (CAPS). The CAPS is an emergency parachute system that can be deployed by the pilot or a passenger to safely slow and lower the entire airplane to ground if controlled flight is no longer possible.

**Figure 1-13: Cirrus SR22**

#### **1.5.2.2.4 Huey UH-1H**

The Huey UH-1H helicopter (N535NA), shown in Figure 1-14, is an established, turbine-driven, rotary-wing flight platform. The aircraft is primarily a research and aerial photography asset, although it also serves well in airborne surveillance and installation security. The cockpit contains dual flight controls and a minimal avionics suite consisting of VOR and DME. A mount also exists for a handheld Global Positioning System (GPS). No established research pallet position exists in the spacious rear cargo compartment, which is currently configured to carry 11 passengers. Though the cargo compartment is ideal for platform installation, most research applications were historically mounted beneath the aircraft. This configuration is possible due to the aircraft's high-skid configuration, allowing an extra 1.7 ft of clearance between the ground and the aircraft underbelly.

**Figure 1-14: Huey UH-1H**

#### **1.5.2.2.5 Lancair Columbia LC-40**

The Lancair Columbia LC-40 (N507NA), shown in Figure 1-15, is an established, reciprocating, single-engine, fixed-wing flight platform. The aircraft is primarily a research asset. The cockpit contains dual flight controls and an adequate avionics suite consisting of VOR/Instrument Landing System (ILS) and a GPS. The rear compartment contains one equipment operator seat and a research equipment position that extends back into the small cargo compartment.

**Figure 1-15: Lancair Columbia LC-40**

#### **1.5.2.2.6 North American Rockwell OV-10A/G**

The North American Rockwell OV-10A/G aircraft (N524NA), shown in Figure 1-16, is a former USAF aircraft designed for stable operation and high maneuverability. It is a twin turboprop aircraft, which can be configured with externally-mounted stores or research pods.

Additionally, it has a large internal bay available for equipment installation. The aircraft is configured with tandem seating for a pilot and observer/researcher. The front cockpit contains full flight, engine, and radio operational controls. The rear cockpit contains basic flight controls and limited engine and landing-gear controls. Both cockpits are equipped with ejection seats.

**Figure 1-16: North American Rockwell OV-10A/G**

## 2.0 Scope

### 2.1 Overview

The scope of the AMOS contract is to provide:

- 1) Aircraft maintenance and operational support.
- 2) Space flight readiness training.
- 3) Airborne research and development.
- 4) Astronaut Office support.

### 2.2 Support Locations

#### 2.2.1 Johnson Space Center (JSC) Managed Locations

The Contractor shall provide aircraft maintenance and operational support at the following JSC managed locations:<sup>20</sup>

- 1) Johnson Space Center, at Ellington Field (EFD), Houston, Texas
- 2) Forward Operating Locations (FOL):
  - a. JSC FOL at El Paso (ELP), Texas  
See SOW Subsection 7.8.1.
  - b. JSC FOL at Edwards Air Force Base (EDW), California<sup>21</sup>  
See SOW Subsection 7.8.2.
- 3) Other locations as required within the contiguous United States (CONUS) and outside the contiguous United States (OCONUS).<sup>22</sup>

---

<sup>20</sup> NASA may add or remove other NASA centers or FOLs during the contract period of performance to meet NASA mission demands. Any NASA Center or FOL added following contract award will be included in the cost-reimbursable portion of the contract until an evaluation can be made by both NASA and the Contractor to determine if the addition is suitable for the fixed-price portion of the contract.

<sup>21</sup> NASA anticipates that the requirement for the Edwards Air Force Base forward operating location will only be necessary until completion of Boeing 747 Shuttle Carrier operations.

<sup>22</sup> The Contractor may be required to provide support at other Government or contractor facilities based on NASA mission requirements.

## 2.2.2 Langley Research Center (LaRC) Managed Locations

The Contractor shall provide aircraft maintenance and operational support at the following LaRC managed locations:

- 1) Langley Research Center, Hampton, Virginia<sup>23</sup>
- 2) Other locations as required within the contiguous United States (CONUS) and outside the contiguous United States (OCOUS).<sup>24</sup>

## 2.3 NASA Center Unique Differences

The format of this statement of work (SOW) reflects JSC as the primary customer. Any unique requirements for work at other NASA centers (e.g. NASA Langley Research Center) are included at the end of each SOW section and titled “Center Unique.” When included, these Center unique requirements shall take precedence over JSC’s requirements at that Center. If Center unique requirements are not included, then the JSC requirements shall apply to the other NASA Center(s). If the center unique requirement is marked as “not applicable” then there is no unique nor JSC requirement that applies.

## 2.4 NASA Contact References

Any reference in this statement of work to the following NASA contacts shall also apply to that person’s duly appointed designee:

- 1) NASA Contracting Officer Technical Representative (COTR)
- 2) NASA Engineering Branch Chief
- 3) NASA Maintenance Manager

---

<sup>23</sup> See SOW Subsection 2.3 regarding SOW content and NASA Langley Center unique differences.

<sup>24</sup> The Contractor may be required to provide support at other Government or contractor facilities based on NASA mission requirements.

## 3.0 References and Applicable Documents

### 3.1 Order of Precedence

In the event of a conflict between a NASA document cited in this statement of work and a non-NASA document cited herein, the NASA document shall take precedence.

### 3.2 Acronyms

See Appendix A.

### 3.3 Definitions

See Appendix B.

### 3.4 Applicable Documents

See Appendix C.<sup>25</sup>

---

<sup>25</sup> *All applicable documents cited in this SOW Appendix C shall be the latest active revision at time of issuance of Request for Proposal. For applicable documents referenced in this statement of work with no revision, refer to SOW Appendix C for the applicable document revision.*

## 3.5 Changes to Applicable Documents

The Contractor shall:

- 1) Perform work in accordance with the applicable documents referenced in this statement of work.
- 2) Ensure any reference to an applicable document includes all of its supplements, amendments, and revisions.
- 3) Ensure that work is performed in accordance with the most recent version of an applicable document. Supplements, amendments, or revisions may be issued during the life of the contract.
- 4) Immediately implement those changes to applicable documents that result in no change to the contract.
- 5) Submit a proposal to the CO and obtain approval from the CO prior to implementing any supplement, amendment, or revision to an applicable document that will result in a change to the fixed-price portion of the contract.
- 6) Prepare the proposal under the fixed-price portion of the contract.
- 7) Submit the proposals within thirty (30) calendar days from the date the Contractor receives notification of the supplement, amendment, or revision giving rise to an increase in price of performance.

The CO may direct the Contractor to immediately implement the change even if there is a price impact. However, the Contractor will still be entitled to submit a proposal for equitable adjustment associated with the change.

# 4.0 Contract Management

## 4.1 General Requirements

### 4.1.1 Overview

*Category: General*

The Contractor shall retain full responsibility for the performance of the requirements set forth in this contract. The Contractor shall:

- 1) Perform in accordance with:
  - a. NPR 7900.3, *Aircraft Operations Management*
  - b. NPD 7900.4, *NASA Aircraft Operations Management*
- 2) Ensure all work is performed in accordance with approved technical data. See SOW Subsection 1.4.

### 4.1.2 Normal Hours of Operation

*Category: General*

The Contractor shall establish work hours consistent with meeting the mission at each contract location. The Contractor shall also provide personnel for varied work schedules to meet changing mission requirements.

#### 4.1.2.1 JSC Ellington Field

Typical work hours for JSC Ellington Field are:

2:30 PM to 11:45 PM (local time)	Sunday
6:30 AM to 11:45 PM (local time)	Monday – Thursday
6:30 AM to 3:15 PM (local time)	Friday

#### 4.1.2.2 El Paso FOL

Typical work hours for the El Paso FOL are:

6:15 AM to 5:00 PM (local time)	Monday – Thursday
---------------------------------	-------------------

#### 4.1.2.3 Edwards FOL

Typical work hours for the Edwards FOL are:

7:00 AM to 4:00 PM (local time)	Monday – Friday
---------------------------------	-----------------

### 4.1.3 Facilities

Category: General

The Contractor shall use the NASA facilities listed in Table 1-2, Table 1-3, and Table 1-4.<sup>26, 27</sup>

### 4.1.4 Deliverables – Management

Category: FP

The Contractor shall provide the management deliverables listed in Table 4-1.

**Table 4-1: Data Requirement Description - Management<sup>28</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-M01	Management Plan
DRD-M02	Commercial Procurement Status Report
DRD-M03	Contractor Work Breakdown Structure (WBS) and Dictionary
DRD-M04	Monthly Progress Reports
DRD-M05	NF533 Cost Reporting
DRD-M06	Notification of Potential Labor Dispute and Contingency Strike Plan
DRD-M07	Roster of Contract Personnel
DRD-M08	Small Business Subcontracting Plan and Reports
DRD-M09	Wage/Salary and Fringe Benefit Data
DRD-M10	Reprocurement Data Package
DRD-M11	Training and Certification Plan
DRD-M12	Environmental and Energy Consuming Product Compliance Reports
DRD-M13	Contract Phase-In Plan
DRD-M14	Information Technology (IT) Capital Planning and Investment Control (CPIC)
DRD-M15	Total Compensation Plan
DRD-M16	Supplemental Project Cost Reporting
DRD-M17	Key Personnel
DRD-M18	Workload Data Plan and Workload Data Reports
DRD-M19	Information Technology (IT) Security Plan, Risk Assessment
DRD-M20	Organizational Conflict of Interest Mitigation Plan

<sup>26</sup> See Section J, Attachment J-3-1 for a list of installation accountable Government property.

<sup>27</sup> The Contractor shall ensure an explosive facility license (AF 2047) is posted in all facilities storing or handling explosives in accordance with AFMAN 91-201, Explosive Safety Standards. The licensing shall be coordinated with the NASA designated representatives.

<sup>28</sup> Refer to Section J, Attachment J-1 for DRD requirements.

### 4.1.5 Performance Standards

*Category: General*

The Contractor performance standards are outlined in Appendix E1, *Fixed-Price Performance Standards* and Appendix E2, *JSC Cost Performance Standards*.

### 4.1.6 Process Control, Corrective Actions, and Continual Improvement

*Category: FP*

The Contractor shall implement process control, corrective actions, and continual improvement in accordance with the following:

- 1) JPR 1281.9 *JSC Procedural Requirement, Process Control*
- 2) JPR 1281.14 *JSC Procedural Requirement, Corrective and Preventive Actions, and Continual Improvement*
- 3) AS-9110 *Aerospace Standard, Quality Maintenance Systems – Aerospace – Requirements for Maintenance Organization, Section 8.5*

### 4.1.7 Contractor Information Program

*Category: FP*

The Contractor shall establish, maintain, and utilize a program to disseminate information to all personnel concerning issues of health, environmental, safety practices, and aircraft safety of flight items. Example items include:

- 1) Documentation of all items disseminated to Contractor personnel.
- 2) Records showing all personnel are aware of the documentation.

### 4.1.8 Customer Focus

*Category: General*

Contractor personnel will be required to interact with NASA personnel and other NASA customers including Government agencies and commercial entities. The Contractor shall ensure all personnel act in accordance with NW-2008-01-001-JSC, *JSC Expected Behaviors*.

## 4.2 Executive Manager

### 4.2.1 Overview

*Category: FP*

The Contractor shall provide a full-time Executive Manager located at Ellington Field to oversee all work performed in this statement of work. The Contractor shall provide an alternate Executive Manager if the primary is unavailable for duty. The Executive Manager or alternate shall:

- 1) Serve as the single-point-of-contact for all AMOS contract activities.
- 2) Have full authority to act for the Contractor on all matters relating to this contract.
- 3) Respond to NASA CO and COTR requests within the specified period established at time of request.

### 4.2.2 Availability

*Category: FP*

The Contractor's Executive Manager or alternate shall be available during normal JSC hours of operation (see SOW Subsection 4.1.2) within one (1) hour to meet at Ellington Field with NASA personnel. After normal JSC hours of operation, the Executive Manager or alternate shall be available within two (2) hours after being contacted by NASA to meet at Ellington Field.

## 4.3 Management Team

*Category: FP*

The Contractor shall provide a management team to ensure all work is performed in accordance with this SOW.

## 4.4 Administrative Support

*Category: FP*

The Contractor shall provide the necessary administrative support services to perform the requirements in SOW Subsections 1.0 through 4.0 and 6.0 through 11.0.

## 4.5 Management and Planning Reports

*Category: FP*

The Contractor shall provide general management, planning, budgeting, Data Requirements Descriptions (DRDs), and other reports specified in the fixed-price portion of the statement of work.

## 4.6 Meetings

### 4.6.1 Required Meetings

*Category: FP*

The Contractor shall support the following required meetings. The Contractor shall come to all meetings prepared to discuss activities or present data related to the contract, airfield activities, missions, or other programs. For those meetings marked “Contractor presented,” the Contractor shall prepare the agenda (with input from NASA), invite attendees, present the meeting, prepare meeting minutes, and track all action items generated during the meeting.

#### Management

- 1) Division status meetings (weekly).
- 2) Contract evaluation meetings (periodic).
- 3) Configuration Control Panel meetings (periodic – Contractor presented).<sup>29</sup>
- 4) All-hands meetings (periodic).

#### Maintenance

- 1) Daily aircraft status meetings in accordance with AOD 34100, *Maintenance Manual* (daily – Contractor presented).
- 2) Aircraft in-phase/major aircraft inspection briefing in accordance with AOD 34100, *Maintenance Manual* (weekly – Contractor presented).
- 3) Pre-dock and post-dock meetings in accordance with AOD 34100, *Maintenance Manual* (periodic – Contractor presented).

#### Safety

- 1) Aviation safety meetings (periodic).

### 4.6.2 Other Meetings

#### 4.6.2.1 Fixed-Price Contract Elements

*Category: FP*

The Contractor shall support meetings dealing primarily with fixed-price contract elements under the fixed-price portion of the contract. The Contractor shall come to all meetings prepared to discuss activities or present data related to the contract, airfield activities, missions, or other programs.

---

<sup>29</sup> NASA will also present at this meeting as required. The Contractor shall work with NASA to coordinate the meeting agenda.

### **4.6.2.2 Cost-Reimbursable Contract Elements<sup>30</sup>**

*Category: Cost*

The Contractor shall support meetings dealing primarily with cost-reimbursable contract elements under the cost-reimbursable portion of the contract. The Contractor shall come to all meetings prepared to discuss activities or present data related to the contract, airfield activities, missions, or other programs.

## **4.7 Financial Management**

*Category: FP*

The Contractor shall provide financial management services (e.g. accounting and budgeting) in support of the contract.

## **4.8 Human Resources**

### **4.8.1 Workforce**

#### **4.8.1.1 Human Resource Services**

##### **4.8.1.1.1 General Requirements**

*Category: FP*

The Contractor shall provide human resources services to ensure a qualified Contractor workforce is provided to support this SOW.<sup>31</sup> The Contractor shall:

- 1) Provide fully trained, qualified, and certified (if required) Contractor personnel in sufficient numbers to manage, supervise, and perform work under this contract. The Contractor's workforce shall meet the personnel requirements listed in Appendix D.
- 2) Ensure no mission impacts due to position vacancies or personnel qualifications. The Contractor shall preclude staffing that may introduce single point failures.

##### **4.8.1.1.2 Security Clearances**

The Contractor shall:

- 1) Provide personnel with security clearances up to TOP SECRET/SENSITIVE COMPARTMENTED INFORMATION (SCI) based on specific program requirements. NASA will sponsor SCI clearances.

---

<sup>30</sup> The "cost" category for meeting support shall not apply to Contractor personnel listed in SOW Subsections 4.2 and 4.3.

<sup>31</sup> NASA may restrict the access of any employee, or prospective employee, identified as a potential threat to the health, safety, security, or operational mission of the installation and its personnel.

- 2) When identified by the government, all personnel assigned to support payload development, integration, operations, deployments, and other aircraft activities shall have a SECRET or higher security clearance based on mission requirements.

#### **4.8.1.2 Surge Requirements**

*Category: FP/Cost*

The Contractor shall support surge demands in staffing or workloads dictated by missions, operations, or maintenance demands. Examples include:

- 1) Adding multiple shifts
- 2) Adjusting shifts
- 3) Part time/temporary personnel

#### **4.8.1.3 Personal Attire and Appearance**

*Category: General*

The Contractor shall ensure that the workforce meets the following personal attire and appearance requirements:

- 1) Contractor personnel shall not wear jewelry or other forms of attire that, if lost, could constitute a Foreign Object Debris (FOD) or safety hazard, in and around aircraft or aircraft related equipment.
- 2) Contractor personnel shall wear NASA identification badges except when in the vicinity of aircraft or around mechanical equipment where they could be considered a safety or FOD hazard.
- 3) Technicians and first line maintenance supervisors shall be easily identified as a Contractor employee. They shall wear uniforms that incorporate a corporate name or logo and clearly depict the employee's first and last name.
- 4) Office personnel shall wear the appropriate attire conducive to the services being provided to NASA.

#### **4.8.2 Physicals**

*Category: FP*

The Contractor shall ensure personnel obtain Government provided physical examinations and physiological training in accordance with JPR 1700.1, *JSC Safety and Health Handbook*, NPR 7900.3, *Aircraft Operations Management*, and other applicable regulations governing the work task.

## 4.8.3 Training

### 4.8.3.1 Training – Safety and Health

*Category: FP*

The Contractor shall provide safety and health training to meet the requirements in NASA JPR 1700.1 and DRD requirements listed in Table 4-1 for all employees based on job assignment within ninety (90) calendar days of employment and anytime an employee is reassigned to new tasks that require additional safety training.

### 4.8.3.2 Training – Critical Task

*Category: FP*

The Contractor shall provide the following training identified by NASA as critical task training. Personnel trained to accomplish critical tasks shall be recertified on an annual basis or as stipulated in applicable DoD, NASA, and OEM documents.<sup>32</sup>

- 1) T-38 and WB-57 ejection seats and seat kits (certified via Contractor certification plan based on approved technical data).
- 2) T-38 and WB-57 canopy rigging (Contractor certified based on approved technical data).
- 3) Engine run certifications by type, model, series engine, both low power and high power (Contractor certified based on approved technical data with certified personnel approved by NASA).
- 4) Engine test cell operator (Contractor certified based on approved technical data).
- 5) Auxiliary Power Unit (APU) engine run (Contractor certified based on approved technical data).
- 6) Brake rider (Contractor certified based on approved technical data).
- 7) Weight and balance quality assurance inspector(s), to include use of the automated weight and balance system (AWBS) (certified via formal Government approved classroom training).
- 8) Explosive handling/storage/shipment. Training shall include a review of responsibilities as defined in NASA JPD 4500.1, *Pyrotechnics – Logistics Management* (trained and certified in accordance with NASA-STD-8719.12, *Safety Standard for Explosives, Propellants, and Pyrotechnics*).
- 9) Engine flexible borescope inspection (Contractor certified based on approved technical data)
- 10) Non-destructive inspection procedures (shall maintain a minimum of two (2) level 3 qualified NDI technicians (certified and qualified in accordance with NAS 410, *NAS Certification and Qualification of Non-Destructive Test Personnel*).
- 11) Parachute repack (certified in accordance with DoD or FAA requirements)
- 12) Emergency response team training for each type aircraft listed in this SOW (Contractor certified based on approved technical data).

---

<sup>32</sup> *In the event of a conflict between recertification training frequencies cited in this statement of work and those stipulated in other documents, the more frequent recertification training requirement shall apply.*

### **4.8.3.3 Training – Specialty**

#### **4.8.3.3.1 Motor Vehicle Training**

*Category: FP*

The Contractor shall provide personnel to attend training for those who operate motor vehicles operated on the flight-line, hangars, and other JSC property. Examples include:

- 1) Ensure personnel requiring driving access to the flight line ramp, vehicle service road or taxi-lane Juliet at EFD obtain a City of Houston Airport Red Badge. Red badges will be obtained after successfully completing the Houston Airport System Vehicle Access and Operating Requirements Training. Once trained by the City of Houston Airport Authority, this training will be repeated on a twelve (12) month recurring basis. The Government or the City of Houston Airport Authority can limit the number of personnel requiring access to these areas.
- 2) Ensure Contractor personnel operating a vehicle on JSC Property are trained and familiar with the rules and regulations contained in JPR 1600.3, *JSC Traffic Regulations*. The Government reserves the right to suspend an employee from operating vehicles on Government property due to recklessness or failure to comply with referenced JPR rules and regulations.

#### **4.8.3.3.2 Tire and Wheel Maintenance Safety Training**

*Category: FP*

The Contractor shall provide tire and wheel maintenance safety training to all Contractor personnel maintaining tires and wheels for both aircraft and support equipment. Training includes on-equipment, removal, replacement and servicing procedures for flight-line personnel, as well as build-up and tear down procedures for back-shop (intermediate maintenance) personnel. Examples include:

- 1) Familiarization with the processes and procedures contained in approved technical data for tire and wheel maintenance as it applies to each type/model/series aircraft and support equipment (as applicable) assigned to AOD.
- 2) Operation of nitrogen and high pressure air servicing equipment.
- 3) Use and handling of aircraft and support equipment tire remote inflation equipment.
- 4) Packaging, shipping, and receiving of tire and wheel assemblies.
- 5) Calibration cycles and requirements for tire and wheel servicing equipment.
- 6) Multi-piece rim wheel training in accordance with Code of Federal Regulations (CFR) 29 CFR 1910.177.

**4.8.3.3.3 Egress Familiarization Training**

*Category: FP*

The Contractor shall:

- 1) Develop an ejection seat equipped aircraft training syllabus for egress system familiarization.
- 2) Provide Contractor and Government personnel who access aircraft cockpits with egress system initial and refresher familiarization training.
  - a. Initial training must be received prior to accessing cockpits.<sup>33</sup>
  - b. Maintain a master list of personnel obtaining the Egress/Cockpit Familiarization initial and refresher training.
  - c. Schedule Contractor and Government personnel for refresher training every twenty-four (24) months. Individuals overdue on egress familiarization training shall not access aircraft cockpits until they complete the familiarization training.<sup>34</sup>

**4.8.3.3.4 Aircraft Ground Handling and Servicing Training**

*Category: FP*

The Contractor shall provide aircraft ground handling and servicing training for Contractor personnel in accordance with approved technical data for the aircraft listed in Table 1-5. Examples include:

- 1) Towing
- 2) Parking
- 3) Mooring
- 4) Jacking
- 5) Hoisting
- 6) Engine ground operations
- 7) Servicing/de-servicing fuel, oil, hydraulics, oxygen, tire pressure
- 8) Lubrication

**4.8.3.3.5 Support Equipment Training**

*Category: FP*

The Contractor shall provide support equipment training to ensure qualified Contractor operators. Training shall include documentation requirements supporting the need for and use of Air Force Technical Order (AFTO) Form 244, *Industrial/Support Equipment Record*.

---

<sup>33</sup> Anticipate three government personnel will require initial egress familiarization training annually.

<sup>34</sup> Anticipate 30-40 government personnel will require the 24-month recurring egress refresher training.

#### **4.8.3.3.6 Water Survival Training**

##### *4.8.3.3.6.1 All Aircraft*

*Category: FP*

The Contractor shall provide water survival refresher training, The Contractor shall:

- 1) Train NASA and Contractor aircrew personnel (includes astronauts, staff pilots, and mission crew members).
- 2) Provide a training class every three (3) months for approximately five (5) aircrew members per class.
- 3) Obtain NASA approval for pool selection.
- 4) Review, update, and maintain the following supporting documents that shall be used by the Contractor to provide and support water survival training:
  - a. AOD Form 257, *T-38 Water Survival Training Checklist*
  - b. AOD WI 33953, *Water Survival Training Curriculum*

##### *4.8.3.3.6.2 Pressure Suit*

*Category: Cost*

The Contractor shall:

- 1) Provide WB-57 pressure suit water survival refresher training to NASA and Contractor aircrew personnel (includes astronauts, staff pilots, and mission crew members) as required.
- 2) Review, update, and maintain the following supporting documents that shall be used by the Contractor to provide and support water survival training:
  - a. AOD Form 258, *WB-57 Water Survival Training Checklist*
  - b. AOD WI 33955, *WB-57 Water Survival Training Curriculum*

#### **4.8.3.3.7 Mishap Investigation Training**

*Category: FP*

The Contractor shall ensure all Contractor personnel assigned to investigate a mishap or high-visibility close call, at a minimum, have completed the “Introduction to Mishap Investigation” course available through System for Administration, Training and Educational Resources for NASA (SATERN) as required by JWI 1040.27, *JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan* within the last year.

**4.8.3.3.8 Engineering Data Management System Training**

*Category: FP*

The Contractor shall provide training for all civil service and contract employees that require access to the Government provided engineering data management (EDM) system described in SOW Subsection 4.12.4.<sup>35</sup>

**4.8.3.3.9 Hangar Door Operation**

*Category: FP*

The Contractor shall provide hangar door operation training to Contractor personnel in accordance with the following manufacturer's instructions:

- 1) Hangar E276 and Hangar E135  
Industrial Door Contractors Inc., *Operations and Maintenance Manual*
- 2) Hangar E990  
Hampshire Construction & Associates, *E-990 Operation & Maintenance Basic Manual*

**4.8.3.3.10 Government Industry Data Exchange Program Training**

*Category: FP*

The Contractor shall provide personnel trained in Government Industry Data Exchange Program (GIDEP) and the Federal Aviation Administration (FAA) suspected unapproved parts (SUP) program and shall coordinate all such actions with the NASA AOD GIDEP and FAA SUP representative assigned to the Aircraft Quality Assurance Branch.

**4.8.3.3.11 Welders**

*Category: FP*

The Contractor shall ensure all welders are trained and qualified in accordance with AWS D17.1, *Specification for Fusion Welding for Aerospace Applications*.

**4.8.3.4 Training – Additional**

*Category: Cost*

The Contractor shall develop training materials and provide additional training classes per NASA CO or COTR request.

---

<sup>35</sup> Anticipate three to five contractor or government employees per year for initial EDM system training. If a new EDM system is implemented at AOD, anticipate 60 contractor and/or government employees will require initial familiarization training on the new system.

### 4.8.3.5 Training – Government Provided

Category: Cost

NASA will provide job specific training classes. The Contractor shall provide personnel to attend these classes. The Contractor shall provide NASA with a list of proposed attendees to attend the classes below. The Government will approve the attendees prior to training.<sup>36</sup> Government provided training will include:

- 1) NASA Aircraft Management Information System (NAMIS) user's and database administrator training<sup>37</sup>
- 2) Computer security training in accordance with the Office of Management and Budget Circular A-130, Appendix III, *Security of Federal Automated Information Resources* within three (3) months of employment and annually thereafter
- 3) Electrostatic discharge training in accordance with NASA JPR 8730.1, *Electrostatic Discharge Control Requirements for the Protection of Electronic Components and Assemblies*.
- 4) Soldered electrical connections training in accordance with NASA-STD-8739.3, *Soldered Electrical Connections*
- 5) Crimping and wire harness training in accordance with NASA-STD-8739.4, *Crimping, Interconnecting, Cables, Harnesses, and Wiring*
- 6) WB-57 pressure suit technician training
- 7) Taxi authorization for G-III
- 8) Aircrew emergency egress
- 9) Aircrew training specific to NASA aircraft or unique on-board systems for:
  - a. Pilots
  - b. Flight Engineers
  - c. Load Masters
  - d. Sensor Equipment Operators
- 10) Other classes as required

### 4.8.4 Conferences

Category: FP/Cost

The Contractor shall:

- 1) Attend conferences per Government request, or;
- 2) Receive concurrence from the COTR and approval from the NASA CO prior to attending any Contractor requested conferences.

---

<sup>36</sup> Class size or job requirements may restrict or limit the number of approved attendees.

<sup>37</sup> NASA will provide initial NAMIS training for the Contractor. The Contractor shall provide NAMIS training for all Contractor personnel no later than six (6) months after contract start.

## 4.9 Travel

### 4.9.1 General Travel

*Category: Cost*

The Contractor shall provide travel arrangement services for Contractor and civil servant personnel.

The Contractor shall:

- 1) Travel predominantly using commercial air unless requested by NASA to travel using Government air or other conventional modes.
- 2) Travel during normal duty hours to prevent excessive overtime unless approved otherwise by NASA.
- 3) Provide services in accordance with Joint Travel Regulations or Federal Travel Regulations as applicable.
- 4) FedTraveler.com E-Gov Travel Service (ETS) is the current system used to plan, book, track, approve, and request reimbursement for travel services for the Federal employee.

### 4.9.2 Deployment Travel<sup>38</sup>

*Category: Cost<sup>39</sup>*

The Contractor shall provide personnel at deployed aircraft locations both within the contiguous United States (CONUS) and outside the contiguous United States (OCONUS). The Contractor shall:

- 1) Coordinate with and receive approval from the NASA Program requesting deployment support (WB-57, Guppy, etc) to determine which technical disciplines and staffing levels will be required to support each deployment.
- 2) Ensure all support personnel have security clearances, if required, by NASA based on mission.
- 3) Ensure personnel meet all health, passport, Visa, air carrier, and security requirements when travelling.
- 4) Identify deployment personnel at least sixty (60) days in advance of OCONUS deployments in order to support Visa application and Synchronized Pre-deployment and Operational Tracker (SPOT) enrollment. NASA may require more than sixty (60) days notice for deployment to some locations.
- 5) Provide medical insurance including medical evacuation insurance for OCONUS deployed personnel.

---

<sup>38</sup> See SOW Appendix B for definition of “deployment.”

<sup>39</sup> The “Cost” category assignment for deployed personnel shall override any other category assignment in this SOW while employees are off-station at the deployed location.

### 4.9.3 SPOT, Passports, and Visas<sup>40</sup>

*Category: Cost*

The Contractor shall ensure that all personnel supporting OCONUS deployments possess passports, obtain Visas, and participate in the SPOT letter of authorization (LOA) system under NASA sponsorship when required.

## 4.10 Operational Risk Management

*Category: FP*

The Contractor shall develop, integrate, and sustain an operational risk management (ORM) program throughout the workplace. The Contractor shall use a reporting format compatible with the JSC risk scorecard listed in of JPR 8000.4, *JSC Risk Management Plan, Appendix C* to report risks. Additional guidance to aid the Contractor in development of the operational risk management program can be found in:

- 1) Air Force Policy Directive 90-9, *Operational Risk Management*
- 2) AFI-90-901, *Operational Risk Management*
- 3) JPR 8000.4, *JSC Risk Management Plan*

## 4.11 Configuration Control

### 4.11.1 Configuration Management

*Category: FP/Cost*

The Contractor shall provide and support configuration management of all aircraft and support equipment. The Contractor shall:

- 1) Maintain the configuration of all NASA aircraft and support equipment in accordance with all approved drawings, specifications, and other data.
- 2) Maintain configuration for type certificated aircraft.<sup>41</sup>

---

<sup>40</sup> Historically there have been 30-50 personnel requiring passports and visas each year. This number should be used as a representation of the past requirements but may not be representative of future requirements.

<sup>41</sup> This would include any supplemental type certificates and field-approved alterations incorporated into the aircraft by NASA approved authorities.

## 4.11.2 Configuration Tracking

Category: FP

The Contractor shall use the configuration module in NAMIS to track open and completed configuration items issued against all aircraft, engines, support equipment, and other ancillary equipment. All configuration items completed on these NASA assets shall be documented on NASA Form 1671A, *Aircraft Maintenance Packet*.

## 4.11.3 Configuration Control Panel (CCP)

Category: FP/Cost

The Contractor shall:

- 1) Support NASA configuration control in accordance with AOD 33839, *Aircraft Configuration Control*.
- 2) Post Configuration Control Panel (CCP) meeting minutes and approved Configuration Control Panel Directives (CCPDs) to a NASA approved database for retrieval by AOD personnel.

## 4.12 Document and Data Management

### 4.12.1 NASA Aircraft Management Information System (NAMIS)

Category: General

The Contractor shall:

- 1) Use the Government provided NASA Aircraft Management Information System (NAMIS)<sup>42</sup> for aircraft operations, maintenance, and logistics support.
- 2) Use all NAMIS application modules in accordance with NPR 7900.3, *Aircraft Operations Management Manual* unless waived in writing by the NASA COTR.
- 3) Enter a clear precise narrative description of the discrepancy and corrective action. Examples include:
  - a. Troubleshooting findings
  - b. Test equipment used
  - c. Serial number of critical calibrated equipment (e.g. torque wrenches)
  - d. Original discrepancy was or was not duplicated
  - e. Ultimate repair actions

---

<sup>42</sup> NAMIS is an integrated automated database used to capture aircraft operations, maintenance, and logistics information in support of NASA Centers that operate aircraft. NAMIS will track all scheduled inspections (inspections based on calendar, hourly, cycles, or events) and user discrepancies (unscheduled maintenance) “real-time” that are reported against aircraft, aircraft components, equipment, and special tooling.

- 4) List the technical reference that was utilized for the repair/inspections to correct the reported anomaly. The Contractor shall include the technical order/directive, engineering work order or maintenance manual number, paragraph, figure, and page number as applicable.
- 5) Enter actual elapsed maintenance times in the regular or dispatch hour block in NAMIS for each maintenance action as applicable.
- 6) Suggest recommendations for NAMIS process/software improvements.

## 4.12.2 NAMIS Application Administrator

*Category: FP*

The Contractor shall provide a NAMIS application administrator and alternate with expertise on the day-to-day use of the NAMIS system by the end of contract phase-in period.<sup>43</sup> Example application administrator tasks include:

- 1) Manage Contractor personnel access permissions and assigned roles
- 2) Create templates for assigned assets
- 3) Establish inspection baseline information including NASA approved deviations

## 4.12.3 Records Management

*Category: FP*

The Contractor shall provide records management services. The Contractor shall:

- 1) Control documents and data in accordance with JPR 1281.5, *Document and Data Control* and AOD WI 34100, *Maintenance Manual*.
- 2) Manage and retain records in accordance with JPR 1440.3, *JSC Records Management Procedural Requirements*.
- 3) Maintain records for type-certificated aircraft in accordance with 14 CFR Section 91.417, *Maintenance Records*.
- 4) Create and maintain a master file of all archived documents not maintained in NAMIS. The master file shall include a list of document titles, revisions, record locations, and archival dates. If records are relocated after initial archiving, the master file shall be updated to reflect the new record location.
- 5) Provide copies of archived records not maintained in NAMIS within four (4) hours of NASA, internal auditors, or regulatory authority's request.

---

<sup>43</sup> See SOW Subsection 4.8.3.5 for government provided training for the NAMIS Database Administrator.

## 4.12.4 Engineering Data Management

### 4.12.4.1 Engineering Electronic Data Management

#### 4.12.4.1.1 General Requirements

*Category: Cost*

The Contractor shall:

- 1) Maintain all existing and newly generated computer aided design (CAD) drawings and engineering electronic data under configuration control using the Government provided engineering data management system.
- 2) Provide a document release notice distributed via email for all released engineering documents. The document release notice shall contain the document number, title, revision, effectivity, release date, and other applicable information as determined by the Contractor. The distribution list shall be approved by the Engineering Branch Chief.

#### 4.12.4.1.2 Engineering Data Management System Administration

*Category: Cost*

The Contractor shall provide administration services for the Government provided engineering electronic data management system by the end of contract phase-in period. The Contractor shall:

- 1) Provide a primary database administrator with expertise on the day-to-day use of the existing BlueCielo Meridian Enterprise<sup>44</sup> system (e.g. drawing number assignment, check-in and check-out procedures, database permissions, and drawing release). The database administrator shall serve as the single point-of-contact for all engineering electronic database management day-to-day usage issues.
- 2) Provide an alternate database administrator if the primary is unavailable for duty (e.g. vacation, illness, etc.).
- 3) Provide support for a NASA engineering electronic database system database administrator.

---

<sup>44</sup> NASA may replace the existing BlueCielo Meridian Enterprise system with a new Government provided engineering database management system during the contract period of performance. If this change does occur, NASA will provide training for the Contractor database administrator on the new system.

#### **4.12.4.2 Engineering Project Records**

*Category: Cost*

The Contractor shall provide engineering records management services. The Contractor shall:

- 1) Maintain records for each assigned engineering project in project files stored electronically on the AOD Engineering server.
- 2) Keep the project files as a historical record for each completed project. The project files shall be organized so that AOD engineers unfamiliar with a project can locate historical data when needed. Examples include:
  - a. Task Transmittal – Engineering (TTE) records
  - b. Design requirements
  - c. Technical correspondence
  - d. Meeting minutes
  - e. Design data
  - f. Engineering calculations
  - g. Design review records
  - h. Engineering Work Orders (EWOs)
  - i. Airworthiness review records
  - j. Flight, Test, and Payload Readiness Review records
  - k. Fleet Modification Instructions (FMIs)
  - l. Material Review Board (MRB) records
  - m. Test Procedure Flight Research Project (TPFRP) records
  - n. Ground and flight test results

#### **4.12.4.3 Engineering Archival Hard Copy Data**

*Category: Cost*

The Contractor shall maintain all AOD engineering archival hard copy data under configuration control. This data is comprised of paper/vellum documents and aperture cards. The Contractor shall:

- 1) Maintain all existing archival documentation. Examples include:
  - a. Aircraft aperture cards (over 300,000 cards)
  - b. Paper and vellum drawings (over 100,000 drawings)
  - c. Drawing change notices
  - d. Engineering Work Orders
  - e. Fleet Modification Instructions
  - f. Engineering reference material
- 2) Archive new hard copy data.
- 3) Provide configuration/revision control for changes to hard copy archival data.

## 4.12.5 Data Backup

*Category: General*

The Contractor shall ensure that personnel follow data backup procedures so that no loss of data will occur due to hardware or software anomalies or destruction/damage to facilities.

## 4.13 Information Technology Systems

*Category: General*

The Contractor shall:

- 1) Adhere to NASA policies for the management of information technology (IT) resources.
- 2) Utilize the Government provided IT systems to accomplish the requirements in this SOW.<sup>45</sup>
- 3) Adhere to NASA security procedures for the unauthorized use of Government computer systems.

## 4.14 Facility Management

### 4.14.1 Facility Manager Alternates

*Category: FP*

The Contractor shall assign a facility manager alternate to each hangar, building, warehouse, or facility used or occupied by the Contractor to assist NASA facility managers. One facility manager alternate may be responsible for multiple locations. The facility manager shall:

- 1) Perform facility inspections in accordance with AOD 33877, *Monthly/Quarterly Safety and Health Inspection*.
- 2) Report discrepancies (particularly those with safety or health implications).
- 3) Act as a point of contact in the NASA facility manager's absence.
- 4) Assist the NASA facility manager in maintaining up-to-date emergency action plans for the facility assigned.
- 5) Participate in educating occupants of assigned buildings on emergency evacuation plans.

---

<sup>45</sup> NASA will provide the necessary IT equipment and applications to accomplish the requirements of the SOW such as workstations, the Microsoft Office Suite of applications, and NASA internet access. Additional Government provided IT systems include, but are not limited to, such applications as NASA Aircraft Management Information System (NAMIS) as well as numerous other DoD technical data and logistics management systems.

## 4.15 Management Services

### 4.15.1 Special Events

*Category: Cost*

The Contractor shall provide coordination, setup, and teardown support for special events as required.

Examples include:

- 1) AOD all hands meetings
- 2) AOD awards ceremonies
- 3) Airshows
- 4) Public relations events
- 5) Crew return activities
- 6) Visitor support

### 4.15.2 Passenger Vehicles

*Category: FP*

The Contractor shall provide passenger vehicles licensed to operate on public roadways to accomplish the requirements in this SOW. The Government will not provide GSA vehicles for this contract.<sup>46</sup>

---

<sup>46</sup> *The Government will provide special purpose vehicles such as fuel trucks and the pressure suit van. Refer to Section J, Attachment J-1.*

# L4.0 Contract Management – LaRC Center Unique

*Category: Cost (SOW Subsections L4.1 through L4.15.2)*

The requirements listed in SOW Subsections L4.1 through L4.15.2 shall apply to Langley Research Center.

## L4.1 General Requirements

### L4.1.1 Overview

See SOW Subsection 4.1.1.

### L4.1.2 Normal Hours of Operation

The Contractor shall establish operating hours consistent with meeting the mission at each contract location. The Contractor shall also provide personnel for varied work schedules to meet changing mission requirements.

#### *L4.1.2.1 Langley Research Center*

Typical work hours for Langley Research Center are:

7:00 AM to 3:30 PM (local time)      Monday – Friday

### L4.1.3 Facilities

The Contractor shall use the NASA facilities listed in Table 1-6.<sup>47, 48</sup>

---

<sup>47</sup> See Section J, Attachment J-3-6 for a list of installation accountable Government property.

<sup>48</sup> The Contractor shall ensure an explosive facility license (AF 2047) is posted in all facilities storing or handling explosives in accordance with AFMAN 91-201, Explosive Safety Standards. The licensing shall be coordinated with the NASA designated representatives.

### L4.1.4 Deliverables – Management

The Contractor shall provide the management deliverables listed in Table 4-1.

**Table 4-2: Data Requirement Description - Management<sup>49</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-M02	Commercial Procurement Status Report
DRD-M04	Monthly Progress Reports
DRD-M05	NF533 Cost Reporting
DRD-M07	Roster of Contract Personnel
DRD-M13	Contract Phase-In Plan

### L4.1.5 Performance Goals

The Contractor performance standards are outlined in Appendix E3, *LaRC Cost Performance Standards* ..

### L4.1.6 Process Control, Corrective Actions, and Continual Improvement

The Contractor shall implement process control, corrective actions and continual improvement in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization*, Subsection 8.5.

### L4.1.7 Contractor Information Program

SOW Subsection 4.1.7 not applicable.

### L4.1.8 Customer Focus

See SOW Subsection 4.1.8.

<sup>49</sup> Refer to Section J, Attachment J-1 for DRD requirements.

## L4.2 Executive Manager

### L4.2.1 Overview

The Contractor shall provide a part-time Executive Manager located at LaRC to oversee all work performed in this statement of work. The Contractor shall provide an alternate Executive Manager if the primary is unavailable for duty. The Executive Manager or alternate shall:

- 1) Serve as the single-point-of-contact for all AMOS contract activities.
- 2) Have full authority to act for the Contractor on all matters relating to this contract.
- 3) Respond to NASA CO and COTR requests within the specified period established at time of request.

### L4.2.2 Availability

The Contractor's Executive Manager or alternate shall be reachable during typical LaRC hours of operation (see SOW Subsection L4.1.2), and available within one (1) hour to meet with NASA personnel. After normal LaRC hours of operation, the Executive Manager or alternate shall be available within two (2) hours after being contacted by NASA.

## L4.3 Management Team

SOW Subsection 4.3 not applicable.

## L4.4 Administrative Support

SOW Subsection 4.4 not applicable.

## L4.5 Management and Planning Reports

SOW Subsection 4.5 not applicable.

## L4.6 Meetings

### L4.6.1 Required Meetings

The Contractor shall come to all meetings prepared to discuss activities or present data related to the contract, airfield activities, missions, or other programs.

#### Maintenance

- 1) Daily aircraft status meetings in accordance with LaRC policy.
- 2) Aircraft in-phase/major aircraft inspection briefing in accordance with LaRC policy.
- 3) Pre-dock and post-dock meetings in accordance with LaRC policy

#### Safety

- 1) Aviation safety meetings (periodic).

### L4.6.2 Other Meetings

SOW Subsection 4.6.2 not applicable.

## L4.7 Financial Management

SOW Subsection 4.7 not applicable.

## L4.8 Human Resources

### L4.8.1 Workforce

#### *L4.8.1.1 Human Resource Services*

##### *L4.8.1.1.1 General Requirements*

SOW Subsection 4.8.1.1.1 not applicable.

##### *L4.8.1.1.2 Security Clearances*

SOW Subsection 4.8.1.1.2 not applicable.

##### *L4.8.1.2 Surge Requirements*

See SOW Subsection 4.8.1.2.

### **L4.8.1.3 Personal Attire and Appearance**

The Contractor shall ensure that the personal attire and appearance of the workforce is conducive to a safe and professional work environment.

### **L4.8.2 Physicals**

The Contractor shall ensure personnel designated as both qualified and non-qualified flight crew obtain Government provided physical examinations in accordance with NPR 7900.3, *Aircraft Operations Management*, and other applicable regulations governing the work task.

### **L4.8.3 Training**

#### **L4.8.3.1 Training – Safety and Health**

The Contractor shall provide safety and health training to meet LaRC requirements for all Contractor employees based on job assignment within ninety (90) calendar days of employment and anytime an employee is reassigned to new tasks that require additional safety training.

#### **L4.8.3.2 Training – Critical Task**

The Contractor shall provide the following training identified by NASA as critical task training. Personnel trained to accomplish critical tasks shall be recertified on an annual basis or as stipulated in various DoD, NASA, and OEM documents.<sup>50</sup>

- 1) OV-10 ejection seats and seat kits (certified via Contractor certification plan based on approved technical data).
- 2) Engine run certifications by type, model, series engine, both low power and high power (Contractor certified based on approved technical data with certified personnel approved by NASA).
- 3) Explosive handling/storage/shipment in accordance with NASA-STD-8719.12, *Safety Standard for Explosives, Propellants, and Pyrotechnics*).
- 4) Emergency response team training for each type aircraft listed in this SOW (Contractor certified based on approved technical data).

#### **L4.8.3.3 Training – Specialty**

SOW Subsection 4.8.3.3 not applicable.

#### **L4.8.3.4 Training – Additional**

SOW Subsection 4.8.3.4 not applicable.

---

<sup>50</sup> *In the event of a conflict between recertification training frequencies cited in this statement of work and those stipulated in other documents, the more frequent training requirement shall apply.*

### **L4.8.3.5 Training – Government Provided**

NASA will provide job specific training classes. The Contractor shall provide NASA with a list of proposed attendees to attend the classes below. The Government will approve the attendees prior to training.<sup>51</sup> Government provided training will include:

- 1) NASA Aircraft Management Information System (NAMIS) user's and database administrator training<sup>52</sup>
- 2) Computer security training in accordance with the Office of Management and Budget Circular A-130, Appendix III, *Security of Federal Automated Information Resources* within three (3) months of employment and annually thereafter
- 3) Electrostatic discharge training
- 4) Soldered electrical connections training in accordance with NASA-STD-8739.3, *Soldered Electrical Connections*
- 5) Crimping and wire harness training in accordance with NASA-STD-8739.4, *Crimping, Interconnecting, Cables, Harnesses, and Wiring*
- 6) Aircrew training specific to NASA aircraft or unique on-board systems for:
  - a. Pilots
- 7) Other classes as required

### **L4.8.4 Conferences**

SOW Subsection 4.8.4 not applicable.

## **L4.9 Travel**

### **L4.9.1 General Travel**

See SOW Subsection 4.9.1.

### **L4.9.2 Deployment Travel**

See SOW Subsection 4.9.2.

### **L4.9.3 SPOT, Passports, and Visas**

See SOW Subsection 4.9.3.

## **L4.10 Operational Risk Management**

The Contractor shall institute a risk management process in accordance with LaRC guidelines and policies.

---

<sup>51</sup> Class size or job requirements may restrict or limit the number of approved attendees.

<sup>52</sup> NASA will provide initial NAMIS training for the Contractor. The Contractor shall provide NAMIS training for all Contractor personnel no later than six (6) months after contract start.

## L4.11 Configuration Control

### L4.11.1 Configuration Management

SOW Subsection 4.11.1 not applicable.

### L4.11.2 Configuration Tracking

See SOW Subsection 4.11.2.

### L4.11.3 Configuration Control Panel (CCP)

The Contractor shall support NASA configuration control in accordance with LaRC guidelines and policies.

## L4.12 Document and Data Management

### L4.12.1 NASA Aircraft Management Information System (NAMIS)

The Contractor shall:

- 1) Use the Government provided NASA Aircraft Management Information System (NAMIS)<sup>53</sup> for aircraft operations, maintenance, and logistics support.
- 2) Use all NAMIS application modules in accordance with NPR 7900.3, *Aircraft Operations Management Manual* unless waived in writing by the NASA COTR.
- 3) Enter a clear precise narrative description of the discrepancy and corrective action. Examples include:
  - a. Troubleshooting findings
  - b. Test equipment used
  - c. Serial number of critical calibrated equipment (e.g. torque wrenches)
  - d. Original discrepancy was or was not duplicated
  - e. Ultimate repair actions
- 4) List the technical reference that was utilized for the repair/inspections to correct the reported anomaly. The Contractor shall include the technical order/directive, engineering work order or maintenance manual number, paragraph, figure, and page number as applicable.
- 5) Enter actual elapsed maintenance times in the regular or dispatch hour block in NAMIS for each maintenance action as applicable.
- 6) Suggest recommendations for NAMIS process/software improvements.

---

<sup>53</sup> NAMIS is an integrated automated database used to capture aircraft operations, maintenance, and logistics information in support of NASA centers that operate aircraft. NAMIS will track all scheduled inspections (inspections based on calendar, hourly, cycles, or events) and user discrepancies (unscheduled maintenance) “real-time” that are reported against aircraft, aircraft components, equipment, and special tooling.

## **L4.12.2 NAMIS Application Administrator**

SOW Subsection 4.12.2 not applicable.

## **L4.12.3 Records Management**

SOW Subsection 4.12.3 not applicable.

## **L4.12.4 Engineering Data Management**

SOW Subsection 4.12.4 not applicable.

## **L4.13 Information Technology Systems**

See SOW Subsection 4.13.

## **L4.14 Facility Management**

### **L4.14.1 Facility Manager Alternates**

SOW Subsection 4.14.1 not applicable.

## **L4.15 Management Services**

### **L4.15.1 Special Events**

SOW Subsection 4.15.1 not applicable.

### **L4.15.2 Passenger Vehicles**

SOW Subsection 4.15.2 not applicable.

## 5.0 Program and Project Support

### 5.1 General Requirements

*Category: Cost*

The Contractor shall provide program and project support to NASA. Projects may include NASA reimbursable programs, internal development projects, and new business opportunities generated as a result of shifting budgets and mission priorities. Example support services include:

- 1) Research, development, acquisition, and sustainment efforts across a broad spectrum of functional disciplines in order to effectively assist in the implementation of Government objectives.
- 2) Development of quick-reaction capabilities (QRC), streamlined acquisition and development processes, advanced concepts and technology demonstrations (ACTD), user concept of operations (CONOPS), technical assessments, and system development that will support near-term and long-term operational requirements for NASA and other Government agencies.

### 5.2 Project Management

*Category: Cost*

The Contractor shall provide project management, project control, and schedule support services for NASA projects. Project managers shall be responsible for managing and executing projects with matrix support from other contract elements in this SOW. Project management support includes tasks such as planning, organizing, technical analysis and recommendations, scheduling, and reporting. Example project management tasks include:

- 1) Task Management and Control: The Contractor shall develop and present to NASA task management plans describing the technical approach, organizational resources, and management controls to meet the cost performance and schedule requirements of NASA aircraft activities and projects.
- 2) Schedule Monitoring and Control: The Contractor shall develop and present to NASA project schedules. The Contractor shall monitor project progress, and update schedules as required.
- 3) Cost Monitoring: The Contractor shall provide cost monitoring to support of project and program activities and monitor costs for control and reporting.

#### 5.2.1 Project Risk Management Plans

*Category: Cost*

The Contractor shall develop and administer risk management plans in support of project activities.

## 5.2.2 Reports and Briefings

*Category: Cost*

The Contractor shall develop reports, briefings, briefing materials, presentation packages, informational brochures, photographs, and test/demonstration/feasibility portfolios including draft and final versions.

## 5.2.3 Funding Plans & Budget Support

*Category: Cost*

The Contractor shall provide funding plans and budget support for NASA projects. Examples include:

- 1) Conduct financial studies and research.
- 2) Compile, analyze, review, and present financial data.
- 3) Evaluate project funding plans and changes.
- 4) Perform project budgeting, analysis, and assistance in the preparation and routing of financial documents.

## 5.3 Project Support Services

### 5.3.1 General Support

*Category: Cost*

The Contractor shall:

- 1) Attend project design reviews, technical interchange meetings, user conferences, program status reviews, management and design reviews, flight readiness reviews, and other reviews per NASA request for projects and programs.
- 2) Present briefings, record and distribute minutes, and complete assigned action items or specific assignments resulting from these meetings.

### 5.3.2 Data Gathering

*Category: Cost*

The Contractor shall conduct data gathering and perform site surveys required to support the conduct of technical studies and analyses, exercises and demonstrations, contingencies, quick reaction tasks, and other requirements. The Contractor may be required to attend and monitor operations at both on and off-site locations in order to gather, compile, develop and edit raw print, video, or digital data and summarize documentation depicting the wide range of project or sponsor capabilities into hard copy or multimedia formats.

### 5.3.3 Acquisition Liaison Support

*Category: Cost*

The Contractor shall provide acquisition support services for projects. Example tasks include:

- 1) Review and prepare technical specifications and supporting documentation.
- 2) Provide liaison support between program/project management and logistics for procurements.

### 5.3.4 Technical Support

*Category: Cost*

The Contractor shall provide technical support services for projects. Example tasks include:

- 1) Support research, development, and production.
- 2) Research candidate technologies and plan for upgrades and improvements to aircraft, equipment, facilities, processes, and programs. The Contractor shall provide to NASA recommendations with written rationale on methods to better integrate new technologies.
- 3) Support aircraft and equipment maintenance issues.
- 4) Support developing systems, subsystems, equipment, and components.
- 5) Safety analysis.

### 5.3.5 Administrative Support

*Category: Cost*

The Contractor shall provide the necessary administrative support services to perform the requirements in SOW Subsection 5.0.

## 5.4 Aircraft and Payload Integration

*Category: Cost*

The Contractor shall provide integration support for payloads, sensors, aircraft upgrades, experiments, and instrumentation. Example tasks include:

- 1) Coordinate user and aircraft availability schedules.
- 2) Provide existing data on aircraft to potential users of the aircraft.
- 3) Coordinate and assist in the assembly, checkout, installation, and troubleshooting of payloads and other equipment.
- 4) Coordinate payload integration requirements and configurations with appropriate customer organizations.
- 5) Support development and review of payload data packages (PDP) for each new system integration.
- 6) Support test and evaluation (T&E) and validation and verification (V&V) activities
- 7) Develop payload integration timelines.
- 8) Providing payload operations and development guidance to the customer for unique aircraft operating conditions.
- 9) Participate in sensor operations training and dress rehearsals scenarios as it relates to the NASA aircraft projects.

## 5.5 Mission Planning and Development

*Category: Cost*

The Contractor shall provide mission planning and development support services. Example tasks include:

- 1) Identify aircraft to meet mission needs
- 2) Recommend sensor suite optimizations/upgrades to enhance mission capabilities
- 3) Develop tasking, collection, processing, exploitation, and dissemination (TCPED) requirements.
- 4) Develop mission cost estimates
- 5) Prepare memorandums of understanding/agreements (MOU/MOA)
- 6) Prepare project implementation plans (PIP)
- 7) Prepare mission related documents:
  - a. Proposals
  - b. Concept of operations (CONOPS)
  - c. Aircraft and personnel clearance automated clearance system (APACS)
  - d. Letters of authorization (LOA)
  - e. Mission partner coordination, etc.

## 5.6 Mission Coordination, Implementation, and Execution

*Category: Cost*

The Contractor shall provide mission coordination, implementation, and execution services for CONUS and OCONUS operations. Examples tasks include:

- 1) Coordinate military airlift requests
- 2) Identify, provide, and coordinate Liaison Officer activities
- 3) Provide advance teams for CONUS and OCONUS missions
- 4) Develop, provide, and execute logistics plans
- 5) Provide data collection management support
- 6) Develop mission execution timelines
- 7) Support the Communications Security custodian as necessary
- 8) Development and execution of test cards
- 9) Support specialized equipment maintenance, training, and operations for Special Mission Unit support

## 5.7 Deployment Support

*Category: Cost*

The Contractor shall support aircraft deployments both within the contiguous United States (CONUS) and outside the contiguous United States (OCONUS). The Contractor shall:

- 1) Provide personnel in appropriate disciplines to support deployed operations.
- 2) Perform similar tasks at the deployed location as if the personnel were at their home location.
- 3) Ensure that deployed personnel have all of the resources necessary to perform their work at the deployed location including essential tools, hardware, and safety related equipment.
- 4) Provide deployment support. Example tasks include:
  - a. Perform duties identified in NPR 7900.3, *Aircraft Operations Management*.
  - b. Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the Aircraft Flight Manual or NASA approved flight crew checklists.
  - c. Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
  - d. Support Operational Readiness Reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
  - e. Provide/augment NASA deployment management support.
  - f. Coordinate mission partner assistance when necessary.
  - g. Collate various customer needs into a single cohesive data collection plan.
  - h. Develop deployment cost estimates.
  - i. Develop and maintain mission schedules.
  - j. Generating mission briefings.
  - k. Support the communications security (COMSEC) custodian as necessary.
  - l. Develop/provide/execute logistics plans in support of deployed operations.
  - m. Conduct data gathering and perform site surveys required to support the conduct of deployed flight operations.

# L5.0 Program and Project Support – LaRC Center Unique

*Category: Cost (SOW Subsections L5.1 through L5.7)*

The requirements listed in SOW Subsections L5.1 through L5.7 shall apply to Langley Research Center.

## L5.1 General Requirements

The Contractor shall provide program and project support to NASA. Projects may include NASA reimbursable programs, internal development projects, and new business opportunities generated as a result of shifting budgets and mission priorities. Example support services include:

- 1) Research, development, acquisition, and sustainment efforts across a broad spectrum of functional disciplines in order to effectively assist in the implementation of Government objectives.

## L5.2 Project Management

SOW Subsection 5.2 not applicable.

### L5.2.1 Project Risk Management Plans

SOW Subsection 5.2.1 not applicable.

### L5.2.2 Reports and Briefings

SOW Subsection 5.2.2 not applicable.

### L5.2.3 Funding Plans & Budget Support

SOW Subsection 5.2.3 not applicable.

## L5.3 Project Support Services

### L5.3.1 General Support

The Contractor shall:

- 1) Attend project design reviews, technical interchange meetings, user conferences, program status reviews, management and design reviews, flight readiness reviews, and other reviews per NASA request for projects and programs.
- 2) Present briefings, record and distribute minutes, and complete assigned action items or specific assignments resulting from these meetings.

### **L5.3.2 Data Gathering**

SOW Subsection 5.3.2 not applicable.

### **L5.3.3 Acquisition Liaison Support**

SOW Subsection 5.3.3 not applicable.

### **L5.3.4 Technical Support**

The Contractor shall provide technical support services for projects. Example tasks include:

- 1) Support research and development.
- 2) Support aircraft and equipment maintenance issues.
- 3) Safety analysis.

### **L5.3.5 Administrative Support**

SOW Subsection 5.3.5 not applicable.

## **L5.4 Aircraft and Payload Integration**

The Contractor shall provide integration support for payloads, sensors, aircraft upgrades, experiments, and instrumentation. Example tasks include:

- 1) Coordinate and assist in the assembly, checkout, installation, and troubleshooting of payloads and other equipment.
- 2) Support test and evaluation (T&E) and validation and verification (V&V) activities
- 3) Develop payload integration timelines.

## **L5.5 Mission Planning and Development**

SOW Subsection 5.5 not applicable.

## **L5.6 Mission Coordination, Implementation, and Execution**

SOW Subsection 5.6 not applicable.

## L5.7 Deployment Support

The Contractor shall provide deployment support. Example tasks include:

- 1) Provide personnel in appropriate disciplines to support deployed operations.
- 2) Perform similar tasks at the deployed location as if the personnel were at their home location.
- 3) Ensure that deployed personnel have all of the resources necessary to perform their work at the deployed location including essential tools, hardware, and safety related equipment.
- 4) Provide deployment support. Example tasks include:
  - a. Those duties identified in NPR 7900.3, *Aircraft Operations Management*.
  - b. Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the Aircraft Flight Manual or NASA approved flight crew checklists.
  - c. Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.

Perform Operational Readiness Reviews on aircraft prior to deployment in accordance with LaRC LMS policies and directives.

## 6.0 Flight Operations

### 6.1 Projected Flight Schedule

#### 6.1.1 T-38N

##### 6.1.1.1 Projected Flight Hours

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall support the projected T-38N flight hours shown in Table 6-1a and Table 6-1b below. These flight hours are the estimated total T-38N hours necessary to support the aircraft quantities listed in Table 1-5.

NASA estimates that no more than fifteen percent (15%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that no more than five percent (5%) of the flight hours will occur between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-1a: T-38N Projected Flight Hours<sup>54, 55</sup>**

T-38N	Base	Option 1	Option 2
Projected Hours	6000	9400	8200

**Table 6-1b: T-38N Projected Flight Hours by Year<sup>54, 55</sup>**

T-38N	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	4500	4500	4800	4800	5000

<sup>54</sup> See Section F, Subsection F.8.3 for options to decrease the number of required aircraft per day and flight hours per year.

<sup>55</sup> One (1) T-38 aircraft will be reserved by NASA as a dedicated project aircraft. The Contractor shall not rely on this aircraft to fulfill the weekly flight schedule.

### 6.1.1.2 Weekly Flight Schedule

Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall provide the required number of T-38N aircraft per day shown in Table 6-2 at Ellington Field. The Contractor shall also provide the additional spare (sp) aircraft per day shown in Table 6-2.

**Table 6-2: T-38N Weekly Flight Schedule**

Contract Year	Required Aircraft per Day							Total per Week
	Mon	Tue	Wed	Thu	Fri	Sat <sup>56</sup>	Sun	
Base	4 +1 sp	7 +2 sp	7 +2 sp	7 +2 sp	5 +2 sp	3 +1 sp	3 +1 sp	30-36 + sp
Option 1	4 +1 sp	8 +2 sp	8 +2 sp	8 +2 sp	5 +1 sp	3 +1 sp	3 +1 sp	33-39 + sp
Option 2	5 +1 sp	8 + 2 sp	8 +2 sp	8 + 2 sp	6 + 1 sp	3 + 1 sp	3 + 1 sp	35-41 + sp

### 6.1.1.3 Flight Schedule Conditions

Category: FP

For T-38N scheduling purposes the following conditions shall apply:

- 1) The Contractor shall not release an aircraft for flight with more than four (4) delayed discrepancies, excluding configuration items.
- 2) Under normal circumstances, no more than two (2) T-38 aircraft will be launched in any thirty (30) minute period. In some special cases such as memorial flyovers or mission support, the Contractor may be required to support more than two (2) T-38 launches in a thirty (30) minute period. See Table 6-3 below for an example daily schedule.
- 3) A minimum one (1) hour turn-around time applies for consecutive flights of the same aircraft.
- 4) The number of T-38N cross-country aircraft will be *counted as part of the required aircraft per day total listed in Table 6-2<sup>57</sup>* until the aircraft returns to Ellington Field.
- 5) For air and ground aborts at locations other than the NASA Centers and Forward Operating Locations listed in SOW Subsection 2.2, the following conditions apply:
  - a. The aircraft will be *counted as part of the required aircraft per day total listed in Table 6-2 for no more than three (3) calendar days.*<sup>58, 59</sup> If Contractor troubleshooting reveals

<sup>56</sup> Saturday and Sunday flights will vary based on weekly schedule requirements.

<sup>57</sup> For example, “counted as part of the required aircraft per day total listed in Table 6-2” means the following: In the base contract period, five (5) aircraft are required on Monday at Ellington Field. If two (2) aircraft leave Monday to fly cross-country and return on Thursday, the Contractor will only be required to have six (6) aircraft (8 minus 2) available on Tuesday and Wednesday (plus spares).

<sup>58</sup> For example, “counted as part of the required aircraft per day total listed in Table 6-2 for no more than three (3) calendar days” means the following: In the base contract period, five (5) aircraft are required on Monday. If one (1) aircraft breaks while on cross-country on Monday the Contractor will only be required to have seven (7) aircraft (8 minus 1) available on Tuesday through Thursday (plus spares). After Thursday, the Contractor will not be allowed to subtract the aircraft from the required per day total.

the repair will exceed three (3) calendar days, the Contractor may request a waiver from the NASA Maintenance Manager for an extension. If approved, the aircraft will be counted as part of the aircraft per day total listed in Table 6-2 for the approved extension period.

- b. The Contractor shall notify the NASA Maintenance Manager when the aircraft is returned to flight status, i.e. repairs are completed, the combined preflight and post-flight (CBPO) inspection is completed, and the aircraft is ready for pilot pickup.<sup>60</sup>

**Table 6-3: Example Daily Schedule<sup>61</sup>**

Take-Off Time	Landing Time	Flight Type	Tail Number <sup>62</sup>
0800	1000	Mission Specialist + Instructor Pilot 1	1
0800	1000	Local	2
0830	1030	Local	3
0830	1400	Out and back	4
0900	1500	Out and back	5
0900	N/A	Cross country	6
0930	N/A	Cross country	7
0930	N/A	Cross country	8
<b>Lunch</b>			
1130	1330	Mission Specialist + Instructor Pilot 2	1
1130	1530	Out and back	2
1200	1600	Out and back	3
1500	1700	Mission Specialist + Instructor Pilot 3	1
1530	1730	Local	4
1600	1800	Local	5

<sup>59</sup> If the air or ground abort results in a NASA decision to impound the aircraft as a close call or mishap investigation, the aircraft will be impounded in accordance with AOD WI 34100, Maintenance Manual, and the aircraft will be counted as part of the required aircraft per day total listed in Table 6-2.

<sup>60</sup> If a NASA pilot is unavailable for aircraft pickup, the aircraft will be counted as part of the required aircraft per day total listed in Table 6-2 until the pilot returns the aircraft to Ellington Field.

<sup>61</sup> This example schedule is provided for reference purposes only and will change daily based on NASA mission requirements.

<sup>62</sup> Tail numbers shown are for illustrative purposes only – not actual NASA tail numbers.

#### **6.1.1.4 Flight Operations Support**

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide the following support services for the T-38N:

- 1) Provide aircraft launch, recovery, and maintenance services. Typical aircraft operating periods at Ellington Field are Sunday (4:00 PM to 11:00 PM), Monday-Thursday (7:00 AM to 11:00 PM) and Friday (7:00 AM to 4:00 PM).
- 2) Tow aircraft (plus spares) to and from the Ellington Field fixed base operator (FBO) to meet weekend and holiday flight schedule requirements. The Contractor is not typically required to launch and recover aircraft on weekends prior to 4:00 PM on Sundays or on holidays.
- 3) Under special circumstances, NASA may request launch and recovery services on weekends. NASA anticipates weekend launch and recovery support will not exceed six (6) weekends per year.

## 6.1.2 WB-57

### 6.1.2.1 Projected Flight Hours

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall support the projected WB-57 flight hours shown in Table 6-4 below. The flight hours shown in Table 6-4 are the estimated total WB-57 hours necessary to support the aircraft quantities listed in Table 1-5.

NASA estimates that approximately thirty-five percent (35%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that approximately twenty percent (20%) of the flight hours will occur between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-4a: WB-57 Projected Flight Hours**

WB-57	Base	Option 1	Option 2
Projected Hours	1200	2320	1600

**Table 6-4b: WB-57 Projected Flight Hours by Year**

WB-57	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	800	1200	1200	960	960

### 6.1.2.2 Flight Operations Support

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide the following support services for the WB-57:

- 1) Provide aircraft launch, recovery, maintenance, and payload integration support services as required Mon – Sun at Ellington Field, forward operating location, or any other aircraft destination or deployed location based on flight schedule requirements.
- 2) Provide support for CONUS and OCONUS deployments. NASA estimates 665 *deployed days*<sup>63</sup> for the base contract period and 1100 deployed days for contract Option 1 and 1100 deployed days for contract Option 2.

<sup>63</sup> A *deployed day* is defined as one (1) aircraft on deployment per day.

## 6.1.3 Super Guppy Transport

### 6.1.3.1 Projected Hours

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall support the projected Super Guppy Transport flight hours shown in Table 6-5 below. The flight hours shown in Table 6-5 are the estimated total Super Guppy hours necessary to support the aircraft quantities listed in Table 1-5.

NASA estimates that approximately ten percent (10%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that the aircraft will rarely fly between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-5a: Super Guppy Transport Projected Flight Hours**

Super Guppy	Base	Option 1	Option 2
Projected Hours	260	330	270

**Table 6-5b: Super Guppy Projected Flight Hours by Year**

Super Guppy	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	200	180	160	160	160

### 6.1.3.2 Flight Operations Support

*Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide the following support services for the Super Guppy Transport:

- 1) Provide aircraft launch, recovery, maintenance, and payload integration support services as required Mon – Sun at Ellington Field, forward operating location, or any other aircraft destination or deployed location based on flight schedule requirements. Contingent on seat availability, Contractor personnel may travel on aircraft.

## 6.1.4 Boeing 747 Shuttle Carrier Aircraft

### 6.1.4.1 Projected Hours

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall support the projected Shuttle Carrier Aircraft flight hours shown in Table 6-6 below. The flight hours shown in Table 6-6 are the estimated total Boeing 747 hours necessary to support the aircraft quantities listed in Table 1-5.

The Government estimates that approximately twenty percent (20%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that the aircraft will rarely fly between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-6a: Shuttle Carrier Aircraft Projected Flight Hours**

747	Base	Option 1	Option 2
Projected Hours	30	0	0

**Table 6-6b: Shuttle Carrier Aircraft Projected Flight Hours by Year**

747	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	30	0	0	0	0

### 6.1.4.2 Flight Operations Support

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall provide the following support services for the Shuttle Carrier Aircraft:

- 1) Provide aircraft launch, recovery, maintenance, and payload integration support services as required Mon – Sun at Ellington Field, forward operating location, or any other aircraft destination or deployed location based on flight schedule requirements. Contingent on seat availability, Contractor personnel may travel on aircraft.

## 6.1.5 Boeing DC-9

### 6.1.5.1 Projected Hours

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall support the projected DC-9 flight hours shown in Table 6-7 below. The flight hours shown in Table 6-7 are the estimated total DC-9 hours necessary to support the aircraft quantities listed in Table 1-5.

NASA estimates that approximately ten percent (10%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that the aircraft will rarely fly between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-7a: DC-9 Projected Flight Hours**

DC-9	Base	Option 1	Option 2
Projected Hours	35	80	65

**Table 6-7b: DC-9 Projected Flight Hours by Year**

DC-9	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	25	35	40	40	40

### 6.1.5.2 Flight Operations Support

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall provide the following support services for the DC-9:

- 1) Provide aircraft launch, recovery, maintenance, and payload integration support services as required Mon – Sun at Ellington Field, forward operating location, or any other aircraft destination or deployed location based on flight schedule requirements. Contingent on seat availability, Contractor personnel may travel on aircraft.

## 6.1.6 Gulfstream GIII

### 6.1.6.1 Projected Flight Hours

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall support the projected GIII flight hours shown in Table 6-8 below. The flight hours shown in Table 6-8 are the estimated total GIII hours necessary to support the aircraft quantities listed in Table 1-5.

NASA estimates that approximately thirty-five percent (35%) of the projected flight hours will occur between the hours of 5:00 PM and 11:00 PM (local time) and that approximately twenty percent (20%) of the flight hours will occur between the hours of 11:00 PM and 7:00 AM (local time).

**Table 6-8a: GIII Projected Flight Hours**

GIII	Base	Option 1	Option 2
Projected Hours	335	800	665

**Table 6-8b: GIII Projected Flight Hours by Year**

GIII	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	200	400	400	400	400

### 6.1.6.2 Flight Operations Support

Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)

The Contractor shall provide the following support services for the GIII:

- 1) Provide aircraft launch, recovery, maintenance, and payload integration support services as required Mon – Sun at Ellington Field, forward operating location, or any other aircraft destination or deployed location based on flight schedule requirements. Contingent on seat availability, Contractor personnel may travel on aircraft.

## 6.1.7 T-38N Simulator

### 6.1.7.1 Projected Hours

*Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall support the projected T-38 simulator training hours shown in Table 6-9 below. The hours shown in Table 6-9 are the estimated total training hours necessary to support the T-38N simulator listed in SOW Subsection 1.5.1.2.7.

NASA estimates that no simulator training will occur between the hours of 5:00 PM and 7:00 AM (local time).

**Table 6-9a: T-38N Simulator Training Hours**

Simulator	Base	Option 1	Option 2
Projected Hours	600	900	750

**Table 6-9b: T-38N Simulator Projected Flight Hours by Year**

Simulator	Year 1	Year 2	Year 3	Year 4	Year 5
Projected Hours	450	450	450	450	450

### 6.1.7.2 Simulator Support

*Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide a simulator instructor when requested by NASA to support training Mon – Fri as required.

## 6.2 Duty Office

### 6.2.1 Scheduler

*Category: Cost*

The Contractor shall create and manage a weekly flight schedule for all aircraft operated by AOD. The Contractor shall coordinate the requests generated by NASA managers, flight crews, project engineers, and others associated with flight operations to create an efficient use of aircraft assets.

### 6.2.2 Operations Duty Officer

*Category: Cost*

The Contractor shall provide an Operations Duty Officer (ODO) within 30 calendar days following written notification from the Contracting Officer. The ODO shall support flight operations by managing the daily flight schedule, answering operational questions, and assisting by radio during in-flight emergencies.

## 6.3 Flight Crew

### 6.3.1 General Requirements

*Category: Cost*

The Contractor shall provide flight crew personnel to operate and support AOD aircraft. Operational requirements will be provided to the Contractor by the NASA CO/COTR. The Contractor shall:

- 1) Ensure program support (project) aircraft operations are conducted in accordance with JSC/AOD approved operational directives and NPR 7900.3, *Aircraft Operations Management*. Aircraft will normally be operated as public use aircraft for this mission.
- 2) Conduct training in mission management aircraft on a non-interference basis with mission management operations. NASA will use mission management aircraft for some types of recurrent and other required qualification training.
- 3) Conduct operations in accordance with 14 CFR Part 91, *General Operating and Flight Rules*, and the AOD 09295, *Volume II, Aircraft Operations and Training Procedures, Research and Mission Support Aircraft* when flying mission management aircraft transporting officially approved passengers in response to Government travel requirements. The Contractor aircrew shall operate NASA Mission Management Aircraft as civil aircraft when carrying passengers.
- 4) Require aircrew to input aircraft discrepancies into the NAMIS database in accordance with NPR 7900.3, *Aircraft Operations Management Manual* and AOD 34100, *Maintenance Manual*.
- 5) Report close calls, or complete other flight paperwork as required.

## 6.3.2 Performance Standards

*Category: Cost*

The Contractor flight crew shall:

- 1) Comply with the provisions set forth in NPR 7900.3, *Aircraft Operations Management*, FAA regulations, original equipment manufacturer (OEM), and other applicable directives, regulations, policies, and instructions.
- 2) Maintain performance standards in accordance with AOD 09295, Volume I, *Aircraft Operations and Training Procedures, T-38 Operating Procedures, and Volume II, Aircraft Operations and Training Procedures, Research and Mission Support Aircraft*. Examples include:
  - a. Safety Precautions: Identified in the applicable aircraft technical data.
  - b. Airfield Operations
  - c. Normal Procedures: Identified in the applicable aircraft technical data.
  - d. Emergency Procedures: All applicable boldface emergency procedures demonstrated without reference to the checklist.
  - e. Aircraft Systems: The examiner may randomly select any system(s) for the student to demonstrate adequate skill and knowledge.
  - f. System Limitations: Demonstrated without reference to the checklist.

## 6.3.3 Proficiency, Currency, and Certification

*Category: Cost*

The Contractor shall ensure flight crew personnel maintain proficiency, currency, and annual requirements in accordance with NPR 7900.3, *Aircraft Operations Management*, AOD 09295, Volume I, *Aircraft Operations and Training Procedures, T-38 Operating Procedures, and Volume II, Aircraft Operations and Training Procedures, Research and Mission Support Aircraft*, and other applicable AOD work instructions.

The Contractor shall:

- 1) Maintain aircrew training records, which shall include: aircrew qualifications, copies of medical and FAA certificates, training status, and experience. The Contractor shall provide copies of these records to NASA Flight Operations.
- 2) Operate the designated aircraft in compliance with the current editions of the applicable aircraft flight manuals and other official aircraft documents.

The Government will provide training and qualification checks for Contractor aircrew, including required periodic simulator training. A NASA authorized flight surgeon will provide periodic flight physicals for aircrew.

The Government may, with appropriate notification to the Contractor, designate the requirement for contract aircrews to operate different aircraft, or the existing aircraft with configuration changes. The Government will provide additional training when aircraft equipment, configuration, model, or type is

changed. Mixed Contractor and Government aircrew may be required on an occasional basis to perform aircrew training, functional checks, technical evaluations, or mission operations.

### 6.3.4 Flight Instructors

*Category: Cost*

The Contractor shall provide flight instructors within 30 calendar days following written notification from the Contracting Officer. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Perform support ground school instruction in aircraft systems, flight characteristics, checklists, and other subjects related to the aircraft under instruction.
- 3) Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists and procedures.
- 4) Perform aircrew check flights in accordance with the Aircraft Flight Manual and NASA approved flight instructions.
- 5) Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
- 6) Perform functional check flights or operational checks on aircraft in accordance with AOD 34100, *Maintenance Manual* and applicable aircraft checklists.
- 7) Perform/support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 8) Support FRRs, TRRs, and PRRs per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.

### 6.3.5 Pilots

*Category: Cost*

The Contractor shall provide pilots within 30 calendar days following written notification from the Contracting Officer. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists and procedures.
- 3) Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
- 4) Perform functional check flights or operational checks on aircraft in accordance with AOD 34100, *Maintenance Manual*, and applicable aircraft checklists.
- 5) Perform/support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 6) Support FRRs, TRRs, and PRRs per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.

### 6.3.6 Ground and Simulator Instructors

*Category: Cost*

The Contractor shall provide personnel to perform Ground or Simulator Instructor duties within 30 calendar days following written notification from the Contracting Officer.

### 6.3.7 Flight Engineers

*Category: Cost*

The Contractor shall provide Flight Engineers within 30 calendar days following written notification from the Contracting Officer. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists and procedures.
- 3) Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
- 4) Perform functional check flights or operational checks on aircraft in accordance with AOD 34100, *Maintenance Manual*, and applicable aircraft checklists.
- 5) Perform/support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 6) Review and determine that weight and center of gravity are within limits for flight in accordance with NPR 7900.3, *Aircraft Operations Management* and ensure copy of weight and balance data is carried aboard aircraft.
- 7) Perform ground engine runs when requested by maintenance personnel. Flight engineers who perform ground engine runs shall be certified in accordance with AOD 09295, Volume I, *Aircraft Operations and Training Procedures, T-38 Operating Procedures, and Volume II, Aircraft Operations and Training Procedures, Research and Mission Support Aircraft*.
- 8) Assist in trouble-shooting aircraft systems if requested by maintenance personnel.
- 9) Perform instructor or examiner flight engineer duties, if designated, in accordance with applicable directives.

### 6.3.8 Sensor Equipment Operators

*Category: Cost*

The Contractor shall provide Sensor Equipment Operators (SEO) within 30 calendar days following written notification from the Contracting Officer in support of WB-57 flight operations. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Serve as sensor equipment operator for all onboard payloads and sensors.
- 3) Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists and procedures.

- 4) Perform normal and emergency procedures in accordance with the aircraft flight manual and NASA approved flight crew checklists.
- 5) Support/perform functional check flights or operational checks on aircraft in accordance with AOD 34100, *Maintenance Manual*, and applicable aircraft checklists.
- 6) Support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 7) Support FRRs, TRRs, and PRRs per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.
- 8) Assist in trouble-shooting aircraft systems if requested by maintenance personnel.
- 9) Support the development of payload data packages (PDP) for payload/system integration.
- 10) Develop SEO checklists.
- 11) Develop and execute flight test cards.
- 12) Participate in sensor operations training and dress rehearsals scenarios as it relates to the WB-57 program.
- 13) Perform instructor or examiner special equipment operator duties, if designated, in accordance with applicable directives.

### 6.3.9 Test Directors

*Category: Cost*

The Contractor shall provide test directors within 30 calendar days following written notification from the Contracting Officer to support NASA aircraft operations. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Perform normal and emergency procedures in accordance with the aircraft flight manual and NASA approved flight crew checklists and procedures.
- 3) Provide ground and in-flight support to ensure personnel safety.
- 4) Provide support to schedule customers for aircraft missions.
- 5) Serve as a technical interface to obtain answers to customer payload integration questions.
- 6) Communicate customer mission requirements to NASA technical and aircrew personnel.
- 7) Support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 8) Support Flight Readiness Reviews (FRRs), Test Readiness Reviews (TRRs), and Payload Readiness Reviews (PRRs) per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.
- 9) Provide support to install and remove customer payloads from aircraft.
- 10) Assist in trouble-shooting payload integration issues.
- 11) Provide in-flight support to manage customer payload activities.

### 6.3.10 Loadmasters

*Category: Cost*

The Contractor shall provide loadmasters within 30 calendar days following written notification from the Contracting Officer. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.
- 2) Support preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists.
- 3) Support normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
- 4) Support functional check flights or operational checks on aircraft in accordance with AOD 34100, *Maintenance Manual*, and applicable aircraft checklists.
- 5) Support operational readiness reviews on aircraft prior to deployment in accordance with AOD 33872, *Operation Readiness Reviews*.
- 6) Support FRRs, TRRs, and PRRs per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.
- 7) Assist in trouble-shooting aircraft systems if requested by maintenance personnel.
- 8) Support the development of payload data packages (PDP) for payload/system integration.
- 9) Participate in flight operations training and dress rehearsals scenarios.
- 10) Perform instructor or examiner loadmaster duties, if designated, in accordance with applicable directives.
- 11) Perform pre-mission and post-mission planning activities that are required to ensure that all cargo and payloads operations meet all flight safety requirements.
- 12) Plan, coordinate, and execute transportation of cargo and mission payloads, and associated support equipment to ensure that all cargo and payloads meet required flight schedules and are delivered safely to the required destination.
- 13) Initiate all pre-mission activities prior to arrival of other mission personnel. Pre-mission activities include cargo load planning, cargo preparation, material handling equipment preparations and positioning, cargo-loading procedures, customer coordination, and cargo aircraft center-of-gravity requirements.
- 14) Operate the Super Guppy cargo loaders used to support Super Guppy cargo transport operations and other required aircraft loading and offloading equipment.
- 15) Review and determine that weight and center of gravity are within limits for flight. Provide appropriate weight and balance data to the aircraft pilots and flight engineers for the purpose of computing required takeoff and landing data.
- 16) Perform post-mission activities which include cargo unloading, materials handling equipment preparation and positioning, and cargo preparation.
- 17) Maintain all documentation related to Super Guppy missions. The Contractor shall ensure that all files are accurate and complete and can be accessed for future missions. The Contractor shall maintain maintenance files on all mission support equipment. The Contractor shall be required to perform weight and balance calculations.
- 18) Provide monitoring and maintenance of shipping fixtures and support equipment.
- 19) Maintain all mission support equipment with associated certification and calibration data. The Contractor shall ensure all mission support equipment certification and calibration is current.
- 20) Obtain military Special Assignment Airlift Mission (SAAM) aircraft, Commercial Charter transportation services for both cargo and passengers, surface vessel charters, as identified by the COTR to support NASA programs and projects.

# L6.0 Flight Operations – LaRC Center Unique

*Category: Cost (SOW Subsections L6.1 through L6.3.10)*

The requirements listed in SOW Subsections L6.1 through L6.3.10 shall apply to Langley Research Center.

## L6.1 Projected Flight Schedule

### L6.1.1 Langley Aircraft

#### L6.1.1.1 Projected Flight Hours

The Contractor shall support the projected flight hours shown in Table L6-1 below. The flight hours listed in Table L6-1 are the combined total to support the aircraft listed in Table 1-7. The flight hours are dependent upon aircraft inventory and customer requirements.

**Table L6-1: LaRC Projected Flight Hours**

LaRC	Base	Option 1	Option 2
Projected Hours	470-600	700-900	550-710

#### L6.1.1.2 Weekly Flight Schedule

The Contractor shall provide the required aircraft based upon the weekly flight schedule provided by LaRC.

#### L6.1.1.3 Flight Schedule Conditions

SOW Subsection 6.1.1.3 not applicable.

#### L6.1.1.4 Flight Operations Support

The Contractor shall provide the following support services:

- 1) Provide aircraft launch, recovery, and maintenance services Mon-Fri (7:00 AM to 3:30 PM) at LaRC (local time).
- 2) Under special circumstances, NASA may request launch and recovery services on weekends and after hours for local flights, deployments, and night related projects.

### L6.1.2 WB-57

SOW Subsection 6.1.2 not applicable.

### **L6.1.3 Super Guppy Transport**

SOW Subsection 6.1.3 not applicable.

### **L6.1.4 Boeing 747 Shuttle Carrier Aircraft**

SOW Subsection 6.1.4 not applicable.

### **L6.1.5 Boeing DC-9**

SOW Subsection 6.1.5 not applicable.

### **L6.1.6 Gulfstream GIII**

SOW Subsection 6.1.6 not applicable.

### **L6.1.7 T-38N Simulator**

SOW Subsection 6.1.7 not applicable.

## **L6.2 Duty Office**

### **L6.2.1 Scheduler**

SOW Subsection 6.2.1 not applicable.

### **L6.2.2 Operations Duty Officer**

SOW Subsection 6.2.2 not applicable.

## **L6.3 Flight Crew**

### **L6.3.1 General Requirements**

The Contractor shall provide flight crew to operate and support LaRC Research Services Directorate (RSD) aircraft. Operational requirements will be provided to the Contractor by the NASA Contracting Officer (CO). The Contractor shall:

- 1) Ensure program support (project) aircraft operations are conducted in accordance with LaRC/RSD approved operational directives and NPR 7900.3, *Aircraft Operations Management*. Aircraft will normally be operated as public use aircraft for this mission.
- 2) Require aircrew to input aircraft discrepancies into the NAMIS database.
- 3) Report close calls, or complete other flight paperwork as required.

### L6.3.2 Performance Standards

The Contractor flight crew shall:

- 1) Comply with the provisions set forth in NPR 7900.3, *Aircraft Operations Management*, FAA regulations, original equipment manufacturer (OEM), and other applicable directives, regulations, policies, and instructions.
- 2) Maintain performance standards in accordance with LaRC policies and requirements. Examples include:
  - a. Safety Precautions: Identified in the applicable aircraft technical data.
  - b. Airfield Operations
  - c. Normal Procedures: Identified in the applicable aircraft technical data.
  - d. Emergency Procedures: All applicable boldface emergency procedures demonstrated without reference to the checklist.
  - e. Aircraft Systems: The examiner may randomly select any system(s) for the student to demonstrate adequate skill and knowledge.
  - f. System Limitations: Demonstrated without reference to the checklist.

### L6.3.3 Proficiency, Currency, and Certification

The Contractor shall ensure flight crew personnel maintain proficiency, currency, and annual requirements in accordance with NPR 7900.3, *Aircraft Operations Management*, LPR 1710.16, *Aviation Operations and Safety Manual*, and other applicable LMS work instructions.

The Contractor shall:

- 1) Maintain aircrew training records, which shall include: aircrew qualifications, copies of medical and FAA certificates, training status, experience, and provide this information to the Chief Pilot (or designee) upon the request of the Government. The Contractor shall provide copies of these records to NASA Flight Operations.
- 2) Operate the designated aircraft in compliance with the current editions of the applicable aircraft flight manuals and other official aircraft documents.

The Government will provide training and qualification checks for Contractor aircrew, including required periodic simulator training. A NASA authorized flight surgeon will provide periodic flight physicals for aircrew.

### L6.3.4 Flight Instructors

SOW Subsection 6.3.4 not applicable.

### L6.3.5 Pilots (Option – 4, See SOW Subsection 12.4.1)

The Contractor shall provide pilots. Example duties include:

- 1) Serve as aircrew in accordance with NPR 7900.3, *Aircraft Operations Management*.

- 2) Perform preflight, through-flight, and post-flight inspections on NASA aircraft in accordance with the aircraft flight manual or NASA approved flight crew checklists and procedures.
- 3) Perform normal and emergency procedures in accordance with the Aircraft Flight Manual and NASA approved flight crew checklists.
- 4) Perform functional check flights or operational checks on aircraft in accordance with LaRC/LMS policies, and applicable aircraft checklists.
- 5) Perform operational readiness reviews on aircraft prior to deployment in accordance with LMS policies.
- 6) Support Flight Readiness Reviews, Test Readiness Reviews, and Payload Readiness Reviews.

### **L6.3.6 Ground and Simulator Instructors**

SOW Subsection 6.3.6 not applicable.

### **L6.3.7 Flight Engineers**

SOW Subsection 6.3.7 not applicable.

### **L6.3.8 Sensor Equipment Operators**

SOW Subsection 6.3.8 not applicable.

### **L6.3.9 Test Directors**

SOW Subsection 6.3.9 not applicable.

### **L6.3.10 Loadmasters**

SOW Subsection 6.3.10 not applicable.

# 7.0 Maintenance

## 7.1 General Requirements

### 7.1.1 Overview

*Category: General*

The contract provides for three-tier aircraft maintenance support (organizational, intermediate, and depot level) for NASA aircraft and support equipment (airframes, engines, appliances, and other equipment) operated at locations identified in SOW Subsection 2.2 of this SOW.<sup>64</sup>

### 7.1.2 Other Aircraft

*Category: Cost*

The Contractor shall provide aircraft maintenance and support services for other aircraft. Example aircraft may include:

- 1) Additional training or mission aircraft. The aircraft type, model, and series will be determined at a future date
- 2) Other U.S. Government/external organization aircraft

### 7.1.3 Deliverables – Maintenance

*Category: FP*

The Contractor shall provide the maintenance deliverables listed in Table 7-1.

**Table 7-1: Data Requirement Description - Maintenance<sup>65</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-N01	Monthly Maintenance Plan

<sup>64</sup> The Government reserves the right to perform occasional aircraft maintenance on Government owned aircraft, engines, accessories, and other support equipment. The Government will coordinate this type of maintenance activity with the Contractor.

<sup>65</sup> Refer to Section J, Attachment J-1 for DRD requirements.

## 7.1.4 Aircraft Maintenance Program

*Category: General*

The objective of the three-tier maintenance program is to maintain aircraft and equipment while optimizing the use of personnel, facilities, material, and funds to achieve mission success. The Contractor shall:

- 1) Implement aircraft/equipment maintenance programs in accordance with AOD 34100, *Maintenance Manual* and approved technical data.
- 2) Ensure aircraft released for flight are serviceable (safe and operable) and properly configured to meet mission requirements.
- 3) Be responsible for planning, scheduling, forecasting, and execution of the maintenance program.
- 4) Ensure that planning provides the most effective and efficient use of human capital, facilities, and equipment, while reducing unscheduled maintenance, and allowing for aircraft and equipment to be returned to a flyable/usable condition with the least impact on mission success.

## 7.1.5 NASA Maintenance Manager

*Category: General*

The NASA Maintenance Manager is the Government's point of contact for all matters associated with the three-tier maintenance program and oversees the Contractor's overall maintenance effort. The Contractor shall keep the NASA Maintenance Manager informed on aircraft/equipment status as it applies to scheduled and unscheduled maintenance. The NASA Maintenance Manager provides the necessary oversight/insight, authority to proceed, and related technical coordination on behalf of the Government. The NASA Maintenance Manager is not responsible for the scheduling, planning, forecasting or execution of the Contractor's maintenance efforts.

## 7.1.6 Maintenance Discipline

*Category: General*

The Contractor shall:

- 1) Not perform any work on aircraft/equipment without approved technical data.
- 2) Comply with all technical data to ensure required repairs, inspections, and documentation are completed in a safe and effective manner.
- 3) Notify NASA of any safety-of-flight anomalies discovered during maintenance activities.
- 4) Adhere to approved technical data to maintain aircraft and equipment in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance Systems – Aerospace – Requirements for Maintenance Organization, Subsections 4.2 and 7.5.1.1*.
- 5) Ensure technical data is in the immediate work area and is open to the appropriate section for quick reference throughout the period of maintenance.
- 6) Ensure personnel follow all approved technical data to make certain all warnings and cautions are adhered to and, upon completion of the maintenance task, reviewed again to ensure all requirements have been accomplished.

## 7.1.7 Aircraft Change Directive Compliance

*Category: Cost*

The Contractor shall comply with all aircraft change directives (ACDs) approved by NASA (e.g. fleet modification instructions, one time inspections, one time replacements, service changes, customer bulletins, engine bulletins, airframe changes received from aircraft or component manufacturers, the FAA or the DoD) on AOD Form 1298.

## 7.1.8 Aircraft Acceptance and Transfer

*Category: Cost*

When requested by NASA, the Contractor shall:

- 1) Perform aircraft and equipment acceptance and transfer actions in accordance with USAF Technical Order (T.O.) 00-20-1, *Aerospace Equipment Maintenance Inspection, Documentation, Policies and Procedures, Chapters 1 and 8* respectively, while continuing to support flying operations.
- 2) Work with the Government to identify “best candidate” aircraft for continued support of the NASA mission verses retirement. Drawdown and transfer timeline plans will be prepared by NASA and delivered to the Contractor prior to the FY of execution and adjusted as required quarterly.

## 7.1.9 FAA Part 145 Repair Station Certification

*Category: Cost*

If requested by NASA, the Contractor shall obtain FAA Part 145 repair station certification.

## 7.2 Maintenance Programs

### 7.2.1 Aircraft Logs and Records Program

*Category: FP*

The Contractor shall maintain aircraft logs and records. The Contractor shall:

- 1) Establish procedures in accordance with AOD WI 34100; *Maintenance Manual*, to ensure each person signing entries in the aircraft logs, logbooks and making entries on serviceable parts tags are trained and authorized.
- 2) Maintain AFTO Form 95s for each Department of Defense (DoD) supported aircraft, as a minimum, in accordance with the type/model/series -6 manual. Specific instructions for filling in the AFTO Form 95 are found in USAF T.O. 00-20-1, Chapter 10.
- 3) Archive all internally approved configuration documents such as Engineering Work Orders (EWOs), Fleet Modification Instructions (FMIs), Test Procedure – Flight Research Project (TP-FRP), One-Time Inspections (OTIs), and One-Time Replacements (OTRs) in NAMIS as part of the completed NASA Form 1671A, *Aircraft Maintenance Packet*.
- 4) Archive other documents in NAMIS as requested by the Government.
- 5) Retain aircraft maintenance records in accordance with NPR 1441.1, *NASA Records Retention Schedules*, Schedule 7, Agency Filing Scheme #7900 (AFS #7900). In addition, on type-certificated aircraft, records shall be maintained in accordance with 14 CFR Section 91.417, *Maintenance Records*.

### 7.2.2 Product Identification and Traceability Program

*Category: FP*

The Contractor shall establish and implement a program for inspections to ensure that purchased products meet the specified purchase requirements and that identification of the product by suitable means throughout product realization is established in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization* and JPR 1281.8, *Product Identification and Traceability*.

### 7.2.2.1 Disposition of Life-limited Aircraft Parts

Category: FP

The Contractor shall control product identification and traceability of aircraft life-limited parts in compliance with 14 CFR Section 43.10, *Disposition of Life-Limited Aircraft Parts*, and 14 CFR Section 45.16, *Marking of Life Limited Parts*. Example tasks include:

- 1) Tag Parts
  - a. A tag or other record shall be attached to the parts. The tag or record shall include the part number, serial number, and current life status of the part. Each time the part is removed from a type-certificated product, either a new tag or record shall be created, or the existing tag or record shall be updated with the current life status.
- 2) Control Parts
  - a. The parts shall be controlled using NAMIS to substantiate the part number, serial number, and current life status of the part. Each time the part is removed, the record shall be updated with the current life status. Additional methods for product identification and traceability are listed below. Methods shall prevent the installation of the part on an aircraft after it has reached its life limit. Acceptable methods include:
    - i. Non-Permanent Marking
      1. The part shall be legibly marked using a non-permanent method showing its current life status. The life status shall be updated each time the part is removed from a product. If the identification mark is removed, another method of tracking shall be used. On certificated aircraft, the mark shall be accomplished in accordance with 14 CFR Section 45.16, *Marking of Life Limited Parts*, in order to maintain the integrity of the part.
    - ii. Permanent Marking
      1. Parts shall be legibly marked in accordance with 14 CFR Section 45.16, *Marking of Life Limited Parts*, in order to maintain the integrity of the part.
    - iii. Segregation
      1. The part shall be segregated using methods that prevent its installation on a product. These methods shall include at a minimum:
        - a. Maintaining a record of the part number, serial number, and current life status.
        - b. Ensuring the part is physically stored separately from parts that are currently eligible for installation.

### 7.2.3 Trend Analysis Program

*Category: FP*

The Contractor shall conduct trend analysis in accordance with AOD WI 34100, *Maintenance Manual*.

### 7.2.4 Tool and Equipment Control Program

*Category: FP*

The Contractor shall:

- 1) Provide a tool and equipment management control program to prevent and eliminate foreign object damage (FOD) to aircraft, engines, training and support equipment, and to reduce costs through strict accountability, control and security of common hand tools, special tools, test equipment, support equipment, and other assets.
- 2) Use the requirements contained in AOD WI 34100, *Maintenance Manual* to ensure that effective tool control is practiced and all tools are accounted for during all phases of maintenance. The Contractor is authorized to add additional requirements for each operating location to ensure positive inventory controls and lost tool reporting.

### 7.2.5 Foreign Object Debris (FOD) Prevention Program

*Category: FP*

The Contractor shall establish and enforce a foreign object elimination (FOE)/foreign object damage (FOD) program for NASA facilities and operating areas in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.6 Facility Services Program

*Category: FP*

The Contractor shall promote a safe and secure work environment in accordance with JPR 1700.1, *JSC Safety and Health Handbook*. In addition to those requirements stipulated in JPR 1700.1, the Contractor's responsibilities shall include:

- 1) Promote a "clean as you go" program. The Contractor shall ensure the work area is clean:
  - a. Prior to starting an operation
  - b. As an operation progresses and work debris accumulates
  - c. When an operation cannot continue
  - d. After an operation is completed and prior to inspection and work sign-off
  - e. At the end of the shift.
- 2) Maintain a clean and orderly work area. Ensure all necessary tools, materials, and equipment are stored in their proper locations.
- 3) Ensure foreign object debris cans and containers, trash cans, and other disposal cans are strategically placed throughout the workplace to prevent foreign objects from migrating into aerospace products. These containers shall be clearly marked to avoid co-mingling of various types of debris.
- 4) Ensure hangar wall areas (within reach) are kept clean. This includes power cable racks, fire hose assemblies, fire cabinets, fire extinguishers and portable eye wash stations. Fire hoses, extinguishers, and eye wash stations shall be clean and serviceable at all times.
- 5) Maintain hangar floor cleanliness and safety:
  - a. Clean hangar floors to ensure free from dirt, grease, and oil. Machine scrub hangar floors once a week minimum to remove built-up dirt, soil or other foreign materials to prevent slip hazards.
  - b. Ensure hangar corners and areas under stairwells are cleaned at least once per month.
  - c. Remove standing water from interior of hangar or other work areas following foul weather. The Contractor shall display "wet floor" caution signs when cleaning these areas where people are or will be present before floors are dry.
  - d. Hangar spills shall be cleaned up immediately.
  - e. Sweep all hangars (to include areas under hangared aircraft) and shop areas and ensure equipment and materials are properly stored at the end of the shift and work day.
- 6) Ensure hangar doors and drain grates are free of debris.
- 7) Stow cables in "walk-overs" when in use. Cable and "walk-overs" shall be stowed when not in use to avoid trip hazards.
- 8) Ensure aircraft positioned in the hangar have drip pans placed under them.
- 9) Ensure the safe use, handling, storage and disposition of materials, including hazardous materials, used in support of aircraft maintenance and in the support shops. Products and materials such as flammables and combustibles shall be stored in approved flammable materials storage cabinets. Products that are not compatible (when stored together) shall be stored separately. Small quantities (no greater than one (1) day's usage) of flammable and combustible materials may be kept in the shop, hangars and other such work areas where it is safe to do so.

## 7.2.7 Weight and Balance Program

*Category: FP*

The Contractor shall ensure a weight and balance program for each aircraft is established and maintained in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.8 Corrosion Prevention and Control Program

*Category: FP*

The Contractor shall conduct a corrosion prevention and control program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.9 Fuel Surveillance Program

*Category: FP*

The Contractor shall conduct a fuel surveillance program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.10 Hydraulic Contamination and Prevention Program

*Category: FP*

The Contractor shall conduct a hydraulic contamination prevention program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.11 Joint Oil Analysis Program (JOAP)

*Category: FP*

The Contractor shall conduct a JOAP program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.12 Electrostatic Discharge (ESD) Program

*Category: FP*

The Contractor shall conduct an ESD Program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.13 Aviators Breathing Oxygen Surveillance (ABO) Program

*Category: FP*

The Contractor shall conduct an ABO Program in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.14 Support Equipment (SE) Program

*Category: FP*

The Contractor shall conduct an SE program for powered, non-powered, and calibrated equipment (metrology) to achieve and maintain maximum material readiness, safety, and conservation of the equipment. The Contractor shall:

- 1) Ensure that the maintenance (including calibration and repair), inventory control, and reporting of current status is an integral part of maintaining aircraft and various support equipment required to meet mission success.
- 2) Utilize NAMIS (see SOW Subsection 4.12) to maintain inventory and readiness data for all supported SE and calibration items. This includes scheduled and unscheduled maintenance complied with in accordance with original equipment manufacturer (OEM) technical data, NASA CC-WD-N6, *Aircraft Non-Powered Ground Support Equipment Work Cards* and CC-WD-G5, *Aircraft Powered Ground Support Equipment Work Cards* and all technical data referenced within this SOW.
- 3) Maintain and inspect the T-38N aircraft support cargo pods and rear seat cargo container in accordance with T.O. 1T-38A-2-2CL-6, *WSSP Removal/Installation and Inspection Procedures Checklist*.
- 4) Ensure the protection of SE from the elements by using cleaning, corrosion control, preservation methodologies to include support equipment placed in storage.
- 5) Act as a focal point for all matters involving SE, to include making recommendations to the Government on new/revised SE requirements to support known and new mission requirements.
- 6) Investigate all lost SE items and provide the Government with information necessary to fully understand the circumstances surrounding the missing equipment.
- 7) Function as the centralized SE inventory management authority responsible for coordinating redistribution of in-use assets among other users and NASA organizations supported by this SOW.
- 8) Manage metrology and calibration tools and equipment in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.2.15 Slings and Lifting Devices Program

*Category: FP*

The Contractor shall establish a sling and lifting device program, to include periodic inspections to comply with the requirements of NASA-STD 8719.9, *Standard for Lifting Devices and Equipment*, USAF Technical Data T.O. 35D6-1-106, *Periodic and Maintenance Instructions –Aircraft and Engine Slings and Restraining Devices*, JPR 1700.1, *JSC Safety and Health Handbook, Chapters 5.8 and 8.5* and AOD CC-WD-P012, *Aircraft and Engine Slings Inspection Workcards*. All lifting devices shall have an AFTO Form 244, *Industrial/Support Equipment Record*, affixed and maintained by the Contractor.

### **7.2.15.1 Critical Lifts**

*Category: Cost*

The Contractor shall conduct critical lifts in accordance with JPR 1700.1, *JSC Safety and Health Handbook*, Chapter 8.5, to ensure compliance with all requirements contained in NASA-STD 8719.9, *Standard for Lifting Devices and Equipment*. Example critical lifts include:

- 1) Lifting G-III engines
- 2) Lifting DC-9 engines

### **7.2.15.2 Pre-lift Documentation**

*Category: FP*

The Contractor shall ensure the following documentation has been completed and available prior to any critical lift occurring:

- 1) JSC Form 941, *Pre-lift Checklist*, in accordance with NASA-STD 8719.9, *Standard for Lifting Devices and Equipment*.
- 2) An approved job hazard analysis (JHA) for the lift being accomplished.

### **7.2.15.3 Slings and Rigging Equipment**

*Category: FP*

The Contractor shall ensure slings and rigging equipment to include testing and inspection meet the requirements in NASA-STD 8719.9, *Standard for Lifting Devices and Equipment*.

### **7.2.15.4 Suspended Load Approval**

*Category: FP*

The Contractor shall ensure personnel are not located under suspended or moving loads unless the operation adheres to the OSHA-approved NASA Alternate Standard for Suspended Load Operations contained in NASA-STD-8719.9, *Standard for Lifting Devices and Equipment, Appendix A*.

## **7.3 Maintenance Control**

*Category: FP*

The Contractor shall establish a maintenance control to serve as the centralized control point for all scheduled and unscheduled maintenance activities. Example tasks include:

- 1) Plan, schedule, forecast, and execute a sound maintenance program for maintenance identified in SOW Subsection 7.1.4 of this SOW.
- 2) Staff maintenance control when maintenance, servicing, and flight operations are being conducted.
- 3) Conduct aircrew debriefs at the termination of each sortie/mission or when a sortie/mission is aborted.

- 4) Serve as the single-point-of-contact, communicating between the NASA Maintenance Manager, NASA Quality, and NASA Operations Duty Officer on all matters affecting aircraft status, availability, and initial notification of close call and mishap reporting. This includes prompt reporting with justification of estimated time in commission (ETICs) changes after initial notification, changes in established priorities, plans and schedules.
- 5) Coordinate all aircraft engine runs and all aircraft ground movements conducted by maintenance personnel.
- 6) Be proficient in the use of the NASA Aircraft Management Information System (NAMIS) automated database (refer to SOW Subsection 4.12.1 of this SOW).
- 7) Review and approve all NASA Form 1671A, *Aircraft Maintenance Packet*, inputs generated in NAMIS.
- 8) Perform documentation and system reviews using NAMIS prior to generating a NASA Form 1673A, *Flight Preparedness Report*, to certify and release an aircraft for flight.
- 9) Ensure aircraft that are scheduled for cross-country flights will not have a scheduled maintenance event come due while the aircraft is cross-country.
- 10) Keep the NASA Aircraft Maintenance Manager informed of intentions to dispatch personnel for aircraft off-station repair actions in accordance with AOD WI 34100, *Maintenance Manual*.
- 11) Update Flight Scheduling Application (FSA) as changes occur to schedules, aircraft configuration, and aircraft status that impact aircraft flight scheduling activities.
- 12) Initiate, approve, track, and report all cannibalizations actions, regardless of location, using AOD Form 229, *Cannibalization Authorization* in accordance with AOD WI 34100, *Maintenance Manual*. The Contractor shall not cannibalize any NASA aircraft that is in storage without prior approval of the NASA Maintenance Manager.
- 13) Adhere to the Functional Check Flight (FCF), Operational Check Flight (OPS Check) program in accordance with AOD WI 34100, *Maintenance Manual*. Ensure all documentation and aircrew briefs required to support this program are fully supported.
- 14) Conduct pre-dock and de-dock meetings for planned major aircraft inspections and aircraft being inducted into the T-38 depot at El Paso, Texas in accordance with AOD WI 34100, *Maintenance Manual*.
- 15) Adhere to the notification policy and documentation requirements for reporting aircraft ground, air aborts, and maintenance delays in accordance with AOD WI 34100, *Maintenance Manual*.
- 16) Support Flight Readiness Reviews and Test Readiness Reviews in accordance with AOD WI 33840 and Operational Readiness Reviews in accordance with AOD WI 33872.
- 17) Monitor the JSC Internal Home Page for JSC Spaceflight Metrology Group (SMG) weather advisories issued via the JSC Emergency Notification System (JENS) and respond per SOW Subsection 7.3.3.
- 18) Adhere to the processes outlined in AOD WI 34100, *Maintenance Manual*, to downgrade or make symbol changes on NASA Form 1671A, *Aircraft Maintenance Packet*.

### 7.3.1 Aircraft Release Authority

*Category: FP*

The Contractor shall:

- 1) Ensure that personnel performing maintenance release of aircraft and aircraft components are qualified and certified in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization*, Subsection 6.2.2.
- 2) Provide the CO and COTR with a list of personnel who are trained and authorized to certify an aircraft is “safe for flight.” This list shall include those personnel authorized to utilize this authority at satellite maintenance controls (e.g. FOLs) at the NASA locations specified within this SOW.
- 3) Include processes that will be utilized for personnel authorized to release aircraft for flight at deployed sites away from locations specified within this SOW.

### 7.3.2 Static Display and Training Aircraft

*Category: FP/Cost*

The Contractor shall prepare static display and training aircraft in accordance with AOD WI 34100, *Maintenance Manual*.

### 7.3.3 Lightning/Sudden Severe Weather

*Category: FP/Cost*

The Contractor shall comply with lightning/sudden severe weather requirements in accordance with AOD WI 34100, *Maintenance Manual*.

#### 7.3.3.1 Lightning Detection System

*Category: FP*

The Contractor shall implement, support, maintain and manage a scheduled maintenance program for the Lightning Detection System in accordance with AOD WI 34100, *Maintenance Manual*.

#### 7.3.3.2 Doppler Weather Radar System

*Category: FP*

The Contractor shall implement, support, maintain and manage a scheduled maintenance program for the Doppler Weather Radar System in accordance with AOD WI 34100, *Maintenance Manual*.

## 7.4 Scheduled and Unscheduled Maintenance

### 7.4.1 Aircraft Maintenance

*Category: FP/Cost*

The Contractor shall perform three-tier scheduled and unscheduled aircraft maintenance (organizational, intermediate, and depot level) in accordance with approved technical data.<sup>66</sup>

### 7.4.2 Aviator's Life Support Systems and Equipment Maintenance

*Category: FP/Cost*

The Contractor shall perform all scheduled and unscheduled aviator's life support systems (ALSS) and equipment maintenance.<sup>67, 68</sup>

### 7.4.3 Powered, Non-Powered, and Calibrated Support Equipment

*Category: FP/Cost*

The Contractor shall perform all scheduled and unscheduled maintenance for powered, non-powered, and calibrated support equipment.<sup>67, 68</sup>

### 7.4.4 Off-Station Maintenance

*Category: FP/Cost*

The Contractor shall:

- 1) Follow the requirements outlined in AOD WI 34100, *Maintenance Manual* for coordinating off-station repair actions.
- 2) Obtain advance approval to dispatch Contractor personnel from the NASA Maintenance Manager to troubleshoot/repair off-station aircraft.

---

<sup>66</sup> See SOW Appendix B for definitions of "scheduled" and "unscheduled" maintenance.

<sup>67</sup> See Section J, Attachment J-3-1 for list of powered, non-powered, and calibrated support equipment.

<sup>68</sup> See SOW Subsection 1.4 for definitions of "supported" or "not supported" by approved technical data.

## 7.4.5 Flight Line Services

### 7.4.5.1 Aircraft Ground Handling/Serviceing

*Category: FP/Cost*

The Contractor shall accomplish all ground handling and servicing in accordance with approved technical data. Example tasks include:

- 1) Towing
- 2) Parking
- 3) Mooring
- 4) Jacking
- 5) Hoisting
- 6) Engine ground operations
- 7) Servicing/de-servicing fuel, oil, hydraulics, oxygen, tire pressure
- 8) Lubrication

### 7.4.5.2 Launch and Recovery

*Category: FP/Cost*

The Contractor shall:

- 1) Prepare the aircraft before aircrew arrival, assist the aircrew during flight preparations, and be in place to recover, inspect, and service each aircraft before the next launch in accordance with approved technical data.
- 2) Meet and park other Government aircraft, to include DoD and NASA transient aircraft during normal maintenance work shift hours.
- 3) Pre-position fire extinguishers, ladders, chocks, grounding wires, powered and non-powered SE required for aircraft arrival and inspect aircraft parking areas for evidence of foreign objects.

### 7.4.5.3 Aircraft Ready Times

*Category: General*

The Contractor shall ensure aircraft are ready for flight to meet the timelines specified in AOD WI 34100, *Maintenance Manual*.

## 7.5 Production Control

*Category: FP*

The Contractor shall establish a production control to serve as the centralized control point for all scheduled and unscheduled maintenance activities as they relate to intermediate and depot level (I-D) maintenance conducted at AOD. Examples include:

- 1) Plan, schedule, forecast, and execute a sound maintenance program.
- 2) Serve as the single-point-of-contact for overhaul, repair, check, test, certification, modification, or manufacturing processes accomplished in the intermediate and depot level support shops.
- 3) Ensure priorities for repairs, upgrades, manufacturing, and logistics are set based on requirements to support NASA missions.
- 4) Be proficient in the use of the NASA Aircraft Management Information System (NAMIS) automated database (refer to SOW Subsection 4.12.1 of this SOW).
- 5) Review and approve all NASA Form 1671A, *Aircraft Maintenance Packet* inputs generated in NAMIS to support intermediate and depot level support shops.
- 6) Initiate, approve, track, and report all cannibalizations actions using AOD Form 229, *Cannibalization Authorization* in accordance with AOD 34100, *Maintenance Manual*.
- 7) Conduct assessment of the intermediate and depot level maintenance activities for each month by conducting trend analysis, reviewing “cannot duplicate” discrepancy rates, reviewing and making recommendations to improve adverse trends and improve overall I-D level turn-around times for component repairs.
- 8) Maintain direct liaison with the Contractor’s Logistics to ensure supply stock levels do not fall below approved levels for items repairable within the back shops.
- 9) Ensure strict accountability and control of all components/assets and equipment that enter the support shops for repair or other maintenance related function.
- 10) Maintain an up-to-date CC-GEN-002, *Automatic Beyond Capability of Maintenance (BCM) Listing*, located in the AOD library to readily identify those repairable assets that “are not repairable on station” at AOD. The Contractor shall review the BCM listing every thirty (30) days and submit changes using the AOD Form 21 process in accordance with AOD 34100, *Maintenance Manual* if required.
- 11) Maintain an up-to-date CC-GEN-001, *Component Repair Listing (CRL)* located in the AOD library to readily identify those repairable assets that “are repairable on station” at AOD. The Contractor shall review the CRL every thirty (30) days and submit changes using the AOD Form 21 process in accordance with AOD 34100, *Maintenance Manual* if required.
- 12) Coordinate the dispatching of personnel with maintenance control to support on-aircraft maintenance requirements.
- 13) Adhere to the processes outlined in AOD WI 34100, *Maintenance Manual*, to downgrade or make symbol changes on the NASA Form 1671A, *Aircraft Maintenance Packet*.

## 7.6 Support Shop Services

### 7.6.1 General

*Category: FP/Cost*

The Contractor shall provide support shop services for scheduled and unscheduled maintenance to include the repair, alteration, fabrication, test and check, reclamation, rebuild and overhaul of parts, assemblies, sub-assemblies and end-items in accordance with approved technical data.<sup>69</sup> Example services include:

- 1) Electrical Systems
- 2) Communications and Navigation (COM/NAV) Systems
- 3) Pneudraulics Systems and Components
- 4) Mechanical Accessories
- 5) Sheetmetal and Composites
- 6) Welding
- 7) Battery
- 8) Paint and Corrosion Prevention and Treatment
- 9) Wheel and Tire Assembly/Disassembly
- 10) Manufacturing
- 11) Machining
- 12) Modification of end-items
- 13) Test and Check Capabilities
- 14) Rework, repair and inspecting powered and non-powered support equipment
- 15) "I" level calibration of designated equipment

### 7.6.2 Component Repair Listing

#### 7.6.2.1 T-38/J85 Engine Items

*Category: FP*

The Contractor shall troubleshoot, check, test, and repair all items marked as T-38/J85 in AOD CC-GEN-001, *Component Repair Listing* in-house under the fixed-price portion of the contract unless otherwise authorized in advance by the NASA Contracting Officer (CO) or designated representative for off-station repair under the cost-reimbursable portion of the contract.

#### 7.6.2.2 Other Items

*Category: Cost*

The Contractor shall troubleshoot, check, test, and repair all items other than those marked as T-38/J85 in AOD CC-GEN-001, *Component Repair Listing* under the cost-reimbursable portion of the contract.

---

<sup>69</sup> See Subsection 1.5.1.1 for JSC facility listing.

### 7.6.3 Special Equipment and Tooling

*Category: FP/Cost*

The Contractor shall:

- 1) Ensure all special equipment and tooling is serviceable.<sup>70</sup>
- 2) Maintain the equipment in the proper hardware and software configurations to test all assigned assets. If maintenance of equipment is beyond the capability of the Contractor, the Contractor shall contact NASA for additional guidance.

### 7.6.4 Support Equipment Shop

*Category: FP*

The Contractor shall maintain a SE shop in accordance with Air Force Occupational Safety and Health Standard 91-20 (AFOSHSTD91-20), *Vehicle Maintenance Shops*.

---

<sup>70</sup> See contract Section J, Attachments J-3-1, J-3-2, J-3-3 and J-3-5 for list of special equipment and tooling.

## 7.6.5 Egress Systems Shop

Category: FP/Cost

The Contractor shall be responsible for maintaining the ejection seats listed in Table 7-2 below:

**Table 7-2: Ejection Seats**

Type Model Aircraft	Make/Model Ejection Seat
T-38N	Martin Baker MK US16LN-1/-2 and McCormick Selph Canopy Fracturing System
WB-57 <sup>71</sup>	Douglas 1C-6

Example responsibilities include:

- 1) Ensure all egress maintenance, to include removal and installation, inspection, repair, and upgrades shall be accomplished in accordance with Air Force Instruction 21-101 (AFI 21-101), *Aircraft and Equipment Management, Chapter 16* and other egress or OEM specific technical data as applicable.
- 2) Utilize approved command and response methods when directed by technical data during any task requiring the removal/installation of explosive components, and during egress final inspections.
- 3) Ensure only trained and qualified egress personnel install and remove parachutes and survival kits that are integral parts of ejection seats.

### 7.6.5.1 Egress Support Equipment

Category: FP/Cost

The Contractor shall maintain, inspect, repair, and modify all Martin Baker and other egress support equipment to ensure equipment is available to support both scheduled and unscheduled maintenance requirements. The Contractor shall use of AFTO Form 244, *Industrial/Support Equipment Record*, for all support equipment. Examples egress support equipment includes: cranes, cradles, and stands.

### 7.6.5.2 Aircraft Canopy System

Category: FP/Cost

The Contractor shall:

- 1) Perform scheduled and unscheduled canopy system maintenance to include canopy rigging, adjustments, and rig checks.
- 2) Ensure canopy system maintenance is restricted to qualified and trained egress technicians.

<sup>71</sup> NASA is currently converting to Advanced Concept Ejection Seat (ACES II) seats for the WB-57. When this change occurs, NASA will provide O-Level maintenance training for Contractor personnel. I-Level training will be provided by DoD.

### **7.6.5.3 Survival Beacon Activation**

*Category: FP/Cost*

Contractor egress personnel shall locate inadvertent beacon activation on the flight-line in accordance with AFI 11-301, *Aircrew Flight Equipment (AFE) Program, Volume 1* and take appropriate actions. If egress personnel are not available, Contractor life support technicians shall locate inadvertent beacon activations within their shops/vehicles and on the flight-line and take appropriate actions.

### **7.6.5.4 Explosives**

#### **7.6.5.4.1 Egress Work Center Explosive Locker**

*Category: FP*

The Contractor shall ensure that levels of explosives in the work center explosive locker(s) do not exceed that which is authorized on the Explosive Facility License, AF Form 2047. The explosive locker(s) shall be clearly marked in accordance with federal, state and local regulations, to include proper fire symbols for the type of explosive devices stored inside the locker(s) and building(s).

#### **7.6.5.4.2 Storage**

*Category: FP*

The Contractor shall:

- 1) Ensure all explosive devices and seats are safetied, capped, plugged, and tagged with proper identification when not physically installed in the aircraft.
- 2) Ensure explosives removed from one seat will not be co-mingled with those from another system.
- 3) Ensure all removed ejection seats are clearly marked “armed” or “de-armed” and appropriate seat covers are installed at all times while maintenance is not being performed on the seat.

#### **7.6.5.4.3 Transportation**

*Category: FP*

The Contractor shall ship and transport explosives in accordance with Code of Federal Regulations (CFR) 49, *Hazardous Material Regulation* and Air Force Manual 91-201 (AFMAN 91-201), *Explosive Safety Standards*.

#### **7.6.5.4.4 Defects**

*Category: FP*

The Contractor shall notify the NASA Maintenance Manager immediately for guidance if an egress item is found to be defective.

## 7.6.6 Personal Equipment Shop

Category: FP

The Contractor shall operate the personal equipment shop as delineated in JPD 8021.1, *In-Flight Personal Equipment for JSC Aircraft Operations*. The Contractor shall:

- 1) Maintain records for each individual requiring flight gear. The Contractor may elect to use the below approved Aircraft Operations Division (AOD) forms, or develop other means, to account for in-flight personal equipment:
  - a. AOD Form 922A: *Personal Clothing and Equipment Record – Flight Status Personnel*.
  - b. AOD Form 922B: *Personal Clothing and Equipment Record – Non-Flight Status Personnel*.
- 2) Provide assistance to aircrew to ensure personal flight equipment fits properly.
- 3) Clean and maintain flight gear in accordance with approved technical data.
- 4) Fabricate and repair soft goods, both aircraft related and non-aircraft related. Pattern making and sewing skills are required to manufacture items, such as seat cushion covers, flight clothing bags, aircraft intake covers, equipment covers, aircraft forms bags, aircraft interior panel/seat covers, any items per engineering or end user drawings, and applicable technical data.
- 5) Fabricate labels, signs, and nametags.
- 6) Maintain, inspect, and replenish first aid kits.
- 7) Handle, store, and forecast explosive devices utilized to support in-flight clothing and personal equipment.
- 8) Maintain, inspect and set up night vision goggles in accordance with manufacturer's instructions.
- 9) Inspect, test, build-up, repair, and assemble smoke masks in accordance with approved technical data.
- 10) Maintain flight crew oxygen masks in accordance with approved technical data.
- 11) Maintain storage noted below:
  - a. Bonded Storage Area
    - i. Maintain bonded storage areas for personal parachute assemblies (PPAs) and their components in accordance with JWI 4210.2, *JSC Manual for the Control of Program Stock*.
  - b. Pyrotechnic Storage Locker
    - i. Maintain a pyrotechnic storage locker for PPA bonded pyrotechnic devices and a locker for flares and pyrotechnics for automatic release devices in accordance with USAF T.O.'s 11A10-26-7, *Pyrotechnic Signals*, 11A10-30-7, *Specialized Storage and Maintenance Procedures for Pyrotechnic Fuses and Fire Starters and Deming Flare* and 11P-1-7, *Specialized Storage and Maintenance Procedures for Cartridges for Aircrew Escape Systems*.
- 12) Maintain Survival Kits noted below:
  - a. MBEU 20027 Survival Kit (T-38N).
    - i. Inspect and test the MBEU 20027 survival kit in accordance with the Martin-Baker maintenance manuals.
  - b. RSSK-8E Survival Kit (B-57).

- i. Inspect and test the RSSK-8E survival kit in accordance with NAVAIR T.O. 13-1-6.3-1 and 13-1-6.3-2, *Seat Survival Kits – Aviation Crew Systems Manuals*.
- 13) Maintain Parachutes
  - a. Inspect, test, buildup, repair, and package A/P28S21 parachutes in accordance with USAF T.O. 14D3-11-1, *Emergency Personnel Recovery Parachute*.
  - b. Maintain Irwin GQ5000 parachutes for the T-38 US16LN escape system in accordance with MB526PARA, *Martin Baker T-38 Parachute Assembly Ejection Seat P/N MBEU200022 & MBEU200023 Maintenance Manual*.
- 14) Maintain Drogue Parachute
  - a. Inspect, test, buildup, repair, and package parachutes in accordance with USAF T.O. 14D1-2-436, *Ejection Seat Drogue Chute*.
- 15) Maintain PCU15P Harnesses
  - a. Inspect, test, buildup, and repair the PCU15P harnesses in accordance with USAF T.O. 14D3-11-1, *Emergency Personnel Recovery Parachute*.
- 16) Maintain PCU16P Harnesses
  - a. Inspect, test, buildup, and repair the PCU16P harnesses in accordance with the Martin-Baker maintenance manuals.
- 17) Maintain Radios/Beacons
  - a. Inspect, test, and change limited life items for radios and beacons in accordance with the manufacturer's instructions.

## 7.6.7 Pressure Suits and Equipment Shop

*Category: Cost*

The Contractor shall maintain pressure suits and pressure suit equipment in accordance with AOD 34100, *Maintenance Manual*.

## 7.6.8 Power Plant (Engine) Shop

*Category: FP/Cost*

The Contractor shall maintain a power plant (engine) shop to:

- 1) Perform on/off-equipment intermediate and depot level scheduled and unscheduled maintenance, modifications, preservation, depreservation, borescoping, blade blending, and configuration upgrades/control on J-85 engines/components in accordance with approved technical data.
- 2) Maintain engine maintenance and transportation trailers and other support equipment utilized to support engine/component maintenance.
- 3) Perform T-38 generator rotor balance in accordance with USAF T.O. 8A6-4-5-2, *AC Generator*.

### 7.6.8.1 Engine Test Cell

Category: FP

The Contractor shall maintain, operate, and inspect the J-85 Engine Test Cell using the technical data below:

- 1) Aircraft Jet Engine Test Stand Service Inspection Work-cards contained in USAF 33D4-6-212-36(N)WC-1
- 2) Aircraft Jet Engine Test Stand Periodic Inspection Work-cards contained in USAF 33D4-6-212-36(N)WC-2.
- 3) Operate the engine test cell in accordance with USAF 2J-J85-111-1, *Engine Test, Troubleshooting, Preservation, and Post-test Handling*, and CALTECH CORP 4-50-4, *J-85 Software User's Manual, Engine Data Acquisition System*.
- 4) Test cell maintenance will be accomplished in accordance with USAF 33D4-6-484-4, *Engine Test Stand Noise Suppressor Model A/F32T-4IPB*.

### 7.6.8.2 J-85 Trim Pad

Category: FP

The Contractor shall utilize 1T-38A-2-1, *General Airplane*, when positioning an aircraft into the Trim Pad Sound Suppressor.

### 7.6.8.3 J-85 Shipping

Category: FP

The Contractor shall ensure NASA J-85 engines are prepared for shipment in accordance with CC-ENG-J85-001; *J-85 Shipping Instructions*.

### 7.6.9 Weld Shop

Category: FP/Cost

The Contractor shall ensure welding procedures are qualified and welding is performed in accordance with AWS D17.1, *Specification for Fusion Welding for Aerospace Applications* or other applicable approved technical data.

### 7.6.10 Non-Destructive Inspection (NDI) Shop

Category: FP/Cost

The Contractor shall:

- 1) Manage an NDI shop and ensure personnel are certified in all aspects of NDI (e.g. optical, dye-penetrant, magnetic particle, ultrasonic, eddy current, and radiographic) to support on and off-equipment inspections on all aircraft and support equipment assigned to the NASA organizations identified in SOW Subsection 1.5.1.2 of this SOW.
- 2) Perform non-destructive inspection.

- 3) Ensure NDI personnel utilize USAF T.O. 33B-1-1, *Non-Destructive Inspection Methods, Basic Theory* and 1T-38A-36, *Non-Destructive Inspection for T-38 Aircraft* as well as the guidelines stipulated in AFI21-101, *Aircraft and Equipment Management, Paragraph 5.9.4* during all aspects of NDI accomplishment. This technical data may be supplemented by other process and procedures when made available by the OEM, USAF and other NASA approved sources.
- 4) Ensure all discrepancies noted during any of the above methods of inspecting shall be documented in NAMIS using NASA Form 1671A, *Aircraft Maintenance Packet*.

## 7.7 T-38 Simulator

*Category: FP*

The Contractor shall maintain and inspect the T-38N ground based simulator in accordance with:

- 1) T-38(SIM)-5, *T-38N Simulator (N900) Maintenance Plan*
- 2) T-38(SIM)-6WC, *T-38N Simulator Preventative Maintenance Inspection Work Cards*

The T-38N simulator is located on-site at JSC in Building 5.

## 7.8 Forward Operating Locations

### 7.8.1 El Paso

#### 7.8.1.1 T-38 Depot Maintenance

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall:

- 1) Perform T-38 depot level work at the El Paso forward operating location.<sup>72</sup> In situations where relocation of the aircraft to El Paso is not possible or practical, the NASA COTR may direct the Contractor to perform the T-38 depot work at a different location.
- 2) Convene a pre-dock meeting in accordance with AOD 34100, *Maintenance Manual* prior to induction into the depot.
- 3) Once the pre-dock meeting scope of work has been approved, send a signed copy of the pre-dock package to the NASA El Paso Depot Site Manager for accomplishment by the Contractor.

#### 7.8.1.2 Aircraft Launch, Recovery, and General Maintenance

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide aircraft launch, recovery, and maintenance support for T-38 and other NASA transient aircraft in El Paso.

---

<sup>72</sup> *These services have historically been provided in El Paso due to a required NASA presence in support of the Space Shuttle Program at White Sands, available hangar space, and dry climate.*

### **7.8.1.3 Super Guppy Support**

*Category: Cost*

The Contractor shall provide aircraft launch, recovery, and maintenance services for the Super Guppy in El Paso.

### **7.8.1.4 Aircraft Storage and Preservation**

*Category: Cost*

The Contractor shall provide aircraft storage and preservation services in a climate that minimizes aircraft corrosion.

## **7.8.2 Edwards**

### **7.8.2.1 Aircraft Launch, Recovery, and General Maintenance**

*Category: Refer to applicable SOW paragraph for category (FP, FP/Cost, or Cost)*

The Contractor shall provide aircraft launch, recovery, and maintenance support at the NASA Edwards Air Force Base FOL to support the Boeing 747 and other NASA transient aircraft.<sup>73</sup>

---

<sup>73</sup> NASA anticipates that the requirement for the Edwards Air Force Base forward operating location will only be necessary until the end of Boeing 747 Shuttle Carrier operations.

# L7.0 Maintenance – LaRC Center Unique

*Category: Cost (SOW Subsections L7.1 through L7.8.2.1)*

The requirements listed in SOW Subsections L7.1 through L7.8.2.1 shall apply to Langley Research Center.

## L7.1 General Requirements

### L7.1.1 Overview

The contract provides for two-tier aircraft maintenance support (organizational and intermediate level) for NASA aircraft and support equipment (airframes, engines, appliances, and other equipment) operated at locations identified in SOW Subsection 2.2 of this SOW.<sup>74</sup>

### L7.1.2 Other Aircraft

The Contractor shall provide aircraft maintenance and support services for other aircraft. Example aircraft may include other U.S. Government/external organization aircraft.

### L7.1.3 Deliverables – Maintenance

SOW Subsection 7.1.3 not applicable.

### L7.1.4 Aircraft Maintenance Program

The objective of the two-tier maintenance program is to maintain aircraft and equipment to optimize the use of personnel, facilities, material, and funds to achieve mission success. The Contractor shall:

- 1) Implement aircraft/equipment maintenance programs in accordance with LMS-TD-0940, *LaRC General Aircraft Maintenance Manual for Research Services Directorate (RSD)* and approved technical data.
- 2) Ensure aircraft released for flight are serviceable (safe and operable) and properly configured to meet mission requirements.
- 3) Be responsible for planning, scheduling, forecasting, and execution of the maintenance program.
- 4) Ensure that planning provides the most effective and efficient use of human capital, facilities, and equipment, while reducing unscheduled maintenance, and allowing for aircraft and equipment to be returned to a flyable/usable condition with the least impact on mission success.

### L7.1.5 LaRC Chief of Maintenance

The LaRC Chief of Maintenance is the Government's single point of contact for all matters associated with the two-tier maintenance program identified in this SOW and is responsible for monitoring the

---

<sup>74</sup> *The Government reserves the right to perform aircraft maintenance on Government owned aircraft, engines, accessories, and other support equipment.*

Contractor's overall maintenance effort. The Contractor shall keep the LaRC Chief of Maintenance informed on aircraft/equipment status as it applies to scheduled and unscheduled maintenance.

### L7.1.6 Maintenance Discipline

See SOW Subsection 7.1.6.

### L7.1.7 Aircraft Change Directive Compliance

The Contractor shall comply with all aircraft change directives (ACDs) approved by NASA (e.g. fleet modification instructions, one time inspections, one time replacements, service changes, customer bulletins, engine bulletins, airframe changes received from aircraft or component manufacturers, the FAA or the DoD).

### L7.1.8 Aircraft Acceptance and Transfer

SOW Subsection 7.1.8 not applicable.

### L7.1.9 FAA Part 145 Repair Station Certification

SOW Subsection 7.1.9 not applicable.

## L7.2 Maintenance Programs

### L7.2.1 Aircraft Logs and Records Program

The Contractor shall maintain aircraft logs and records. The Contractor shall:

- 1) Establish procedures in accordance with LMS-TD-0940, *LaRC General Aircraft Maintenance Manual for RSD*, to ensure each person signing entries in the aircraft logs, logbooks and making entries on serviceable parts tags are trained and authorized.
- 2) Maintain AFTO Form 95s for each Department of Defense (DoD) supported aircraft, as a minimum, in accordance with the type/model/series -6 manual. Specific instructions for filling in the AFTO Form 95 are found in USAF T.O. 00-20-1, Chapter 10.
- 3) Archive all internally approved configuration documents such as Aircraft Work Orders, Experiment Software Work Requests (ESWRs), One-Time Inspections (OTIs), and One-Time Replacements (OTRs) in NAMIS as part of the completed NASA Form 1671A, *Aircraft Maintenance Packet*.
- 4) Archive other documents in NAMIS as requested by the Government.
- 5) Retain aircraft maintenance records in accordance with NPR 1441.1, *NASA Records Retention Schedules*, Schedule 7, Agency Filing Scheme #7900 (AFS #7900). In addition, on type-certificated aircraft, records shall be maintained in accordance with 14 CFR Section 91.417, *Maintenance Records*.

## L7.2.2 Product Identification and Traceability Program

The Contractor shall establish and implement a program for inspections to ensure that purchased products meet the specified purchase requirements and that identification of the product by suitable means throughout product realization is established in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization*, Subsection 7.

### L7.2.2.1 Disposition of Aircraft Parts

See SOW Subsection 7.2.2.1.

## L7.2.3 Trend Analysis Program

SOW Subsection 7.2.3 not applicable.

## L7.2.4 Tool and Equipment Control Program

The Contractor shall:

- 1) Adhere to established LaRC tool and equipment management control program to prevent and eliminate foreign object damage (FOD) to aircraft, engines, training and support equipment, and to reduce costs through strict accountability, control and security of common hand tools, special tools, test equipment, support equipment, and other assets.
- 2) Use the requirements contained in LMS-TD-0940, *LaRC General Aircraft Maintenance Manual for RSD* to ensure that effective tool control is practiced and all tools are accounted for during all phases of maintenance. The Contractor is authorized to add additional requirements for each operating location to ensure positive inventory controls and lost tool reporting.

## L7.2.5 Foreign Object Debris (FOD) Prevention Program

The Contractor shall establish and enforce a foreign object elimination (FOE)/foreign object damage (FOD) program for NASA facilities and operating areas in accordance with LMS-TD-0940, *LaRC General Aircraft Maintenance Manual for RSD*.

## L7.2.6 Facility Services Program

The Contractor shall promote a safe and secure work environment in accordance with Langley Management System (LMS) policies and directives. In addition to those requirements, the Contractor's responsibilities shall include:

- 1) Promote a "clean as you go" program. All employees shall ensure the work area is clean:
  - a. Prior to starting an operation
  - b. As an operation progresses and work debris accumulates
  - c. When an operation cannot continue
  - d. After an operation is completed and prior to inspection and work sign-off
  - e. At the end of the shift.

- 2) Maintain a clean and orderly work area with necessary tools, materials, and equipment in their places of orderly arrangement.
- 3) Ensure foreign object debris cans and containers, trash cans, and other disposal cans are strategically placed throughout the workplace to prevent foreign objects from migrating into aerospace products. These containers shall be clearly marked to avoid co-mingling of various types of debris.
- 4) Maintain hangar floor cleanliness and safety:
  - a. Clean hangar floors to ensure free from dirt, grease, and oil. Machine scrub hangar floors once a week minimum to remove built-up dirt, soil or other foreign materials to prevent slip hazards.
  - b. Ensure hangar corners and areas under stairwells are cleaned at least once per month.
  - c. Remove standing water from interior of hangar or other work areas following foul weather. The Contractor shall display “wet floor” caution signs when cleaning these areas where people are or shall be present before floors are dry.
  - d. Hangar spills shall be cleaned up immediately.
  - e. Sweep all hangars (to include areas under hangared aircraft) and shop areas and ensure equipment and materials are properly stored at the end of the shift and work day.
- 5) Stow cables in “walk-overs” when in use. Cable and “walk-overs” shall be stowed when not in use to avoid trip hazards.
- 6) Ensure aircraft positioned in the hangar have drip pans placed under them.
- 7) Ensure the safe use, handling, storage and disposition of materials, including hazardous materials, used in support of aircraft maintenance and in the support shops. Products and materials such as flammables and combustibles shall be stored in approved flammable materials storage cabinets. Products that are not compatible (when stored together) shall be stored separately. Small quantities of flammable and combustible materials may be kept in the shop, hangars and other such work areas where it is safe to do so.

### **L7.2.7 Weight and Balance Program**

SOW Subsection 7.2.7 not applicable.

### **L7.2.8 Corrosion Prevention and Control Program**

SOW Subsection 7.2.8 not applicable.

### **L7.2.9 Fuel Surveillance Program**

The Contractor shall conduct a fuel surveillance program in accordance with LMS policies.

### **L7.2.10 Hydraulic Contamination and Prevention Program**

SOW Subsection 7.2.10 not applicable.

### **L7.2.11 Joint Oil Analysis Program (JOAP)**

SOW Subsection 7.2.11 not applicable.

## **L7.2.12 Electrostatic Discharge (ESD) Program**

SOW Subsection 7.2.12 not applicable.

## **L7.2.13 Aviators Breathing Oxygen Surveillance (ABO) Program**

SOW Subsection 7.2.13 not applicable.

## **L7.2.14 Support Equipment (SE) Program**

SOW Subsection 7.2.14 not applicable.

## **L7.2.15 Slings and Lifting Device Program**

SOW Subsection 7.2.15 not applicable.

### ***L7.2.15.1 Critical Lifts***

SOW Subsection 7.2.15.1 not applicable.

### ***L7.2.15.2 Pre-lift Documentation***

SOW Subsection 7.2.15.2 not applicable.

### ***L7.2.15.3 Slings and Rigging Equipment***

SOW Subsection 7.2.15.3 not applicable.

### ***L7.2.15.4 Suspended Load Approval***

SOW Subsection 7.2.15.4 not applicable.

## **L7.3 Maintenance Control**

The Contractor shall be responsible for reviewing and approving all NASA Form 1671A, *Aircraft Maintenance Packet*, inputs generated in NAMIS and performing documentation and system reviews using NAMIS prior to generating a NASA Form 1673A, *Flight Preparedness Report*, (refer to Subsection L7.3.1) to certify and release an aircraft safe for flight.

### **L7.3.1 Aircraft Release Authority**

The Contractor will be tasked to release aircraft safe for flight if there are no Government personnel available to do so. Refer to SOW Subsection 7.3.1.

### **L7.3.2 Static Display and Training Aircraft**

SOW Subsection 7.3.2 not applicable.

### **L7.3.3 Lightning/Sudden Severe Weather**

The Contractor shall comply with lightning/sudden severe weather requirements in accordance with LaRC standards and processes.

#### ***L7.3.3.1 Lightning Detection System***

SOW Subsection 7.3.3.1 not applicable.

#### ***L7.3.3.2 Doppler Weather Radar System***

SOW Subsection 7.3.3.2 not applicable.

## **L7.4 Scheduled and Unscheduled Maintenance**

### **L7.4.1 Aircraft Maintenance**

The Contractor shall perform two-tier scheduled and unscheduled aircraft maintenance (organizational and intermediate) in accordance with approved technical data.<sup>75</sup>

### **L7.4.2 Aviators Life Support Systems and Equipment Maintenance (Option 4 – See SOW Subsection 12.4.2)**

See SOW Subsection 7.4.2.

### **L7.4.3 Powered, Non-Powered, and Calibrated Support Equipment**

See SOW Subsection 7.4.3.

### **L7.4.4 Off-Station Maintenance**

The Contractor shall:

- 1) Follow the requirements outlined in LMS-TD-0940, *LaRC General Aircraft Maintenance Manual for RSD* for coordinating off-station repair actions.
- 2) Obtain advance approval to dispatch Contractor personnel from the NASA Maintenance to troubleshoot/repair off-station aircraft.

### **L7.4.5 Flight Line Services**

#### ***L7.4.5.1 Aircraft Ground Handling/Serviceing***

See SOW Subsection 7.4.5.1.

---

<sup>75</sup> See Appendix B for definitions of “scheduled” and “unscheduled” maintenance.

### **L7.4.5.2 Launch and Recovery**

See SOW Subsection 7.4.5.2.

### **L7.4.5.3 Aircraft Ready Times**

The Contractor shall ensure all aircraft are ready for flight to meet the timelines specified in LMS operations policies.

## **L7.5 Production Control**

SOW Subsection 7.5 not applicable.

## **L7.6 Support Services**

### **L7.6.1 General**

The Contractor shall provide support services for scheduled and unscheduled maintenance to include the repair, alteration, fabrication, test and check, reclamation, rebuild and overhaul of parts, assemblies, sub-assemblies and end-items in accordance with approved technical data.<sup>76</sup> Example services include:

- 1) Electrical Systems
- 2) Communications and Navigation (COM/NAV) Systems
- 3) Sheetmetal and Composites
- 4) Battery
- 5) Machining
- 6) Test and Check Capabilities
- 7) Rework, repair and inspecting powered and non-powered support equipment
- 8) Calibration of designated equipment

### **L7.6.2 Component Repair Listing**

SOW Subsection 7.6.2 not applicable.

### **L7.6.3 Support Shop Test Equipment and Tooling**

SOW Subsection 7.6.3 not applicable.

### **L7.6.4 Support Equipment Shop**

SOW Subsection 7.6.4 not applicable.

---

<sup>76</sup> See Subsection 1.5.2.1 for LaRC facility listing.

### **L7.6.5 Egress Systems Shop (Option 4 – See SOW Subsection 12.4.3)**

The Contractor shall be responsible for maintaining the ejection seats for current OV-10s and any future aircraft requirements.

Example responsibilities include:

- 1) Ensure all egress maintenance, to include removal and installation, inspection, repair, and modification shall be accomplished in accordance with AFI 21-101, *Aircraft and Equipment Management, Chapter 16* and other egress or OEM specific technical data as applicable.
- 2) Utilize approved demand response team when directed by technical data during any task requiring the removal/installation of explosive components, and during egress final inspections.
- 3) Ensure only trained and qualified egress personnel install and remove parachutes and survival kits that are integral parts of ejection seats.

#### **L7.6.5.1 Egress Support Equipment**

SOW Subsection 7.6.5.1 not applicable.

#### **L7.6.5.2 Aircraft Canopy System**

SOW Subsection 7.6.5.2 not applicable.

#### **L7.6.5.3 Survival Beacon Activation**

SOW Subsection 7.6.5.3 not applicable.

#### **L7.6.5.4 Explosives**

##### **L7.6.5.4.1 Egress Work Center Explosive Locker**

SOW Subsection 7.6.5.4.1 not applicable.

##### **L7.6.5.4.2 Storage**

See SOW Subsection 7.6.5.4.2.

##### **L7.6.5.4.3 Transportation**

SOW Subsection 7.6.5.4.3 not applicable.

##### **L7.6.5.4.4 Defects**

See SOW Subsection 7.6.5.4.4.

### **L7.6.6 Personal Equipment Shop**

The Contractor shall operate the personal equipment shop as delineated in LMS directives. The Contractor shall:

- 1) Maintain records for each individual requiring flight gear.
- 2) Provide assistance to aircrew to ensure personal flight equipment fits properly.
- 3) Clean and maintain flight gear in accordance with approved technical data.

- 4) Fabricate and repair soft goods, both aircraft related and non-aircraft related. Pattern making and sewing skills are required to manufacture items, such as seat cushion covers, flight clothing bags, aircraft intake covers, equipment covers, aircraft forms bags, aircraft interior panel/seat covers, any items per engineering or end user drawings, and applicable technical data.
- 5) Fabricate labels, signs, and nametags.
- 6) Maintain, inspect, and replenish first aid kits.
- 7) Handle, store, and forecast explosive devices utilized to support in-flight clothing and personal equipment.
- 8) Maintain, inspect and set up night vision goggles in accordance with manufacturer's instructions.
- 9) Inspect, test, build-up, repair, and assemble smoke masks in accordance with approved technical data.
- 10) Maintain flight crew oxygen masks in accordance with approved technical data.
- 11) Maintain storage noted below:
  - a. Bonded Storage Area
    - i. Maintain bonded storage areas for personal parachute assemblies (PPAs) and their components.
  - b. Pyrotechnic Storage Locker
    - i. Maintain a pyrotechnic storage locker for PPA bonded pyrotechnic devices and a locker for flares and pyrotechnics for automatic release devices in accordance with USAF T.O.'s 11A10-26-7, *Pyrotechnic Signals*, 11A10-30-7, *Specialized Storage and Maintenance Procedures for Pyrotechnic Fuses and Fire Starters and Deming Flare* and 11P-1-7, *Specialized Storage and Maintenance Procedures for Cartridges for Aircrew Escape Systems*.
- 12) Maintain Survival Kits for specific flight missions as required.
- 13) Maintain Radios/Beacons
  - a. Inspect, test, and change limited life items for radios and beacons in accordance with the manufacturer's instructions.

### **L7.6.7 Maintain Pressure Suits and Equipment**

SOW Subsection 7.6.7 not applicable.

### **L7.6.8 Power Plant (Engine) Shop**

SOW Subsection 7.6.8 not applicable.

### **L7.6.9 Weld Shop**

SOW Subsection 7.6.9 not applicable.

### **L7.6.10 Non-Destructive Inspection (NDI) Shop**

SOW Subsection 7.6.10 not applicable.

## **L7.7 T-38 Simulator**

SOW Subsection 7.7 not applicable.

## **L7.8 Forward Operating Locations**

SOW Subsection 7.8 not applicable.

### **L7.8.1 El Paso**

SOW Subsection 7.8.1 not applicable.

### **L7.8.2 Edwards**

See SOW Subsection 7.8.2 not applicable.

# 8.0 Engineering

## 8.1 General Requirements

### 8.1.1 Overview

*Category: Cost*

The Contractor shall provide engineering support services for aircraft, payload, and support equipment development, repairs, and upgrades. The Contractor shall work with NASA engineers as required to support mission requirements. The engineering support will cover both public use and FAA certificated aircraft. Support shall be provided in a timely manner to maximize aircraft or equipment availability.

Example engineering support services include:

- 1) Aircraft maintenance support
- 2) Aircraft sustainment (e.g. locating supportable parts or generating repair procedures)
- 3) Aircraft upgrades
- 4) Aircraft troubleshooting
- 5) Aircraft ground and flight testing
- 6) Aircraft Service Changes and Customer Bulletins evaluation
- 7) Ground support equipment design, troubleshooting, and testing
- 8) Payload integration and testing
- 9) Payload shipping fixture design
- 10) Technical specifications and supporting documentation for procurements
- 11) Technical interface with other Government agencies and commercial companies

### 8.1.2 Task Delegation

*Category: Cost*

NASA will assign individual engineering support tasks to the Contractor via a Task Transmittal as defined in AOD 33841, *Task Transmittal – Engineering (TTE)*. The Contractor shall provide a written response to the TTE per the requirements defined in AOD 33841 within three (3) workdays.

### 8.1.3 Task Support and Administration

*Category: Cost*

The Contractor shall conduct engineering tasks per the following AOD work instructions:

- 1) AOD 33820 *Engineering Projects*
- 2) AOD 33840 *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review.*
- 3) AOD 33842 *Engineering Work Order*

### 8.1.4 Engineering Schedule

*Category: Cost*

The Contractor shall provide a schedule for all assigned engineering tasks. The Contractor shall work with NASA to develop the schedule content. The Contractor shall:

- 1) Provide schedule support for all assigned tasks. Example schedule items include:
  - a. Resource allocation
  - b. Design completion
  - c. Analysis completion
  - d. Drawing release
  - e. Design reviews
  - f. Airworthiness reviews
  - g. Logistics and manufacturing
  - h. Flight, test, & payload readiness reviews
  - i. Test schedules
  - j. Engineering Work Order release schedule
- 2) Provide weekly schedule updates to NASA management.
- 3) Notify and receive approval for any schedule adjustments to NASA management as required.
- 4) Maintain baseline schedules to track schedule variance.

### 8.1.5 Engineering Cost Estimates

*Category: Cost*

The Contractor shall supply engineering cost estimates (e.g. labor hours, material costs, subcontract costs) when requested by NASA. Example cost estimates include:

- 1) Aircraft repair costs
- 2) Aircraft upgrade costs
- 3) Aircraft troubleshooting and testing costs
- 4) Aircraft payload integration costs

## 8.1.6 Engineering Reviews

### 8.1.6.1 Airworthiness Reviews

*Category: Cost*

The Contractor shall support or present engineering airworthiness reviews per AOD 33820, *Engineering Projects*.

### 8.1.6.2 Flight, Test, and Payload Readiness Reviews

*Category: Cost*

The Contractor shall support or present flight, test, and payload readiness reviews per AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.

## 8.2 Systems Engineering

*Category: Cost*

The Contractor shall institute a systems engineering process for all engineering tasks to support aircraft, payload, and ground support equipment development, repairs, or upgrades. The Contractor shall reference NASA/SP-2007-6105, *NASA Systems Engineering Handbook* for guidance. The goal of the systems engineering process is to provide optimal designs with an emphasis on increasing standardization, decreasing maintenance, and reducing technical risk. Example systems engineering tasks include:

- 1) Develop system architectures
- 2) Define and allocate requirements
- 3) Define and assess interfaces
- 4) Define, assess, and mitigate risks
- 5) Evaluate design tradeoffs to facilitate optimal designs based on cost, schedule and technical risk
- 6) Define verification and validation requirements
- 7) Support technical document development and reviews
- 8) Communicate system design goals across engineering and maintenance teams

## 8.3 Design

### 8.3.1 General Requirements

*Category: Cost*

The Contractor shall:

- 1) Conduct design and development activities in accordance with JPR 1281.4, *Design and Development*.
- 2) Reference AOD Engineering Document #8594002, *Design and Analysis Handbook, Aircraft Operations Division* for design guidance.

- 3) Conduct technical peer reviews for all engineering documentation, designs, and drawings prior to release. Example peer review tasks include:
  - a. Review documentation/drawings to minimize errors
  - b. Review documentation/drawings to ensure design suitability
  - c. Review documentation/drawings to ensure fabrication feasibility

## 8.3.2 Drafting and Computer Aided Design

### 8.3.2.1 Drawing Generation

*Category: Cost*

The Contractor shall provide drafting and Computer Aided Design (CAD) services to support aircraft, payload, and ground support equipment development, repairs, or upgrades. The CAD systems (AutoCAD and Pro/Engineer) will be Government furnished but shall be Contractor installed, operated, and maintained. The Contractor shall:

- 1) Provide drafting and CAD support. Example tasks include:
  - a. Electrical schematic generation
  - b. Printed circuit board design drawings
  - c. Wire list generation
  - d. Mechanical design drawings
  - e. Sheet metal design drawings
  - f. Structural design drawings
  - g. System level drawing generation
  - h. Aircraft configuration drawings
  - i. Drawing trees
  - j. Generating and maintaining CAD standards
- 2) Create all designs and drawings using the AutoCAD or Pro/Engineer CAD systems. The CAD software versions shall be compatible with current AOD versions.
- 3) Create and maintain all drawings in accordance with AOD 33849, *Engineering Work Instruction, Engineering Drawing Format, Requirements, and Procedures*.
- 4) Place a priority on using Pro/Engineer for mechanical/structural design tasks.
- 5) Receive approval for all changes or upgrades to the CAD system software or drawing standards by the AOD Engineering Branch Chief.
- 6) Scan or convert all drawings into Portable Document Format (PDF).
- 7) Provide access to all newly created or modified engineering drawings in both Portable Document Format (PDF) and native file formats. One PDF file shall contain all of the drawing sheets and Drawing Change Notices (DCNs) for one drawing/document number.
- 8) Support NASA civil servant CAD system installation and maintenance when requested by NASA.

### 8.3.2.2 Drawing Checking

*Category: Cost*

The Contractor shall ensure that all drawings are checked per AOD 33849, *Engineering Work Instruction, Engineering Drawing Format, Requirements, and Procedures* prior to release to minimize drawing and design errors and ensure drawings meet AOD 33849 standards.

### 8.3.2.3 Scanning and Duplication

*Category: Cost*

The Contractor shall provide scanning and duplication support services. Example tasks include:

- 1) Provide maintenance services for Government provided scanning, duplicating, and aperture card reader equipment.
- 2) Provide support to scan, electronically store, and print paper copies of engineering drawings up to “J” size (34” wide x 48” to 144” long).<sup>77</sup>
- 3) Provide support to print paper copies of drawings from aperture cards up to “C” size (17” x 22”).<sup>77</sup>
- 4) Provide support to print drawings up to “J” size at the El Paso forward operating location.

### 8.3.3 Electrical Engineering

*Category: Cost*

The Contractor shall provide electrical engineering services to support aircraft, payload, and ground support equipment development, repairs, or upgrades. Example electrical engineering tasks include:

- 1) Avionics integration (Aeronautical Radio Incorporated (ARINC) and Mil-Std data buses)
- 2) Line Replaceable Unit (LRU) design and integration
- 3) Circuit design (analog and digital)<sup>78</sup>
- 4) Wire harness design
- 5) Payload electrical interface design
- 6) Data recorder programming and data post-processing (e.g. Ballard Technology data recorders, Ballard CoPilot analysis software, Aeroflex Datatrac, reduced gravity accelerometer data recorder)
- 7) Troubleshooting using electrical and avionics test equipment (e.g. multimeters, oscilloscopes, avionics test equipment, buss analyzers, aircraft ground support equipment)

---

<sup>77</sup> This service shall be accessible by all AOD Engineering Branch members (contractor and civil servant).

<sup>78</sup> NASA may implement a new Computer Aided Design software package for electrical design during the life of the contract. If NASA does make this change, the Contractor shall support the migration to the new system.

### 8.3.4 Mechanical/Aerospace Engineering

*Category: Cost*

The Contractor shall provide mechanical/aerospace engineering services to support aircraft, payload, or ground support equipment development, repairs, or upgrades. Example mechanical/aerospace engineering tasks include:

- 1) Repairs to aircraft or equipment that are beyond the scope of DoD Technical Orders, manufacturer's repair manuals, or routine aircraft maintenance manuals
- 2) Material Review Board (MRB) generation per AOD 33842, *Preparation of Engineering Work Orders*
- 3) Sheet metal design
- 4) Machined component design
- 5) Welded component design
- 6) Composite design
- 7) Pneumatic and hydraulic system design

### 8.3.5 Quality Engineering

*Category: Cost*

The Contractor shall provide quality engineering services to support aircraft, payload, and ground support equipment development, repairs, and upgrades. Example quality engineering tasks include:

- 1) Ensure, design, fabrication, modification/integration instructions (e.g. EWOs), and inspection processes satisfy NASA, FAA, and other statutory requirements as applicable
- 2) Review drawings to ensure proper process callouts (e.g. heat treat, weld inspection, coatings, plating, electrical fabrication requirements, etc.)
- 3) Identify critical components and corresponding inspection requirements
- 4) Perform root cause analyses and develop corrective actions
- 5) Perform Failure Modes and Effects Analysis (FMEA)
- 6) Perform trend analysis
- 7) Coordinate quality and inspection processes for components fabricated via subcontract (e.g. dimensional inspection, weld inspection)
- 8) Provides inspection skill training

## 8.4 Analysis

### 8.4.1 Structural Analysis

*Category: Cost*

The Contractor shall provide structural analysis services to substantiate aircraft, payload, or ground support equipment development, repairs, or upgrades. Structural analyses shall be prepared and documented per AOD Engineering Document #8594001, *Preparation of Stress Analysis Reports*.

Example tasks include:

- 1) Handbook calculations and finite element analyses of airframe structures
- 2) Handbook calculations and finite element analyses of payload structures
- 3) Handbook calculations and finite element analyses of ground support equipment
- 4) Handbook calculations and finite element analyses for aircraft repairs
- 5) Weight and balance calculations

### 8.4.2 Electrical Analysis

*Category: Cost*

The Contractor shall provide electrical analysis services to substantiate aircraft, payload, or ground support equipment development, repairs, or upgrades. Example tasks include:

- 1) Electrical loads analysis
- 2) Circuit analysis
- 3) Radio Frequency (RF) analysis including antenna pattern analysis, interference, and usage
- 4) Bus analysis
- 5) Timing analysis
- 6) Electromagnetic Interference (EMI) or Radio Frequency Interference (RFI) analysis

### 8.4.3 Failure Mode Effects and Criticality Analysis (FMECA)

*Category: Cost*

The Contractor shall perform failure mode effects and criticality analyses when requested by NASA. The FMECA shall meet the intent of MIL-STD-1629, *Procedures for Performing a Failure Mode, Effects and Criticality Analysis* and NASA/SP-2007-6105, *NASA Systems Engineering Handbook*.

### 8.4.4 Hazard Analysis

*Category: Cost*

The Contractor shall perform hazard analyses when requested by NASA. Hazard analyses for aircraft, payloads, and support equipment shall be in accordance with AOD 33840, *Flight Readiness Review, Test Readiness Review, and Payload Readiness Review*.

## 8.5 Engineering Troubleshooting & Testing

### 8.5.1 Engineering Troubleshooting

*Category: Cost*

The Contractor shall provide engineering troubleshooting services to assist maintenance personnel in resolving aircraft, payload, and ground support equipment issues. The goal shall be to resolve issues quickly to minimize aircraft downtime. Example engineering troubleshooting tasks include:

- 1) Diagnosing and resolving aircraft equipment failures
- 2) Diagnosing and resolving electrical or mechanical interface issues between NASA aircraft and customer payloads

The Contractor shall:

- 1) Provide engineering troubleshooting support on-call, twenty-four (24) hours a day based on mission demands
- 2) Provide on-the-aircraft engineering troubleshooting support as required at NASA Centers, NASA forward operating location, or other CONUS or OCONUS location based on mission demands

### 8.5.2 Engineering Testing

*Category: Cost*

The Contractor shall provide engineering test services for aircraft, payloads, and ground support equipment. Example testing tasks include:

- 1) Develop ground and flight test plans
- 2) Verify and validate the operation and safety of new designs, upgrades, and repairs
- 3) Flight Testing – Select instrumentation, perform data collection, and analyze data to evaluate aircraft system performance and identify flight anomalies. Flight test plans and reports shall be per AOD 33843, *Flight Test, Aircraft Operations Division*
- 4) Ground Testing – Select instrumentation, perform data collection, and analyze data for aircraft and payload systems to evaluate system performance and identify anomalies
- 5) Bench Testing – Perform integration and testing of new or modified systems to verify operation and identify anomalies
- 6) Perform troubleshooting using schematics and diagnostic equipment to support maintenance personnel
- 7) Perform propulsion system performance assessments
- 8) Generate test reports

### 8.5.3 Engineering Test Equipment

*Category: Cost*

The Contractor shall maintain inventory and provide check-in and check-out services for engineering test equipment. Example test equipment includes:

- 1) Multi-meters
- 2) Test equipment
- 3) Flight test data recorders
- 4) Test cables, connectors, probes
- 5) Data buss analyzers
- 6) Computer equipment
- 7) Cameras

### 8.6 Engineering Logistics Liaison

*Category: Cost*

The Contractor shall provide engineering logistics liaison services. The logistics liaison shall serve as an interface between the engineering group and the Contractor logistics group and shall reside in the AOD engineering branch. Example engineering logistics tasks include:

- 1) Supporting NASA engineering team members to review bill of materials on engineering drawings for accuracy and completeness.
- 2) Generating parts lists based on Bill of Materials or via engineering request.
- 3) Generating procurement requests to the Contractor logistics group.
- 4) Tracking part status working with the Contractor logistics group to ensure timely part arrival.
- 5) Providing delivery status reports by project to engineering as requested.
- 6) Identifying delivery issues and develop plan of action to resolve.
- 7) Coordinating the build-up of aircraft upgrade and payload integration kits.

## 8.7 Engineering Technical Writing Liaison

*Category: Cost*

The Contractor shall provide engineering technical writing liaison services. The technical writing liaison shall serve as an interface between the engineering group and the AOD documentation group and shall reside in the AOD engineering branch. Documentation development and revisions shall be in accordance with AOD 34100, *Maintenance Manual*. Example technical writing tasks include:

- 1) Review and provide input for technical order (T.O.) revisions based on engineering repairs, upgrades, or revisions (e.g. AOD Form 21 generation support per AOD 34100, *Maintenance Manual*).
- 2) Provide input for flight manual revisions based on engineering upgrades or revisions.
- 3) Support the development of engineering work instructions or revisions.
- 4) Engineering report or documentation generation support.

## 8.8 Supplementary Engineering Support Services

*Category: Cost*

The Contractor shall provide the engineering support services listed in SOW Subsections 8.8.1 through 8.8.5 below. These services shall support surges in engineering workload or provide supplementary support for projects requiring unique engineering specialties. The Contractor shall:

- 1) Coordinate a meeting with NASA within three (3) workdays following task assignment for initial discussions.
- 2) Commence work on the assigned task within fifteen (15) workdays following NASA request or per mutually agreed schedule at time of task assignment.
- 3) Deliver all non-proprietary reports, computer models, and electronic files generated by the support service provider to NASA.
- 4) Provide all non-proprietary data to NASA in the native file format of the originating system. For example, a finite element analysis model created using MSC NASTRAN, shall be delivered to NASA in the original MSC NASTRAN format.

## 8.8.1 Structural Analysis

*Category: Cost*

The Contractor shall provide structural analysis services to supplement the analysis requirements listed in SOW Subsection 8.4.1. Structural analyses shall be prepared and documented per AOD Engineering Document #8594001, *Preparation of Stress Analysis Reports*. In addition to the requirements listed in SOW Subsection 8.4.1, the structural analysis service provider shall provide the following analysis support:

- 1) Non-linear analysis (e.g. buckling/stability)
- 2) Vibration analysis
- 3) Composites analysis
- 4) Pressure vessel analysis

## 8.8.2 Aerodynamic Analysis

*Category: Cost*

The Contractor shall provide aerodynamic analysis services to support aircraft and payload development, repairs, or upgrades. Example aerodynamic analysis tasks include:

- 1) Perform assessments of the aeronautical impacts of aircraft alterations on aircraft stability, control, and performance.
- 2) Perform assessments of aerodynamic loading on aircraft structures and flight controls.
- 3) Perform aerodynamic assessment of payload installations.
- 4) Perform flutter analysis.

## 8.8.3 Materials Engineering & Testing

*Category: Cost*

The Contractor shall provide materials engineering and testing services. Example materials engineering and testing tasks include:

- 1) Root cause analysis of component failures due to fatigue, corrosion, wear, overloading, or other failure modes.
- 2) Recommendations for materials selection based on aircraft or ground support equipment design or repairs.
- 3) Mechanical testing. Test lab shall be accredited by the American Association for Laboratory Accreditation (A2LA) for testing aerospace grade materials.

## 8.8.4 Software Engineering

*Category: Cost*

The Contractor shall provide software engineering services to support aircraft, payload, and ground support equipment development, repairs, and upgrades. When requested by NASA, the Contractor shall follow NPR 7150.2A *NASA Software Engineering Requirements*. Example software engineering tasks include:

- 1) Data recorder programming and data post-processing (e.g. Government provided equipment: Ballard Technology data recorders, Ballard CoPilot analysis software, Aeroflex Datatrac, reduced gravity accelerometer data post-processing).
- 2) Line Replaceable Unit (LRU) software development or modification (e.g. Government provided equipment: in-house designed T-38 combined electronics unit).
- 3) Avionics special test equipment software development or modification (e.g. Government provided equipment: in-house designed T-38 combined electronics unit special test equipment).
- 4) Software programming support. Example programming languages may include: C++, Java, SQL, and Microsoft .NET framework.
- 5) Simulation software applications (e.g. Spice, MATLAB, Mathematica, Simulink).
- 6) Macro generation for Microsoft products.

## 8.8.5 FAA Designated Engineering Representative Support

*Category: Cost*

The Contractor shall provide FAA appointed Designated Engineering Representative (DER) services in the appropriate engineering discipline when required for repairs or alterations on FAA type-certificated aircraft or per NASA request.

# L8.0 Engineering – LaRC Center Unique

(Option – 4, See SOW Subsection 12.4.4)

*Category: Cost (SOW Subsections L8.1 through L8.8.5)*

The requirements listed in SOW Subsections L8.1 through L8.8.5 shall apply to Langley Research Center.

## L8.1 General Requirements

### L8.1.1 Overview

The Contractor shall provide engineering support services for aircraft, payload, and support research equipment development, repairs, and upgrades. The Contractor shall work with NASA engineers as required to support mission requirements. The engineering support will cover both public use and FAA certificated aircraft. Support shall be provided in a timely manner to maximize aircraft or equipment availability. Example engineering support services include:

- 1) Aircraft maintenance support
- 2) Aircraft sustainment (e.g. locating supportable parts or repair procedures)
- 3) Aircraft upgrades
- 4) Aircraft troubleshooting
- 5) Aircraft ground and flight testing
- 6) Aircraft Service Changes and Customer Bulletins evaluation
- 7) Ground support equipment design, troubleshooting, and testing
- 8) Payload integration and testing
- 9) Technical specifications and supporting documentation for procurements
- 10) Technical interface with other Government agencies and commercial companies

### L8.1.2 Task Delegation

SOW Subsection 8.1.2 not applicable.

### L8.1.3 Task Support and Administration

SOW Subsection 8.1.3 not applicable.

### L8.1.4 Engineering Schedule

SOW Subsection 8.1.4 not applicable.

### L8.1.5 Engineering Cost Estimates

SOW Subsection 8.1.5 not applicable.

## **L8.1.6 Engineering Programs**

See SOW Subsection 8.1.6.

### ***L8.1.6.1 Airworthiness Reviews***

The Contractor shall support or present engineering airworthiness reviews in accordance with LaRC directives.

### ***L8.1.6.2 Flight, Test, and Payload Readiness Reviews***

The Contractor shall support or present flight, test, and payload readiness reviews per LaRC directives.

## **L8.2 Systems Engineering**

SOW Subsection 8.2 not applicable.

## **L8.3 Design**

### **L8.3.1 General Requirements**

SOW Subsection 8.3.1 not applicable.

### **L8.3.2 Drafting and Computer Aided Design**

#### ***L8.3.2.1 Drawing Generation***

The Contractor shall provide drafting and Computer Aided Design (CAD) services to support aircraft, payload, and ground support equipment development, repairs, or upgrades. The CAD systems (AutoCAD and Pro/Engineer) will be Government furnished but shall be Contractor installed, operated, and maintained. The Contractor shall:

- 1) Provide drafting and CAD support. Example tasks include:
  - a. Electrical schematic generation
  - b. Printed circuit board design drawings
  - c. Wire list generation
  - d. Mechanical design drawings
  - e. Sheet metal design drawings
  - f. Structural design drawings
  - g. System level drawing generation
  - h. Aircraft configuration drawings
  - i. Drawing trees
  - j. Generating and maintaining CAD standards
- 2) Create all designs and drawings using the AutoCAD or Pro/Engineer CAD systems. The CAD software versions shall be compatible with current AOD versions.

- 3) Create and maintain all drawings in accordance with LaRC Center processes and LMS procedures.
- 4) Place a priority on using Pro/Engineer for mechanical/structural design tasks.
- 5) Receive approval for all changes or upgrades to the CAD system software or drawing standards by the designated evaluator.
- 6) Scan or convert all drawings into Portable Document Format (PDF).
- 7) Provide access to all newly created or modified engineering drawings in both Portable Document Format (PDF) and native file formats. One PDF file shall contain all of the drawing sheets and Drawing Change Notices (DCNs) for one drawing/document number.
- 8) Support NASA civil servant CAD system installation and maintenance when requested by NASA.

### **L8.3.2.2 Drawing Checking**

The Contractor shall ensure that all drawings are checked prior to release to minimize drawing and design errors and ensure drawings meet LaRC drawing standards.

### **L8.3.2.3 Scanning and Duplication**

The Contractor shall provide scanning and duplication support services as required.

## **L8.3.3 Electrical Engineering**

The Contractor shall provide electrical engineering services to support aircraft, payload, and ground support equipment development, repairs, or upgrades. Example electrical engineering tasks include:

- 1) Avionics integration (ARINC and Mil-Std data buses)
- 2) Line Replaceable Unit (LRU) design and integration
- 3) Circuit design (analog and digital)
- 4) Wire harness design
- 5) Payload electrical interface design
- 6) Data recorder programming and data post-processing
- 7) Troubleshooting using electrical and avionics test equipment (e.g. multimeters, oscilloscopes, avionics test equipment, buss analyzers, aircraft ground support equipment)

## **L8.3.4 Mechanical/Aerospace Engineering**

The Contractor shall provide mechanical/aerospace engineering services to support aircraft, payload, or ground support equipment development, repairs, or upgrades. Example mechanical/aerospace engineering tasks include:

- 1) Repairs to aircraft or equipment that are beyond the scope of DoD Technical Orders, manufacturer's repair manuals, or routine aircraft maintenance manuals
- 2) Sheet metal design
- 3) Machined component design
- 4) Composite design

### **L8.3.5 Quality Engineering**

SOW Subsection 8.3.5 not applicable.

## **L8.4 Analysis**

### **L8.4.1 Structural Analysis**

The Contractor shall provide structural analysis services to substantiate aircraft, payload, or ground support equipment development, repairs, or upgrades. Example structural analysis tasks include:

- 1) Handbook calculations and finite element analyses of airframe structures
- 2) Handbook calculations and finite element analyses of payload structures
- 3) Handbook calculations and finite element analyses of ground support equipment
- 4) Handbook calculations and finite element analyses for aircraft repairs
- 5) Weight and balance calculations

### **L8.4.2 Electrical Analysis**

See SOW Subsection 8.4.2.

### **L8.4.3 Failure Mode Effects and Criticality Analysis (FMECA)**

See SOW Subsection 8.4.3.

### **L8.4.4 Hazard Analysis**

The Contractor shall perform hazard analyses when requested by NASA. Hazard analyses for aircraft, payloads, and support equipment shall be in accordance with LaRC/LMS directives.

## **L8.5 Engineering Troubleshooting & Testing**

### **L8.5.1 Engineering Troubleshooting**

See SOW Subsection 8.5.1.

### **L8.5.2 Engineering Testing**

The Contractor shall provide engineering test services for aircraft, payloads, and ground support equipment. Example testing tasks include:

- 1) Develop ground and flight test plans
- 2) Verify and validate the operation and safety of new designs, upgrades, and repairs
- 3) Flight Testing – Select instrumentation, perform data collection, and analyze data to evaluate aircraft system performance and identify flight anomalies.

- 4) Ground Testing – Select instrumentation, perform data collection, and analyze data for aircraft and payload systems to evaluate system performance and identify anomalies
- 5) Bench Testing – Perform integration and testing of new or modified systems to verify operation and identify anomalies
- 6) Perform troubleshooting using schematics and diagnostic equipment to support maintenance personnel
- 7) Perform propulsion system performance assessments
- 8) Generate test reports

### **L8.5.3 Engineering Test Equipment**

SOW Subsection 8.5.3 not applicable.

## **L8.6 Engineering Logistics Liaison**

SOW Subsection 8.6 not applicable.

## **L8.7 Engineering Technical Writing Liaison**

SOW Subsection 8.7 not applicable.

## **L8.8 Supplementary Engineering Support Services**

SOW Subsection 8.8 not applicable.

### **L8.8.1 Structural Analysis**

SOW Subsection 8.8.1 not applicable.

### **L8.8.2 Aerodynamic Analysis**

SOW Subsection 8.8.2 not applicable.

### **L8.8.3 Materials Engineering & Testing**

SOW Subsection 8.8.3 not applicable.

### **L8.8.4 Software Engineering**

SOW Subsection 8.8.4 not applicable.

### **L8.8.5 FAA Designated Engineering Representative Support**

SOW Subsection 8.8.5 not applicable.

## 9.0 Logistics

### 9.1 General Requirements

*Category: Cost*

The Contractor shall provide logistics support services for the locations listed in SOW Subsection 2.2.1. The Contractor shall utilize the NASA Aircraft Management Information System (NAMIS) in accordance with SOW Subsection 4.12.1 of this SOW for all functional areas and processes required to support logistics. More information on the functional areas and logistics processes supported by NAMIS can be found in AOD 33862, *Volume IV NAMIS Requirements – Aircraft Logistics System Level 5 Requirements*.<sup>79</sup>

### 9.2 Deliverables – Logistics

*Category: Cost*

The Contractor shall provide the logistics deliverables listed in Table 9-1.

**Table 9-1: Data Requirement Description - Logistics<sup>80</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-L01	Reports Required for Logistics
DRD-L02	Contractor Logistics Operating Plan
DRD-L03	Government Property Management Plan

<sup>79</sup> AOD tracks over 50,000 line items in the NAMIS parts catalog for supply. The aircraft logistics support function generates in excess of 160,000 requisitions, issue, receive, and return transactions per year, with a significantly higher number of system inquiries. Approximately 60 percent of the total number of parts is obtained from DoD sources. The Contractor obtains the remainder via local purchase. NAMIS interfaces to the NASA Integrated Enterprise Management Program (IEMP) System for financial accountability, the Defense Automatic Addressing System Office (DAASO) Automated Message Exchange System (DAMES) for requisitioning spares through DoD, and an interface with the Air Force's D043 master parts catalog. In addition, there is an interface between NAMIS and the Contractor's financial accounting system.

<sup>80</sup> Refer to contract Section J, Appendix J1 for DRD requirements.

## 9.3 Logistics Services

*Category: Cost*

The Contractor shall provide the logistics services listed below:

- 1) Inventory Management
  - a. Material warehousing
  - b. Stock control/replenishment
  - c. Reverse posting of supply asset deliveries
  - d. Stock rotation
  - e. Supply issue points
  - f. Physical inventories
  - g. Wall-to-wall inventories
  - h. Contract transition inventories
  - i. Inquiries
  - j. Material issue processing to include parts issue counter
  - k. Bench stock management and processing
  - l. Shop stock management and processing
  - m. Shelf-life management
  - n. Material/asset turn-in processing (DIFM)
  - o. Kitting
    - i. Project kits
    - ii. Flyaway (deployment) kits
    - iii. Aircraft change directive kits
  - p. Excess and Disposal
- 2) Property Control
- 3) Cataloging
  - a. Classification of parts
  - b. Categorizing parts
  - c. Tagging and labeling parts
  - d. Grouping parts
  - e. Environmental control requirements
- 4) Acquisition
  - a. Subcontracts
  - b. Purchasing
  - c. Requisition
    - i. Public use aircraft
    - ii. Certificated aircraft
    - iii. NASA configuration items
  - d. Warranty Program
  - e. Material Receipt Processing
    - i. Material receiving
    - ii. Pilferable item security
    - iii. Verification of Purchased Products

1. Supply Discrepancy Reporting (SDR) Program
  - a. DOD Parts
  - b. Commercial Parts
- iv. Functional checks
- v. Hazardous materials
  1. Chemicals
  2. Explosives
- 5) Pyrotechnics Logistics Management
- 6) Shipping and Receiving
  - a. Special handling requirements
    - i. Over-size deliveries
    - ii. Rigging and heavy hauling support
    - iii. Escorts
    - iv. Premium transportation services
    - v. NASA aircraft transportation
- 7) Courier Services
- 8) Deployment Support

## 9.4 Logistics Service Details

### 9.4.1 Inventory Management

#### 9.4.1.1 Warehouse Safety and Health

*Category: Cost*

The Contractor shall maintain warehouse safety and health in accordance with processes contained in JPR 1700.1, *Safety and Health Handbook*.

#### 9.4.1.2 Inquiries

*Category: Cost*

The Contractor shall respond to inquiries for information such as part number verification, asset availability, inventory count of an individual item, part number/serial number searches, Government industry data exchange program (GIDEP) alert research and requests to physically view material within two (2) hours from initial request during normal work hours listed in SOW Subsection 4.1.2.

### **9.4.1.3 Awaiting Parts (AWP) Disposition**

*Category: Cost*

The Contractor shall accomplish the following tasks if a DoD unserviceable end-item has been in an AWP status for sixty (60) days.

- 1) Contact the appropriate DoD Logistics Item Manager responsible for the piece parts or serviceable repairable unit (SRU) to get the most current status on the open requisition(s).
- 2) If delivery of the bits and pieces or SRU cannot be guaranteed within thirty (30) days, the Logistics Manager will contact the NASA Manager and request disposition of the end-item.

### **9.4.1.4 Excess and Disposal**

#### **9.4.1.4.1 Excess and Disposal of Government Property**

*Category: Cost*

The Contractor shall:

- 1) Utilize the DoD Customer Asset Report (FTE) and Reply to Customer Asset Report (FTR) processes contained in NAMIS to report DoD excess supply stock and equipment requiring disposal prior to utilizing NASA procedures contained in JWI 4300.1, *JSC Instructions for Excess and Disposal of Government Property*.
- 2) Ensure products dispositioned for scrap are conspicuously and permanently marked, or positively controlled, until physically rendered unusable in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance Systems – Aerospace – Requirements for Maintenance Organization*.

#### **9.4.1.4.2 Handling and Disposal of Lithium Cells/Batteries**

*Category: Cost*

The Contractor shall receive and handle all lithium cells and batteries in accordance with the processes contained in JPR 8550.1, *JSC Environmental Compliance Procedural Requirements*.

## **9.4.2 Property Control**

### **9.4.2.1 Management of Controlled Equipment**

*Category: Cost*

The Contractor shall manage sensitive, controlled and functional property assigned to JSC and managed through the Property, Plant and Equipment (PP&E) System in accordance with JWI 4200.1, *Management of Controlled Equipment*.

### **9.4.2.2 Government Property**

*Category: Cost*

The Contractor shall manage, inventory, control, use, preserve, protect, repair, and maintain Government property in its possession in accordance with Federal Acquisition Regulation (FAR) Clause 52.245-1, *Government Property* and NPR 4100.1, *NASA Inventory Management Manual*. The Contractor shall prepare NASA Form 598, *Property Survey Report*, for any lost, damaged, destroyed, or stolen Government property in accordance with NPR 4200.1; *NASA Equipment Management Procedural Requirements*.

### **9.4.2.3 Control of Customer-Supplied Products**

*Category: Cost*

The Contractor shall control customer supplied products in accordance with AOD 33948, *Control of Customer-Supplied Products*.

### **9.4.2.4 Repairable Parts Center (RPC)**

*Category: Cost*

The Contractor shall establish a repairable parts center to:

- 1) Track repairable assets.
- 2) Maintain a due-in from maintenance (DIFM) system to include a repair processing center, which shall track all repairable assets from issue to return to supply.
- 3) Verify document and serial numbers, when applicable, for issued assets, transportation, and tracking of assets while in the repair cycle.

## **9.4.3 Acquisition**

### **9.4.3.1 General**

*Category: Cost*

The Contractor shall provide procurement/subcontracting acquisition services. The Contractor shall procure when possible through the NASA, Federal, or DoD supply system.

### **9.4.3.2 Expedited Sub-Contracting**

*Category: Cost*

If requested by NASA, the Contractor shall obtain services or property on an expedited basis that requires the placement of a sub-contract/purchase order. The Contractor shall notify NASA on the status of the request within three (3) working days. Special attention should be paid to obtaining the appropriate Rights in Data, when requested by NASA. Refer to SOW Subsection 9.4.3.5 for warranty information on sub-contracts.

### 9.4.3.3 Local Purchase

*Category: Cost*

The Contractor shall:

- 1) Utilize AOD Form 1307, *Purchase Request Worksheet*, for approval to purchase any item greater than \$500. This form shall be utilized for all purchases of equipment, supplies and services including fabrication, training, and sub-contracting to support the AOD mission.
- 2) Obtain approval from CO or COTR prior to ordering any new item containing a hazardous constituent.
- 3) Obtain prior approval from the CO or COTR for all commercial purchases greater than \$10,000.
- 4) Obtain CO approval on all purchase orders or sub-contracts greater than \$100,000.
- 5) Utilize the NASA Defense Priority and Allocation System rating of nine (9) for all commercial purchases.

### 9.4.3.4 DoD Requisitions

*Category: Cost*

The Contractor shall:

- 1) Ensure funding is available for DoD Requisitions.
- 2) Transmit requirements to the Defense Automated Message Exchange System (DAMES) on a daily basis.
- 3) Ensure that NAMIS purchase order amounts are updated based on DAMES response showing the unit price for items that have been shipped.
- 4) Ensure retro-grade carcasses are returned within 30-days for each Expendability, Recoverability, Reparability Category (ERRC) "T" item requisitioned.
- 5) Reconcile DoD invoices, Military Standard Billing System (MILSBILLS) with actual orders and receipts in NAMIS. Utilize assistance from the NASA Disbursement Office as required.
- 6) Provide a five-year requirements data exchange list (RDEL) for all ERRC "T" items in accordance with AFMCMAN 23-1, Chapter 27, *Requirements for Secondary Items*.
- 7) Input Requirement Data Exchanges via the Defense Automatic Addressing System (DAAS) in accordance with AFMCMAN 23-1, Chapter 27, *Requirements for Secondary Items*.

### 9.4.3.5 Warranty Program

*Category: Cost*

The Contractor shall:

- 1) Provide any benefits to NASA that would accrue or be due from commercial warranties received with the purchase and repair of materials, parts, and equipment under this contract.
- 2) Ensure all sub-contracts/purchase orders contain warranties covering design and manufacturing requirements, defects in materials and workmanship, and essential performance requirements.

### 9.4.3.6 Verification of Purchased Products

Category: Cost

The Contractor shall establish and implement the inspection or other activities necessary for ensuring that purchased products meet specified purchase requirements in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization*.

### 9.4.3.7 Supply Discrepancy Reporting (SDR) Program

Category: Cost

The Contractor shall report parts received from DoD and Commercial sources that are identified as defective or suspect as follows:

#### **For DoD Parts:**

The Contractor shall:

- 1) Report any part received from DoD that is identified as defective or suspect via the DoD Defense Automatic Addressing System Center (DAASC), WEBBASED Supply Discrepancy Reporting System (WEBSDR)<sup>81</sup>
- 2) Segregate parts reported under the WebSDR from normal stock pending disposition from DoD sources.
- 3) Conduct follow-up action on any SDR within thirty (30) calendar days from initial report submission.

#### **For Commercial Parts:**

The Contractor shall:

- 1) Report suspect parts under the Suspect Unapproved Parts (SUP) Program using FAA Form 8120-11, Sup Report.

---

<sup>81</sup> Access to WebSDR may be obtained by completing an online system access request (SAR) from the DAASC website: <https://www.daas.dla.mil>.

### 9.4.3.8 Material Processing Timelines

Category: Cost

The Contractor shall:

- 1) Process material requests for items in stock within two (2) hours of initial request.
- 2) Process material request for items not in stock by close of business the day after the item is received in supply, unless the material falls under the priority receipt definition.
- 3) Process priority receipts on the same day the item is received. Priority receipts are defined as
  - a. Hazardous Materials
  - b. Communications security (COMSEC)
  - c. Medical items or drugs
  - d. Work stoppage items
  - e. Receipts requiring special handling
- 4) Process routine receipts (items that do not meet priority receipt definition) no later than the second (2<sup>nd</sup>) work day after receipt of item.

### 9.4.4 Pyrotechnics Logistics Management

Category: Cost

The Contractor shall:

- 1) Follow the provisions outlined in JPD 4500.1F, *Pyrotechnics – Logistics Management*. Example tasks include:
  - a. Pick-up, control, store, issue, document, transport and dispose of JSC pyrotechnics in support of JSC AOD activity and crew survival pyrotechnics up to Class 1.3C.
  - b. Establish and implement inventory controls to provide identification, traceability, and reporting of pyrotechnics.
  - c. Maintain all records associated with explosive devices to meet all reporting requirements required by law and regulations. These records shall be made available within two (2) hours from initial request to the Government during surveillance audits and during the annual explosive handling certifications conducted by NASA personnel in accordance with JPD 4500.1, *Pyrotechnics – Logistics Management*.
- 2) Forecast pyrotechnic device replacement requirements for cartridge actuated devices (CAD) and propellant actuated devices (PAD) and place them on order to optimize quantity cost vs. shelf life (refer to USAF Technical Order 00-20-9 for assistance).
- 3) Dispose of explosive devices in accordance with USAF T.O. 11A- 1-42, *General Instructions for Disposal of Conventional Munitions* and USAF T.O. 11A-1-60, *Inspection of Reusable Munitions Containers and Scrap Material*.

If service lives are to expire prior to replacement part delivery, then to preclude an aircraft/equipment being placed in a not mission capable (NMC) status pending receipt of a replacement item, the Contractor shall:

- 1) Determine if a service life extension is available via normal logistic support functions. If so, present proposed service life extension (SLE) and support data to NASA Engineering for review and approval.
- 2) Coordinate SLE's for pyrotechnic devices that are not readily available via normal logistic support functions with NASA Engineering.

## **9.4.5 Shipping and Receiving**

### **9.4.5.1 Export Compliance**

*Category: Cost*

The Contractor shall ship material OCONUS in accordance with all applicable laws and regulations to include export control in accordance with JWI 2190.1, *JSC Export Compliance*.

### **9.4.5.2 Identification, Handling, Storage, Packaging, Preservation and Delivery**

*Category: Cost*

The Contractor shall identify, handle, store, package, preserve, deliver, and ship products in accordance with JPR 1281.15, *Identification, Handling, Storage, Packaging, Preservation and Delivery* and USAF T.O. 00-85B-3, *How to Package Air Force Spares*.

### **9.4.5.3 Preparation and Processing of JSC Form 290, JSC Shipping Document**

*Category: Cost*

When requested by NASA, the Contractor shall coordinate Government bill of lading (GBL) for property that will be transported within CONUS or OCONUS (exported) to include commercial bill of lading (CBL) in accordance with JWI 6050.1, *How to Prepare and Process JSC Form 290, JSC Shipping Document*.

#### **9.4.5.4 Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components**

*Category: Cost*

The Contractor shall:

- 1) Use reusable containers when practical for all items that require periodic shipment to and return from repair activities and where adequate provisions to control the containers make reuse economical in accordance with NPR 6000.1H, Paragraph 2.9, *Requirements for Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components*.
- 2) Reuse packaging material to the maximum extent practicable in accordance with NPR 6000.1H, Paragraph 2.9, *Requirements for Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components*.

#### **9.4.5.5 Hazardous Material Shipments**

*Category: Cost*

The Contractor shall ensure that all shipments containing hazardous materials are packaged, packed, marked, labeled, and documented as appropriate, in accordance with the processes contained in:

- 1) Department of Transportation (DOT) Hazardous Materials Regulations in Title 49 CFR
- 2) International Civil Aviation Organizations (ICAO) Technical Instruction for the Safe Transportation of Dangerous Goods
- 3) International Maritime Organizations (IMO) Dangerous Goods Code
- 4) International Air Transport Association (IATA) Dangerous Goods Regulation

#### **9.4.5.6 Reporting and Adjusting Discrepancies in Government Shipments**

*Category: Cost*

The Contractor shall ensure shipping discrepancies are resolved and freight claims are processed in accordance with CFR Title 41, Volume 3, Ch-Part-Section 102-117, 190, *Reporting and Adjusting Discrepancies in Government Shipments*.

#### **9.4.5.7 Shipments on NASA Aircraft**

*Category: Cost*

All cargo movements onboard NASA aircraft shall be coordinated in advance with the NASA Operations Duty Officer to ensure cargo meets all Federal requirements, particularly in the transportation of hazardous materials. Hazardous cargo as defined in 49 CFR 171.8, *General Information, Regulations and Definitions*, shall not be transported on NASA mission management aircraft

## 9.4.6 Courier Services

*Category: Cost*

The Contractor shall supply courier services to pickup and deliver documents and packages to and from Ellington Field facilities, the JSC site, and Houston area locations. The Government will not provide General Services Administration (GSA) vehicles for this contract.<sup>46</sup>

## 9.4.7 Deployment Support

*Category: Cost*

When requested by NASA, the Contractor shall provide logistics personnel at deployed locations per SOW Subsection 4.9.2.

## 9.5 Support Outside Normal Work Hours

*Category: Cost*

The Contractor shall:

- 1) Assign an on-call support person in accordance with 5 CFR Section 551.431 outside the normal work hours listed in SOW Subsection 4.1.2, to provide logistics assistance to meet any of the services identified in SOW Subsection 9.0 of this SOW.
- 2) Support person shall arrive at EFD within 2-hours of initial request for assistance.

## L9.0 Logistics – LaRC Center Unique

*Category: Cost (SOW Subsections L9.1 through L9.5)*

The requirements listed in SOW Subsections L9.1 through L9.5 shall apply to Langley Research Center.

### L9.1 General Requirements

The Contractor shall provide logistics support services for the locations listed in SOW Subsection 2.2.2. The Contractor shall utilize the NASA Aircraft Management Information System (NAMIS) in accordance with SOW Subsection L4.12.1 of this SOW for all functional areas and processes required to support logistics.

### L9.2 Deliverables – Logistics

SOW Subsection 9.2 not applicable.

### L9.3 Logistics Services

The Contractor shall provide the logistics services listed below:

- 1) Inventory Management
  - a. Material Warehousing
  - b. Stock control/replenishment
  - c. Reverse posting of supply asset deliveries
  - d. Stock rotation
  - e. Supply issue points
  - f. Physical inventories
  - g. Wall-to-wall inventories
  - h. Contract transition inventories
  - i. Deployment spares
  - j. Inquiries
  - k. Material issue processing
  - l. Bench stock management and processing
  - m. Shop stock management and processing
  - n. Kitting
    - i. Project kits
    - ii. Flyaway (deployment) kits
    - iii. Aircraft change directive kits
- 2) Property Control
- 3) Cataloging
  - a. Classification of parts
  - b. Categorizing parts
  - c. Tagging and labeling parts

- d. Grouping parts
- e. Environmental control requirements
- 4) Acquisition
  - a. Requisition
    - i. Public use aircraft
    - ii. Certificated aircraft
    - iii. NASA configuration (modification) items
  - b. Material Receipt Processing
    - i. Material receiving
    - ii. Pilferable item security
    - iii. Receiving inspections
    - iv. Functional checks
    - v. Hazardous materials
      - 1. Chemicals
      - 2. Explosives

## L9.4 Logistics Service Details

### L9.4.1 Inventory Management

#### *L9.4.1.1 Warehouse Safety and Health*

SOW Subsection 9.4.1.1 not applicable.

#### *L9.4.1.2 Inquires*

See SOW Subsection 9.4.1.2.

#### *L9.4.1.3 Awaiting Parts (AWP) Disposition*

The Contractor shall accomplish the following if a DoD unserviceable end-item has been in an AWP status for sixty (60) days.

- 1) Contact the appropriate DoD Logistics Item Manager responsible for the piece parts or serviceable repairable unit (SRU) on order to repair the unserviceable item.
- 2) If delivery of the bits and pieces or SRU cannot be guaranteed within thirty (30) days, the Logistics Manager will contact the LaRC Chief of Maintenance and request disposition of the end-item.

#### *L9.4.1.4 Excess and Disposal*

SOW Subsection 9.4.1.4 not applicable.

## **L9.4.2 Property Control**

### ***L9.4.2.1 Management of Controlled Equipment***

SOW Subsection 9.4.2.1 not applicable.

### ***L9.4.2.2 Government Property***

The Contractor shall use and maintain the Government property provided by the Government.

### ***L9.4.2.3 Control of Customer-Supplied Products***

SOW Subsection 9.4.2.3 not applicable.

### ***L9.4.2.4 Repairable Parts Center (RPC)***

SOW Subsection 9.4.2.4 not applicable.

## **L9.4.3 Acquisition**

### ***L9.4.3.1 General***

See SOW Subsection 9.4.3.1.

### ***L9.4.3.2 Expedited Subcontracting***

See SOW Subsection 9.4.3.2.

### ***L9.4.3.3 Local Purchase***

The Contractor shall:

- 1) Obtain LaRC Chief of Maintenance approval for all local purchases. This includes all purchases of equipment, supplies and services including fabrication, training, and sub-contracting to support the RSD mission.
- 2) Obtain approval from CO or COTR prior to ordering any new item containing a hazardous constituent.
- 3) Obtain prior approval from the CO or COTR for all commercial purchases greater than \$10,000
- 4) Obtain CO approval on all purchase orders or sub-contracts greater than \$100,000.
- 5) Utilize the NASA Defense Priority and Allocation System rating of nine (9) for all commercial purchases.

### ***L9.4.3.4 DoD Requisitions***

See SOW Subsection 9.4.3.4.

### ***L9.4.3.5 Warranty Program***

See SOW Subsection 9.4.3.5.

### **L9.4.3.6 Verification of Purchased Products**

SOW Subsection 9.4.3.6 not applicable.

### **L9.4.3.7 Supply Discrepancy Reporting (SDR) System**

The Contractor shall report parts received from DoD and Commercial sources that are identified as defective or suspect to the LaRC Chief of Maintenance.

### **L9.4.3.8 Material Processing Timelines**

SOW Subsection 9.4.3.8 not applicable.

## **L9.4.4 Pyrotechnics Logistics Management**

SOW Subsection 9.4.4 not applicable.

## **L9.4.5 Shipping and Receiving**

### **L9.4.5.1 Export Compliance**

SOW Subsection 9.4.5.1 not applicable.

### **L9.4.5.2 Identification, Handling, Storage, Packaging, Preservation and Delivery**

SOW Subsection 9.4.5.2 not applicable.

### **L9.4.5.3 Preparation and Processing of JSC Form 290, JSC Shipping Document**

SOW Subsection 9.4.5.3 not applicable.

### **L9.4.5.4 Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components**

The Contractor shall:

- 1) Use reusable containers when practical for all items that require periodic shipment to and return from repair activities and where adequate provisions to control the containers make reuse economical in accordance with NPR 6000.1H, Paragraph 2.9, *Requirements for Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components*.
- 2) Reuse packaging material to the maximum extent practicable in accordance with NPR 6000.1H, Paragraph 2.9, *Requirements for Packing, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components*.

### **L9.4.5.5 Hazardous Material Shipments**

SOW Subsection 9.4.5.5 not applicable.

### ***L9.4.5.6 Reporting and Adjusting Discrepancies in Government Shipments***

SOW Subsection 9.4.5.6 not applicable.

### ***L9.4.5.7 Shipments on NASA Aircraft***

See SOW Subsection 9.4.5.7.

### ***L9.4.6 Courier Services***

SOW Subsection 9.4.6 not applicable.

### ***L9.4.7 Deployment Support***

See SOW Subsection 9.4.7.

## **L9.5 Support Outside Normal Work Hours**

The Contractor shall:

- 1) Assign an on-call support person in accordance with 5 CFR Section 551.431 outside the normal work hours listed in SOW Subsection L4.1.2, to provide logistics assistance to meet any of the services identified in SOW Subsection 9.0 of this SOW.

# 10.0 Quality Control

## 10.1 General Requirements

### 10.1.1 Quality Management System

*Category: FP*

The Contractor shall provide quality control services. The Contractor's quality management system (QMS) shall be certified to the quality requirements of AS-9110, *Aerospace Requirements for Aircraft Maintenance Organizations* within one year of contract award.

The Contractor's quality management system shall, as a minimum, meet the following requirements:

- 1) Federal Acquisition Regulations (FAR) and NASA FAR Supplement
- 2) NASA JPD 1280.1, *Quality Policy*
- 3) NASA JPR 1280.2, *Quality Manual*

The Contractor Quality Control shall be required to sign off on all NASA Form 1671A *Aircraft Maintenance Packet*, anomalies that meet the conditions in AOD WI 34100, *Maintenance Manual*. The Contractor may add to these requirements as deemed appropriate based on risk and criticality.

### 10.1.2 Deliverables – Quality

*Category: FP*

The Contractor shall provide the quality deliverables listed in Table 10-1.

**Table 10-1: Data Requirement Description - Quality<sup>82</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-Q01	Quality Plan
DRD-Q02	Government Industry Data Exchange Program (GIDEP) and NASA Advisory Problem Data Sharing and Utilization Program Documentation and Reporting

<sup>82</sup> Refer to Section J, Appendix J1 for DRD requirements.

### 10.1.3 NASA Quality Assurance Evaluators (QAE)

*Category: General*

NASA QAE personnel are assigned to the Aircraft Operations Division (AOD), Aircraft Quality Assurance (QA) Branch. These personnel provide monitoring and surveillance of the Contractor using the elements outlined in the SOW and Contractor's Management Plan.<sup>83</sup>

### 10.1.4 Contractor Procurement Reviews

*Category: General*

The NASA Aircraft QA Branch will review all Contractor critical and high risk procurements for the application of quality and acceptance requirements in accordance with AOD 34100, *Maintenance Manual*.

### 10.1.5 Government Access

*Category: General*

The Contractor shall allow Government representatives access to work areas, data, provide support, and not interfere with the quality assurance evaluators (QAE's), State, Federal, and other designated personnel in the performance of their official duties.

### 10.1.6 Non-Conformances

*Category: FP*

The Contractor shall take corrective action for all non-conformances (not meeting contract requirements) identified during Government/Contractor surveillance/audits and provide corrective actions to the NASA CO and COTR in accordance with AOD 34100, *Maintenance Manual*.

### 10.1.7 Corrective and Preventative Action

*Category: FP*

The Contractor shall ensure that corrective and preventative actions include a corrective and preventive action plan that addresses why the performance threshold was not met to include root cause analysis, how performance will be returned to an acceptable level(s), and how recurrence will be prevented in the future.

---

<sup>83</sup> *The Government reserves the right to conduct inspections on Government owned aircraft, engines, accessories, and other support equipment.*

## 10.1.8 Outsourced Processes

*Category: FP*

The Contractor shall ensure controls of outsourced (e.g. subcontracted) processes are identified within the scope of the Contractor's Quality Management System (QMS), in accordance with SAE AS9110, *Aerospace Standard, Quality Maintenance System – Aerospace – Requirements for Maintenance Organization*, Subsection 4.1.

## 10.1.9 Deployment Support

*Category: Cost<sup>84</sup>*

When requested by NASA, the Contractor shall provide quality control support for aircraft deployments per SOW Subsection 4.9.2.

## 10.2 Technical Library

*Category: FP*

The Contractor shall establish and maintain the Technical Library in accordance with AOD WI 34100, *Maintenance Manual*.

### 10.2.1 Aircraft Change Directives

*Category: FP*

The Contractor shall receive, review, and make recommendations to NASA on all Aircraft Change Directives (ACDs) via the use of AOD Form 1298, *Maintenance Instruction Tracking Form* in accordance with AOD WI 34100, *Maintenance Manual*.

---

<sup>84</sup> *Cost category applies to labor costs over and above those costs covered by the fixed price portion of the contract (e.g. deployment/hazardous duty pay).*

## 10.2.2 Inquires to Repairs Not Supported by Approved Technical Data

*Category: FP*

The Contractor shall ensure all discrepancies discovered on aircraft and assigned equipment are repaired in accordance with approved technical data. In the event a discrepancy is noted and the repair is not supported by approved technical data, the Contractor shall take the following actions before Engineering (NASA or Contractor) is contacted for assistance:

- 1) The Contractor shall initiate a “down” discrepancy in the NAMIS database and subsequently contact/confer with their Contractor quality personnel to validate the repair requirement. The Contractor’s Quality Control Office shall serve as the monitor for these type anomalies and will ensure a valid request is warranted.
- 2) The Contractor Quality Control Office shall review supporting technical data to determine if the repair is not supported by approved technical data. NASA Quality Assurance may be contacted if assistance is deemed warranted.
- 3) Once the validation process is complete, the Contractor Quality Control Office shall bring the appropriate technical data researched to the NASA Maintenance Manager, along with the open “downing” discrepancy to discuss the not supported by approved technical data repair requirement.

Upon completion of Items 1-3 above, the NASA Maintenance Manager will:

- 1) Determine if the repair “is” or “is not” supported by approved technical data.
- 2) Update the down discrepancy in NAMIS to indicate that the repair “is” or “is not” supported by approved technical data.

## 10.3 Deficiency Reporting

*Category: FP*

The Contractor shall ensure that deficiency reporting (DR) procedures for issue, turn-in, and storage are in accordance with T.O. 00-35D-54, *USAF Deficiency Reporting, Investigation and Resolution*. The DR shall be reported via the DoD web-based Joint Deficiency Reporting System (JDRS).

# L10.0 Quality Control – LaRC Center

## Unique (Option 4 – See SOW Subsection 12.4.5)

*Category: Cost (SOW Subsections L10.1 through L10.3)*

The requirements listed in SOW Subsections L10.1 through L10.3 shall apply to Langley Research Center.

## L10.1 General Requirements

### L10.1.1 Quality Management System

The Contractor shall perform assigned aircraft maintenance tasks in accordance with approved technical documentation and the established Quality Management System at Langley Research Center.

### L10.1.2 Deliverables – Quality

SOW Subsection 10.1.2 not applicable.

### L10.1.3 NASA Quality Assurance Evaluators (QAE)

SOW Subsection 10.1.3 not applicable.

### L10.1.4 Contractor Procurement Reviews

SOW Subsection 10.1.4 not applicable.

### L10.1.5 Government Access

SOW Subsection 10.1.5 not applicable.

### L10.1.6 Non-Conformances

SOW Subsection 10.1.6 not applicable.

### L10.1.7 Corrective and Preventative Action

SOW Subsection 10.1.7 not applicable.

### L10.1.8 Outsourced Processes

SOW Subsection 10.1.8 not applicable.

### **L10.1.9 Deployment Support**

See SOW Subsection 10.1.9.

## **L10.2 Quality Technical Library**

The Contractor shall establish and maintain the Quality Technical Library in accordance with RSD Quality Assurance Office established procedures.

### **L10.2.1 Aircraft Change Directives**

The Contractor shall receive, review, and make recommendations to NASA on all Aircraft Change Directives (ACDs).

### **L10.2.2 Inquires to Repairs Not Supported by Approved Technical Data**

SOW Subsection 10.2.2 not applicable.

## **L10.3 Deficiency Reporting**

SOW Subsection 10.3 not applicable.

# 11.0 Safety

## 11.1 General Requirements

### 11.1.1 Safety and Health Program

*Category: FP*

The Contractor shall develop, maintain, and execute a safety and health program in accordance with NASA JPR 1700.1, *JSC Safety and Health Handbook*.

### 11.1.2 Deliverables – Safety

*Category: FP*

The Contractor shall provide the safety deliverables listed in Table 11-1.

**Table 11-1: Data Requirement Description - Safety<sup>85</sup>**

Data Requirement List (DRL) Item No.	DRD Title
DRD-S01	Lessons Learned Program Plan and Lessons Learned
DRD-S02	Safety and Health Plan
DRD-S03	Safety and Health Program Self Evaluation
DRD-S04	Monthly Safety and Health Metrics

### 11.1.3 Workplace Health and Safety

*Category: FP*

The Contractor shall:

- 1) Comply with Occupational and Health (OSHA) (Public Law 91-596) Guidance, USAF technical orders (T.O.), and other DoD and aircraft manufacturers prescribed processes/procedures to ensure the safety of their personnel.
- 2) Resolve safety and health issues as they arise.

<sup>85</sup> Refer to Section J, Appendix J1 for DRD requirements.

## 11.1.4 Deployment Support

*Category: Cost<sup>86</sup>*

When requested by NASA, the Contractor shall provide safety support for aircraft deployments per SOW Subsection 4.9.2. Requested support may include assisting NASA in conducting an investigation and/or root cause analysis of a safety reported close call, mishap or injury.

## 11.2 Hazards

### 11.2.1 Job Hazard Analysis (JHA)

*Category: FP*

When written directives do not identify hazards for tasks being performed, the Contractor, with assistance from NASA and Contractor's safety offices, shall complete a job hazard analysis (JHA). Procedures for JHA's are contained in JPR 1700.1, *JSC Safety and Health Handbook* and ASO WI 33901, *Job Hazard Analysis*.

### 11.2.2 Hazardous Materials

*Category: FP*

The Contractor shall follow established guidelines for handling hazardous materials in accordance with JSC JPR 1700.1, Section 9, *JSC Safety and Health Handbook*.

## 11.3 Safety Programs

### 11.3.1 Voluntary Protection Program (VPP)

*Category: FP*

NASA, Johnson Space Center's Ellington Field Location is a VPP STAR site.

The Contractor shall support the VPP four main program elements identified below:

- 1) Management Commitment and Employee Involvement
- 2) Workplace Analysis
- 3) Hazard Prevention and Control
- 4) Safety and Health Training

---

<sup>86</sup> *Cost category applies to labor costs over and above those costs covered by the fixed price portion of the contract (e.g. deployment/hazardous duty pay).*

### 11.3.2 Confined Space Entry Program

*Category: FP*

The Contractor shall:

- 1) Conduct confined space entry in accordance with JPR 1700.1, *JSC Safety and Health Handbook*, Chapter 6.10.
- 2) Verify confined space training is current (no more than two (2) years old) for all personnel, including subcontractors, repairing NASA AOD aircraft on NASA property prior to the commencement of any work.

### 11.3.3 Hazardous Materials and Hazardous Waste Management Program

*Category: FP*

The Contractor shall ensure a Hazardous Material Control and Management Program (HAZMAT) is established, maintained, and enforced in accordance with the NASA Center HAZMAT Program as depicted in JPR 1700.1, *JSC Safety and Health Handbook*. Example program items include:

- 1) Hazardous material use
- 2) Disposal
- 3) Handling
- 4) Transportation
- 5) Long term and work site storage
- 6) Incident reporting

### 11.3.4 Radiation Safety Program

*Category: FP*

The Contractor shall ensure a Radiation Safety Program is established, maintained, and enforced in accordance with JPR 1700.1, *JSC Safety and Health Handbook*, USAF T.O. 33B-1-1, *Nondestructive Inspection Methods* and Air Force Manual (AFMAN) 48-125, *Dosimetry Program*.

### 11.3.5 Facility Emergency Preparedness Program

*Category: FP*

The Contractor shall establish emergency action procedures aligned with NASA response plans for disaster control and severe weather in accordance with JPD 1040.2, *JSC Emergency Preparedness Program*.

## 11.4 Mishap and Incident Response

### 11.4.1 Aircraft Mishap Interim Response Program

*Category: FP*

The Contractor shall:

- 1) Develop an interim response program to support NASA in responding to aircraft mishaps, injuries, fuel spills, environmental contamination, and weather damage to support JWI 1040.27, *JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan*
- 2) Provide the NASA COTR and CO with an up-to-date list of qualified response team members

### 11.4.2 Mishap and Close Call Reporting

*Category: FP*

The Contractor shall:

- 1) Report mishaps and close calls (flight and ground) in accordance with JPR 1700.1, *JSC Safety and Health Handbook*, NPR 7900.3, *Aircraft Operations Management Manual*, and AOD 34100, *Maintenance Manual*.
- 2) Immediately notify the NASA Operations Duty Officer of mishaps regardless of date and time.
- 3) Notify the Contracting Officer of mishaps within 48 hours
- 4) Coordinate close call reporting with the NASA Safety Office
- 5) Ensure all equipment (aircraft, engines, and support equipment) involved in the close call or mishap is impounded in accordance with AOD 34100, *Maintenance Manual* to ensure a thorough investigation into the root and causal factors can be conducted without altering the mishap scene.

### 11.4.3 Mishap and Close Call Investigation

*Category: Cost<sup>87</sup>*

The Contractor shall:

- 1) Support mishap investigations when requested by NASA.
- 2) Ensure mishap investigation support is in accordance with JPR 1700.1, *JSC Safety and Health Handbook* and NPR 7900.3, *Aircraft Operations Management Manual*.
- 3) Ensure personnel assigned to investigate mishaps are trained per SOW Subsection 4.8.3.3.7.

---

<sup>87</sup> *Cost category does not apply to labor for safety, quality, or management personnel already performing work under the fixed-price portion of the contract.*

## 11.4.4 Mishap Interim Response

Category: *Cost*<sup>88</sup>

The Contractor shall support mishap interim responses in accordance with JWI 1040.27, *JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan*.

## 11.4.5 Crash Trailer

### 11.4.5.1 General

Category: *FP*

The Contractor shall

- 1) Maintain NASA's aircraft emergency response trailer and the equipment maintained therein at Ellington Field (EFD).
- 2) Maintain an AFTO Form 244; Industrial/Support Equipment Record, for the trailer.
- 3) Ensure that a sufficient number of personnel are familiar with the technical data maintained in the crash trailer in accordance with JWI 1040.27, *JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan*, to support emergency response in the event of an aircraft mishap.

### 11.4.5.2 Crash Trailer Periodic Maintenance

Category: *FP*

The Contractor shall:

- 1) Inspect the crash trailer every one-hundred-eighty (180) days in accordance with CC-WD-G6; *SE Inspection Program*.
- 2) Conduct a wall-to-wall inventory every three-hundred-sixty-five (365) days of the crash trailer contents listed in JWI 1040.27, *JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan* on an annual basis. The inventory will include inflation of all aircraft lift bags in accordance with established technical data/OEM maintenance manuals.
- 3) Track and document inspections in the NAMIS database.

## 11.4.6 Facility Disaster Recovery and Restoration

Category: *Cost*

The Contractor shall assist the Government in disaster recovery and restoration of facilities in accordance with JWI 1040.17, *JSC Emergency Preparedness Plan, Annex M – Recovery Plan*.

---

<sup>88</sup> *Cost category does not apply to labor for safety, quality, or management personnel already performing work under the fixed-price portion of the contract.*

## 11.5 Aviation Safety Office Chief Engineer

*Category: Cost*

The Contractor shall provide an aviation safety office chief engineer. The aviation safety office chief engineer shall:

- 1) Act as the primary expert in mishap and close call investigations.
- 2) Observe and review ongoing flight and ground operations to ensure compliance with established procedures and safety guidelines, and make recommendations to the NASA Chief Aviation Safety Officer (CASO) and NASA Aviation Safety Officer (ASO), as necessary, concerning any safety issues.
- 3) Maintain a high level of knowledge in areas of aviation safety, aircraft engineering, and maintenance safety to evaluate critical issues related to safe operations of JSC aircraft.

Example duties include:

- 1) Assist the NASA Aviation Safety Office in maintaining the NASA Aviation Anomaly Reporting System (NAARS) for JSC. Coordinate NAARS routine anomaly investigations.
- 2) Review recommendations, as required, to mitigate identified aviation safety issues.
- 3) Assist in mishap investigations as assigned.
- 4) Maintain currency with mishap investigation techniques and tools.
- 5) If requested by NASA, represent the NASA Aviation Safety Office during Flight Readiness Reviews, Test Readiness Reviews, Payload Readiness Reviews, Operational Readiness Reviews, and preliminary, critical, or final engineering design reviews.
- 6) Assist in the coordination of quarterly Aviation Safety Meeting (ASM) schedules and agendas with the Astronaut Office T-38 Safety Representative. If requested by NASA, assist the NASA ASO in the hosting of ASMs.
- 7) Serve as the document custodian for *JWI 1040.27, JSC Emergency Preparedness Plan, Appendix 5 – JSC Aircraft Mishap Plan*, and *AOD 33887, Monthly/Quarterly Safety and Health Inspection*. Coordinate periodic document reviews and update documents as required.
- 8) Assist in the accomplishment of monthly facility inspections as assigned to identify hazards and recommend upgrades to improve safety and health.
- 9) Assist in the coordination of annual AOD Safety and Health Day events and in the organization and execution of AOD Safety Stand-downs as required.

# L11.0 Safety – LaRC Center Unique

*Category: Cost (SOW Subsections L11.1 through L11.5)*

The requirements listed in SOW Subsections L11.1 through L11.5 shall apply to Langley Research Center.

## L11.1 General Requirements

### L11.1.1 Safety and Health Program

The Contractor is responsible for following and maintaining all LaRC safety requirements and policies.

### L11.1.2 Deliverables – Safety

See SOW Subsection 11.1.2.

### L11.1.3 Workplace Health and Safety

The Contractor shall:

- 1) Comply with Occupational and Health (OSHA) (Public Law 91-596) Guidance, USAF technical orders (T.O.), and other aircraft manufacturers prescribed processes/procedures to ensure the safety of their personnel.
- 2) Comply with NPR 1800.1 *NASA Occupational Health Program*
- 3) Resolve safety and health issues as they arise.

### L11.1.4 Deployment Support

See SOW Subsection 11.1.4.

## L11.2 Hazards

The Contractor shall incorporate Operational Risk Management (ORM) within the workplace. This includes the identification, elimination or control, and documentation of hazards to minimize risk associated with uncertainty in the decision-making process.

### L11.2.1 Job Hazard Analysis (JHA)

SOW Subsection 11.2.1 not applicable.

### L11.2.2 Hazardous Materials

The Contractor shall follow established guidelines for handling hazardous materials in accordance with NPR 1800.1 *NASA Occupational Health Program* and LaRC and LMS policy.

## L11.3 Safety Programs

### L11.3.1 Voluntary Protection Program (VPP)

NASA, LaRC is a VPP STAR Center.

The Contractor shall support the VPP four main program elements identified below:

- 1) Management Commitment and Employee Involvement
- 2) Workplace Analysis
- 3) Hazard Prevention and Control
- 4) Safety and Health Training

### L11.3.2 Confined Space Entry Program

SOW Subsection 11.3.2 not applicable.

### L11.3.3 Hazardous Materials and Hazardous Waste Management Program

SOW Subsection 11.3.3 not applicable.

### L11.3.4 Radiation Safety Program

SOW Subsection 11.3.4 not applicable.

### L11.3.5 Facility Emergency Preparedness Program

The Contractor shall establish emergency action procedures aligned with NASA LaRC response plans for disaster control and severe weather.

## L11.4 Mishap and Incident Response

### L11.4.1 Aircraft Mishap Interim Response Program

SOW Subsection 11.4.1 not applicable.

### L11.4.2 Mishap and Close Call Reporting

The Contractor shall:

- 1) Report mishaps and close calls (flight and ground) in accordance with NPR 8621.1, *NASA Procedures and Guidelines for Mishap and Close Call Reporting, Investigating, and Recordkeeping*, NPR 7900.3, *Aircraft Operations Management Manual*, and LMS-OP-0939, *Aviation Accident Reporting, Investigation, and Site Management Plan*.

- 2) In the event of a maintenance related mishap/incident, report immediately to the NASA Chief of Maintenance and/or NASA Director, Research Services Directorate. Flight related mishaps shall be immediately reported to the LaRC Aviation Safety Officer and Director, Research Services Directorate.
- 3) Notify the Contracting Officer of mishaps within 48 hours
- 4) Coordinate close call reporting with the NASA Safety Office
- 5) Ensure all equipment (aircraft, engines, and support equipment) involved in the close call or mishap is impounded to ensure a thorough investigation into the root and causal factors can be conducted without altering the mishap scene.

### **L11.4.3 Mishap and Close Call Investigation**

The Contractor shall:

- 1) Support mishap investigations when requested by NASA.
- 2) Ensure mishap investigation support is in accordance with NPR 8621.1, *NASA Procedures and Guidelines for Mishap and Close Call Reporting, Investigating, and Recordkeeping* and NPR 7900.3, *Aircraft Operations Management Manual*.

### **L11.4.4 Mishap Interim Response**

SOW Subsection 11.4.4 not applicable.

### **L11.4.5 Crash Trailer**

SOW Subsection 11.4.5 not applicable.

### **L11.4.6 Facility Disaster Recovery and Restoration**

The Contractor shall assist the Government in disaster recovery and restoration of facilities.

## **L11.5 Aviation Safety Office Chief Engineer**

SOW Subsection 11.5 not applicable.

## 12.0 SOW Options

### 12.1 Option 1 – Technical Publications and Document Management Services

*Category: Cost*

The Contractor shall provide technical publications and document management services. Example tasks include:

- 1) Provide research and consult with subject matter experts to generate technical publications that accurately reflect the current configuration of aircraft and support equipment so that the aircraft and equipment can be properly maintained and operated.
- 2) Ensure document and data control is in accordance with AOD 34100, *Maintenance Manual*.
- 3) Provide process verification to ensure the technical completeness of each document.
- 4) Ensure that current publications are made accessible to NASA as soon as possible so that NASA can perform maintenance and operations using the most up-to-date information available.
- 5) Provide increased accessibility to technical publications through the creation, conversion, and availability of electronic publications on the AOD Web site.
- 6) Ensure consistency of technical publications in terms of format, structure, terminology, use of color, and literary elements (e.g. voice and person).
- 7) Provide documentation life cycle management:
  - a. Support the full life cycle of AOD technical publications, from requirements definition to final delivery including project mgt., quality assurance, and configuration control.
- 8) Provide document life cycle tracking:
  - a. Track the status and location of all documents that are under development or are in the review and approval cycle, and provide this information to AOD management, as required, including the time each document has been under review by each reviewer.
- 9) Work with organizations outside of AOD, such as NASA Headquarters, the JSC Information Resources Directorate (IRD), the Center Directives Management System (CDMS), the JSC Quality Management System (QMS), and the Scientific and Technical Information Center (STIC) to publish forms and documents with affectivity outside of AOD.
- 10) Act as the custodians for AOD and maintain the AOD/Flight Crew Operations Directorate (FCOD) Safety Office master list in a current status to accurately reflect AOD's technical publications.
- 11) Maintain AOD-produced JSC internal documents and JSC Work Instructions (JWI) in accordance with identified directives.
- 12) Ensure that electronic/hard copy deliverables and archived records are managed and maintained in accordance with identified files and records management and procedures.
- 13) Develop and implement the necessary processes and procedures for the NAMIS Work Cards System documentation at AOD, from initial concept to final delivery to:
  - a. Convert work cards from their existing format into the Work Cards System
  - b. Maintain Work Cards System documentation.

## 12.2 Option 2 – Spaceflight Parachute Assembly Services

*Category: Cost*

The Contractor shall provide spaceflight parachute assembly inspecting, testing, buildup, repairing, and packing services.

## 12.3 Option 3 – Security Services

*Category: Cost*

The Contractor shall provide security services per NASA request. Examples of security services support include:

- 1) Provide support to programs and projects requiring Special Security Officer (SSO) support.
- 2) Provide development and management of program/project security guides, classification guides, document marking, safeguarding, and procedures
- 3) Provide development, management, and operations support for secure facilities
- 4) Provide development and implementation of policies, instructions, procedures, control systems, and methods
- 5) Manage personnel access controls and assists with security education
- 6) Transmit, transfer, downgrade, and destroy information
- 7) Support personnel security, communications security, physical security, COMSEC, information security, and information systems security

## **12.4 Option 4 – Langley Research Center Support**

### **12.4.1 LaRC – Pilots**

*Category: Cost*

See SOW Subsection L6.3.5.

### **12.4.2 LaRC – Aviators Life Support Systems and Equipment Maintenance**

*Category: Cost*

See SOW Subsection L7.4.2.

### **12.4.3 LaRC – Egress Systems Shop**

*Category: Cost*

See SOW Subsection L7.6.5.

### **12.4.4 LaRC – Engineering**

*Category: Cost*

See SOW Subsection L8.0.

### **12.4.5 LaRC – Quality Control**

*Category: Cost*

See SOW Subsection L10.0.

## Appendix A – Acronyms

Acronym	Definition
A2LA	American Association of Laboratory Accreditation
ABO	Aviators Breathing Oxygen
ACD	Aircraft Change Directives
ACES	Advanced Concept Ejection Seat
ACTD	Advanced Concepts and Technology Demonstrations
ADAS	Advanced Digital Avionics System (STA)
AFE	Aircrew Flight Equipment
AFI	Air Force Instructions
AFMAN	Air Force Manual
AFOHSTD	Air Force Occupational Safety and Health Standard
AFPAM	Air Force Pamphlet
AFS	Agency Filing Scheme
AFTO	Air Force Technical Order
ALSS	Aviation Life Support System
AMOS	Aircraft Maintenance and Operational Support contract
AOD	Aircraft Operations Division
APACS	Aircraft and Personnel Automated Clearance System
APU	Auxiliary Power Unit
ARINC	Aeronautical Radio, Incorporated
AWBS	Automated Weight and Balance System
AWP	Awaiting Parts
BCM	Beyond the Capability of Maintenance
CAD	Computer Aided Design or Cartridge Activated Device
CAPS	Cirrus Airframe Parachute System
CBL	Commercial Bill of Lading
CBPO	Combined Preflight and Basic Post Flight
CCP	Configuration Control Panel
CCPD	Configuration Control Panel Directives
CDMS	Center Directives Management System
CFR	Code of Federal Regulation
CMP	Computerized Maintenance Program (G-II and G-III)
CO	Contracting Officer
COM	Communications
COM/NAV	Communications and Navigation
COMSEC	Communications Security
CONOPS	Concept of Operations
CONUS	Contiguous United States
COTR	Contracting Officer's Technical Representative

Acronym	Definition
CRL	Component Repair Listing
DAASO	Defense Automatic Addressing System Office
DAMES	Defense Automatic Addressing System Office (DAASO) Automated Message Entry System
DER	Designated Engineering Representative
DCN	Drawing Change Notice
DFRC	Dryden Flight Research Center
DIFM	Due in from Maintenance
DME	Distance Measuring Equipment
DLC	Direct Lift Control
DOD	Department of Defense
DOT	Department of Transportation
DR	Deficiency Report
DRD	Data Requirement Description
DRL	Data Requirements List
EDM	Engineering Data Management
EDW	Edwards Air Force Base, California
EFD	Ellington Field, Texas
ELP	El Paso, Texas
EMI	Electromagnetic Interference
ERRC	Expendability, Reparability, Recoverability Category
ESWR	Experiment Software Work Order
ETIC	Estimated Time-in-Commission
ESD	Electrostatic Discharge
EWO	Engineering Work Order
FAA	Federal Aviation Administration
FAR	Federal Aviation Regulation or Federal Acquisition Regulation
FBO	Fixed Base Operator
FCE	Flight Crew Equipment
FCF	Functional Check Flight
FCOD	Flight Crew Operations Directorate
FMC	Full Mission Capable
FMEA	Failure Mode and Effects Analysis
FMECA	Failure Mode Effects and Criticality Analysis
FMI	Fleet Modification Instruction
FOD	Foreign Object Damage/Debris
FOE	Foreign Object Elimination
FOL	Forward Operating Location
FRR	Flight Readiness Review
FSA	Flight Scheduling Application
FTE	Customer Asset Report
FTR	Reply to Customer Asset Report

Acronym	Definition
FP	Fixed Price
FY	Fiscal Year
G-II	Gulfstream 1159 Aircraft
G-III	Gulfstream 1159A Aircraft
GA	General Aviation
GBL	Government Bill of Lading
GIDEP	Government Industry Data Exchange Program
GPS	Global Positioning System
GSA	General Services Administration
HAZMAT	Hazardous Material
I-D	Intermediate and Depot
IT	Information Technology
IATA	International Air Transport Association
ICAO	International Civil Aviation Organizations
IFR	Instrument Flight Rules
ILS	Instrument Landing System
IMO	International Maritime Organizations
JDRS	Joint Deficiency Reporting System
JENS	Johnson Space Center Emergency Notification System
JHA	Job Hazard Analysis
JOAP	Joint Oil Analysis Program
JOFLS	JSC Outbound Freight Logistics System
JPR	JSC Procedural Requirement
JSC	Johnson Space Center
JWI	Johnson Space Center Work Instruction
LMS	Langley Management System
LaRC	Langley Research Center
LOA	Letter of Authorization
LRU	Line Replaceable Unit
MC	Mission Capable
MILSBILLS	Military Standard Billing List
MMA	Mission Management Aircraft
MOA	Memorandum of Agreement
MOU	Memorandum of Understanding
MRB	Material Review Board
NAMIS	NASA Aircraft Management Information System
NASA	National Aeronautics and Space Administration
NDI	Non-Destructive Inspection
NMC	Not Mission Capable
NMCD	Not Mission Capable Decision
NMCE	Not Mission Capable Engineering
NMCEP	Not Mission Capable Engineering Project

Acronym	Definition
NMCFS	Not Mission Capable Storage
NMCI	Not Mission Capable Investigation
NMCM	Not Mission Capable Maintenance
NMCO	Not Mission Capable Operations
NMCR	Not Mission Capable Retirement
NMCS	Not Mission Capable Supply
NPR	NASA Procedural Requirements
OCONUS	Outside the Contiguous United States
ODO	Operations Duty Officer (NASA)
OEM	Original Equipment Manufacturer
ORM	Operational Risk Management
ORR	Operational Readiness Review
OSHA	Occupational Safety & Health Administration
OTI	One Time Inspection
OTR	One Time Replacement
PAD	Propellant Activated Device
PDF	Portable Document Format
PDP	Payload Data Package
PIP	Program Implementation Plan
PPA	Personal Parachute Assembly
PP&E	Property, Plant and Equipment
PRR	Payload Readiness Review
QA	Quality Assurance (NASA)
QAE	Quality Assurance Evaluator
QC	Quality Control (Contractor)
QMS	Quality Management System
QRC	Quick Reaction Capability
RDEL	Requirements Data Exchange List
RFI	Radio Frequency Interference
RPC	Repair Processing Center
RSD	Research Services Directorate
SAAM	Special Assignment Airlift Mission
SAE	SAE International (formerly Society of Automotive Engineers)
SATERN	System for Administration, Training and Education Resources for NASA
SCA	Shuttle Carrier Aircraft
SCI	Sensitive Compartmented Information
SDR	Supply Discrepancy Report
SE	Support Equipment
SEO	Sensor Equipment Operator
SGT	Super Guppy Transport
SLE	Service Life Extension
SME	Spaceflight Metrology Group

Acronym	Definition
SOW	Statement of Work
SP	Spare
SPOT	Synchronized Pre-deployment and Operational Tracker
SRU	Serviceable Repairable Unit
SSO	Special Security Officer
STIC	Science and Technology Information Center
STD	Standard
SUP	Suspected Unapproved Parts
T&E	Test and Evaluation
TCPED	Tasking, Collection, Processing, Exploitation, and Dissemination
T.O.	Technical Order
TP-FRP	Test Procedure-Flight Research Project
TRR	Test Readiness Review
TTE	Task Transmittal Engineering
USAF	United States Air Force
V&V	Validation and Verification
VFR	Visual Flight Rules
VOR	VHF Omni-directional Range
VPP	Voluntary Protection Program (OSHA)
WEBSDR	Web Based Supply Discrepancy Report
WI	Work Instruction

## Appendix B – Definitions

Word	Definition
Acceptance Inspection	Inspection performed at the time an aircraft changes physical or reporting custody. Includes as a minimum, logs and records review, NAMIS baseline data entry, configuration verification to include any one-time inspections/replacements issued by NASA, and the equivalent of a preflight inspection. NASA may elect to increase inspection depth if the aircraft material condition or record examination indicates such actions are warranted.
Accessory	A self-contained unit mounted on a higher assembly or is installed in a weapon system or end item of equipment. It is designed to perform a specific function; such as, generating electrical power, producing hydraulic or oil pressure or to apply these sources of power for actuating doors, mechanisms, and flight control surfaces.
Accumulated Work Hours	Hours that are expended against a job/task by individuals assigned to the same task (refer to man-hours).
Air Abort	Any discrepancy discovered in flight that results in an aircrew aborting his/her planned mission to safely land the aircraft before the mission objectives are completed.
Aircraft Change Directive	Aircraft change directives (ACD) apply to all AOD aircraft and aircraft-related systems. An ACD refers to airworthiness directives, service changes, customer bulletins, service bulletins, engine bulletins, airframe bulletins, and airframe changes that are received from aircraft or component manufacturers, the FAA, and the DOD and to NASA locally-generated one-time inspections and one-time replacements. Compliance of an ACD will be approved/disapproved via the AOD Form 1298; <i>Maintenance Instruction Tracking Form</i> .
Aircraft Logbook	A detailed service record maintained for each individual aircraft.
Aviation Life Support Systems (ALSS) Equipment	Individual items worn by, attached to, used by, or provided for aircrew and passengers to maintain life, health, function, and safety during flight and to provide for escape, descent, survival and recovery. ALSS includes life sustaining equipment such as oxygen regulators, pressurization components, egress or jettison system components, etc., installed on an aerospace vehicle.
Alteration	A change that does not affect the basic character or structure of the end item it is applied to. It limits, qualifies or restricts an end item to a new purpose or end.
Audit	A periodic evaluation of detailed plans, policies, procedures, products, and data.
Avionics	Includes electronic, electrical, instruments, communication and navigation equipment and their subsystems taken either as independent equipment, or integrated systems to accomplish the mission.
Awaiting Maintenance	Time when an aircraft or end item is not mission capable or partial mission capable and no maintenance is being accomplished on these end items that caused the not mission capable or partial mission capable status.
Awaiting Parts	The condition that exists when materials are required to complete the maintenance action and these materials are not readily available; work cannot be performed on the item being repaired due to lack of ordered parts.

Word	Definition
Bench Check	A physical inspection or functional test of an end item removed for an alleged malfunction to determine if the part or item is serviceable or repairable. It also includes any off-equipment action by maintenance in determining the condition status of an item or a determination of the extent of maintenance, repair, or possible overhaul required to return it to a serviceable status. Bench check includes repair actions when the repair is accomplished concurrently with the bench check.
Beyond the Capability of Maintenance	A term/code used by the intermediate and/or depot level support shops when a repair is not authorized at that level or when an maintenance activity is not capable of being accomplished due to lack of equipment, facilities, technical skills, technical data, or parts.
Bits and Pieces	Items that are normally treated as one piece of hardware, or are physically constructed of two or more pieces joined together in a way that prevents disassembly without destruction or impairment of the designed use. Examples of such items are nuts, screws, gaskets, seals, bearings, brushes, gears, fuses, light bulbs, tubes, capacitors, and resistors.
Cannibalization or Cannibalize	The removal of a component from an aircraft, engine or other end item that is not available from normal supply sources to make a second piece of equipment functional.
Certificated Aircraft	An aircraft certified for flight by the FAA, not a public use aircraft. Also see Type Certificated.
Combined, Preflight and Post-Flight Inspection	An inspection that encompasses the full scope of a pre-flight and post-flight inspection and is accomplished at the same time to satisfy both requirements.
Conditional Inspection	In inspection conducted as a result of a specific over-limit condition, or as a result of circumstances or events which create an administrative requirement for an inspection. Examples include hard landing, overstress/over "G", over-temperature, lightning strike, overweight landing or take-off. Examples of administrative actions include one-time inspections imposed by NASA.
Configuration	The functional and/or physical characteristics of hardware and software as set forth in technical documentation and achieved in a product.
Configuration Control	The procedures necessary to control the form, fit, and function of components, sub-systems, and systems.
Configuration Item	The term can be applied to anything designated for the elements of configuration management and treated as a single entity in the configuration management system. The entity must be uniquely identified so that it can be distinguished from all other configuration items.
Configuration Management System	A unique identification, controlled storage, change control, and status reporting of selected intermediate work products, product components, and products during the life of a system. The objective of this system is to avoid the introduction of errors related to incompatibilities with other configuration items.
Configuration Control Panel	A group of knowledgeable representatives that represent a cross-section of the organization (management, engineering, operations, safety, maintenance and quality) established to review and approve or disapprove configuration changes in the baseline configuration of an aircraft or asset.
Consumable Item	Any item or substance which, upon installation, loses its identity and is normally consumed in use or cannot be economically repaired.

Word	Definition
Contracting Officer	A person with the authority to enter into (purchase), administer or terminate contracts and make related determinations and findings.
Contracting Officer's Technical Representative	A representative designated by the CO who performs primarily technical functions such as providing technical direction, inspection, approval of drawings, testing, and other functions of a technical or administrative nature not involving a change in the scope, price, terms or conditions of the contract.
Controlled Equipment	All non-sensitive equipment with an acquisition cost of \$5,000 or more and an estimated service life with two years or more, which will not be consumed or expended in an experiment. Also selected items of property with an acquisition cost less than \$5,000 that are designated and identified as sensitive, by the holding Center, such as weapons and certain types of hazardous devices.
Customer-Supplied Product	Products, such as payloads and flight equipment, owned by NASA or another contractor for the purpose of flight processing, testing, storage, analysis, modification, and/or fabrication.
De-Dock/Post Dock Meeting	A formal meeting between NASA representatives and the Contractor for the purpose of identifying all maintenance requirements that were accomplished during the phase/major calendar/hourly inspection or depot work. Refer to AOD WI 34100 for additional information on these type meetings.
Delayed Discrepancy	A malfunction or a discrepancy that does not create a not-mission capable status and is not immediately corrected.
Deployment	The temporary relocation of an aircraft, support personnel, and equipment from JSC, AOD, Ellington Field, or AOD FOL, to other CONUS or OCONUS locations in support of AOD missions.
Depot	The facility where depot level maintenance is accomplished.
Depot Level Maintenance ("D" Level)	Maintenance accomplished on aircraft or equipment requiring major rework or a complete rebuild of parts, assemblies, sub-assemblies and end items, including manufacture, alteration, testing and reclamation of parts as required. D-level maintenance is normally accomplished by personnel of higher technical skills and in facilities with more extensive shop facilities and equipment than available at the O and I level maintenance activities.
Discrepancy	A non-standard condition that is noted when operating or maintaining an aircraft/equipment that requires corrective action to restore the aircraft/equipment to normal operating conditions/parameters contained in approved technical data.
Due in for Maintenance	A system to track the status and location of repairable aircraft assets to be returned from repair/overhaul either at field level or depot level maintenance activities.
Engineering Project	A defined, bounded activity requiring engineering support.
Engineering Work Order	The Engineering Work Order (EWO), AOD Form 14, authorizes work on Johnson Space Center (JSC) aircraft and aircraft-related equipment. It provides detailed instructions, establishes a method of work control, collects historical records, and facilitates inspection. The EWO serves to combine documentation of change, test, fabrication, and repair into a single multi-use document. The EWO is required to initiate a configuration change (temporary or permanent) to any JSC aircraft, conduct tests where collection of engineering data is necessary, fabricate items for use on aircraft and support systems, develop software change/test instructions, or repair aircraft (refer to Material Review Board) where published technical information is not available.

Word	Definition
Estimated Time-In Commission	Estimated date/time aircraft scheduled or unscheduled maintenance actions will be completed to restore the aircraft or end item to a full mission capable status. Refer to AOD WI 34100, Table 1, Not Mission Capable Maintenance for information on ETIC establishment.
Familiar	Having a working knowledge for the area identified. Familiarization is normally achieved from prior military/commercial experience, formal classroom or on-the-job-training.
Fleet Modification Instructions	A document describing a modification to be incorporated on an entire aircraft fleet, group of aircraft, or a major system.
Flight Readiness Review	A thorough, impartial review by NASA Management and the support contractor to certify an aircraft is safe to fly its intended mission following completion of major structure repairs, modifications and/or alterations. Refer to AOD WI 33840 for additional information concerning Flight Readiness Reviews.
Forward Operating Location	A facility other than Ellington Field, operated by the Johnson Space Center, where maintenance and operations of JSC aircraft are performed
Full Mission Capable	The material condition of an aircraft indicating it can perform its assigned mission. A Full Mission Capable aircraft has completed a Basic Pre-flight or Thru-Flight inspection and is ready in all respects to be released "safe for flight". Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Functional Check	The functional check and operation of an end-item on the aircraft or in the support shops, using equipment, procedures, and limits in approved technical data. NASA components requiring Functional Checks are contained in CC-WD-F1 work cards located in the AOD Library.
Functional Check Flight	A flight to determine whether the airframe, power plants, accessories and equipment are functioning per predetermined standards while subjected to the intended operating environment. Refer to AOD WI 34100 for aircraft specific maintenance actions that generate FCF requirements.
Functionally Controlled Equipment	Equipment under \$5,000 which is controlled by an on-site functional manager and is not considered sensitive. Functional managers are required to approve purchases and excess actions for equipment in their functional areas.
Ground Abort	<p>For those one of a kind aircraft (WB-57, G-III, DC-9, SGT) that cannot be spared for a mission, a ground abort is defined as any time an aircrew walks to an aircraft scheduled to fly and the aircraft is not subsequently launched due to a detected malfunction and the malfunction cannot be repaired within one hour from the time of discovery (refer to Maintenance Delay).</p> <p>For T-38aircraft, a ground abort is defined as any sortie or mission which is aborted prior to take-off due to a detected or suspected aircraft malfunction and the support contractor cannot provide a spare aircraft or the reported malfunction on the original aircraft cannot be repaired within one hour from the time of discovery (refer to Maintenance Delay) for the aircrew to make the assigned mission.</p>
Ground Functional Check	Accomplished when the maintenance action on an aircraft involves only the removal and reinstallation of connecting hardware without a change in adjustment or alignment to flight control systems. This ground functional check is used to determine airworthiness of an aircraft in lieu of a functional check or operational check flight.

Word	Definition
Ground Support Equipment	Powered or Non-Powered Support Equipment used to support maintenance in the servicing, repair, operation, removal/installation of equipment or test of aircraft and its related systems. Ground support equipment also includes all calibrated tools, test sets and other calibrated equipment that involves the use of approved instrument calibration procedures.
Hand Tool	A tool commonly used on aircraft such as screwdrivers, wrenches, sockets, which may be easily purchased from a local vendor.
Hazard	Any real or potential condition that can cause injury or death to personnel, or damage to, or loss of equipment or property. This hazard may be a result of personnel error, environment, design characteristics, procedural differences, or sub-systems or component failure or malfunction.
Human Factors	Recognition that personnel performing tasks are affected by physical fitness, physiological characteristics, personality, stress, fatigue, distraction, communication and attitude.
Inspection	The examination and testing of aircraft, engines, supplies and services, including raw materials, components, and intermediate assemblies, to determine whether they conform to specified requirements.
Intermediate Maintenance ("I" Level)	Maintenance which is the responsibility of, and is performed by designated maintenance activities for direct support of organizational maintenance activities. It includes, but is not limited to calibration, repair or replacement of damaged or unserviceable parts, components or assemblies, and the local fabrication of non-available parts.
Key Characteristics	The features of a material, process, or part whose variation has a significant influence of product fit, performance, service life or manufacturability.
Life-Limited Component	Any component for which mandatory replacements limit (calendar, hourly, cycles or events) are specified in the type design, the Instructions for Continued Airworthiness, or approved maintenance manual.
Life Status	The accumulated calendar days, hours, cycles or events on mandatory life-limited components.
Maintenance	The function of retaining material in, or restoring it to, a serviceable condition. It includes servicing, inspecting, replacement, alterations, or defect rectification of an aircraft or an aircraft component that is performed after completion of manufacturing.
Maintenance Delay	Any mission that is delayed due to a detected or suspected maintenance malfunction discovered by an aircrew and/or maintenance personnel on an assigned aircraft that can be corrected by the maintenance contractor within 1 hour from the received time of the reported malfunction.
Material Review Board (MRB)	A Material Review Board, refer to Engineering Work Order, provides technical repair instructions when no other technical data is available or the existing technical publications, engineering drawings, or procedures are inadequate (does not apply to FAA certified aircraft).
Major Engine Inspection	A comprehensive inspection performed to determine the material condition of an engine. This inspection is performed when the engine is removed from the aircraft.
Mission Capable	The material condition of an aircraft indicating it can perform its assigned missions. A Basic Preflight or Thru-flight Inspection has not been performed and the aircraft is not ready to be released "safe for flight". Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.

Word	Definition
Mission Effectiveness	The launching of one or more aircraft to achieve a mission and the mission results are reported by an aircrew as “successfully completed” following the mission. Refer to definition of Air Abort.
Mission Management Aircraft	Those administrative aircraft certified by the Federal Aviation Administration and used primarily for passenger transport. These include aircraft used to transport management and staff personnel on official travel for the purpose of satisfying mission requirements or other travel for the conduct of agency business.
Non-conformance	A condition of product or service in which any characteristics do not conform to specifications required and/or stated. This may include failures, deficiencies, defects, malfunctions and the like.
Non-Labor Resources	Resources provided by the contractor other than labor to include materials, equipment, training, travel, and other direct costs.
Not Mission Capable	The material condition of an aircraft indicating it is not capable of performing any of its assigned missions (refer to Not Mission Capable Maintenance or Supply).
Not Mission Capable Decision	The material condition of an aircraft pending final disposition by NASA Management that may include picking an aircraft up that had cross-county maintenance completed, retirement, storage and the like. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Engineering	The material condition of an aircraft indicating work to be accomplished to correct a material anomaly is beyond the capability of approved technical data and the disposition to restore the aircraft to the equivalent or improved material condition it had before the discrepancy was sustained or noted comes directly from Aircraft Operations Division Engineering (NASA or Contractor). The use of this aircraft status code indicates Maintenance is at a complete work stoppage for Engineering. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Engineering Project	The material condition of an aircraft indicating the aircraft is not mission capable due to an engineering project. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Storage	The material condition of an aircraft indicating a not-mission-capable decision has been made to place the aircraft in a flyable or long-term storage. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Impoundment	The material condition of an aircraft indicating the aircraft has been impounded by NASA in accordance with ASO WI 33808, Impounding Aircraft Components and Maintenance Documentation. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Maintenance	The material condition of an aircraft or component indicating it is not capable of performing its assigned mission due to a “downing” discrepancy for scheduled or unscheduled maintenance in the NASA provided automated database. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Operations	The material condition of an aircraft indicating it is ready to be picked up and returned to EFD or other FOL site pending aircrew availability. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.
Not Mission Capable Retirement	The material condition of an aircraft indicating a not-mission-capable-decision has been made to retire the aircraft. Refer to AOD WI 34100, Table 1 for usage of this aircraft status code.

Word	Definition
Not Mission Capable Supply	The material condition of an aircraft indicating it is not capable of performing its mission due to a “downing” discrepancy for scheduled or unscheduled maintenance that cannot be accomplished due to supply shortage. Aircraft in this category are at a complete work stoppage for supply.
Operational Check Flight	An in-flight check of lesser severity than a functional check flight that is flown to determine whether selected aircraft systems operate per predetermined standards while subjected to the intended operating environment. Refer to AOD WI 34100 for aircraft specific maintenance actions that generate OPS Check Flight requirements.
Organizational Maintenance (“O” Level)	Maintenance (scheduled or unscheduled which is the responsibility of, and is performed by, a using organization on its assigned equipment. It includes, but is not limited to inspecting (conditional, special, phase, calendar, cyclic, before/after flight, acceptance or transfer) servicing, lubricating, adjusting, replacing line replaceable units, mechanical accessories, electrical/hydraulic and minor assemblies and sub-assemblies.
Phase Inspection	A series of related inspections performed sequentially at specific intervals. These inspections are the result of dividing the maintenance requirements into small packages containing approximately the same workload.
Post-Flight Inspection	An inspection conducted after each flight to detect degradation or damage that may have occurred during the flight and to determine the need for servicing.
Pre-Dock Meeting	A formal meeting between NASA and the support contractor prior to the input of an aircraft into scheduled phase/major calendar/hourly inspections or depot work to identify all maintenance requirements that will be accomplished during these type inspections. Refer to AOD WI 34100 for additional information regarding Pre-dock Meetings.
Preflight Inspection	The final inspection conducted prior to the first flight of each flight day to ensure the aircraft is safe for flight and to verify proper servicing.
Preventive Maintenance	Systematic inspection, detection, correction, and prevention of early failures, before they become actual or major failures.
Program Support Aircraft	Aircraft used to support programs and mission operations. This includes, but is not limited to, astronaut training, safety chase, photo chase, cargo transport, flight training, range surveillance, launch security, and command and control.
Project Aircraft	An aircraft with a problem that cannot be solved with normal maintenance technical data, requiring engineering assistance. Specific anomalies will also cause an aircraft to become a project. Refer to AOD WI 33820 for additional information on Project Aircraft.
Project Engine	An engine with a problem that cannot be solved with normal maintenance technical data, requiring engineering assistance. Specific anomalies will also cause an engine to become a project. Refer to AOD WI 33820 for additional information on Project Engine.
Property, Plant and Equipment System	An agency-wide tool/system used throughout the agency to identify, control and account for Government-owned equipment acquired by or in use by NASA and its Contractors.
Public Use Aircraft	An aircraft operated by or on behalf of the Government.
Qualifications	Training or competencies, which provide an individual the necessary skills, knowledge, or credentials to perform a specific function. These qualifications are normally achieved from prior military/commercial experience, formal classroom or on-the-job-training.

Word	Definition
Quality Management System (QMS)	A system by which an organization aims to reduce and eventually eliminate non-conformances to specifications, standards, and customer expectations in the most effective and efficient manner.
Receiving Inspection	An inspection to verify that purchased products conform to specified purchase requirements. Verification activities may include obtaining objective evidence of the quality of the product from suppliers to include accompanying documentation, certificate of conformity, test reports, statistical records and establishment of process controls to ensure key characteristics have been met.
Recurring Discrepancy	When an aircrew member reports the identical discrepancy on an aircraft within ten flight hours of original occurrence.
Repeat Discrepancy	When an aircrew member reports the identical discrepancy on an aircraft within five flight hours of original occurrence.
Scheduled Maintenance	Known or predictable maintenance requirements based on calendar, hourly, events, or cycles, that can be planned or programmed for accomplishment on short and long-range schedules. This includes accomplishing recurring scheduled maintenance inspection and servicing, complying with configuration items, accomplishing scheduled time change item replacements, and correcting delayed or deferred discrepancies. It also includes modification and renovation projects that are programmed for depot.
Service Bulletin	A document which directs a one-time inspection of an in-service aircraft, system, sub-assemblies, components or piece of support equipment. These documents are normally issued by Federal Aviation Authority (FAA) or DoD.
Service Change	A document which directs and provides instructions for the accomplishment of a change, modification, repositioning or alteration of material in an in-service aircraft, system, sub-assemblies, components or piece of support equipment from its original design. These documents are normally issued by Federal Aviation Authority (FAA) or DoD.
Sensitive Equipment and Parts	An item of equipment that, due to its pilferable nature or the possibility of it being a hazard, requires a stringent degree of control. A sensitive item can be capital or non-capital. Generally, sensitive items are controlled at an acquisition cost of \$500 or more.
Serviceable Condition	The condition of an item that is capable of performing its purpose and function to the requirements for which it is originally intended.
Servicing	The replenishing of all fluids, fuel, oil, water methanol, as well as cleaning the aircraft exterior and interior, cleaning food dispensing equipment, ice chests, coffee pots, hot cups, chemical toilets, as required. This may also include storage of meals on the aircraft.
Sortie	A completed flight; equivalent to 1 takeoff and 1 full stop landing.
Special Inspection	A scheduled inspection with a prescribed interval other than preflight, phase, major engine or standard depot level maintenance. These intervals are specified in the applicable planned maintenance system publication and are based on elapsed calendar time, flight hours, operating hours, or number of cycles or events. Examples include 50 hour, 225 hour, 45-day, and 90-day inspections.
Special Upkeep	Work accomplished to an aircraft, without regards to flying hours or special events, to improve, change or restore and/or enhance the material condition. For example, corrosion control program, major paint touch-ups.

Word	Definition
Time Change Technical Order	A document issued by the DOD to provide technical information necessary to properly and systematically inspect or alter the configuration of aircraft, engines, systems or components. This includes all types of changes and bulletins and consists of information that is not normally disseminated by revisions to technical manuals.
Technical Data	Data that is necessary to ensure that the aircraft and related systems can be maintained in a condition such that serviceability and airworthiness of the aircraft and related operational and emergency equipment, is assured. This data includes computerized maintenance program (CMP) cards, NASA/Department of Defense (DoD) technical orders and work cards, manufacturer's maintenance manuals, Aircraft Operations Division (AOD) unique work instructions (WIs), engineering work orders (EWOs), fleet modification instructions (FMIs), engineering drawings, test procedure – flight research project (TP-FRP) instructions, Federal Aviation Authority (FAA)-approved original equipment manufacturer (OEM) standards, aircraft change directives (ACDs) (e.g. airworthiness directives, service bulletins, etc) and any other subscriptions, data, and specifications.
Test Procedure-Flight Research Project	An approved, repetitive inspection or test on NASA aircraft, components or ground support equipment.
Through-Flight Inspection	An inspection conducted on an aircraft between flights flown on the same day to ensure the integrity of the aircraft for flight, verify proper servicing, and to detect any degradation that may have occurred during the previous flight.
Training	The process of providing knowledge and skills to individuals to better enable them to perform their current duties or future duties. Training may include job-specific training such as a series of instructions or proficiency demonstrations leading to a qualification.
Transfer Inspection	Inspection performed at the time an aircraft changes physical or reporting custody. Includes as a minimum, logs and records review, NAMIS data storage, and the equivalent of a preflight inspection. NASA may elect to increase inspection depth if the aircraft material condition or record examination indicates such actions are warranted.
Troubleshooting	The logical, analytical, and where applicable, an approved technical order prescribed procedure followed in isolating aircraft/equipment malfunctions.
Turn-around Time	This includes wheels in the well for the first flight to wheels in the well for the second flight and any maintenance time required to repair, inspect, service and prepare the aircraft "safe for flight".
Type Certificated	Aircraft with FAA airworthiness certificates.
Unscheduled Maintenance	Unpredictable maintenance requirements, maintenance not previously planned or programmed, maintenance requiring prompt attention and must be added to, integrated with, or substituted for previously scheduled workloads. This includes, but is not limited to, compliance with immediate action aircraft change directives, correction of discrepancies discovered during flight or operation of equipment, and performance of repairs as a result of accidents or incidents.
Weather Abort	Any scheduled mission that is not completed due to inclement weather.
Work Instruction	A document that describes how to accomplish specific job activities needed to ensure consistent working methods and achieve the required quality standard.

## Appendix C - Applicable Documents

Note: Documents in gray are referenced in Section C, AMOS SOW.

OTI 20-000127	OTI - Update UHF preset frequencies on STA & N2 (n/a to N948)		17-Oct-00		
OTI 20-000129	OTI - Inspect all T-38 left/right wing flap inboard hinges for cracks		2-Nov-00		
OTI 20-000131	OTI - Inspect J85-5N Fleet for Proper Engine Cam Followers (supersedes OTI 20-000111)		14-Dec-00		
OTI 20-000132	OTI - Inspect all Vertical Fin Access Panel installations		5-Feb-01		
OTI 20-000133	OTI - Inspect all T-38 Vertical Stabilizer Lower Attach Bolts (per USAF MSG R21171OZ, dated Feb 01)		6-Mar-01		
OTI 20-000134	OTI - Inspect T-38 Main Landing Gear Strut Orifice Support Tube Bolt (supersedes OTI 20-000130)		24-Apr-01		
OTI 20-000135	OTI - Inspect all T-38 Main Wheel Bolts (p/n MS21297)		20-Jun-01		
OTI 20-000136	OTI - Inspect all T-38 Horizontal Stabilizer Control Rod Ends (p/n 2-73030)		14-Aug-01		
OTI 20-000137	OTI - Inspect all T-38 Crossfeed Valve & Fuel Shutoff Valve Actuators		15-Aug-01		
OTI 20-000138	OTI - Inspect Restrictor Release Lanyard		14-Sep-01		
OTI 20-000139	OTI - Inspect all GOX Servicing Carts		23-Oct-01		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000141	OTI - T-38/J85-5N Engine Inspection to determine Type Cases		28-Nov-01		
OTI 20-000142	OTI - Inspect T-38 FCP & RCP Wire Harness Installations		2-May-02		
OTI 20-000143	OTI - Inspect all SPEY MK511-8 Engines for FOD		8-Mar-02		
OTI 20-000145	OTI - Inspect all T-38N with Digital T-5 Amps (p/n 5071-T08P03) - superseded OTI 20-000144		9-Apr-02		
OTI 20-000146	OTI - Weight/Balance to ensure Center of Gravity computations are accurate		9-Apr-02		
OTI 20-000147	OTI - Inspect Oxygen Extension Hose on IP & SIM pilot's Smoke Mask (STA fleet)		24-Apr-02		
OTI 20-000148	OTI - Inspect all T-38 Main Wheel Bolts (p/n MS21297)		15-May-02		
OTI 20-000149	OTI - Inspect T-38 fleet Radar Altimeter R/T's		30-May-02		
OTI 20-000150	OTI - Inspect all T-38 Horizontal Stabilizer Quadrant Frames		31-May-02		
OTI 20-000151	OTI - Inspect GII Main Landing Gear Control Valve Blanking Pin		11-Jul-02		
OTI 20-000152	OTI - Inspect all STA Main Landing Gear Control Valve Blanking Pin		11-Jul-02		
OTI 20-000153	OTI - Inspect KC-135 N931 Pylon Fuel Hose Assembly (p/n 90-4536)		31-Jul-02		
OTI 20-000154	OTI - NDI to inspect N926 & N928 Right/Left Customer Bleed Air Ducts for cracks		2-Aug-02		
OTI 20-000155	OTI - Inspect N902, N960 & N967 Horizontal Stabilizer Mixer for the Trim Actuator (p/n 3-73193)		26-Sep-02		
OTI 20-000157	OTI - Inspect all T-38N Avionics Bay DC Circuit Breaker Panels		22-Oct-02		
OTI 20-000158	OTI - Inspect all Martin-Baker Ejection Seats (Serial #1-#30) Top Latch Locking Nut Counter Bore Recess position		17-Oct-02		
OTI 20-000159	OTI - NDI to inspect GII/STA for cracks at AFT Vertical Attach Bulkhead		11-Oct-02		
OTI 20-000160	OTI - Reposition Rear Seat Communication Electrical Lead on Martin-Baker seats		18-Oct-02		
OTI 20-000161	OTI - Inspect Front/Rear Cockpit for Northrop Ejection Seat Handle Ground Safety Pin		12-Nov-02		
OTI 20-000162	OTI - Inspect/Reposition Hold Down Clamp of Wire bundle in Rear Cockpit right hand side of Center Console		21-Nov-02		
OTI 20-000163	OTI - Inspect all T-38 Aft Lower Wing Skin Panel		14-Feb-03		
OTI 20-000163	OTI - Inspect all T-38N Avionics Bay DC Circuit Breaker Panels		22-Oct-02		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000164	OTI - Inspect on Martin-Baker seats the Front/Rear Cockpit Manual Release Handle Housing Block (supersedes OTI 20-000156)		3-Mar-03		
OTI 20-000165	OTI - Inspect installed Diverter Valve Harness, Connector & Junction Box for defects		19-Mar-03		
OTI 20-000166	OTI - Inspect T-38 Boarding Ladders for critical measurements		17-Apr-03		
OTI 20-000167	OTI - Inspect Interconnect Hose on Martin-Baker Seats		5-May-03		
OTI 20-000168	OTI - Inspect Martin-Baker Sear Kit Beacon AN/URT-33		4-Jun-03		
OTI 20-000169	OTI - Inspect Passenger Seats on all STA's		6-Jun-03		
OTI 20-000170	OTI - Inspect Martin-Baker Seat Initiator Attachment Hardware		1-Jul-03		
OTI 20-000172	OTI - Inspect T-38N Ejector Side Fairing Clearance (supersedes OTI 20-000171)		16-Jul-03		
OTI 20-000174	OTI - Inspect Crew 60 Mounting Plate for Security		22-Aug-03		
OTI 20-000175	OTI - Place Range Marking on T-38 Cabin Altimeter		8-Sep-03		
OTI 20-000176	OTI - Inspect Installed & Uninstalled Engines J-85 Afterburner for cracks/distortions		6-Oct-03		
OTI 20-000177	OTI - Inspect J-85 Fuel Flow Transmitter (N564 & N965 only)		31-Oct-03		
OTI 20-000178	OTI - Conduct Serviceability check on all supply stock/uninstalled Main Fuel Nozzles (p/n 37D401657P111 or P116)		14-Nov-03		
OTI 20-000179	OTI - Inspect Rudder Hydraulic Line for chaffing on Fire Wall Panel Screws for T-38 aircraft		24-Nov-03		
OTI 20-000180	OTI - Inspect all J-85 Engines Fuel Flow Connectors for burned Pin B		4-Dec-03		
OTI 20-000181	OTI - Inspect Mode "S" Transponder Rack for presence of the Upper Hold Down Pin Assembly		9-Jan-04		
OTI 20-000183	OTI - Inspect Martin-Baker Front Cockpit Inter-seat Sequencing (ISS) Ballistic Hoses (supersedes OTI 20-000182)		6-Feb-04		
OTI 20-000184	OTI - Inspect Left Hand COM/NAV Door Cooling Fan for presence of Deflector (p/n 3-54454-3)		27-Feb-04		
OTI 20-000185	OTI - Inspect Wiring Harness on all Towing Vehicles		12-Apr-04		
OTI 20-000186	OTI - Adjust all T-38N Landing Light Assemblies to new criteria for Taxi/Landing positions		21-Apr-04		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000187	OTI - Inspect Martin-Baker Under-seat Rocket Motors the position, serial number & fill date		24-May-04		
OTI 20-000188	OTI - Collect McCormick-Selph Acceptor/Donor assembly installation date for entering into NALCOMIS for tracking time change requirements		9-Jan-04		
OTI 20-000189	OTI - Inspect all T-38 Canopy Fracturing System(CFS) Acceptor/Donor alignment		15-Jun-04		
OTI 20-000190	OTI - Inspect all T-38 for defective Pitch Trim Cutoff Switches		31-Jul-04		
OTI 20-000191	OTI - Inspect Left/Right STA Main Landing Gear Up-lock Shafts for cracking		11-Aug-04		
OTI 20-000192	OTI - Inspect N944 of the installed Upper Check Valve		27-Aug-04		
OTI 20-000193	OTI - Inspect Main Flight Control & Throttle Cables through panel 160 for proper tension		25-Oct-04		
OTI 20-000195	OTI - Inspect STA Flaperon Linkage for evidence of contact with the adjacent structure		3-Dec-04		
OTI 20-000196	OTI - Inspect T-38 Generator Rotor Vespel Spindle for proper installation of screw assembly (p/n 4131603-2) - supersedes OTI 20-000194		6-Dec-04		
OTI 20-000197	OTI - Inspect all STA aircraft & N950 for proper Nose Landing Gear Down-lock Switch adjustment		9-Dec-04		
OTI 20-000198	OTI - Inspect all STA's to visually check Inner/Outer Thrust Reverser Shafts for excessive play		13-Dec-04		
OTI 20-000199	OTI - Inspect all STA's to visually check Wing Trailing Edge Flap & Flaperon Access Panel Screws		15-Dec-04		
OTI 20-000200	OTI - Inspect all T-38A/N Flight & Throttle Control Cables (superseded OTR 21-000128 against N907 only)		10-Dec-05		
OTI 20-000201	OTI - Inspect Nose Landing Gear Up-lock Hook on N944, N945 & N947 for cracking		10-Jan-05		
OTI 20-000202	OTI - Inspect Wire Bundle secured to FCP/Upper CRT for chafing & proper clamp installation		18-Jan-05		
OTI 20-000203	OTI - Inspect Wire Bundle behind Right Console Lower Trim Panel for chafing & proper security of wire bundle		18-Jan-05		
OTI 20-000204	OTI - Inspect Elevator Trim Actuator Cables on STAs & N950 for condition & security		10-Feb-05		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000205	OTI - Inspect T-38 Martin-Baker or Northrop seat IFF & PE lead Quick Disconnect Lanyard Cables for condition, security & proper installation		11-Apr-05		
OTI 20-000206	OTI - Inspect T-38 Center Boarding Step		11-Apr-05		
OTI 20-000207	OTI - Inspect Electrical Junction Boxes for proper installation of Pin Receptacle Shields		19-Apr-05		
OTI 20-000209	OTI - Inspect T-38A/N Engine Tracks for material (alum or titan) & proper installation hardware (supersedes OTI 20-000208)		5-May-05		
OTI 20-000210	OTI - Inspect FCP & RCP MK US16LN-1 Martin-Baker Seat Firing System for proper hardware & installation		24-May-05		
OTI 20-000211	OTI - Inspect a 25% sample of installed front/rear cockpit Martin-Baker ejection seats		26-May-05		
OTI 20-000212	OTI - Inspect #2 Main Bearings on J-85 Engines		2-Jun-05		
OTI 20-000214	OTI - Inspect Aft Section Ejector Firewall hardware to proper torque of screws (supersedes OTI 20-000213)		15-Jul-05		
OTI 20-000215	OTI - Inspect T-38 Cockpit Lighting Control Panel for condition of wiring & fuses (p/n 3887123-301)		15-Aug-05		
OTI 20-000216	OTI - Inspect & lubricate all Aircraft Left/Right Thrust Reverser Teleflex cables		19-Aug-05		
OTI 20-000217	OTI - Inspect/Repair all T-38 both cockpit Right Upper Trim Panel Flood Light Receptacle Wiring		19-Aug-05		
OTI 20-000218	OTI - Inspect Left/Right Upper/Lower Engine Throttle Cables		24-Aug-05		
OTI 20-000219	OTI - Inspect all T-38A/N Sidebrace Assemblies for proper belt installation		9-Sep-05		
OTI 20-000220	OTI - Inspect Vertical Tip VHF Antenna Coax Cable Connector		15-Sep-05		
OTI 20-000221	OTI - Inspect DLC Control Lever for possible interference from wire Harness		27-Sep-05		
OTI 20-000222	OTI - Inspect STAs & N950 Engine Generator Ammeter & Battery Monitor System Shunts		11-Oct-05		
OTI 20-000223	OTI - Inspect DC-9 Horizontal Stabilizer Actuator Gimble Assembly Orientation & accessible grease fittings		13-Oct-05		
OTI 20-000224	OTI - Inspect STA Main Aircraft Battery Quick Connect Receptacles for corrosion & arcing		29-Nov-05		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000225	OTI - Inspect B-4 Maintenance Stands for proper placards, warnings & hydraulic pump hoses		29-Nov-05		
OTI 20-000226	OTI - NDI Inspection of T-38 Left/Right Upper Longerons & Hook slots		13-Dec-05		
OTI 20-000227	OTI - Inspect Rotational Hand Controller wiring & connector for correct pin installation		13-Dec-05		
OTI 20-000228	OTI - Inspect STA & GII the Four Emergency Exit Windows for proper installation		13-Dec-05		
OTI 20-000229	OTI - Inspect Torque on T-38 MLG Torque Line Pin		25-Jan-06		
OTI 20-000230	OTI - Inspect all STAs for cracks at the Nose Landing Gear Wheel-Well Fuselage Pressure Skin		30-Jan-06		
OTI 20-000231	OTI - Inspect T-38N Landing Gear Control & Warning System		7-Mar-06		
OTI 20-000232	OTI - Inspect T-38N Aircraft Canopy Jettison Ballistic Hoses for condition & corrosion		24-Jul-06		
OTI 20-000233	OTI - Inspect T-38N Wire Harness w/Flight Control Cables for chaffing		22-Sep-06		
OTI 20-000234	OTI - Inspect GII/GIII Right/Left Hand Generator Cables for proper installation		17-Nov-06		
OTI 20-000235	OTI - Identify suspect/defective Aft Fuselage (boat tail) Fire Overheat Warning Detector Assembly		29-Nov-06		
OTI 20-000236	OTI - Confirm Aircraft Records & Maint Tracking Database is accurate		2-Mar-07		
OTI 20-000237	OTI - Inspect Left/Right Precoolers to determine if Aft Coupling Split Lock Retaining Ring is installed		25-May-07		
OTI 20-000238	OTI - Search Logs/Records to determine correct p/n & serial number of Heat Exchanger (Precooler) is installed on STAs, GII & N2NA		29-Jun-07		
OTI 20-000241	OTI - Inspect STAs Instructor/Student Pilot & Flight Engr Jump-seat Adjustable Lap Belts & Shoulder Harness for condition		16-Oct-07		
OTI 20-000242	OTI - Inspect T-38 Upper Cockpit Longerons FS 225 & FS 232 (supersedes OTI 20-000239 & OTI 20-000240)		8-Jan-08		
OTI 20-000243	OTI - Inspect STA/GII/GIII Engine Log Books for current compliance status of MOD 5270		30-Jan-08		
OTI 20-000244	OTI - For STA/GII to prevent Anti-skid Control Hydraulic Lines from crossing during installation		20-Feb-08		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI 20-000245	OTI - Inspect NLG Axle Assembly on STA 945		20-Mar-08		
OTI 20-000246	OTI - Inspect accessible portions of High Pressure Duct (STA/GII/GIII)		8-Apr-08		
OTI 20-000247	OTI - SPEY 511-8 Engines overhauled at Goodrich-Montreal		20-May-08		
OTI 20-000249	OTI - Inspect Goodyear Main Landing Gear Tires (N944, N945, N946 & N947)		18-Jul-08		
OTI 20-000250	OTI - Inspect Goodyear Main Landing Gear Tires (N948 & N949)		18-Jul-08		
OTI 20-000251	OTI - Inspect Goodyear Main Landing Tires (for N2NA)		18-Jul-08		
OTI 20-000252	OTI - Lubricate all slings & restraint devices		10-Oct-08		
OTI 20-000253	OTI - Verify all ADU serial numbers & DOM's in Martin Baker seat kits		20-Oct-08		
OTI 20-000254	OTI - Inspect for signs of water intrusion in upper wing position light lens holder		19-Nov-08		
OTI 20-000254 Rev 1	OTI - Inspect for signs of water intrusion in upper wing position light lens holder		30-Jan-09		
OTI 20-000255	OTI - Inspect STA/GII MLG Steel Brake Lines		22-Dec-08		
OTI 20-000256	OTI - Remove existing PN label from Time Delay Subassembly		17-Feb-09		
OTI 20-000257	OTI - Perform External Power Receptacle Inspection for DC-9		26-Feb-09		
OTI 20-000258	OTI - Inspect for clearance of wire bundle above let rear rudder pedal, Block 3 T-38		26-May-09		
OTI 20-000259	OTI - Verify proper installation of fuel control rod assembly on STA's		4-Jun-09		
OTI 20-000260	OTI - Identify FCP & RCP audio control panel P/N & S/N on EFIS T-38 only		4-Jun-09		
OTI 20-000261	OTI - Inspect rudder force producing ring for tooling marks per TCTO 1T-38-823		5-Jun-09		
OTI 20-000262	OTI - Martin-Baker ADU placed in "automatic" position		30-Jun-09		
OTI 20-000263	OTI - Conduct NDI of Rudder Control Rod Assemblies for defects		10-Jul-09		
OTI_20-000264	OTI - Inspect/Replace all non Self-locking Nuts with Self-locking nuts on Primary Flt Controls		30-Jul-09		
OTI_20-000265	OTI - Inspect for debris in Comm/Nav Bay & Radome on T38 B3		30-Jul-09		
OTI 20-000266	T-38 Lower Wing Skin Inspection	Basic	6-Oct-09		
OTI 20-000267	T-38 44% Spar Exposed Fitting Inspection	Basic			
OTI 20-000268	T-38 Instrument Panel Grounding Strap Inspection	Basic			

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTI_20-000269	OTI - Inspect ICS Chord Connections & Audio Control Panel Wiring for chaffing		17-Nov-09		
OTI_20-000270	OTI - Prevent chafing of Wires on Right Comm/Nav Door Fan		3-Dec-09		
OTI_20-000271	OTI - Inspect Horizontal & Vertical Stabs for Popping Noise (STA's)		8-Jan-10		
OTI_20-000272	OTI - Inspect Horizontal & Vertical Stabs for Popping Noise (N949)		8-Jan-10		
OTI_20-000273_R1	Inspect for the presence of "Restricted G" placards on T-38 B3 instrument panels		29-Mar-10		
OTI_20-000274	Inventory DADC/DDADC and configuration modules to capture serial numbers installed on T-38 aircraft		15-Apr-10		
OTI_20-000275	Configuration control of the TAWS database cards installed in T-38 B3 aircraft		7-Jun-10		
OTI_20-000276	Verify Pitot Heat circuit configuration in existing T-38 B3 aircraft is at current mod level		7-Jun-10		
OTI_20-000277	Landing Light lost in-flight N917		17-Jun-10		
OTI_20-000278_R1	Un-commanded Rudder Kick N955		28-Jul-10		
OTI_20-000279_R1	Inspect all T-38s (including mod line & flyable storage) for Un-commanded Rudder Kick		28-Jul-10		
OTI_20-000280	Inspect all T-38 fleet (including mod line & flyable storage) 66% wing fittings to determine metal type		2-Aug-10		
OTI_20-000281	Baseline new inspection cycle and ensure only Grimes lights are installed on T-38s		10-Aug-10		
OTI_20-000282	Provide technical reference for new inspection requirements on t-38 Landing lights		10-Aug-10		
OTI_20-000283	Inspect T38 Throttle Quadrant Cables		19-Jan-11		
OTI_20-000284	Inspect STAs & GIII Engine Thrust Strut		25-Jan-11		
OTI_20-000285	N918 Landing Light Inspection		18-Mar-11		
OTI_20-000286	OTI - Inspect N966 Canopy Jettison System		5-Apr-2011		
OTI_20-000287	OTI - GIII/ STA Perform leak check for Pressure Fueling Float Valve Lines		15-Apr-2011		
OTI_20-000288	OTI - Inspect Windscreen Bow on T-38 Fleet		11-Jul-2011		
OTI_20-000289	OTI - T-38 Visual Inspection of the Engine Mount		5-Aug-11		
OTR 21-000074	OTR - STA/GII Thrust Reverser Spherical Bearings		22-Mar-00		
OTR 21-000075	OTR - T-38 Fuel Compensator Probes		25-Apr-00		
OTR 21-000076	OTR - Replace Clevis, Cockpit Main Step Upper Tube		9-May-00		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTR 21-000077	OTR - Replace CRU-60/P Parachute Oxygen Connector Assembly (NSN 1660-00-076-9662)		12-Jul-00		
OTR 21-000078	OTR - Update existing Airspeed Limitation Placard (per NASA Dwg C21F1214)		17-Jul-00		
OTR 21-000079	OTR - Replace T-38 Engine Mount Bolts (p/n 6-50205-1)		13-Mar-01		
OTR 21-000080	OTR - Replace T-38 Generators with suspect out-of-balance rotors		28-Sep-00		
OTR 21-000081	OTR - Replace two Elevator Down Springs in boiler room		24-Oct-00		
OTR 21-000082	OTR - Replace T-38 Ejection Seat Catapult Upper Mount Bolts & Washers (forward/aft seats)		29-Nov-00		
OTR 21-000082A	OTR - Replace T-38 Ejection Seat Catapult Upper Mount Bolts & Washers (forward/aft seats)		29-Nov-00		
OTR 21-000084	OTR - Replace T-38 Main Landing Gear Brakes		13-Dec-00		
OTR 21-000085	OTR - Replace Digital T-5 Amplifier (T-38N only)		17-Apr-01		
OTR 21-000086	OTR - Replace J85-5N Aspirator Clamps		14-May-01		
OTR 21-000087	OTR - Replace Afterburner Fuel Control PS-3 Drain Line (fleet wide)		20-Jun-01		
OTR 21-000088	OTR - Replace Modified Combined Electronics Unit (fleet wide)		23-Jul-01		
OTR 21-000089	OTR - Replace Front & Rear Cockpit Utility Light Locking Device		20-Aug-01		
OTR 21-000091	OTR - Replace all KC-135 LPU's (new p/n P0723E105PW)		23-Oct-01		
OTR 21-000092	OTR - Replace J85-5N Ignition System Components		11-Dec-01		
OTR 21-000093	OTR - Replace Stage One & Two Stators on existing J85-5N Fleet		11-Dec-01		
OTR 21-000094	OTR - Replace J85 Fleet Stainless Steel Compressor Case		11-Dec-01		
OTR 21-000095	OTR - Replace T-38N Symbol Generator (new p/n066-04021-1113)		7-Jan-02		
OTR 21-000096	OTR - Replace T-38 Ejector Assembly (p/n 4146TO1G01)		15-Mar-02		
OTR 21-000098	OTR - Replace T-38 Nose Landing Gear Strut Drag Brace Stud Shoulder Bolt (p/n 9756C94)		14-Aug-02		
OTR 21-000099	OTR - Replace T-38 Brakes with new Green Dot Brakes		8-Aug-02		
OTR 21-000101	OTR - Replace left/right Fasteners on Gutter/Landing Light Panel (supersedes OTR 21-000100)		16-Oct-02		
OTR 21-000103	OTR - Install newly designed Turbine Cases (p/n 6052T90G01)		24-Mar-03		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTR 21-000104	OTR - Replace Cap Screw for Main Fuel Control		26-Mar-03		
OTR 21-000105	OTR - Replace Cap Screws for Afterburner Fuel Control		26-Mar-03		
OTR 21-000106	OTR - Replace currently installed Concord Batteries with new Soldering Procedure Batteries as received from Manf.		16-Apr-03		
OTR 21-000107	OTR - Replace T-38 Fleet Decals located on Main Landing Gear Doors		5-May-03		
OTR 21-000108	OTR - Remove all unauthorized parts from all T-38 Canopy Seal Coalescer Filter Housings		13-May-03		
OTR 21-000108A	OTR - Remove all unauthorized parts from all T-38 Canopy Seal Coalescer Filter Housings		6-Jun-03		
OTR 21-000109	OTR - Correct IRS Initialization Problem with IRS Sensor on T-38N Aircraft (N906, 907, 909, 919, 961 & 963)		10-Jun-03		
OTR 21-000110	OTR - Replace T-38N Martin-Baker Ejection Seat Shoulder Harness to Frost UWARS & fittings to Koch UWARS		6-Jun-03		
OTR 21-000111	OTR - Replace all uncoated Flight Control Cables on T-38 Aircraft		16-Jul-03		
OTR 21-000112	OTR - Replace all T-38 Airframe & Engine Power Coupling Assemblies		12-Sep-03		
OTR 21-000113	OTR - Rebuild T-38 Accessory Power Assembly Airframes		12-Sep-03		
OTR 21-000114	OTR - Replace STA Thrust Reverser Three Segment Clamps with new nuts & bolts		5-Dec-03		
OTR 21-000114A	OTR - Replace STA Thrust Reverser Three Segment Clamps with new nuts & bolts		15-Dec-03		
OTR 21-000115	OTR - Replace all J85-5N Fuel Nozzles		6-Jan-04		
OTR 21-000116	OTR - Remove Martin-Baker ISS Handle and replace with p/n MBEU200212-1		9-Jan-04		
OTR 21-000117	OTR - Remove IRS 429 Syncro Adapter P/N 934520-00 & replace with MOD-1 Syncro Adapter Unit P/N 934520-00		16-Jan-04		
OTR 21-000118	OTR - Remove ELDEC Fuel Flow Indicators p/n 9-328-41		16-Jan-04		
OTR 21-000119	OTR - Remove MLG Goodyear 12PR Tires, replace with Goodyear 14PR Bias Tires (p/n 461B-3779-TL)		13-Feb-04		
OTR 21-000121	OTR - Upgrade Safe/Arm Handle Plate to thicker plate (p/n MBEU20076-1)		23-Apr-04		
OTR 21-000122	OTR - Remove/replace Cabin Pressure Regulator Sensing Line		21-Jun-04		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTR 21-000123	OTR - Improve protection of ISS Hoses to eliminate the need for 25-hr recurring inspections		8-Jul-04		
OTR 21-000124	OTR - Remove/replace all STA Nose Landing Gear Actuator Rod Ends		19-Jul-04		
OTR 21-000125	OTR - Remove/replace Nose Landing Gear Actuator Rod End (N950 only)		19-Jul-04		
OTR 21-000126	OTR - Replace/inspect on STA's Check Valves on the Combine Hyd System Manifold in right wheel well		25-Aug-04		
OTR 21-000127	OTR - Replace Right Side HPRU covers with modified part (p/n MBEU201224)		9-Sep-04		
OTR 21-000129	OTR - Remove T-38 Generator Rotors for proper installation of Vespel Spindles		6-Dec-04		
OTR 21-000130	OTR - Replace remaining T-38A/N Main & Interconnect Flight Control Cables		14-Dec-04		
OTR 21-000131	OTR - Replace STA Nose Landing Gear Up-lock Hooks		13-Jan-05		
OTR 21-000132	OTR - Remove/Reinstall MST 67A Transponder on T-38N Aircraft for Mod		22-Feb-05		
OTR 21-000133	OTR - Remove/replace Left/Right Engine Throttle Cables (Per CMP cards)		26-Aug-05		
OTR 21-000134	OTR - Replace T-38N Front/Rear Cockpit Lighting Control Panels with mod panel (p/n 3887123-701)		15-Sep-05		
OTR 21-000135	OTR - Replace Steering Gearbox Mount Hardware on tugs		15-Nov-05		
OTR 21-000136	OTR - Replace T-38 Main Landing Gear Upper/Lower Torque Arm Pin Retention Hardware		15-Dec-05		
OTR 21-000137	OTR - Replace Canopy Downlock Mechanism Mounting Hardware		3-Jan-06		
OTR 21-000138	OTR - Replace PRC-90 Survival Radio & Spare Batteries on T-38 Aircraft		20-Mar-06		
OTR 21-000139	OTR - Replace PRC-90 Survival Radio and Spare Batteries on WB-57 Aircraft		20-Mar-06		
OTR 21-000140	OTR - Replace SAFE/ARMED Handle on Martin-Baker Ejection Seats (p/n MBEU188912)		24-Jul-06		
OTR 21-000141	OTR - Replace Nose Landing Gear Actuator Rod End on N2NA & N948		10-Aug-06		
OTR 21-000142	OTR - Replace Current Steel Quill Shaft in Airframe-Mounted Gearbox Power Shaft Coupling (p/n 3121603)		14-Sep-06		
OTR 21-000143R1	OTR - Replace T-38 Airframe Gearboxes, Filler Tubes & Oil Fill Sight Gauge Assembly (supersedes OTI 21-000143)		9-Nov-06		
OTR 21-000144	OTR - Replace T-38 Airframe Gearboxes, Filler Tubes & Oil Fill Sight Gauge Assembly		6-Oct-06		

Document #	Title	Revision	Revision Date	NASA Supplement	External Supplement
OTR 21-000144	OTR - Replace on T-38N Gearboxes oil fill tube (p/n 3-51230-3) with oil sight gauge assembly (p/n 14-622-501)	Rev A	31-Jul-07

## Appendix D – Personnel Requirements

SLC	Job Description Guidelines
Executive Manager	<p>Manages all functions of the Aircraft Maintenance Operations Support contract. The Executive Manager shall be the point of contact for all NASA Centers included in this contract. Qualifications for this position shall be a minimum of ten years in the aviation field in a management position. Individual shall have experience leading a diversified team in an aerospace environment, possess strong interpersonal and team building skills, with a proven ability to attract, hire and motivate a strong management team. Excellent written and verbal communications skills. Individual shall hold a BS degree in an aviation related or management discipline.</p>
Accountant I	<p>Prepares balance sheets, profit and loss statements, and other financial reports. Responsibilities also include analyzing trends, costs, revenues, financial commitments, and obligations incurred to predict future revenues and expenses. Reports organization's finances to management, and offers suggestions about resource utilization, tax strategies, and assumptions underlying budget forecasts. May require a bachelor's degree in area of specialty and 0-2 years of experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager.</p>
Accountant II	<p>Prepares balance sheets, profit and loss statements, and other financial reports. Responsibilities also include analyzing trends, costs, revenues, financial commitments, and obligations incurred to predict future revenues and expenses. Reports organization's finances to management, and offers suggestions about resource utilization, tax strategies, and assumptions underlying budget forecasts. May require a bachelor's degree in area of specialty and 2-4 years of experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a supervisor or manager.</p>
Accountant III	<p>Prepares balance sheets, profit and loss statements, and other financial reports. Responsibilities also include analyzing trends, costs, revenues, financial commitments, and obligations incurred to predict future revenues and expenses. Reports organization's finances to management, and offers suggestions about resource utilization, tax strategies, and assumptions underlying budget forecasts. Requires a bachelor's degree in area of specialty, and 4-6 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.</p>
Accountant IV	<p>Prepares balance sheets, profit and loss statements, and other financial reports. Responsibilities also include analyzing trends, costs, revenues, financial commitments, and obligations incurred to predict future revenues and expenses. Reports organization's finances to management, and offers suggestions about resource utilization, tax strategies, and assumptions underlying budget forecasts. Requires a bachelor's degree in area of specialty and 6-8 years of experience in the field or in a related area.</p>

SLC	Job Description Guidelines
	Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.
Administrative Support I	Typically responsible for performing daily office tasks such as filing, recording, maintaining records, copying, posting, and other similar duties, using a computer terminal, typewriter, and other word processors. Follows organization and department procedures to complete tasks in a timely manner. Familiar with standard concepts, practices, and procedures within a particular field. Performs a variety of additional office-work tasks. Works under general supervision. Typically reports to a more senior administrative specialist, professional, supervisor or manager. Typically requires a high school diploma or its equivalent. Typically requires 0-2 years of work experience.
Administrative Support II	Typically responsible for performing daily office tasks such as filing, recording, maintaining records, copying, posting, and other similar duties, using a computer terminal, typewriter, and other word processors. Follows organization and department procedures to complete tasks in a highly skilled and timely manner. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of additional office-work and support tasks. Typically reports to a more senior Administrative Specialist, supervisor or a manager. May direct the efforts of others. Typically requires a high school diploma or its equivalent. Typically requires 2-4 years of experience.
Administrative Support III	Typically responsible for performing daily office tasks such as filing, recording, maintaining records, copying, posting, and other similar duties, using a computer terminal, typewriter, and other word processors. Follows organization and department procedures to complete tasks in a highly skilled and timely manner. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a wide variety of additional management support functions and other duties as assigned. May serve as facility manager/coordinator. May direct, guide, and coordinate the activities of a team of administrative personnel. Typically reports to a supervisor, manager or program manager. Typically requires a high school diploma or its equivalent. Typically requires 5 years of experience. Perform project coordination duties including calendar control, customer and expense reports.
Aircraft Mechanic I	A fully qualified journeyman qualified to perform maintenance on aircraft or ground support equipment (AGE).
Aircraft Mechanic II	Oversees and coordinates the maintenance of aircraft or aircraft components. Individual should be a fully qualified aircraft journeyman and have the ability to direct others in the completion of aircraft related maintenance tasks. Possesses Federal Aviation Administration (FAA) Airplane or Powerplant certification or special skills.
Aircraft Mechanic III	Oversees and coordinates the maintenance of aircraft or aircraft components. Individual should be a fully qualified aircraft journeyman and have the ability to direct others in the completion of aircraft related maintenance tasks. Possesses Federal Aviation Administration (FAA) Airplane and Powerplant certification or special certification defined in the SOW (e.g. NDI, Welder).
Designer	Design or create engineering drawings using CAD systems with reference to engineering specifications.

<b>SLC</b>	<b>Job Description Guidelines</b>
Documentation Specialist I	Types technical material with reference to rough drafts and corrected copy using a word processor, computer or typewriter. Performs basic editing and suggests grammatical and punctuation corrections to technical personnel. Intermediate knowledge of Microsoft Word, Excel, and Adobe Acrobat.
Documentation Specialist II	Types technical material with reference to rough drafts and corrected copy using a word processor, computer or typewriter. Performs advanced editing. Proficient with Microsoft Word, Excel, PowerPoint, and Adobe Acrobat. Knowledge of Adobe Photoshop.
Engineer I	Typically responsible for design, development, test, implementation, and analysis of technical products and systems. May develop a range of products. Familiar with commonly-used concepts, practices, and procedures within a particular field. Typically reports to a more senior Engineer, supervisor or a manager. Typically requires a bachelor's degree in engineering. Typically requires 2 years of experience in the field or in a related area.
Engineer II	Typically responsible for design, development, test, implementation, and analysis of technical products and systems. May develop a range of products. Familiar with commonly used concepts, practices, and procedures within a particular field. Typically reports to a more senior Engineer, supervisor or a manager. May direct the efforts of others. Typically requires a bachelor's degree in engineering. Typically requires 5 years of experience in the field or in a related area.
Engineer III	Typically responsible for design, development, test, implementation, and analysis. Recognized as technical leader and resource. Proficient with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Responsible for the solution of complex total system problems. May direct, guide, and coordinate the activities of a team of technical personnel performing complex engineering activities. Typically reports to a manager or program manager. Typically requires a bachelor's degree in engineering. Typically requires 10 years of related experience. License and certification may be required.
Engineering Manager	Demonstrated experience managing a diversified team of engineers in an aerospace engineering environment. Demonstrated experience leading the design, development, testing, troubleshooting, and fabrication of aircraft components and systems. Proven ability to manage and implement computer aided design processes (AutoCAD and Pro/Engineer preferred). Strong interpersonal and team building skills with a proven ability to attract, hire, and motivate a strong engineering team. Excellent written and verbal communication skills. Proven track record of completing projects on schedule, within budget, with satisfied customers. Requires BS/MS degree from an accredited institution with 10+ years aerospace industry experience in a key leadership role.
Equipment Operator	Performs ground and flight tests on aircraft and research equipment. Typically, formulates and applies mathematical modeling and other optimizing methods to develop and interpret information for research packages.
Flight Engineer	Flight operations duty position. Maintain proficiency, currency, and annual requirements required by NASA.
Graphics Specialist	Designs or creates graphics for technical material following Air Transport Association technical documentation standards. Technical illustration skills. Proficient with Adobe Photoshop and Corel Designer. Knowledge of AutoCAD, Adobe Acrobat, Microsoft Word, and Excel.
Helper	Entry-level mechanic with no aviation related experience.

<b>SLC</b>	<b>Job Description Guidelines</b>
Loadmaster	Flight operations duty position. Maintain proficiency, currency, and annual requirements required by NASA. Must have attended a service related school in the methods of loading and the weight and balance of cargo aircraft with 5 years of experience.
Logistics Analysis I	Performs shipping, stocking, receiving, issuing, inventory of materials. Enhances product workflow by analyzing and developing logistics plans that affect production, distribution, and inventory. Creates and reviews procedures for distribution and inventory management to maximize customer satisfaction and minimize cost. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager.
Logistics Analysis II	Enhances product workflow by analyzing and developing logistics plans that affect production, distribution, and inventory. Creates and reviews procedures for distribution and inventory management to maximize customer satisfaction and minimize cost. May require an associate's degree or equivalent and 2-4 years of experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.
Logistics Analysis III	Enhances product workflow by analyzing and developing logistics plans that affect production, distribution, and inventory. Creates and reviews procedures for distribution and inventory management to maximize customer satisfaction and minimize cost. Requires an associate's degree or equivalent and 4-6 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May report to an executive or a manager. A wide degree of creativity and latitude is expected.
Logistics Analysis IV	Enhances product workflow by analyzing and developing logistics plans that affect production, distribution, and inventory. Creates and reviews procedures for distribution and inventory management to maximize customer satisfaction and minimize cost. May require an associate's degree or its equivalent with 6-8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. May report to an executive or a manager.
Maintenance/Production Controller	Shall have a minimum of 3 years experience as an aircraft maintenance/production controller coordinating and monitoring the maintenance workload for a multi-aircraft fleet, some one-of-a-kind aircraft and over 3,000 line items of assets. Shall be able to multi-task; to include forecasting and effectively communicating with a wide-variety of work disciplines to provide up-to-date technical information on queries associated with aircraft/equipment statuses include providing estimated times in commission (ETIC's) for items in a not-mission-capable status. Shall be proactive in orchestrating the daily work priorities and flight schedule requirements to ensure full capability of the assigned personnel to meet mission requirements.
Manager	Directs work of Supervisors and other employees. Ensures employees

SLC	Job Description Guidelines
	follow all established safety, technical procedures necessary for successful contract performance. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. Experience in progressively challenging management positions, including successfully managing people. Must have demonstrated experience managing a diversified team. Strong interpersonal and team building skills. Excellent written and verbal communication skills. Proven track record of completing projects on schedule, within budget, with satisfied customers. Typically reports to a program manager. Typically requires a bachelor's degree. Typically requires 5 years of experience.
Manager I, Aircraft Maintenance	Manages the service, repair, and overall maintenance of aircraft and aircraft engines to verify aircrafts are safe for flight. Ensures compliance to all FAA maintenance regulations and safety requirements. Oversees the scheduling of repairs and maintenance. Ensures projects are completed on time and within budget. Acts as advisor to aircraft maintenance team regarding projects, tasks, and operations. Requires a bachelor's degree and 7-10 years of experience in the field or in a related area and a FAA aircraft and engine mechanic license. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required. Typically reports to a unit/department head.
Manager II, Aircraft Maintenance	Manages the service, repair, and overall maintenance of aircraft and aircraft engines to verify aircrafts are safe for flight. Ensures compliance to all FAA maintenance regulations and safety requirements. Oversees the scheduling of repairs and maintenance. Ensures projects are completed on time and within budget. Acts as advisor to aircraft maintenance team regarding projects, tasks, and operations. Requires a bachelor's degree and at least 10 years of experience in the field or in a related area and a FAA aircraft and engine mechanic license. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required. Typically reports to a unit/department head.
Management Analyst	Analyzes accounting records to determine financial resources required to implement programs and makes recommendations for budget allocations to ensure conformance to budgetary limits. Also responsible for reviewing operating budgets periodically in order to analyze trends affecting budget needs. Requires a bachelor's degree in area of specialty and 6-8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. May report to an executive or a manager.
Pilot	Flight operations duty position. Maintain proficiency, currency, and annual requirements required by NASA. Must have minimum of 2000 flight hours in type related aircraft.
Procurement I	Responsible for purchasing and negotiating materials, equipment, and supplies from vendors. Evaluates vendor quotes and services to determine most desirable suppliers. May require a bachelor's degree and 0-3 years of experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not

<b>SLC</b>	<b>Job Description Guidelines</b>
	typically require exercising independent judgment. Typically reports to a supervisor or manager.
Procurement II	Responsible for purchasing and negotiating materials, equipment, and supplies from vendors. Evaluates vendor quotes and services to determine most desirable suppliers. May require a bachelor's degree and 2-5 years of experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals to perform a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a supervisor or manager.
Procurement III	Responsible for purchasing and negotiating materials, equipment, and supplies from vendors. Evaluates vendor quotes and services to determine most desirable suppliers. May require a bachelor's degree and 5-8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. A wide degree of creativity and latitude is expected. May report to an executive or a manager.
Procurement IV	Responsible for purchasing and negotiating materials, equipment, and supplies from vendors. Evaluates vendor quotes and services to determine most desirable suppliers. May require a bachelor's degree and at least 8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.
Project Manager I	Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. May require a bachelor's degree and 2-4 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.
Project Manager II	Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. May require a bachelor's degree and 4-7 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.
Project Manager III	Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. May require a bachelor's degree and at least 7 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals.

SLC	Job Description Guidelines
	Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Must have demonstrated experience managing projects. Strong interpersonal and team building skills. Excellent written and verbal communication skills. Proven track record of completing projects on schedule, within budget, with satisfied customers. Typically reports to a manager or head of a unit/department.
Quality Manager	Provides management of all quality functions of the Aircraft Maintenance Operations Support contract. Must have demonstrated experience managing a diversified team. Strong interpersonal and team building skills. Excellent written and verbal communication skills. Proven track record of completing projects on schedule, within budget, with satisfied customers.
Quality Assurance Representative (QAR)	Shall have a minimum of three years experience on airframes, avionics, electrical, egress, aviator's life support equipment of NDI, coupled with familiarity with the tools, concepts and methodologies of quality management. Have knowledge of Aerospace Standard AS-9110 and be able to conduct audits, surveillance and monitoring to assess compliance with stated requirements. Have experience in root cause analysis and corrective/preventative actions and be able to develop and initiate corrective action plans while ensuring focus on organizational continuous improvement.
Safety Manager	Provides management of all safety and health functions of the Aircraft Maintenance Operations Support contract. Must have demonstrated experience managing a safety program. Strong interpersonal skills. Excellent written and verbal communication skills.
Scheduler	Coordinate with flight crew and production control to plan aircraft flight schedules.
Security Specialist I	Performs security oversight as defined by security operational manuals.
Security Specialist II	Performs security oversight as defined by security operational manuals. Development and management of program/project security guides, classification guides, document marking, safeguarding, and procedures.
Security Specialist III	Provides management oversight of security personnel. Responsible for the development and management of program/project security guides, classification guides, document marking, safeguarding, and procedures. Responsible for the operations of classified facilities.
Technical Editor I	Plans, coordinates, and edits content of material for publication. May review proposals and drafts for possible publication. Proficient with Microsoft Word and Adobe Acrobat. Organizational, coordination, and customer service skills.
Technical Editor II	Plans, coordinates, and edits content of material for publication. May review proposals and drafts for possible publication. May possess advanced degree. Technical writing and editing expertise. Proficient with Microsoft Word, Excel, PowerPoint, and Adobe Acrobat. Knowledge of Adobe Photoshop. Excellent organizational, coordination, and customer service skills.
Technical Library Support Technician	Shall have related experience in maintaining a master technical library comprised of aircraft manufacturers, Federal Aviation, Department of Defense, and JSC library technical publications, forms, and other related technical documentation that is supplemented by unique Aircraft Operations Division change processes and procedures to support a wide-variety of aircraft and ancillary equipment. Shall be able to audit remote locations or dispersed technical libraries for accuracy and provide training to remote library custodians.
Technical Writer	Develops, writes, and edits technical materials, such as equipment manuals instruction books, and related technical publications to include

SLC	Job Description Guidelines
	operating and maintenance instructions. The writer interprets blueprints, sketches, parts lists, specifications, mockups and product samples to integrate and delineate technology, operating, and production procedures in accordance with established standards. Posses technical writing skills, organizational, coordination and customer service skills, and knowledge of Microsoft Word and Excel.
Technical Writing Liaison	Technical liaison between engineering and the documentation management office. Interprets engineering drawings to assist technical writers in providing manuals to include operating and maintenance instructions.
Test Director	Flight operations duty position. Maintain proficiency, currency, and annual requirements required by NASA.
Training Specialist I	Designs and conducts company training programs. Monitors and reports the effectiveness of training on employees during the orientation period and for career development. May be involved in initial plan design and existing plan enhancements. Requires a bachelor's degree in a related area and 0-3 years of experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a manager.
Training Specialist II	Designs and conducts company training programs. Monitors and reports the effectiveness of training on employees during the orientation period and for career development. Involved in initial plan design and existing plan enhancements. Requires a bachelor's degree in a related area and 2-5 years of experience in the field or in a related area. Familiar with standard concepts, practices and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a manager.
Training Specialist III	Designs and conducts company training programs. Monitors and reports the effectiveness of training on employees during the orientation period and for career development. May be involved in initial plan design and existing plan enhancements. Requires a bachelor's degree in a related area and 4-8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. May report directly to an executive or head of a unit/department. A wide degree of creativity and latitude is expected.
Warehouse Manager	Manages all warehouse activities. Manages the warehouse ensuring the receipt, coordination, and safety of goods coming through a warehouse. Also ensures that orders arrive and are dispatched on time to the appropriate destinations and in the expected quantities. Requires a high school diploma or its equivalent with 5-7 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. Leads and directs the work of others. A wide degree of creativity and latitude is required. Typically reports to a head of a unit/department.
Warehouse Supervisor	Supervises the receiving, storing, packing, and shipping of merchandise or materials. Maintains stock records and schedules. Requires a high school diploma or its equivalent with at least 4 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices,

<b>SLC</b>	<b>Job Description Guidelines</b>
	and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. Leads and directs the work of others. A wide degree of creativity and latitude is required. Typically reports to a manager.
Warehouse Worker	Receives, unpacks, checks, and stores merchandise or materials. Fills requisitions and orders. Packs, crates, and ships products and materials to distribution center, departments, or assembly line. May operate fork lift. Requires a high school diploma or its equivalent with 2-4 years of experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a supervisor or manager.

## Appendix E1

### Fixed-Price Performance Standards

Category	Performance Standard	Acceptable Quality Level	Surveillance Method
<b>Technical Performance</b>			
Technical	Mission effectiveness	100% mission effectiveness	NAMIS data
Technical	Functional Check Flight (FCF) effectiveness	>85% success rate on first flight attempt	NAMIS data
Technical	Operational check (OPS Check) flight effectiveness	>90% success rate on first flight attempt	NAMIS data
Technical	Aircraft delayed discrepancies	No more than 4 discrepancies per aircraft (excludes aircraft in phase inspection)	NAMIS data
Technical	Mishaps/close calls due to failure to comply with approved technical data and/or safety procedures	<1 per month	NAARS, Close Call Reporting System
Safety & Health Employee Involvement	NASA JPR 1700.1; Safety and Health Handbook	Promote, implement, and sustain employee (e.g., non-supervisory) involvement in safety and health compliance program development, implementation and decision-making	Contractor Provided Data

<b>Category</b>	<b>Performance Standard</b>	<b>Acceptable Quality Level</b>	<b>Surveillance Method</b>
Safety & Health Management & Leadership	NASA JPR 1700.1; Safety and Health Handbook	Sustaining commitment to safety and health compliance	Contractor Provided Data
<b>Quality Performance</b>			
Quality	Contractor generated audit conformance rate	>90% conformance rate monthly	Contractor provided data
Quality	NASA performed Quality surveillance audits	>90% conformance rate monthly	NASA QMT database
Quality	NASA performed process audits	>95% conformance rate	NASA QMT database
Quality	Documentation accuracy in NAMIS	>95% accuracy rate	Government Sampling of NAMIS
Quality	Repeat pilot discrepancies	<1% of total monthly sorties flown	NAMIS
Quality	Recurring pilot discrepancies	<1% of total monthly sorties flown	NAMIS
Quality	Documentation research accuracy for items outside of approved technical data	>95% accuracy	NASA Maintenance Manager Tracking
Quality	Tool control program violations	<2 violations per month	NAMIS, NASA QMT database
<b>Management Performance</b>			
Management	Ensure no mission impacts due to position vacancies or personnel qualifications	Vacancies are filled within 30 calendar days	Contractor provided self-evaluation data in DRD-M04, Monthly Progress Report

<b>Category</b>	<b>Performance Standard</b>	<b>Acceptable Quality Level</b>	<b>Surveillance Method</b>
Management	Scheduled Inspection Compliance	<1% of scheduled inspections exceeding the NASA approved maximum negative deviation (without waiver)	NAMIS
Management	Timeliness of Archiving NASA Form 1671A	< 7 working days from date of completion on NASA Form 1671A	Government Sampling of NAMIS
Management	Support shops	<300 items back logged	NAMIS
Management	Overdue training	<5% scheduled training events overdue	Contractor provided data
Management	T-38 fleet time	>225 hours	NAMIS
Management	J-85 engine fleet time	>450 hours	NAMIS

## Appendix E2

### JSC Cost Performance Standards

Category	Performance Standard	Acceptable Quality Level	Surveillance Method
<b>Technical Performance</b>			
Technical	Mission effectiveness	>98% mission Effectivity	NAMIS data
Technical	Functional Check Flight (FCF) effectiveness	>85% success rate on first flight attempt	NAMIS data
Technical	Mishaps/close calls due to failure to comply with approved technical data and/or safety procedures	<1 per month	NAARS, Close Call Reporting System
Technical	Configuration Management	<2% deficiencies in configuration management	Government Evaluation/Sampling
Technical	Aircraft and Payload Integration Support of external customers	>90% customer satisfaction	Government survey of external customers
Technical	Engineering Task Support and Administration	<5% of total schedule delays in project milestones (5% or 15 day maximum, whichever is lower). For example, total milestone slips for a 100 day project could not exceed 5 days without NASA concurrence.	Government Surveillance/ Contractor provided self-evaluation data
Technical	Engineering documents	>98% of engineering documents are released on time,	Government Surveillance/ Contractor provided self-evaluation data

		no significant errors are found during government sign off, and no significant redlines are found during fabrication or maintenance activities	
Technical	Engineering Schedule Estimates	>90% of engineering projects are completed per government approved Contractor baseline schedule estimates	Government Surveillance/ Contractor provided self-evaluation data
Technical	Engineering Customer Support	>95% of engineering designs, repairs, and modifications meet customer requirements during initial implementation and require no significant re-design	Government Surveillance/ Contractor provided self-evaluation data
Safety & Health Employee Involvement	NASA JPR 1700.1; Safety and Health Handbook	Promote, implement, and sustain employee (e.g., non-supervisory) involvement in safety and health compliance program development, implementation and decision-making	Contractor Provided Data
Safety & Health Management & Leadership	NASA JPR 1700.1; Safety and Health Handbook	Sustaining commitment to safety and health compliance	Contractor Provided Data

<b>Quality Performance</b>			
Quality	Repeat pilot discrepancies	<1% of total monthly sorties flown	NAMIS
Quality	Recurring pilot discrepancies	<1% of total monthly sorties flown	NAMIS
Quality	Tool control program violations	<2 violations per month	NAMIS, NASA QMT database
<b>Logistics Performance</b>			
Logistics	Inventory Management	>98% accuracy in maintaining inventory	NAMIS and Inventory Sampling
Logistics	Shipping and receiving	100% compliance with all Federal, State and Local laws and regulations	Government oversight and surveillance
<b>Management Performance</b>			
Management	Surge and deployment support	No delays/mission impacts caused by staffing deficiencies	NASA Surveillance and Monitoring
Management	Scheduled Inspection Compliance	<1% of scheduled inspections exceeding the NASA approved maximum negative deviation (without waiver)	NAMIS
Management	Project Management, Control and Support Services	>90% of projects completed per Government approved Contractor baseline estimates	Contractor provided self-evaluation data in DRD-M04, Monthly Progress Report
<b>Cost Performance</b>			
Cost	Actual wrap rate vs. contract wrap rate		Government Surveillance

Cost	Cost performance measured against government approved Contractor baseline cost estimates	90% of projects completed per government approved Contractor baseline cost estimates	Contractor provided self-evaluation data in DRD-M04, Monthly Progress Report
<b>Small Business Goals</b>			
Small Business	Contractor meets small business goals per contract requirements	Contractor meets 100% of stated goals	Contractor provided self-evaluation data in DRD-M04, Monthly Progress Report

## Appendix E3

### LaRC Cost Performance Standards

Category	Performance Standard	Acceptable Quality Level	Surveillance Method
<b>Technical Performance</b>			
Quality	Aircraft Maintenance Records – Historical Records	<10 days to incorporate aircraft records of newly acquired aircraft into the QAO database	Quality Surveillance
Quality	Aircraft records accuracy	>97 % records reviewed without errors	Quality Surveillance
Quality	Service change accuracy	>95% of service change record accuracy concerning airworthiness directives and manufacturers service bulletins to determine applicability to aircraft/accessories	Quality Surveillance
Quality	Weight and Balance processes	100% accuracy in weighing, computing and recording of weight and balance processes and record accuracy for all assigned aircraft	Quality Surveillance
Quality	Equipment records updated	Every 7 days equipment records will be reviewed, updated and appropriate reports distributed.	Quality Surveillance and Audits
Quality	Final inspections on major maintenance	>97% error free inspection of major maintenance items per GAMM on assigned aircraft	Quality Surveillance
Maintenance	Pre-flight, post-flight and periodic checks (when scheduled)	>95% error free pre-flight, post-flight and periodic checks	Quality Surveillance
Maintenance	Estimated time in commission (ETIC) effectiveness (scheduled ETIC work days versus actual)	>90% of agreed upon ETICs are met	Quality Surveillance

<b>Management Performance</b>			
Management	Full Mission Capable (FMC) Rate	>75% FMC success rate of aircraft	NAMIS data
Management	Functional Check Flight (FCF) effectiveness	>90% success rate on first flight attempt	NAMIS data
Management	Mission effectiveness	>95% mission success rate	NAMIS data
Management	Aviation Ground equipment (AGE) FMC rate	>95% FMC rate of assigned AGE	NAMIS data
Management	AGE Scheduled Maintenance ETIC effectiveness	>98% of AGE scheduled maintenance (inspections) that meet ETIC's	NAMIS data
Management	Communication/Navigation (COM/NAV) Shop Equipment Calibration FMC rate	>98% of equipment calibrated by the COM/NAV shop is maintained in an FMC condition	NAMIS data
Management	Battery FMC rate	>95% of assigned batteries are maintained in an FMC condition	NAMIS data
Management	Avionics Spares	>95% of the total compliment of avionics spares are maintained in an FMC condition	NAMIS data
Management	Personal Equipment (PE) FMC rate	>95% of personal equipment is maintained in an FMC condition	NAMIS data
Management	Personal Equipment (PE) ETIC effectiveness	>98% of PE scheduled inspections meet ETIC's	NAMIS data
<b>Logistics Performance</b>			
Logistics	Inventory Management (procurement/stock)	>90% timeliness in acquisition, proper stockroom management, ordering accuracy and controlling access	NAMIS and Inventory Sampling

## **SECTION D - PACKAGING AND MARKING**

### **D.1 1852.211-70 PACKAGING, HANDLING, AND TRANSPORTATION (SEP 2005) (Applies to Fixed-Price and Cost)**

- (a) The Contractor shall comply with NASA Procedural Requirements (NPR) 6000.1, "Requirements for Packaging, Handling, and Transportation for Aeronautical and Space Systems, Equipment, and Associated Components", as may be supplemented by the statement of work or specifications of this contract, for all items designated as Class I, II, or III.
- (b) The Contractor's packaging, handling, and transportation procedures may be used, in whole or in part, subject to the written approval of the Contracting Officer, provided (1) the Contractor's procedures are not in conflict with any requirements of this contract, and (2) the requirements of this contract shall take precedence in the event of any conflict with the Contractor's procedures.
- (c) The Contractor must place the requirements of this clause in all subcontracts for items that will become components of deliverable Class I, II, or III items.

(End of clause)

**(END OF SECTION)**

## SECTION E - INSPECTION AND ACCEPTANCE

- E.1 52.246-2 INSPECTION OF SUPPLIES - FIXED-PRICE. (AUG 1996) (Applies to Fixed-Price)
- E.2 52.246-3 INSPECTION OF SUPPLIES - COST-REIMBURSEMENT. (MAY 2001) (Applies to Cost)
- E.3 52.246-4 INSPECTION OF SERVICES - FIXED-PRICE. (AUG 1996) (Applies to Fixed-Price)
- E.4 52.246-5 INSPECTION OF SERVICES - COST-REIMBURSEMENT. (APR 1984) (Applies to Cost)
- E.5 52.246-16 RESPONSIBILITY FOR SUPPLIES. (APR 1984) (Applies to Fixed-Price and Cost)
- E.6 1852.246-73 HUMAN SPACE FLIGHT ITEM. (MAR 1997) (Applies to Fixed Price and Cost)
- E.7 52.246-11 HIGHER-LEVEL CONTRACT QUALITY REQUIREMENT. (FEB 1999) (Applies to Fixed-Price and Cost)

The Contractor shall comply with the higher-level quality standard selected below.

The Contractor shall have a quality program that is certified with the International Organization for Standardization document AS-9110, *Aerospace Requirements for Aircraft Maintenance Organizations* within one year of contract award.

(End of clause)

**(END OF SECTION)**

## SECTION F - DELIVERIES AND PERFORMANCE

F.1 52.247-34 F.O.B. DESTINATION. (NOV 1991) (Applies to Cost)

F.2 52.242-15 STOP-WORK ORDER. (AUG 1989) (Applies to Fixed-Price)

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either -

(1) Cancel the stop-work order; or

(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if -

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided that the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

(End of clause)

F.3 52.242-15 STOP-WORK ORDER. (AUG 1989) - ALTERNATE I (APR 1984)  
(Applies to Cost)

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may

agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either -

- (1) Cancel the stop-work order; or
  - (2) Terminate the work covered by the order as provided in the Termination clause of this contract.
- (b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule, the estimated cost, the fee, or a combination thereof, and in any other terms of the contract that may be affected, and the contract shall be modified, in writing, accordingly, if -
- (1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
  - (2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.
- (c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.
- (d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

(End of clause)

**F.4 1852.247-73 BILLS OF LADING. (JUN 2002) (Applies to Fixed-Price and Cost)**

The purpose of this clause is to define when a commercial bill of lading or a government bill of lading is to be used when shipments of deliverable items under this contract are f.o.b. origin.

- (a) Commercial Bills of Lading. All domestic shipments shall be made via commercial bills of lading (CBLs). The Contractor shall prepay domestic transportation charges. The Government shall reimburse the Contractor for these charges if they are added to the invoice as a separate line item supported by the paid freight receipts. If paid receipts in support of the invoice are not obtainable, a statement as described below must be completed, signed by an authorized company representative, and attached to the invoice.

I certify that the shipments identified below have been made, transportation charges have been paid by (company name), and paid freight or comparable receipts are not obtainable.

Contract or Order Number: TBD

Destination: TBD

- (b) Government Bills of Lading. (1) International (export) and domestic overseas shipments of items deliverable under this contract shall be made by Government bills of lading (GBLs). As used in this clause, domestic overseas means non-continental United States, i.e. Hawaii, Commonwealth of Puerto Rico, and possessions of the United States.
- (2) At least 15 days before shipment, the Contractor shall request in writing GBLs from: Silvia Hanagriff, Lead, Center Transportation, 2101 NASA Road One, Mail Code JB7, Houston, TX 77058. If time is limited, requests may be by telephone: 281-483-3208. Requests for GBLs shall include the following information.
- (i) Item identification/ description.
  - (ii) Origin and destination.
  - (iii) Individual and total weights.
  - (iv) Dimensional Weight.
  - (v) Dimensions and total cubic footage.
  - (vi) Total number of pieces.
  - (vii) Total dollar value.
  - (viii) Other pertinent data.
- (End of clause)

F.5 PERIOD OF PERFORMANCE (Applies to Fixed-Price and Cost)

The Period of Performance for the Phase-In is April 20, 2012 to May 31, 2012.

The period of performance for the contract is June 1, 2012 through September 30, 2013.

(End of clause)

F.6 OPTION TO EXTEND PERIOD OF PERFORMANCE (Applies to Fixed-Price and Cost)

The Government may require the contractor to continue to perform services under this contract. The Contracting Officer may exercise this option(s) by issuance of a unilateral contract modification 30 days or more before the completion date set forth in Section F.4. Should the option be exercised, the resultant contract will include all terms and conditions of the basic contract as it exists immediately prior to the exercise of the option except for the following changes:

**Option 1**

B.2 entitled “ESTIMATED COST, FIXED PRICE AND AWARD FEES” will be modified to reflect the additions of \$(OFI) to the estimated cost and fixed price and \$(OFI) to the maximum

available award fees.

B.2.1.1 will be modified to reflect the addition to the estimated cost, fixed price and maximum available award fees as follows:

		Maximum Available Award Fee
Estimated Cost	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Fixed Price	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

B.2.1.2 will be modified to reflect the addition to the estimated cost, fixed price and maximum available award fees as follows:

		Maximum Available Award Fee
Estimated Cost	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Fixed Price	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

F.5 entitled “PERIOD OF PERFORMANCE” will be modified to state:

“The Period of Performance of this contract shall be June 1, 2012 through September 30, 2015

H.20 entitled “LEVEL OF EFFORT (COST) will be modified to reflect the addition of 467,961 total direct hours to the number of hours shown in (a).

H.20 Johnson Space Center will be modified to reflect the addition of 439,317 total direct labor hours shown in (a)(1).

H.20 Langley Research Center will be modified to reflect the addition of 28,644 total direct labor hours shown in (a)(2).

I.35 entitled “PAYMENT OF OVERTIME PREMIUMS” will be modified to reflect an addition of \$(OFI).

**Option 2**

B.2 entitled “ESTIMATED COST, FIXED PRICE AND AWARD FEES” will be modified to reflect the additions of \$(OFI) to the estimated cost and fixed price and \$(OFI) to the maximum available award fees.

B.2.1.1 will be modified to reflect the addition to the estimated cost, fixed price and maximum available award fees as follows:

		Maximum Available Award Fee
Estimated Cost	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Fixed Price	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

B.2.1.2 will be modified to reflect the addition to the estimated cost, fixed price and maximum

available award fees as follows:

		Maximum Available Award Fee
Estimated Cost	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Fixed Price	<u>\$(OFI)</u>	<u>\$(OFI)</u>
Total	<u>\$(OFI)</u>	<u>\$(OFI)</u>

F.5 entitled “PERIOD OF PERFORMANCE” will be modified to state:  
 “The Period of Performance of this contract shall be June 1, 2012 through May 31, 2017.

H.20 entitled “LEVEL OF EFFORT (COST) will be modified to reflect the addition of 389,456 total direct hours to the number of hours shown in (a)

H.20 Johnson Space Center will be modified to reflect the addition of 365,586 total direct labor hours shown in (a)(1).

H.20 Langley Research Center will be modified to reflect the addition of 23,870 total direct labor hours shown in (a)(2).

I.35 entitled “PAYMENT OF OVERTIME PREMIUMS” will be modified to reflect an addition of \$(OFI).

(End of clause)

**F.7 OPTION FOR THE INCREMENTAL INCREASE OF LEVEL OF EFFORT REQUIRED DURING CONTRACT PERFORMANCE (Applies to Cost)**

The Government may increase the number of direct labor hours required to be furnished during the period of performance by an amount ranging from 1 to 762,600 direct labor hours. If the Government elects to exercise its option to increase the number of direct labor hours to be furnished, the Contractor will be so notified by a contract modification executed by the Contracting Officer. The terms and conditions relating the Government’s option rights as provided herein are as follows:

- (a) The Government may increase the direct labor hours to be furnished (up to the maximum amount specified) by the exercise of one option, or by the exercise of multiple options, during the period of performance.
- (b) The Contract Periods for Incremental Increase of Effort Options are defined as follows:  
 Base Period – June 1, 2012 through September 30, 2013  
 Option 1 – October 1, 2013 through September 30, 2015  
 Option 2, October 1, 2015 through May 31, 2017
- (b)(1) If the Government exercises one or more options pursuant to this clause for **Johnson Space Center**, the estimated cost and fee values will be increased as follows:
  - (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.

- (ii) For Options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI) respectively for every hour ordered by the exercise of an option.
  - (ii) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.
- (b)(2) If the Government exercises one or more options pursuant to this provision for **Langley Research Center**, the estimated cost and fee values will be increased as follows:
- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.
  - (ii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI) respectively for every hour ordered by the exercise of an option.
  - (ii) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.

(End of clause)

## F.8 TECHNICAL OPTIONS (Applies to Cost)

The Government may increase the number of direct labor hours required to be furnished for technical options during the period of performance by an amount ranging from 1 to 107,356 direct labor hours. If the Government elects to exercise its option to increase the number of direct labor hours to be furnished, the Contractor will be so notified by a contract modification executed by the Contracting Officer. The terms and conditions relating the Government's option rights as provided herein are as follows:

- (a) The Government may increase the direct labor hours to be furnished (up to the maximum amount specified) by the exercise of one option, or by the exercise of multiple options, during the period of performance.

The Contract Periods for Technical Options are defined as follows:

Base Period – June 1, 2012 through September 30, 2013  
Option 1 – October 1, 2013 through September 30, 2015  
Option 2, October 1, 2015 through May 31, 2017

- (b)(1) If the Government exercises one or more options pursuant to this clause, the estimated cost and fee values will be increased as follows:

### F.8.1 TECHNICAL OPTIONS FOR JOHNSON SPACE CENTER (Applies to Cost)

#### F.8.1.1 TECHNICAL PUBLICATIONS AND DOCUMENT MANAGEMENT SERVICES (SECTION 12.1 of the SOW) (Applies to Cost)

The Contracting Officer may exercise this option by issuance of a unilateral contract modification before the required commencement of work as follows: 1 to 40 direct labor hours; **5** calendar days in advance, 41 to 80 direct labor hours; **10** calendar days in advance, and over 81 direct labor hours; **15** calendar days in advance. The terms and conditions relating the Government’s Option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this clause for **JSC**, the estimated cost and fee values will be increased as follows:

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by \$( OFI) and \$( OFI) respectively for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.

**F.8.1.2**     **OPTION FOR SPACEFLIGHT PARACHUTE ASSEMBLY (SECTION 12.2 of the SOW) (Applies to Cost)**

The Contracting Officer may exercise this option by issuance of a unilateral contract modification before the required commencement of work **30** calendar days in advance. The terms and conditions relating the Government’s option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this provision for **JSC**, the estimated cost and fee values for every hour ordered by the exercise of an option will be increased as follows:

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every standard time (ST) hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every overtime time (OT) hour ordered by the exercise of an option.
- (iii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by \$( OFI) and \$( OFI) respectively for every ST hour ordered by the exercise of an option.
- (iv) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by \$( OFI) and \$( OFI) respectively for every over time hour ordered by the exercise of an option.
- (v) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every ST hour ordered by the exercise of an option.

- (vi) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every OT hour ordered by the exercise of an option

F.8.1.3 OPTION FOR SECURITY SERVICES (SECTION 12.3 of the SOW) (Applies to Cost)

The Contracting Officer may exercise this option by issuance of a unilateral contract modification before the required commencement of work **30** calendar days in advance. The terms and conditions relating the Government’s option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this clause for **JSC**, the estimated cost and fee values will be increased as follows:

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every standard time (ST) hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every overtime time (OT) hour ordered by the exercise of an option.
- (iii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every ST hour ordered by the exercise of an option.
- (iv) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every OT hour ordered by the exercise of an option.
- (v) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every ST hour ordered by the exercise of an option.
- (vi) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every OT hour ordered by the exercise of an option

(End of clause)

F.8.2 TECHNICAL OPTIONS FOR LANGLEY RESEARCH CENTER (Applies to Cost)

F.8.2.1 OPTION FOR PILOTS (SECTION 12.4.1 of the SOW) (Applies to Cost)

The Contracting Officer may exercise this option by issuance of a unilateral contract modification 30 calendar days before the required commencement of work. The terms and conditions relating the Government’s Option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this provision for LaRC, the estimated cost and fee values for every hour ordered by the exercise of an option will be increased as follows

for Pilots

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every standard time (ST) hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every overtime time (OT) hour ordered by the exercise of an option.
- (iii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every ST hour ordered by the exercise of an option.
- (iv) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every OT hour ordered by the exercise of an option.
- (v) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every ST hour ordered by the exercise of an option.
- (vi) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every OT hour ordered by the exercise of an option

F.8.2.2 OPTIONS FOR AVIATORS LIFE SUPPORT SYSTEMS AND EQUIPMENT MANAGEMENT SERVICES (SECTION 12.4.2 of the SOW) (Applies to Cost)

The Contracting Officer may exercise this option by issuance of a unilateral contract modification 30 calendar days before the required commencement of work. The terms and conditions relating the Government’s Option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this provision for LaRC, the estimated cost and fee values for every hour ordered by the exercise of an option will be increased as follows for Aviators Life Support Systems and Equipment (Aircraft Mechanic II)?

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every standard time (ST) hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every overtime time (OT) hour ordered by the exercise of an option.
- (iii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every ST hour ordered by the exercise of an option.
- (iv) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every OT hour

ordered by the exercise of an option.

- (v) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every ST hour ordered by the exercise of an option.
- (vi) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every OT hour ordered by the exercise of an option

**F.8.2.3 OPTIONS FOR EGRESS SYSTEMS SHOP (SECTION 12.4.3 of the SOW)  
(Applies to Cost)**

The Contracting Officer may exercise this option by issuance of a unilateral contract modification 30 calendar days before the required commencement of work. The terms and conditions relating the Government’s Option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this provision for LaRC, the estimated cost and fee values for every hour ordered by the exercise of an option will be increased as follows for Riggers.

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every standard time (ST) hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every overtime time (OT) hour ordered by the exercise of an option.
- (iii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every ST hour ordered by the exercise of an option.
- (iv) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every OT hour ordered by the exercise of an option.
- (v) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every ST hour ordered by the exercise of an option.
- (vi) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every OT hour ordered by the exercise of an option

**F.8.2.4 OPTION FOR ENGINEERING (SECTION 12.4.4 of the SOW) (Applies to Cost)**

The Contracting Officer may exercise this option by issuance of a unilateral contract modification before the required commencement of work **30** calendar days in advance. The terms and conditions relating the Government’s option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this clause for **an Engineer II**, the estimated cost and fee values will be increased as follows:

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.

**F.8.2.5 OPTIONS FOR QUALITY CONTROL (SECTION 12.4.5 of the SOW) (Applies to Cost)**

The Contracting Officer may exercise this option by issuance of a unilateral contract modification 30 calendar days before the required commencement of work. The terms and conditions relating the Government’s Option rights as provided herein are as follows:

If the Government exercises one or more options pursuant to this provision for LaRC, the estimated cost and fee values for every hour ordered by the exercise of an option will be increased as follows for Quality Control.

- (i) For options exercised for work to be performed during Base Period, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 1, the estimated cost and award fee will be increased by (\$ OFI) and (\$ OFI) respectively for every hour ordered by the exercise of an option.
- (ii) For options exercised for work to be performed during Option 2, the estimated cost and award fee will be increased by \$(OFI) and \$(OFI), respectively, for every hour ordered by the exercise of an option.

**F.8.3 OPTIONS FOR DECREASE IN T-38N AIRCRAFT (Applies to fixed price)**

Note: At no time during this contract will the Government remove more than two T-38 aircraft or reduce the number of T-38 flight hours more than 600 hours.

**F.8.3.1** The Government may require the contractor to remove one T-38N from the required number of T-38N aircraft per day in Section C, Table 6-2 T-38N “Weekly Flight Schedule” and 300 hours per year, shown in Section C, Table 6-1 “Projected Flight Hours.” The Contracting Officer may exercise this option at time of award of the contract or with the Option to Extend the Period of Performance Options by issuance of a unilateral contract modification. Should the option be exercised, the resultant contract will include all terms and conditions of the basic contract as it

exists immediately prior to the exercise of the option except for the following changes:

F.8.3.1.1 Option exercised at time of award of the contract, the fixed price and award fee are decreased as follows:

(i) For Base Period the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

F.8.3.1.2 Option exercised at time of exercise of Option 1, the fixed price and award fee are decreased as follows:

(i) For Option 1 Period, the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

F.8.3.1.3 Option exercised at time of exercise of Option 2, the fixed price and award fee are decreased as follows:

(i) For Option 2 Period, the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

F.8.3.2 The Government may require the contractor to remove two T-38N from the required number of T-38N aircraft per day in Section C, Table 6-2 T-38N “Weekly Flight Schedule” and 600 hours per year, shown in Section C, Table 6-1 “Projected Flight Hours.” The Contracting Officer may exercise this option at time of award of the contract or with the Option to Extend the Period of Performance Options by issuance of a unilateral contract modification. Should the option be exercised, the resultant contract will include all terms and conditions of the basic contract as it exists immediately prior to the exercise of the option except for the following changes:

F.8.3.2.1 Option exercised at time of award of the contract, the fixed price and award fee are decreased as follows:

(i) For Base Period the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

F.8.3.2.2 Option exercised at time of exercise of Option 1, the fixed price and award fee are decreased as follows:

(i) For Option 1 Period, the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

F.8.3.2.3 Option exercised at time of exercise of Option 2, the fixed price and award fee are decreased as follows:

(i) For Option 2 Period, the fixed price and award fee will be decreased by \$(OFI) and \$(OFI), respectively.

(End of clause)

F.9 FLIGHT ITEM (JSC PROCUREMENT INSTRUCTION 52.247-95) (AUG 2005)  
(Applies to Fixed-Price and Cost)

Block 16 of each Department of Defense Form 250 prepared for flight hardware or related equipment to be shipped under this contract must be annotated as follows in 1/4-inch letters or larger by hand printing or rubber stamp:

“THIS IS A FLIGHT ITEM:” OR "THIS IS MISSION ESSENTIAL GROUND SUPPORT EQUIPMENT," as applicable.

(End of clause)

**(END OF SECTION)**

## SECTION G - CONTRACT ADMINISTRATION DATA

- G.1 1852.223-71 FREQUENCY AUTHORIZATION. DEC 1988) (Applies to Fixed-Price and Cost)
- G.2 1852.227-70 NEW TECHNOLOGY. (MAY 2002) (Applies to Fixed-Price and Cost)
- G.3 1852.227-86 COMMERCIAL COMPUTER SOFTWARE - LICENSING. (DEC 1987) (Applies to Fixed-Price and Cost)
- G.4 1852.242-71 TRAVEL OUTSIDE OF THE UNITED STATES. (DEC 1988) (Applies to Cost)
- G.5 1852.242-73 NASA CONTRACTOR FINANCIAL MANAGEMENT REPORTING. (NOV 2004) (Applies to Cost)
- G.6 1852.216-76 AWARD FEE FOR SERVICE CONTRACTS. (JUN 2000) (Applies to Cost)

- (a) The Contractor can earn award fee from the cost portion of the contract from a minimum of zero dollars to the maximum stated in paragraphs B.2.1.1 and B.2.1.2 for cost elements of clause B.2 ESTIMATED COST, FIXED PRICE AND AWARD FEE (Applies to Fixed-Price and Cost).
- (b) Beginning 6 months after the effective date of this contract, the Government shall evaluate the Contractor's performance every 6 months to determine the amount of award fee earned by the Contractor during the period. The Contractor may submit a self-evaluation of performance for each evaluation period under consideration. These self-evaluations will be considered by the Government in its evaluation. The Government's Fee Determination Official (FDO) will determine the award fee amounts based on the Contractor's performance in accordance with Attachment J-2-1. The plan may be revised unilaterally by the Government prior to the beginning of any rating period to redirect emphasis.
- (c) The Government will advise the Contractor in writing of the evaluation results. The payment office will make payment based on unilateral modification by the Contracting Officer.
- (d) After 85 percent of the potential award fee has been paid, the Contracting Officer may direct the withholding of further payment of award fee until a reserve is set aside in an amount that the Contracting Officer considers necessary to protect the Government's interest. This reserve shall not exceed 15 percent of the total potential award fee.
- (e) The amount of award fee which can be awarded in each evaluation period is limited to the amounts set forth at Attachment J-2-1 Cost Plus Award Fee Plan. Award fee which is not earned in an evaluation period cannot be reallocated to future evaluation periods.
- (f)(1) Provisional award fee payments will be made under this contract pending the determination of the amount of fee earned for an evaluation period. If applicable, provisional award fee payments will be made to the Contractor on a monthly basis. The total amount of award fee available in an evaluation period that will be provisionally paid is the lesser of 80 percent or the prior period's

evaluation score.

- (2) Provisional award fee payments will be superseded by the final award fee evaluation for that period. If provisional payments exceed the final evaluation score, the Contractor will either credit the next payment voucher for the amount of such overpayment or refund the difference to the Government, as directed by the Contracting Officer.
- (3) If the Contracting Officer determines that the Contractor will not achieve a level of performance commensurate with the provisional rate, payment of provisional award fee will be discontinued or reduced in such amounts as the Contracting Officer deems appropriate. The Contracting Officer will notify the Contractor in writing if it is determined that such discontinuance or reduction is appropriate.
- (4) Provisional award fee payments will be made prior to the first award fee determination by the Government.
- (g) Award fee determinations are unilateral decisions made solely at the discretion of the Government.

(End of clause)

#### G.7 SUBMISSION OF INVOICES FIXED PRICE (Applies to Fixed-Price)

- (1) The Contractor shall submit an original invoice and three copies (or electronic invoice, if authorized) to the address designated in the contract, (See Form 33, Block 25) to receive invoices. An invoice must include—
  - (i) Name and address of the Contractor;
  - (ii) Invoice date and number;
  - (iii) Contract number, contract line item number and, if applicable, the order number;
  - (iv) Description, quantity, unit of measure, unit price and extended price of the items delivered;
  - (v) Name and address of official to whom payment is to be sent;
  - (vi) Name, title, and phone number of person to notify in event of defective invoice; and
  - (vii) Taxpayer Identification Number (TIN). The Contractor shall include its TIN on the invoice only if required elsewhere in this contract.
  - (viii) Electronic funds transfer (EFT) banking information.
  - (ix) The NASA Shared Services Center is the Designated Billing Office for NASA invoices. All invoices/vouchers shall be submitted via email to NSSC-AccountsPayable@nasa.gov, with no more than one invoice/voucher per email submission. The contractor shall also include a carbon copy of the emailed invoice to the NASA JSC Contracting Officer.
- (A) The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

(B) If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g., 52.232-33, Payment by Electronic Funds Transfer—Central Contractor Registration), or applicable agency procedures.

(C) EFT banking information is not required if the Government waived the requirement to pay by EFT.

(2) Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR Part 1315.

(D) The Contractor may invoice monthly for the preceding month for the Fixed-Price Portion of the Contract, exclusive of the Award Fee, based on the following:

**G.7.1 For Johnson Space Center, Phase-In And Base Period**

**G.7.1.1 JSC Phase-In Period**

Item No	Description	Quantity	Unit	Unit Price	Amount
JSC 1	Phase-In	1	Lot	\$(OFI)	\$(OFI)*

Item No	Description	Quantity	Unit	Unit Price	Amount
1	Phase- In	1	Lot	(OFI)	(OFI)***

**\*\*\*This amount shall be the same as found in B.2.1.2**

(End of clause)

**G.8 AWARD FEE FOR FIXED PRICED SERVICE CONTRACTS (Applies to Fixed-Price)**

- (a) The Contractor can earn award fee from a minimum of zero dollars to the maximum stated in paragraphs B.2.1.1 and B.2.1.2 for the Fixed Price elements of clause B.2 ESTIMATED COST FIXED PRICE AND AWARD FEE (Applies to Fixed-Price and Cost).
- (b) Beginning 6 months after the effective date of this contract, the Government shall evaluate the Contractor's performance every 6 months to determine the amount of award fee earned by the Contractor during the period. The Contractor may submit a self-evaluation of performance for each evaluation period under consideration. These self-evaluations will be considered by the Government in its evaluation. The Government's Fee Determination Official (FDO) will determine the award fee amounts based on the Contractor's performance in accordance with Attachment J-2-2. The plan may be revised unilaterally by the Government prior to the beginning of any rating period to redirect emphasis.
- (c) The Government will advise the Contractor in writing of the evaluation results. The payment office will make payment based on unilateral modification by the Contracting Officer.
- (d) After 85 percent of the potential award fee has been paid, the Contracting Officer may direct the withholding of further payment of award fee until a reserve is set aside in an amount that the Contracting Officer considers necessary to protect the Government's interest. This reserve shall not exceed 15 percent of the total potential award fee.
- (e) The amount of award fee which can be awarded in each evaluation period is limited to the amounts set forth at Attachment J-2-2 Fixed Price Award Fee Plan. Award fee which is not earned in an evaluation period cannot be reallocated to future evaluation periods.

- (f)(1) Provisional award fee payments will not be made under this contract.
- (2) Award fee payments will be made after award Fee Determination Official (FDO) has determined the award fee earned and payable for each evaluation period.
- (g) Award fee determinations are unilateral decisions made solely at the discretion of the Government.

(End of clause)

**G.9 1852.216-87 SUBMISSION OF VOUCHERS FOR PAYMENT. (MAR 1998)**  
**(Applies to Cost)**

- (a) The designated billing office for cost vouchers for purposes of the Prompt Payment clause of this contract is indicated below. Public vouchers for payment of costs shall include a reference to the number of this contract.
- (b) (1) If the Contractor is authorized to submit interim cost vouchers directly to the NASA paying office, the original voucher should be submitted to:

NASA Shared Services Center  
Financial Management Division (FMD) Accounts Payable  
Bldg. 1111  
Stennis Space Center, MS 39529

- (2) For any period that the Defense Contract Audit Agency has authorized the Contractor to submit interim cost vouchers directly to the Government paying office, interim vouchers are not required to be sent to the Auditor, and are considered to be provisionally approved for payment, subject to final audit.
- (3) Copies of vouchers should be submitted as directed by the Contracting Officer.
- (c) If the Contractor is not authorized to submit interim cost vouchers directly to the paying office as described in paragraph (b), the Contractor shall prepare and submit vouchers as follows:
  - (1) One original Standard Form (SF) 1034, SF 1035, or equivalent Contractor's attachment to: Defense Contract Audit Agency (DCAA) Direct Submission Authorization TBD Date.
  - (2) Five copies of SF 1034, SF 1035A, or equivalent Contractor's attachment to the following offices by insertion in the memorandum block of their names and addresses:
    - (i) Copy 1 NASA Contracting Officer
    - (ii) Copy 2 Auditor
    - (iii) Copy 3 Contractor
    - (iv) Copy 4 Contract administration office; and
    - (v) Copy 5 Project management office

- (3) The Contracting Officer may designate other recipients as required.
- (d) Public vouchers for payment of fee shall be prepared similarly to the procedures in paragraphs (b) or (c) of this clause, whichever is applicable, and be forwarded to:

For JSC:  
 NASA Lyndon B. Johnson Space Center  
 Institutional Procurement Office  
 Attn: Alice J. Pursell  
 Houston, TX 77058-3696

For LaRC:  
 NASA Langley Research Center  
 Office of Procurement  
 Attn: Michael T. Stubbs, Mail Stop 126  
 Hampton, VA 23681-0001 This is the designated billing office for fee vouchers for purposes of the Prompt Payment clause of this contract.

- (e) In the event that amounts are withheld from payment in accordance with provisions of this contract, a separate voucher for the amount withheld will be required before payment for that amount may be made.

(End of clause)

**G.10 1852.227-72 DESIGNATION OF NEW TECHNOLOGY REPRESENTATIVE AND PATENT REPRESENTATIVE. (JUL 1997) (Applies to Fixed-Price and Cost)**

- (a) For purposes of administration of the clause of this contract entitled "New Technology" or "Patent Rights - Retention by the Contractor (Short Form)," whichever is included, the following named representatives are hereby designated by the Contracting Officer to administer such clause:

<b>Title</b>	<b>Office Code</b>	<b>Address (including zip code)</b>
New Technology Representative	AD2	NASA, Lyndon B. Johnson Space Center Technology Transfer and Commercialization Office Houston, TX 77058-3696
Patent Counsel	AL	NASA, Lyndon B. Johnson Space Center, Office of Chief Counsel, Houston, TX 77058-3696

- (b) Reports of reportable items, and disclosure of subject inventions, interim reports, final reports, utilization reports, and other reports required by the clause, as well as any correspondence with respect to such matters, should be directed to the New Technology Representative unless transmitted in response to correspondence or request from the Patent Representative. Inquires or requests regarding disposition of rights, election of rights, or related matters should be directed to the Patent Representative. This clause shall be included in any subcontract hereunder requiring a "New Technology" clause or "Patent Rights - Retention by the Contractor (Short Form)" clause, unless otherwise authorized or directed by the Contracting Officer. The respective responsibilities and authorities of the above-named representatives are set forth in

1827.305-370 of the NASA FAR Supplement.

(End of clause)

**G.11 1852.242-70 TECHNICAL DIRECTION. (SEP 1993) (Applies to Fixed-Price and Cost)**

- (a) Performance of the work under this contract is subject to the written technical direction of the Contracting Officer Technical Representative (COTR), who shall be specifically appointed by the Contracting Officer in writing in accordance with NASA FAR Supplement 1842.270. "Technical direction" means a directive to the Contractor that approves approaches, solutions, designs, or refinements; fills in details or otherwise completes the general description of work or documentation items; shifts emphasis among work areas or tasks; or furnishes similar instruction to the Contractor. Technical direction includes requiring studies and pursuit of certain lines of inquiry regarding matters within the general tasks and requirements in Section C of this contract.
- (b) The COTR does not have the authority to, and shall not, issue any instruction purporting to be technical direction that -
  - (1) Constitutes an assignment of additional work outside the statement of work;
  - (2) Constitutes a change as defined in the changes clause;
  - (3) Constitutes a basis for any increase or decrease in the total estimated contract cost, the fixed fee (if any), or the time required for contract performance;
  - (4) Changes any of the expressed terms, conditions, or specifications of the contract; or
  - (5) Interferes with the Contractor's rights to perform the terms and conditions of the contract.
- (c) All technical direction shall be issued in writing by the COTR.
- (d) The Contractor shall proceed promptly with the performance of technical direction duly issued by the COTR in the manner prescribed by this clause and within the COTR's authority. If, in the Contractor's opinion, any instruction or direction by the COTR falls within any of the categories defined in paragraph (b) of this clause, the Contractor shall not proceed but shall notify the Contracting Officer in writing within 5 working days after receiving it and shall request the Contracting Officer to take action as described in this clause. Upon receiving this notification, the Contracting Officer shall either issue an appropriate contract modification within a reasonable time or advise the Contractor in writing within 30 days that the instruction or direction is -
  - (1) Rescinded in its entirety; or
  - (2) Within the requirements of the contract and does not constitute a change under the changes clause of the contract, and that the Contractor should proceed promptly with its performance.
- (e) A failure of the Contractor and Contracting Officer to agree that the instruction or direction is both within the requirements of the contract and does not constitute a change under the changes clause, or a failure to agree upon the contract action to be taken with respect to the instruction or

direction, shall be subject to the Disputes clause of this contract.

- (f) Any action(s) taken by the Contractor in response to any direction given by any person other than the Contracting Officer or the COTR shall be at the Contractor's risk.

(End of clause)

**G.12 1852.245-70 CONTRACTOR REQUESTS FOR GOVERNMENT-PROVIDED EQUIPMENT. (JAN 2011) ALTERNATE I (JAN 2011) (Applies to Fixed-Price and Cost)**

- (a) The Contractor shall provide all property required for the performance of this contract. The Contractor shall not acquire or construct items of property to which the Government will have title under the provisions of this contract without the Contracting Officer's written authorization. Property which will be acquired as a deliverable end item as material or as a component for incorporation into a deliverable end item is exempt from this requirement. Property approved as part of the contract award or specifically required within the statement of work is exempt from this requirement.
- (b)(1) In the event the Contractor is unable to provide the property necessary for performance, and the Contractor requests provision of property by the Government, the Contractor's request shall
  - (i) Justify the need for the property;
  - (ii) Provide the reasons why Contractor-owned property cannot be used;
  - (iii) Describe the property in sufficient detail to enable the Government to screen its inventories for available property or to otherwise acquire property, including applicable manufacturer, model, part, catalog, National Stock Number or other pertinent identifiers;
  - (iv) Combine requests for quantities of items with identical descriptions and estimated values when the estimated values do not exceed \$100,000 per unit; and
  - (v) Include only a single unit when the acquisition or construction value equals or exceeds \$100,000.
- (2) Contracting Officer authorization is required for items the Contractor intends to manufacture as well as those it intends to purchase.
- (3) The Contractor shall submit requests to the Contracting Officer no less than 30 days in advance of the date the Contractor would, should it receive authorization, acquire or begin fabrication of the item.
- (c) The Contractor shall maintain copies of Contracting Officer authorizations, appropriately cross-referenced to the individual property record, within its property management system.
- (d) Property furnished from Government excess sources is provided as-is, where-is. The Government makes no warranty regarding its applicability for performance of the contract or its ability to operate. Failure of property obtained from Government excess sources under this clause is insufficient reason for submission of requests for equitable adjustments discussed in the clause at FAR 52.245-1, Government Property, as incorporated in this contract.

- (e) In the event the Contracting Officer issues written authorization to provide property, the Contractor shall screen Government sources to determine the availability of property from Government inventory or excess property.
- (1) The Contractor shall review NASA inventories and other authorized Federal excess sources for availability of items that meet the performance requirements of the requested property.
  - (i) If the Contractor determines that a suitable item is available from NASA supply inventory, it shall request the item using applicable Center procedures.
  - (ii) If the Contractor determines that an item within NASA or Federal excess is suitable, it shall contact the Center Industrial Property Officer to arrange for transfer of the item from the identified source to the Contractor.
- (2) If the Contractor determines that the required property is not available from inventory or excess sources, the Contractor shall note the acquisition file with a list of sources reviewed and the findings regarding the lack of availability. If the required property is available, but unsuitable for use, the Contractor shall document the rationale for rejection of available property. The Contractor shall retain appropriate cross-referenced documentary evidence of the outcome of those screening efforts as part of its property records system.

(End of clause)

**G.13 1852.245-71 INSTALLATION-ACCOUNTABLE GOVERNMENT PROPERTY. (JAN 2011) ALTERNATE I (JAN 2011) (Applies to Fixed-Price and Cost)**

(a) The Government property described in paragraph (c) of this clause may be made available to the Contractor on a no-charge basis for use in performance of this contract. This property shall be utilized only within the physical confines of the NASA installation that provided the property unless authorized by the Contracting Officer under (b)(1)(iv). Under this clause, the Government retains accountability for, and title to, the property, and the Contractor shall comply with the following:

NASA Procedural Requirements (NPR) 4100.1, NASA Materials Inventory Management Manual;

NASA Procedural Requirements (NPR) 4200.1, NASA Equipment Management Procedural Requirements;

NASA Procedural Requirement (NPR) 4300.1, NASA Personal Property Disposal Procedural Requirements;

**[JWI 4210.2 JSC Instructions for Control of Program Stock](#)**

Property not recorded in NASA property systems must be managed in accordance with the requirements of the clause at FAR 52.245-1, as incorporated in this contract. The Contractor shall establish and adhere to a system of written procedures to assure continued, effective management control and compliance with these user responsibilities. In accordance with FAR 52.245-1(h)(1) the Contractor shall be liable for property lost, damaged, destroyed or stolen by the Contractor or their employees when determined responsible by a NASA Property Survey Board, in accordance with the NASA guidance in this clause.

- (b)(1) The official accountable recordkeeping, financial control, and reporting of the property subject to this clause shall be retained by the Government and accomplished within NASA management information systems prescribed by the installation Supply and Equipment Management Officer (SEMO) and Financial Management Officer. If this contract provides for the Contractor to acquire property, title to which will vest in the Government, the following additional procedures apply:
  - (i) The Contractor shall not utilize the installation's central receiving facility for receipt of contractor-acquired property. However, the Contractor shall provide listings suitable for establishing accountable records of all such property received, on a monthly basis, to the SEMO.
  - (ii) The Contractor shall furnish a copy of each purchase order, prior to delivery by the vendor, to the installation central receiving area.
  - (iii) The Contractor shall establish a record for Government titled property as required by FAR 52.245-1, as incorporated in this contract, and shall maintain that record until accountability is accepted by the Government.
  - (iv) Contractor use of Government property at an off-site location and off-site subcontractor use requires advance approval of the Contracting Officer and notification of the Industrial Property Officer. The property shall be considered Government furnished and the Contractor shall assume accountability and financial reporting responsibility. The Contractor shall establish records and property control procedures and maintain the property in accordance with the requirements of FAR 52.245-1, Government Property (as incorporated in this contract), until its return to the installation. NASA Procedural Requirements related to property loans shall not apply to offsite use of property by contractors.
- (2) After transfer of accountability to the Government, the Contractor shall continue to maintain such internal records as are necessary to execute the user responsibilities identified in paragraph (a) of this clause and document the acquisition, billing, and disposition of the property. These records and supporting documentation shall be made available, upon request, to the SEMO and any other authorized representatives of the Contracting Officer.
- (c) The following property and services are provided if checked:
  - (1) Office space, work area space, and utilities. Government telephones are available for official purposes only.
  - (2) Office furniture.
  - (3) Property listed in Attachment J-3.
- (i) If the Contractor acquires property, title to which vests in the Government pursuant to other provisions of this contract, this property also shall become accountable to the Government upon its entry into Government records.
- (ii) The Contractor shall not bring to the installation for use under this contract any property owned or leased by the Contractor, or other property that the Contractor is accountable for under any other Government contract, without the Contracting Officer's prior written approval.

[ ] (4) Supplies from stores stock.

[X] (5) Publications and blank forms stocked by the installation.

[X] (6) Safety and fire protection for Contractor personnel and facilities.

[X] (7) Installation service facilities: See Table 1, 2, and 3 listed below.

[X] (10) Building maintenance for facilities occupied by Contractor personnel.

[X] (11) Moving and hauling for office moves, movement of large equipment, and delivery of supplies. Moving services may be provided on-site, as approved by the Contracting Officer.

(End of clause)

G.14 1852.245-75 PROPERTY MANAGEMENT CHANGES. (JAN 2011) (Applies to Fixed-Price and Cost)

(a) The Contractor shall submit any changes to standards and practices used for management and control of Government property under this contract to the assigned property administrator prior to making the change whenever the change -

(1) Employs a standard that allows increase in thresholds or changes the timing for reporting loss, damage, or destruction of property;

(2) Alters physical inventory timing or procedures;

(3) Alters recordkeeping practices;

(4) Alters practices for recording the transport or delivery of Government property; or

(5) Alters practices for disposition of Government property.

(End of clause)

G.15 1852.245-76 LIST OF GOVERNMENT PROPERTY FURNISHED PURSUANT TO FAR 52.245-1. (JAN 2011) (Applies to Fixed-Price and Cost)

For performance of work under this contract, the Government will make available Government property identified below on a no charge-for-use basis pursuant to the clause at FAR 52.245-1, Government Property, as incorporated in this contract. The Contractor shall use this property in the performance of this contract at other location(s) as may be approved by the Contracting Officer. Under FAR 52.245-1, the Contractor is accountable for the identified property.

**NO GOVERNMENT PROPERTY WILL BE MADE AVAILABLE OR PROVIDED TO THE CONTRACTOR AS GOVERNMENT FURNISHED PROPERTY (GFP) UNDER THIS CLAUSE. PROPERTY UNDER AMOS WILL BE AVAILABLE AS INSTALLATION ACCOUNTABLE PROPERTY IN ACCORDANCE WITH NASA FAR SUPPLEMENT (NFS) 1852.245-71 (JAN 2011) UNLESS OTHERWISE AUTHORIZED IN THIS CONTRACT.**

(End of clause)

G.16 1852.245-78 PHYSICAL INVENTORY OF CAPITAL PERSONAL PROPERTY. (JAN 2011) (Applies to Fixed-Price and Cost)

(a) In addition to physical inventory requirements under the clause at FAR 52.245-1, Government Property, as incorporated in this contract, the Contractor shall conduct annual physical inventories

for individual property items with an acquisition cost exceeding \$100,000.

(1) The Contractor shall inventory -

(i) Items of property furnished by the Government;

(ii) Items acquired by the Contractor and titled to the Government under the clause at FAR 52.245-1;

(iii) Items constructed by the Contractor and not included in the deliverable, but titled to the Government under the clause at FAR 52.245-1; and

(iv) Complete but undelivered deliverables.

(2) The Contractor shall use the physical inventory results to validate the property record data, specifically location and use status, and to prepare summary reports of inventory as described in paragraph (c) of this clause.

(b) Unless specifically authorized in writing by the Property Administrator, the inventory shall be performed and posted by individuals other than those assigned custody of the items, responsibility for maintenance, or responsibility for posting to the property record. The Contractor may request a waiver from this separation of duties requirement from the Property Administrator, when all of the conditions in either (1) or (2) of this paragraph are met.

(1) The Contractor utilizes an electronic system for property identification, such as a laser bar-code reader or radio frequency identification reader, and

(i) The programs or software preclude manual data entry of inventory identification data by the individual performing the inventory; and

(ii) The inventory and property management systems contain sufficient management controls to prevent tampering and assure proper posting of collected inventory data.

(2) The Contractor has limited quantities of property, limited personnel, or limited property systems; and the Contractor provides written confirmation that the Government property exists in the recorded condition and location;

(3) The Contractor shall submit the request to the cognizant property administrator and obtain approval from the property administrator prior to implementation of the practice.

(c) The Contractor shall report the results of the physical inventory to the property administrator within 10 calendar days of completion of the physical inventory. The report shall -

(1) Provide a summary showing number and value of items inventoried; and

(2) Include additional supporting reports of -

(i) Loss in accordance with the clause at 52.245-1, Government Property;

(ii) Idle property available for reuse or disposition; and

(iii) A summary of adjustments made to location, condition, status, or user as a result of the

physical inventory reconciliation.

(d) The Contractor shall retain auditable physical inventory records, including records supporting transactions associated with inventory reconciliation. All records shall be subject to Government review and/or audit.

(End of clause)

**G.17 1852.245-79 RECORDS AND DISPOSITION REPORTS FOR GOVERNMENT PROPERTY WITH POTENTIAL HISTORIC OR SIGNIFICANT REAL VALUE. (JAN 2011) (Applies to Fixed-Price and Cost)**

(a) In addition to the property record data required by the clause at FAR 52.245-1, Government Property as incorporated in this contract, Contractor records of all Government property under this contract shall -

- (1) Identify the projects or missions that used the items;
- (2) Specifically identify items of flown property;
- (3) When known, associate individual items of property used in space flight operations with the using astronaut(s); and
- (4) Identify property used in test activity and, when known, the individuals who conducted the test.

(b) The Contractor shall include this information within item descriptions -

- (1) On any Standard Form 1428, Inventory Schedule;
- (2) In automated disposition systems;
- (3) In any other disposition related reports; and
- (4) In other requests for disposition instructions.

(c) The Contractor shall not remove NASA identification or markings from Government property prior to or during disposition without the advanced written approval of the Plant Clearance Officer.

(End of clause)

**G.18 1852.245-82 OCCUPANCY MANAGEMENT REQUIREMENTS. (JAN 2011) (Applies to Fixed-Price and Cost)**

(a) In addition to the requirements of the clause at FAR 52.245-1, Government Property, as included in this contract, the Contractor shall comply with the following in performance of work in and around Government real property:

- (1) NPD 8800.14, Policy for Real Property Management.
- (2) NPR 8831.2, Facility Maintenance Management.

- (b) The Contractor shall obtain the written approval of the Contracting Officer before installing or removing Contractor-owned property onto or into any Government real property or when movement of Contractor-owned property may damage or destroy Government-owned property. The Contractor shall restore damaged property to its original condition at the Contractor's expense.
- (c) The Contractor shall not acquire, construct or install any fixed improvement or structural alterations in Government buildings or other real property without the advance, written approval of the Contracting Officer. Fixed improvement or structural alterations, as used herein, means any alteration or improvement in the nature of the building or other real property that, after completion, cannot be removed without substantial loss of value or damage to the premises. Title to such property shall vest in the Government.
- (d) The Contractor shall report any real property or any portion thereof when it is no longer required for performance under the contract, as directed by the Contracting Officer.

(End of Clause)

**G.19 EL PASO INTERNATIONAL AIRPORT 10-YEAR FINGER PRINT CRIMINAL HISTORY CHECK (Applies to Fixed-Price and Cost)**

All Contractor employees who require unescorted access to the El Paso International Airport Security Identification Display Area (SIDA) shall submit his/her fingerprints to the United States Office of Personnel Management for a fingerprint-based criminal history record check. The Contractor may contact the El Paso International Airport Badging Office at 915-780-4750 to make an appointment for fingerprinting.

(End of clause)

**G.20 SECURITY/BADGING REQUIREMENTS FOR FOREIGN NATIONAL VISITORS AND EMPLOYEES/REPRESENTATIVES OF FOREIGN CONTRACTORS (JSC PROCUREMENT INSTRUCTION 52.204-91) (JAN 2006) (Applies to Fixed-Price and Cost)**

- (a) An employee of a domestic Johnson Space Center (JSC) Contractor or its subcontractor who is not a U.S. citizen (foreign national) may not be admitted to the JSC site for purposes of performing work without special arrangements. In addition, all employees or representatives of a foreign JSC Contractor/subcontractor may not be admitted to the JSC or WSTF site without special arrangements. For employees as described above, advance notice must be given to the Security Office of the host installation at least 3 weeks prior to the scheduled need for access to the site so that instructions on obtaining access may be provided. Contractors should be aware that approval for access to the site and issuance of a badge may take much longer than three weeks and sufficient lead time must be allowed to accommodate the approval process.
- (b) All visit/badge requests for persons described in (a) above must be entered in the NASA Foreign National Management System (NFMMS) for acceptance, review, concurrence and approval purposes. When an authorized company official requests a JSC or LaRC badge for site access, he/she is certifying that steps have been taken to ensure that its Contractor or subcontractor employees, visitors, or representatives will not be given access to export-controlled or classified information for which they are not authorized. The authorized company officials shall serve as the Contractor's representative(s) in certifying that all

visit/badge request forms are processed in accordance with JSC and LaRC security and export control procedures. No foreign national, representative, or resident alien Contractor/subcontractor employee shall be granted access into JSC or WSTF until approved and processed through the NFNMS. Unescorted access will not be granted unless a favorable National Agency Check (NAC) has been completed by the JSC Security Office, and an approved NASA Foreign National Visitor Security/Technology Control Plan (STTCP), (previously called the Access Control Plan) has been submitted and approved.

- (c) The Contractor agrees that it will not employ for the performance of work onsite at the JSC or WSTF any individuals who are not legally authorized to work in the United States. If the JSC or WSTF Industrial Security Specialist or the Contracting Officer has reason to believe that any employee of the Contractor may not be legally authorized to work in the United States and/or on the contract, the Contractor may be required to furnish copies of Form I-9 (Employment Eligibility Verification), U.S. Department of Labor Application for Alien Employment Certification, and any other type of employment authorization document.

The Contractor agrees to provide the information requested by the JSC or WSTF Security Office in order to comply with NASA policy directives and guidelines related to foreign visits to NASA facilities so that (1) the visitor/employee/ representative may be allowed access to JSC or other NASA Centers for performance of this contract, (2) required investigations can be conducted, and (3) required annual or revalidation reports can be submitted to NASA Headquarters. All requested information must be submitted in a timely manner in accordance with instructions provided by JSC or any other Center to be visited.

(End of clause)

**G.21 IDENTIFICATION OF EMPLOYEES (JSC PROCUREMENT INSTRUCTION 52.242-92) (AUG 2009) (Applies to Fixed-Price and Cost)**

- (a) At all times while on Government property, the Contractor, subcontractors, their employees and agents shall wear badges which will be issued by the NASA Badging & Visitor Control Office, located in Building 110 at the Johnson Space Center (JSC), or at the Main Gate at the White Sands Test Facility (WSTF). JSC badges and credentials will be issued only between the hours of 6:00 a.m. to 5:30 p.m., Monday through Friday. WSTF employee badges will be issued only between the hours of 8 a.m. to 2 p.m., Monday through Friday. WSTF visitor badges will be issued on a 7-day a week, 24-hour a day basis at the forward gate (B-117). Resident aliens and foreign nationals/representatives shall be issued green foreign national badges.
- (b) Each individual who wears a badge shall be required to sign personally for the badge. The Contractor shall be held accountable for issued badges and all other related items and must assure that they are returned to the NASA Badging & Visitor Control Offices upon completion of work under the contract in accordance with Security Management Directive (SMD) 500-15, "Security Termination Procedures." Failure to comply with the NASA Contractor termination procedures upon completion of the work (e.g., return of badges, keys, CAA cards, clearance terminations, JSC Public Key Infrastructure (PKI)/special program deletions, etc.) may result in final payment being delayed.

(End of clause)

**(END OF SECTION)**

## SECTION H - SPECIAL CONTRACT REQUIREMENTS

- H.1 1852.208-81 RESTRICTIONS ON PRINTING AND DUPLICATING. (NOV 2004)  
(Applies to Fixed-Price and Cost)
- H.2 1852.225-70 EXPORT LICENSES. (FEB 2000) (Applies to Fixed-Price and Cost)
- (b) The Contractor shall be responsible for obtaining export licenses, if required, before utilizing foreign persons in the performance of this contract, including instances where the work is to be performed on-site at (JSC and LaRC), where the foreign person will have access to export-controlled technical data or software.
- H.3 1852.228-70 AIRCRAFT GROUND AND FLIGHT RISK. (OCT 1996) (Applies to Fixed-Price)  
Add the following:  
(k) Definition of aircraft is modified to include helicopters. The helicopter covered under this contract has reached a point of manufacture comparable to that specified in the standard definition, which is written for conventional winged aircraft.
- H.4 1852.228-71 AIRCRAFT FLIGHT RISKS. (DEC 1988) (Applies to Cost)
- H.5 1852.246-70 MISSION CRITICAL SPACE SYSTEM PERSONNEL RELIABILITY PROGRAM. (MAR 1997) (Applies to Fixed-Price and Cost)
- H.6 1852.247-71 PROTECTION OF THE FLORIDA MANATEE. (MAR 1989) (Applies to Fixed-Price and Cost)
- H.7 TASK ORDERING PROCEDURE. (Applies to Cost)
- (a) Only the Contracting Officer may issue task orders to the Contractor, providing specific authorization or direction to perform work within the scope of the contract and as specified in the schedule. The Contractor may incur costs under this contract in performance of task orders and task order modifications issued in accordance with this clause. No other costs are authorized unless otherwise specified in the contract or expressly authorized by the Contracting Officer.
- (b) Prior to issuing a task order, the Contracting Officer shall provide the Contractor with the following data:
- (1) A functional description of the work identifying the objectives or results desired from the contemplated task order.
- (2) Proposed performance standards to be used as criteria for determining whether the work requirements have been met.
- (3) A request for a task plan from the Contractor to include the technical approach, period of performance, appropriate cost information, and any other information required to determine the reasonableness of the Contractor's proposal.
- (c) Within 10 calendar days after receipt of the Contracting Officer's request, the Contractor shall

submit a task plan conforming to the request.

- (d) After review and any necessary discussions, the Contracting Officer may issue a task order to the Contractor containing, as a minimum, the following:
  - (1) Date of the order.
  - (2) Contract number and order number.
  - (3) Functional description of the work identifying the objectives or results desired from the task order, including special instructions or other information necessary for performance of the task.
  - (4) Performance standards, and where appropriate, quality assurance standards.
  - (5) Maximum dollar amount authorized (cost and fee or price). This includes allocation of award fee among award fee periods, if applicable.
  - (6) Any other resources (travel, materials, equipment, facilities, etc.) authorized.
  - (7) Delivery/performance schedule including start and end dates.
  - (8) If contract funding is by individual task order, accounting and appropriation data.
- (e) The Contractor shall provide acknowledgment of receipt to the Contracting Officer within 5 calendar days after receipt of the task order.
- (f) If time constraints do not permit issuance of a fully defined task order in accordance with the procedures described in paragraphs (a) through (d), a task order which includes a ceiling price may be issued.
- (g) The Contracting Officer may amend tasks in the same manner in which they were issued.
- (h) In the event of a conflict between the requirements of the task order and the Contractor's approved task plan, the task order shall prevail.

(End of clause)

H.8 1852.223-70 SAFETY AND HEALTH. (APR 2002) (Applies to Fixed-Price and Cost)

- (a) Safety is the freedom from those conditions that can cause death, injury, occupational illness, damage to or loss of equipment or property, or damage to the environment. NASA's safety priority is to protect: (1) the public, (2) astronauts and pilots, (3) the NASA workforce (including Contractor employees working on NASA contracts), and (4) high-value equipment and property.
- (b) The Contractor shall take all reasonable safety and occupational health measures in performing this contract. The Contractor shall comply with all Federal, State, and local laws applicable to safety and occupational health and with the safety and occupational health standards, specifications, reporting requirements, and any other relevant requirements of this contract.

- (c) The Contractor shall take, or cause to be taken, any other safety, and occupational health measures the Contracting Officer may reasonably direct. To the extent that the Contractor may be entitled to an equitable adjustment for those measures under the terms and conditions of this contract, the equitable adjustment shall be determined pursuant to the procedures of the changes clause of this contract; provided, that no adjustment shall be made under this Safety and Health clause for any change for which an equitable adjustment is expressly provided under any other clause of the contract.
- (d) The Contractor shall immediately notify and promptly report to the Contracting Officer or a designee any accident, incident, or exposure resulting in fatality, lost-time occupational injury, occupational disease, contamination of property beyond any stated acceptable limits set forth in the contract Schedule; or property loss of \$25,000 or more, or Close Call (a situation or occurrence with no injury, no damage or only minor damage (less than \$1,000) but possesses the potential to cause any type mishap, or any injury, damage, or negative mission impact) that may be of immediate interest to NASA, arising out of work performed under this contract. The Contractor is not required to include in any report an expression of opinion as to the fault or negligence of any employee. In addition, service contractors (excluding construction contracts) shall provide quarterly reports specifying lost-time frequency rate, number of lost-time injuries, exposure, and accident/incident dollar losses as specified in the contract Schedule.
- (e) The Contractor shall investigate all work-related incidents, accidents, and Close Calls, to the extent necessary to determine their causes and furnish the Contracting Officer a report, in such form as the Contracting Officer may require, of the investigative findings and proposed or completed corrective actions.
- (f) (1) The Contracting Officer may notify the Contractor in writing of any noncompliance with this clause and specify corrective actions to be taken. When the Contracting Officer becomes aware of noncompliance that may pose a serious or imminent danger to safety and health of the public, astronauts and pilots, the NASA workforce (including Contractor employees working on NASA contracts), or high value mission critical equipment or property, the Contracting Officer shall notify the Contractor orally, with written confirmation. The Contractor shall promptly take and report any necessary corrective action.  
  
(2) If the Contractor fails or refuses to institute prompt corrective action in accordance with subparagraph (f) (1) of this clause, the Contracting Officer may invoke the stop-work order clause in this contract or any other remedy available to the Government in the event of such failure or refusal.
- (g) The Contractor (or subcontractor or supplier) shall insert the substance of this clause, including this paragraph (g) and any applicable Schedule provisions and clauses, with appropriate changes of designations of the parties, in all solicitations and subcontracts of every tier, when one or more of the following conditions exist:
  - (1) The work will be conducted completely or partly on premises owned or controlled by the Government.
  - (2) The work includes construction, alteration, or repair of facilities in excess of the simplified acquisition threshold.
  - (3) The work, regardless of place of performance, involves hazards that could endanger the public, astronauts and pilots, the NASA workforce (including Contractor employees working on NASA contracts), or high value equipment or property, and the hazards are not adequately addressed by

Occupational Safety and Health Administration (OSHA) or Department of Transportation (DOT) regulations (if applicable).

- (4) When the Contractor (or subcontractor or supplier) determines that the assessed risk and consequences of a failure to properly manage and control the hazard(s) warrants use of the clause.
- (h) The Contractor (or subcontractor or supplier) may exclude the provisions of paragraph (g) from its solicitation(s) and subcontract(s) of every tier when it determines that the clause is not necessary because the application of the OSHA and DOT (if applicable) regulations constitute adequate safety and occupational health protection. When a determination is made to exclude the provisions of paragraph (g) from a solicitation and subcontract, the Contractor must notify and provide the basis for the determination to the Contracting Officer. In subcontracts of every tier above the micro-purchase threshold for which paragraph (g) does not apply, the Contractor (or subcontractor or supplier) shall insert the substance of paragraphs (a), (b), (c), and (f) of this clause).
- (i) Authorized Government representatives of the Contracting Officer shall have access to and the right to examine the sites or areas where work under this contract is being performed in order to determine the adequacy of the Contractor's safety and occupational health measures under this clause.
- (j) The Contractor shall continually update the safety and health plan when necessary. In particular, the Contractor shall furnish a list of all hazardous operations to be performed, and a list of other major or key operations required or planned in the performance of the contract, even though not deemed hazardous by the Contractor. NASA and the Contractor shall jointly decide which operations are to be considered hazardous, with NASA as the final authority. Before hazardous operations commence, the Contractor shall submit for NASA concurrence -
  - (1) Written hazardous operating procedures for all hazardous operations; and/or
  - (2) Qualification standards for personnel involved in hazardous operations.

(End of clause)

H.9 1852.223-75 MAJOR BREACH OF SAFETY OR SECURITY. (FEB 2002) (Applies to Fixed-Price and Cost)

- (a) Safety is the freedom from those conditions that can cause death, injury, occupational illness, damage to or loss of equipment or property, or damage to the environment. Safety is essential to NASA and is a material part of this contract. NASA's safety priority is to protect: (1) the public; (2) astronauts and pilots; (3) the NASA workforce (including contractor employees working on NASA contracts); and (4) high-value equipment and property. A major breach of safety may constitute a breach of contract that entitles the Government to exercise any of its rights and remedies applicable to material parts of this contract, including termination for default. A major breach of safety must be related directly to the work on the contract. A major breach of safety is an act or omission of the Contractor that consists of an accident, incident, or exposure resulting in a fatality or mission failure; or in damage to equipment or property equal to or greater than \$1 million; or in any "willful" or "repeat" violation cited by the Occupational Safety and Health Administration (OSHA) or by a state agency operating under an OSHA approved plan.

- (b) Security is the condition of safeguarding against espionage, sabotage, crime (including computer crime), or attack. A major breach of security may constitute a breach of contract that entitles the Government to exercise any of its rights and remedies applicable to material parts of this contract, including termination for default. A major breach of security may occur on or off Government installations, but must be related directly to the work on the contract. A major breach of security is an act or omission by the Contractor that results in compromise of classified information, illegal technology transfer, workplace violence resulting in criminal conviction, sabotage, compromise or denial of information technology services, equipment or property damage from vandalism greater than \$250,000, or theft greater than \$250,000.
- (c) In the event of a major breach of safety or security, the Contractor shall report the breach to the Contracting Officer. If directed by the Contracting Officer, the Contractor shall conduct its own investigation and report the results to the Government. The Contractor shall cooperate with the Government investigation, if conducted.

(End of clause)

H.10 1852.228-76 CROSS-WAIVER OF LIABILITY FOR INTERNATIONAL SPACE STATION ACTIVITIES (DEVIATION) 10/5/2009 NASA PROCUREMENT INFORMATION CIRCULAR 09-11 (Applies to Cost)

- (a) The Intergovernmental Agreement Among the Government of Canada, Governments of Member States of the European Space Agency, the Government of Japan, the Government of the Russian Federation, and the Government of the United States of America concerning Cooperation on the Civil International Space Station (IGA) for the International Space Station (ISS) contains a cross-waiver of liability provision to encourage participation in the exploration, exploitation, and use of outer space through the ISS. The Parties intend that this cross-waiver of liability be broadly construed to achieve this objective.
- (b) As used in this clause, the term:
  - (1) "Agreement" refers to any NASA Space Act agreement that contains the cross-waiver of liability provision authorized by 14 CFR Part 1266.102.
  - (2) "Damage" means:
    - (i) Bodily injury to, or other impairment of health of, or death of, any person;
    - (ii) Damage to, loss of, or loss of use of any property;
    - (iii) Loss of revenue or profits; or
    - (iv) Other direct, indirect, or consequential damage.
  - (3) "Launch Vehicle" means an object, or any part thereof, intended for launch, launched from Earth, or returning to Earth which carries payloads or persons, or both.
  - (4) "Partner State" includes each Contracting Party for which the IGA has entered into force, pursuant to Article 25 of the IGA or pursuant to any successor agreement. A Partner State includes its Cooperating Agency. It also includes any entity specified in the Memorandum of Understanding (MOU) between NASA and the Government of Japan's Cooperating Agency in

the implementation of that MOU.

- (5) “Party” means a party to a NASA Space Act agreement involving activities in connection with the ISS and a party that is neither the prime contractor under this contract nor a subcontractor at any tier.
- (6) "Payload" means all property to be flown or used on or in a Launch Vehicle or the ISS.
- (7) "Protected Space Operations" means all Launch or Transfer Vehicle activities, ISS activities, and Payload activities on Earth, in outer space, or in transit between Earth and outer space in implementation of the IGA, MOUs concluded pursuant to the IGA, implementing agreements, and contracts to perform work in support of NASA’s obligations under these Agreements. It includes, but is not limited to:
  - (i) Research, design, development, test, manufacture, assembly, integration, operation, or use of Launch or Transfer Vehicles, the ISS, Payloads, or instruments, as well as related support equipment and facilities and services; and
  - (ii) All activities related to ground support, test, training, simulation, or guidance and control equipment and related facilities or services. “Protected Space Operations” also includes all activities related to evolution of the ISS, as provided for in Article 14 of the IGA. “Protected Space Operations” excludes activities on Earth which are conducted on return from the ISS to develop further a Payload’s product or process for use other than for ISS-related activities in implementation of the IGA.
- (8) "Related Entity" means:
  - (i) A contractor or subcontractor of a Party or a Partner State at any tier;
  - (ii) A user or customer of a Party or a Partner State at any tier; or
  - (iii) A contractor or subcontractor of a user or customer of a Party or a Partner State at any tier. The terms “contractor” and “subcontractor” include suppliers of any kind.
- (9) “Transfer Vehicle” means any vehicle that operates in space and transfers Payloads or persons or both between two different space objects, between two different locations on the same space object, or between a space object and the surface of a celestial body. A “Transfer Vehicle” also includes a vehicle that departs from and returns to the same location on a space object.
  - (c)(1) The Contractor agrees to a cross-waiver of liability pursuant to which it waives all claims against any of the entities or persons listed in paragraphs (c)(1)(i) through (c)(1)(iv) of this clause based on Damage arising out of Protected Space Operations. This cross-waiver shall apply only if the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations. The cross-waiver shall apply to any claims for Damage, whatever the legal basis for such claims, against:
    - (i) A Party as defined in (B)(5) above;
    - (ii) A Partner State other than the United States of America;
    - (iii) A Related Entity of any entity identified in paragraph (c)(1)(i) or (c)(1)(ii) of this clause; or

- (iv) The employees of any of the entities identified in paragraphs (c)(1)(i) through (c)(1)(iii) of this clause.
  - (2) In addition, the contractor shall, by contract or otherwise, extend the cross-waiver of liability set forth in paragraph (c)(1) of this clause to its subcontractors at any tier by requiring them, by contract or otherwise, to:
    - (i) Waive all claims against the entities or persons identified in paragraphs (c)(1)(i) through (c)(1)(iv) of this clause; and
    - (ii) Require that their subcontractors waive all claims against the entities or persons identified in paragraphs (c)(1)(i) through (c)(1)(iv) of this clause.
  - (3) For avoidance of doubt, this cross-waiver of liability includes a cross-waiver of claims arising from the *Convention on International Liability for Damage Caused by Space Objects*, which entered into force on September 1, 1972, where the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations.
  - (4) Notwithstanding the other provisions of this clause, this cross-waiver of liability shall not be applicable to:
    - (i) Claims between the Government and its own contractors or between its own contractors and subcontractors;
    - (ii) Claims made by a natural person, his/her estate, survivors or subrogees (except when a subrogee is a Party to an Agreement or is otherwise bound by the terms of this cross-waiver) for bodily injury to, or other impairment of health of, or death of, such person;
    - (iii) Claims for Damage caused by willful misconduct;
    - (iv) Intellectual property claims;
    - (v) Claims for Damage resulting from a failure of the contractor to extend the cross-waiver of liability to its subcontractors and related entities, pursuant to paragraph (c)(2) of this clause; or
    - (vi) Claims by the Government arising out of or relating to the contractor's failure to perform its obligations under this contract.
  - (5) Nothing in this clause shall be construed to create the basis for a claim or suit where none would otherwise exist.
  - (6) This cross-waiver shall not be applicable when 49 U.S.C. Subtitle IX, Chapter 701 is applicable.

**(End of clause)**

H.11 1852.228-78, CROSS-WAIVER OF LIABILITY FOR SCIENCE OR SPACE EXPLORATION ACTIVITIES UNRELATED TO THE INTERNATIONAL SPACE STATION (DEVIATION) (10/5/2009 NASA PROCUREMENT INFORMATION CIRCULAR 09-11) (APPLIES TO COST)

(a) The purpose of this clause is to extend a cross-waiver of liability to NASA contracts for work done in support of Agreements between Parties involving Science or Space Exploration activities, unrelated to the International Space Station (ISS), but which involve a launch. This cross-waiver of liability shall be broadly construed to achieve the objective of furthering participation in space exploration, use, and investment.

(b) As used in this clause, the term:

(1) "Agreement" refers to any NASA Space Act agreement that contains the cross-waiver of liability provision authorized in 14 CFR 1266.104.

(2) "Damage" means:

(i) Bodily injury to, or other impairment of health of, or death of, any person;

(ii) Damage to, loss of, or loss of use of any property;

(iii) Loss of revenue or profits; or

(iv) Other direct, indirect, or consequential Damage;

(3) "Launch Vehicle" means an object, or any part thereof, intended for launch, launched from Earth, or returning to Earth which carries Payloads or persons, or both.

(4) "Party" means a party to a NASA Space Act agreement for Science or Space Exploration activities, unrelated to the ISS, but which involve a launch and a party that is neither the prime contractor under this contract nor a subcontractor at any tier hereto. (5) "Payload" means all property to be flown or used on or in a Launch Vehicle.

(6) "Protected Space Operations" means all Launch or Transfer Vehicle activities and Payload activities on Earth, in outer space, or in transit between Earth and outer space in implementation of an Agreement for Science or Space Exploration activities, unrelated to the ISS, but which involve a launch. Protected Space Operations begins at the signature of the Agreement and ends when all activities done in implementation of the agreement are completed. It includes, but is not limited to:

(i) Research, design, development, test, manufacture, assembly, integration, operation, or use of Launch or Transfer Vehicles, Payloads, or instruments, as well as related support equipment and facilities and services; and

(ii) All activities related to ground support, test, training, simulation, or guidance and control equipment, and related facilities or services.

Protected Space Operations excludes activities on Earth which are conducted on return from space to develop further a Payload's product or process other than for the activities within the scope of an Agreement.

(7) "Related entity" means:

(i) A contractor or subcontractor of a Party at any tier;

(ii) A user or customer of a party at any tier; or

(iii) A contractor or subcontractor of a user or customer of a Party at any tier.

The terms “contractors” and “subcontractors” include suppliers of any kind. (c) Cross-waiver of liability:

(1) The contractor agrees to a waiver of liability pursuant to which it waives all claims against any of the entities or persons listed in paragraphs (c)(1)(i) through (c)(1)(iv) of this clause based on Damage arising out of Protected Space Operations. This cross-waiver shall apply only if the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations. The waiver shall apply to any claims for Damage, whatever the legal basis for such claims, against:

(i) A Party;

(ii) A Party to another NASA Agreement or contract that includes flight on the same Launch Vehicle;

(iii) A Related Entity of any of the entities identified in (c)(1)(i) or (c)(1)(ii) of this clause; or

(iv) The employees of any of the entities identified in (c)(1)(i) through (c)(1)(iii) of this clause.

(2) The contractor agrees to extend the cross-waiver of liability as set forth in paragraph (c)(1) of this clause to its own subcontractors at all tiers by requiring them, by contract or otherwise, to:

(i) Waive all claims against the entities or persons identified in paragraphs (c)(1)(i) through (c)(1)(iv) of this clause; and

(ii) Require that their Related Entities waive all claims against the entities or persons identified in paragraph (c)(1)(i) through (c)(1)(iv) of this clause.

(3) For avoidance of doubt, this cross-waiver includes a cross-waiver of claims arising from the Convention on International Liability for Damage Caused by Space Objects, which entered into force on September 1, 1972, where the person, entity, or property causing the Damage is involved in Protected Space Operations and the person, entity, or property damaged is damaged by virtue of its involvement in Protected Space Operations.

(4) Notwithstanding the other provisions of this clause, this cross-waiver of liability shall not be applicable to:

(i) Claims between the Government and its own contractors or between its own contractors and subcontractors;

(ii) Claims made by a natural person, his/her estate, survivors, or subrogees (except when a subrogee is a Party to an Agreement or is otherwise bound by the terms of this cross-waiver) for bodily injury to, or other impairment of health, or death of such person;

(iii) Claims for Damage caused by willful misconduct;

(iv) Intellectual property claims;

- (v) Claims for damages resulting from failure of the contractor to extend the cross-waiver of liability to its subcontractors and related entities, pursuant to paragraph (c)(2) of this clause; or
- (vi) Claims by the Government arising out of or relating to a contractor’s failure to perform its obligations under this contract.
- (5) Nothing in this clause shall be construed to create the basis for a claim or suit where none would otherwise exist.
- (6) This cross-waiver shall not be applicable when 49 U.S.C. Subtitle IX, Chapter 701 is applicable.

(End of clause)

**H.12 1852.232-77 LIMITATION OF FUNDS (FIXED- PRICE CONTRACT). (MAR 1989)**  
**(Applies to Fixed-Price)**

- (a) Of the total fixed price of items in Section B.2, the sum of \$(Government Fill In) is presently available for payment and allotted to this contract. It is anticipated that from time to time additional funds will be allocated to the contract in accordance with the following schedule, until the total price of said items is allotted:

**SCHEDULE FOR ALLOTMENT OF FUNDS**

Date	Amounts
<u>[Government Fill In]</u>	<u>[Government Fill In]</u>

- (b) The Contractor agrees to perform or have performed work on the items specified in paragraph (a) of this clause up to the point at which, if this contract is terminated pursuant to the Termination for Convenience of the Government clause of this contract, the total amount payable by the Government (including amounts payable for subcontracts and settlement costs) pursuant to paragraphs (f) and (g) of that clause would, in the exercise of reasonable judgment by the Contractor, approximate the total amount at the time allotted to the contract. The Contractor is not obligated to continue performance of the work beyond that point. The Government is not obligated in any event to pay or reimburse the Contractor more than the amount from time to time allotted to the contract, anything to the contrary in the Termination for Convenience of the Government clause notwithstanding.
- (c) (1) It is contemplated that funds presently allotted to this contract will cover the work to be performed until [Government Fill In].
- (2) If funds allotted are considered by the Contractor to be inadequate to cover the work to be performed until that date, or an agreed date substituted for it, the Contractor shall notify the Contracting Officer in writing when within the next 60 days the work will reach a point at which, if the contract is terminated pursuant to the Termination for Convenience of the Government clause of this contract, the total amount payable by the Government (including amounts payable for subcontracts and settlement costs) pursuant to paragraphs (f) and (g) of that clause will approximate 75 percent of the total amount then allotted to the contract.
- (3) (i) The notice shall state the estimate when the point referred to in paragraph (c) (2) of this clause will be reached and the estimated amount of additional funds required to continue performance to the date specified in paragraph (c) (1) of this clause, or an agreed date substituted for it.

- (ii) The Contractor shall, 60 days in advance of the date specified in paragraph (c) (1) of this clause, or an agreed date substituted for it, advise the Contracting Officer in writing as to the estimated amount of additional funds required for the timely performance of the contract for a further period as may be specified in the contract or otherwise agreed to by the parties.
- (4) If, after the notification referred to in paragraph (c) (3) (ii) of this clause, additional funds are not allotted by the date specified in paragraph (c) (1) of this clause, or an agreed date substituted for it, the Contracting Officer shall, upon the Contractor's written request, terminate this contract on that date or on the date set forth in the request, whichever is later, pursuant to the Termination for Convenience of the Government clause.
- (d) When additional funds are allotted from time to time for continued performance of the work under this contract, the parties shall agree on the applicable period of contract performance to be covered by these funds. The provisions of paragraphs (b) and (c) of this clause shall apply to these additional allotted funds and the substituted date pertaining to them, and the contract shall be modified accordingly.
- (e) If, solely by reason of the Government's failure to allot additional funds in amounts sufficient for the timely performance of this contract, the Contractor incurs additional costs or is delayed in the performance of the work under this contract, and if additional funds are allotted, an equitable adjustment shall be made in the price or prices (including appropriate target, billing, and ceiling prices where applicable) of the items to be delivered, or in the time of delivery, or both.
- (f) The Government may at any time before termination, and, with the consent of the Contractor, after notice of termination, allot additional funds for this contract.
- (g) The provisions of this clause with respect to termination shall in no way be deemed to limit the rights of the Government under the default clause of this contract. The provisions of this Limitation of Funds clause are limited to the work on and allotment of funds for the items set forth in paragraph (a) of this clause. This clause shall become inoperative upon the allotment of funds for the total price of said work except for rights and obligations then existing under this clause.
- (h) Nothing in this clause shall affect the right of the Government to terminate this contract pursuant to the Termination for Convenience of the Government clause of this contract.

(End of clause)

**H.13 1852.235-71 KEY PERSONNEL AND FACILITIES. (MAR 1989) (Applies to Fixed-Price and Cost)**

- (a) The personnel in the positions or managing the functional areas listed below and/or facilities listed below (or specified in the contract Schedule) are considered essential to the work being performed under this contract. Before removing, replacing, or diverting any of the listed or specified personnel or facilities, the Contractor shall (1) notify the Contracting Officer reasonably in advance and (2) submit justification (including proposed substitutions) in sufficient detail to permit evaluation of the impact on this contract.
- (b) The Contractor shall make no diversion without the Contracting Officer's written consent;

provided that the Contracting Officer may ratify in writing the proposed change, and that ratification shall constitute the Contracting Officer's consent required by this clause.

- (c) The personnel in the positions or managing the functional areas listed below and/or facilities (shown below or as specified in the contract Schedule) may, with the consent of the contracting parties, be amended from time to time during the course of the contract to add or delete personnel and/or facilities.

<b>Position/Functional Area</b>	<b>Personnel</b>
Executive Manager	(OFI)
Executive Manager - Alternate	(OFI)
Engineering	(OFI)
WB-57 Maintenance	(OFI)
Program and Project Support	(OFI)
Logistics	(OFI)
Maintenance	(OFI)
Quality Control	(OFI)
Safety and Health Officer	(OFI)
Sub-contracting and Purchasing	(OFI)
LaRC Executive Manager	(OFI)

(End of clause)

**H.14 1852.242-72 OBSERVANCE OF LEGAL HOLIDAYS. (AUG 1992) (Applies to Fixed-Price and Cost)**

- (a) The on-site Government personnel observe the following holidays:

New Year's Day  
 Labor Day  
 Martin Luther King, Jr.'s Birthday  
 Columbus Day  
 President's Day  
 Veterans Day  
 Memorial Day  
 Thanksgiving Day  
 Independence Day  
 Christmas Day  
 Any other day designated by Federal statute, Executive order, or the President's proclamation.

- (b) When any holiday falls on a Saturday, the preceding Friday is observed. When any holiday falls on a Sunday, the following Monday is observed. Observance of such days by Government personnel shall not by itself be cause for an additional period of performance or entitlement of compensation except as set forth within the contract.

(End of clause)

**H.15 REPRESENTATIONS, CERTIFICATIONS AND OTHER STATEMENTS OF OFFEROR (Applies to Fixed-Price and Cost)**

The completed provision 52.204-8, Annual Representations and Certifications, including any amended representation(s) made at paragraph (b) of the provision; and other representations, certifications and other statements contained in Section K completed and submitted as part of the offer dated *[Insert date of offer (Offeror Fill In)]* are hereby incorporated by reference in this resulting contract.

(End of Clause)

**H.16 JSC HAZARDOUS MATERIALS USE (JSC PROCUREMENT INSTRUCTION 52.223-92) (DEC 1999) (Applies to Fixed-Price and Cost)**

- (a) This clause is JSC-unique, and the requirements are in addition to any U.S. Environmental Protection Agency, U.S. Occupational Safety and Health Administration, or other state or Federal regulation or statute. Therefore, the following requirements do NOT supersede any statutory or regulatory requirements for any entity subject to this clause.
- (b) "Hazardous materials," for the purposes of this clause, consist of the following:
  - (1) Those materials defined as "highly hazardous chemicals" in Occupational Safety and Health Administration Process Safety Management Regulation, 29 Code of Federal Regulation 1010.119, without regard for quantity.
  - (2) Those "extremely hazardous substances" subject to the emergency planning requirements in the Environmental Protection Agency Emergency Planning and Community Right-to-Know Regulation, 40 Code of Federal Regulation 355, Part 355, without regard for quantity.
  - (3) Those "hazardous substances" subject to the release notification requirements under Environmental Protection Agency's Emergency Planning and Community Right-to-Know Regulation, 40 Code of Federal Regulation 302.4, without regard for quantity.
  - (4) Any radioisotope material or device that produces ionizing radiation.
  - (5) Any Class II, III, or IV laser as defined by the American National Standards Institute No. Z136.1 (1986)
  - (6) Any explosive or any pyrotechnics.
  - (7) Any pesticide.
- (c) The Contractor shall develop and maintain an inventory listing the identity and quantity of hazardous materials stored or used onsite at JSC for the performance of the contract.
- (d) The Contractor shall ensure that the proper training of its employees in the use and inherent hazards of these materials is accomplished prior to use.
- (e) The Contractor shall notify the JSC Occupational Health and Test Support Office (SD13) prior to any initial use or different application of these materials.
- (f) The Contractor shall use all hazardous materials properly and take all necessary precautions to ensure no harm is done to humans or the environment.

- (g) The Contractor shall insert the substance of this clause, including this Paragraph F with appropriate changes of designations of the parties, in subcontracts under which hazardous materials will be utilized, or may reasonably be expected to be utilized, onsite at JSC.
- (h) In the event the Contractor fails or refuses to comply with any aspect of this clause, such failure or refusal may be considered a material breach of this contract.

(End of clause)

**H.17 52.223-93 ENVIRONMENTAL AND ENERGY CONSERVATION REQUIREMENTS (Feb 2011) (JSC Procurement Instruction) (Applies to Fixed-Price and Cost)**

- (a) The Contractor shall ensure that all work performed and equipment used to fulfill the requirements of this contract are in compliance with all Federal, state, and local regulations and public laws, and the following NASA JSC directives: JPD 8500.1, JSC Environmental Excellence Policy; JPR 8550.1, JSC Environmental Compliance Procedural Requirements; JPR 8553.1, JSC Environmental Management System Manual; JWI 8553.1, EMS Aspect/Impact Assessment and EMP Process; NPR 8570.1, Energy Efficiency and Water Conservation; and JWI 8570.1, Energy Conservation. The Contractor shall provide data on affirmative procurement, waste reduction activity, energy efficient product procurement, and ozone depleting substances in accordance with DRD [insert number], Environmental and Energy Consuming Product Compliance Reports.
- (b) The Government remains the owner and operator of record for all environmental activities conducted at NASA owned properties unless otherwise documented in assigned agreement between NASA and the Contractor. The Contractor is advised that activities performed at JSC and associated facilities are subject to Federal, state and local regulatory agency inspections to review compliance with environmental laws and regulations. For on-site issues, JSC's Environmental Office will be the single point of contact with Federal and state regulatory agencies and their representatives unless otherwise directed by the Contracting Officer or the Environmental Office. The Contractor shall immediately notify the JSC Environmental Office when contacted by external regulatory agency representatives and shall cooperate fully. The Contractor shall complete, maintain, and make available to the Contracting Officer, JSC Environmental Office, JSC Energy Manager, or regulatory agency personnel all documentation relating to environmental compliance matters under applicable laws. The Contractor shall immediately notify the JSC Environmental Office upon issuance of a Notice of Violation or noncompliance to the Contractor.
- (c) Should a Notice of Violation, Notice of Noncompliance, Notice of Deficiency, or similar regulatory agency notice be issued to the Government as a facility owner/operator on account of the actions or inactions of the Contractor or one of its subcontractors in the performance of work under this contract, the Contractor shall fully cooperate with the Government in correcting any problems and defending against regulatory assessment of any civil fines or penalties arising out of such actions or inactions.

(End of clause)

**H.18 SMALL BUSINESS SUBCONTRACTING GOALS (JSC PROCUREMENT INSTRUCTION 52.219-90) (OCT 2006) (Applies to Fixed-Price and Cost)**

The total small business goal, expressed as a percent of total contract value including options, is **18** percent. The small business percentage goal includes the following goals expressed as a percent of total contract value:

<b>Subcategories of Small Business Concerns**</b>	<b>Dollar Target</b>	<b>Percentage of Total Contract Value</b>	<b>Percentage of Subcontract value</b>
Other than Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Women Owned Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Small Disadvantaged Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Veteran Owned Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Service-Disabled Veteran-Owned Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
HUBZone Small Business	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
Historically Black Colleges and Universities	<u>\$(OFI)</u>	<u>%(OFI)</u>	<u>%(OFI)</u>
**For purposes of this clause, the terms, "HUBZone Small Business Concern," "Small Disadvantaged Business Concern," "Service-Disabled, Veteran-Owned Small Business Concern," "Veteran-Owned Small Business Concern," "Women-Owned Small Business Concern," and "Historically Black College or University (HBCU)" are defined in paragraph 2.101 of the Federal Acquisition Regulation.			

(End of clause)

**H.19 ADMINISTRATIVE LEAVE (JSC PROCUREMENT INSTRUCTION 52.242-94) (SEP 2008) (Applies to Fixed-Price and Cost)**

- (a) When the NASA installation grants administrative leave to its Government employees (e.g., as a result of inclement weather, potentially hazardous conditions, or other special circumstances), the following personnel should also be dismissed upon notification of a center closure provided by the Contracting Officer:

Contractor personnel working on-site; and Contractor personnel dedicated to the contract effort who are working off-site within 10 miles of JSC; and unable to perform their NASA contract duties at their off-site location because their normal place of business has been or is expected to be negatively impacted by an emergency situation (e.g. has sustained damage, has been evacuated, etc.).

However, the Contractor shall provide sufficient on-site personnel to perform round-the-clock requirements of critical work already in process, unless otherwise instructed by the Contracting Officer or authorized representative.

- (b) Administrative leave granted under this clause shall be subject to modification or termination by the Contracting Officer and in all instances shall be subject to the availability of funds. The cost of salaries and wages to the Contractor for the period of any such excused absence shall be a reimbursable item of cost under this contract for effected employees in accordance with the Contractor's established accounting policy.

1. If a labor hour-based contract, administrative leave granted under this clause shall be accounted for consistent with productive hours under this contract for employees in accordance with the Contractor's established accounting policy.
  2. For fixed price contracts based on other than labor hours for deliverables, the Contracting Officer and Contractor shall as a precondition to any reimbursement negotiate an advanced agreement to determine the appropriate method in which to grant administrative leave under this clause.
  3. All invoices requesting payment under this clause shall be marked as “Administrative Leave in accordance with 52.242-94, Administrative Leave.” All such invoices paid will be subject to review, audit, and revision when routine operations re-commence.
- (c) The Contractor shall include this clause in all services subcontracts that include personnel in the categories described in (a) above.

(End of clause)

## H.20 LEVEL-OF-EFFORT (COST)(Applies to Cost)

- (a) During the term of the contract, the Contractor is obligated to provide not less than 90% nor more than 110% of 305,400 total direct labor hours. An allocation of the hours by specific NASA center is provided below.

(1) Johnson Space Center

During the term of the contract, the Contractor is obligated to provide not less than 90% nor more than 110% of 286,304 total direct labor hours.

(2) Langley Research Center

During the term of the contract, the Contractor is obligated to provide not less than 90% nor more than 110% of 19,096 total direct labor hours.

- (b) “Direct labor hours” are those productive hours expended by Contractor personnel, including subcontracted personnel, in performing work requirements described in the Statement of Work or elsewhere in this contract that are charged as direct labor under the Contractor’s established accounting policy and procedures.
- (c) Once the maximum number of direct labor hours is reached or the contract term has ended, the Contractor’s requirements under the contract are fulfilled, even though the specified work may not have been completed. The Contractor is not authorized to exceed the maximum of the direct labor hours specified in paragraph (a) unless a bilateral contract modification is executed. Any estimated cost and fee(s) adjustments for any additional direct labor hours shall be based solely upon the quantity of additional hours being added to the maximum number of direct labor hours specified in this clause.
- (d) The fee, if any, is based upon the furnishing of at least the specified minimum number of direct labor hours, including subcontract hours. If the Contractor provides less than that specified minimum number of hours prior to expiration of the contract term, and the Government has not invoked its rights under the Termination clause of this contract to adjust the contract for such reduced effort, the Contracting Officer may unilaterally make an equitable downward adjustment to the contract fee. The downward adjustment in fee will be

based upon the difference between the minimum direct labor hours specified under this clause and the amount of direct labor hours provided by the Contractor. Prior to making such an adjustment, the Contracting Officer will request the Contractor provide a written discussion of any extenuating circumstances (e.g., productivity improvements or reductions in contract scope) which contributed to the underrun. Any information provided by the Contractor will be considered by the Contracting Officer in determining the amount of the downward adjustment in fee.

(End of clause)

**H.21 SECURITY PROGRAM/NON-U.S. CITIZEN EMPLOYEE ACCESS REQUIREMENTS (FEB 2007) (Applies to Fixed-Price and Cost)**

Access to the LaRC by non-U.S. citizen employees, including those in lawful permanent resident status, shall be approved in accordance with NPR 1371.2A, " Requirements for Processing Requests for Access to NASA Installations or Facilities by Foreign Nationals or U.S. Citizens Who are Reprs of Foreign Entities". Processing requires advance notice of a minimum of 20 days depending on the nationality of the non-U.S. citizen or foreign representative. Access authorization shall be for a maximum of one year and must be re-evaluated annually. Non-U.S. citizen employees or foreign representatives must be under escort at all times while on Center (by a NASA Civil Servant or permanently badged Contractor) unless otherwise approved by the International Visitors Coordinator (IVC).

(End of clause)

**H.22 OBSERVATION OF SAFETY STAND DOWN EVENT BY CONTRACTOR EMPLOYEES (Langley Clause 52.223-92) (MAY 2006) (Applies to Fixed-Price and Cost)**

The Langley Research Center (LaRC) Safety Stand Down Event is an annual event dedicated to learning best practices for a safe work environment. When the LaRC Director designates the Safety Stand Down Event, the Contractor shall require all onsite and near-site employees to participate in Safety Stand Down activities at LaRC.

(End of clause)

**H.23 ASSOCIATE CONTRACTOR AGREEMENT (ACA) (Applies to Fixed-Price and Cost)**

JSC is a Government-owned, Government-operated installation. Government-Contractor and Contractor-Contractor partnering is essential to the success of JSC operations. Therefore, an Associate Contractor Agreement (ACA) among support Contractors are required to ensure the successful operation at JSC. Example support contracts include:

JSC Logistics Operations Contract	NNJ08JA01C
JSC Security Contract	NAS9-01055
JSC Facilities Contract	NNJ08JA02C
Custodial Contract	NNJ08JB96C
Grounds Contract	NNJ08JA03C
JSC Environmental Contract	NNJ08JB01C
NAMIS Support Contract	NNJ11JC26T

WB-57 Special Capabilities Support and Engineering Services Contract  
WB-57 Mechanical Engineering Services Contract  
WB-57 Aeronautics and Structural Engineering Services Contract  
Microgravity Services

NNJ11JB28C

Additional ACA's may be required as contracts are competed / re-competed or as new contractor relationships develop.

The associate Contractors need to establish guidelines to address coordination, cooperation, and communication. In addition the associate Contractors need to establish the means for the exchange of such data and communications as needed. A copy of the ACA shall be provided to the Contracting Officer within 30 days after agreement is reached.

(End of clause)

#### H.24 NASA RECORDS MANAGEMENT (Applies to Fixed-Price and Cost)

The contractor shall create, maintain, preserve, and dispose of NASA records in accordance with NPG 1441.1D "NASA Records Retention Schedules."

(End of clause)

#### H.25 CENTER UNIQUE CLAUSES (Applies to Fixed-Price and Cost)

Federal Acquisition Regulation (FAR), NASA FAR Supplement (NFS) clauses, and clauses with no Federal regulation clause number designation covers all work at JSC and LaRC. Unless otherwise noted, clauses with JSC Procurement Instruction (JPI) and Langley are only applicable to the appropriate Center.

(End of clause)

#### H.26 EMERGENCY PREPAREDNESS AND RESPONSE (Applies to Fixed-Price and Cost)

The Contractor's obligation may include resolution of unusual or emergency situations. The Contractor may be required to assist NASA, within the general scope of work, but in currently unidentified ways, in preparation for, or in response to emergencies. Obligations under this requirement shall only arise when one or more of the criteria at FAR 18.001, enabling NASA to utilize "Emergency Acquisition Flexibilities", are met. If the emergency preparedness and response requirements result in changes to the contract, all contract adjustments will be processed in accordance with the Changes clause of this contract.

(End of clause)

#### H.27 CONTINUITY OF SERVICES (Applies to Fixed-Price and Cost)

1. In the event the incumbent is not the successful contractor for the follow-on contract award, the incumbent contractor hereby agrees to cooperate with the successor. Further, the contractor shall turn over to the successor contractor all administrative records and technical data acquired or formulated during the life of this contract.
2. The incumbent contractor's own work shall carefully fit into the successor contractor's

phase-in schedule. The incumbent contractor shall not commit or permit any act, which will interfere with the performance of work by the successor contractor or by the government. The incumbent contractor shall take reasonable steps to aid in the transition of the successor's work force into the environment, on a non-interference basis with the incumbent contractor's responsibilities.

3. On a non-interference basis the successor shall be allowed to observe all activities, which occur during the phase-in period. These activities shall include as a minimum over-the-shoulder observance of daily activities and other requests mutually agreed to by the involved parties.

## **H.28 CONTRACT TYPE CONVERSION (Applies to Fixed-Price and Cost)**

If sufficient data becomes available on a repetitive task being performed in the cost portion of the contract, either the Contracting Officer or the contractor may request a firm-fixed-price for that item for the remaining life of the contract. Any modification to the contract as a result of this clause when be in accordance with clause I.103.

(End of clause)

## **H.29 1852.209-71 LIMITATION OF FUTURE CONTRACTING.(DECEMBER 1988) (APPLIES TO FIXED-PRICE AND COST)**

- (a) The Contracting Officer has determined that this acquisition may give rise to a potential organizational conflict of interest. Accordingly, the attention of prospective offerors is invited to FAR Subpart 9.5--Organizational Conflicts of Interest
- (b) The nature of this conflict is that it may provide technical specifications and supporting documentation for procurements as detailed in:
  - (1) Section C, Statement of Work, 5.3.3 1 "Acquisition Liaison Support;"
  - (2) 8.0 "Engineering," 8.1 "General Requirements," 8.1.1 "Overview" Sub-bullet # 10 "Technical specifications and supporting documentation for procurements;" and
  - (3) L.8.0; "Engineering," L.8.1 "General Requirements," L.8.1.1 "Overview" Sub-bullet # 10 "Technical specifications and supporting documentation for procurements"
- (c) The restrictions upon future contracting are as follows:
  - (1) If the Contractor, under the terms of this contract, or through the performance of tasks pursuant to this contract, is required to develop specifications or statements of work that are to be incorporated into a solicitation, the Contractor shall be ineligible to perform the work described in that solicitation as a prime or first-tier subcontractor under an ensuing NASA contract. This restriction shall remain in effect for a reasonable time, as agreed to by the Contracting Officer and the Contractor, sufficient to avoid unfair competitive advantage or potential bias (this time shall in no case be less than the duration of the initial production contract). NASA shall not unilaterally require the Contractor to prepare such specifications or statements of work under this contract.
  - (2) To the extent that the work under this contract requires access to proprietary, business confidential, or financial data of other companies, and as long as these data remain proprietary

or confidential, the Contractor shall protect these data from unauthorized use and disclosure and agrees not to use them to compete with those other companies.

(End of clause)

**H.30 MITIGATION OF ORGANIZATIONAL CONFLICTS OF INTEREST (APPLIES TO FIXED-PRICE AND COST)**

- (a) Mitigation plan. The Organizational Conflict of Interest Mitigation Plan and its obligations are hereby incorporated in the contract by reference.
- (b) Changes. (1) Either the Contractor or the Government may propose changes to the Organizational Conflict of Interest Mitigation Plan. Such changes are subject to the mutual agreement of the parties and will become effective only upon incorporating the change into the plan by contract amendment.  
  
(2) In the event that the Government and the Contractor cannot agree upon a mutually acceptable change, the Government reserves the right to make a unilateral change to the OCI Plan as necessary, with the approval of the head of the contracting activity, subject to Contractor appeal as provided in the Disputes clause.
- (c) Violation. The Contractor shall report any violation of the Organizational Conflict of Interest Mitigation Plan, whether by its own personnel or those of the Government or other contractors, to the Contracting Officer. This report shall include a description of the violation and the actions the Contractor has taken or proposes to take to mitigate and avoid repetition of the violation. After conducting such further inquiries and discussions as may be necessary, the Contracting Officer and the Contractor shall agree on appropriate corrective action, if any, or the Contracting Officer shall direct corrective action.
- (d) Breach. Any breach of the above restrictions or any nondisclosure or misrepresentation of any relevant facts required regarding organizational conflicts of interests to be disclosed may result in termination of this contract for default or other remedies as may be available under law or regulation.
- (e) Subcontracts. The Contractor shall include the substance of this clause, including this paragraph (e), in subcontracts where the work includes or may include tasks related to the organizational conflict of interest. The terms —Contractor and —Contracting Officer shall be appropriately modified to reflect the change in parties and to preserve the Government’s rights.

(End of clause)

**H.31 DISCLOSURE OF ORGANIZATIONAL CONFLICT OF INTEREST AFTER CONTRACT AWARD (Applies to Fixed-Price and Cost)**

- (a) If the Contractor identifies an actual or potential organizational conflict of interest that has not already been adequately disclosed and resolved (or waived in accordance with FAR 9.503), the Contractor shall make a prompt and full disclosure in writing to the Contracting Officer. This disclosure shall include a description of the action the Contractor has taken or proposes to take in order to resolve the conflict. This reporting requirement also includes subcontractors’ actual or potential organizational conflicts of interest not adequately disclosed and resolved prior to award.

- (b) Mitigation plan. If there is a mitigation plan in the contract, the Contractor shall periodically update the plan, based on changes such as changes to the legal entity, the overall structure of the organization, subcontractor arrangements, contractor management, ownership, ownership relationships, or modification of the work scope.

(End of clause)

**(END OF SECTION)**

## SECTION I - CONTRACT CLAUSES

- I.1 52.202-1 DEFINITIONS. (JUL 2004) (Applies to Fixed-Price and Cost)
- I.2 52.203-3 GRATUITIES. (APR 1984) (Applies to Fixed-Price and Cost)
- I.3 52.203-5 COVENANT AGAINST CONTINGENT FEES. (APR 1984) (Applies to Fixed-Price and Cost) (Applies to Fixed-Price and Cost)
- I.4 52.203-6 RESTRICTIONS ON SUBCONTRACTOR SALES TO THE GOVERNMENT. (SEP 2006) (Applies to Fixed-Price and Cost) (Applies to Fixed-Price and Cost)
- I.5 52.203-7 ANTI-KICKBACK PROCEDURES. (OCT 2010) (Applies to Fixed-Price and Cost) (Applies to Fixed-Price and Cost)

- I.27 52.215-23 LIMITATIONS ON PASS-THROUGH CHARGES. (OCT 2009) (Applies to Cost)
- I.28 52.216-7 ALLOWABLE COST AND PAYMENT. (JUN 2011) (Applies to Cost)
- (3) The designated payment office will make interim payments for contract financing on the “30th” day after the designated billing office receives a proper payment request.
- I.29 52.217-8 OPTION TO EXTEND SERVICES. (NOV 1999) Option to Extend Services. (Applies to Fixed-Price and Cost)

The Government may require continued performance of any services within the limits and at the

rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor by issuance of a unilateral contract modification 30 days or more before the completion date set forth in Sections F.5.

- I.30 52.219-8 UTILIZATION OF SMALL BUSINESS CONCERNS. (JAN 2011) (Applies to Fixed-Price and Cost)
- I.31 52.219-9 SMALL BUSINESS SUBCONTRACTING PLAN. (JAN 2011) - ALTERNATE II (OCT 2001) (Applies to Fixed-Price and Cost)
- I.32 52.219-16 LIQUIDATED DAMAGES - SUBCONTRACTING PLAN. (JAN 1999) (Applies to Fixed-Price and Cost)
- I.33 52.219-28 POST-AWARD SMALL BUSINESS PROGRAM REREPRESENTATION. (APR 2009) (Applies to Fixed-Price and Cost)
- I.34 52.222-1 NOTICE TO THE GOVERNMENT OF LABOR DISPUTES. (FEB 1997) (Applies to Fixed-Price and Cost)
- I.35 52.222-2 PAYMENT FOR OVERTIME PREMIUMS. (JUL 1990) (Applies to Cost)

(a) The use of overtime is authorized under this contract if the overtime premium does not exceed [Government Fill In To be filled in prior to award] or the overtime premium is paid for work -
- I.36 52.222-3 CONVICT LABOR. (JUN 2003) (Applies to Fixed-Price and Cost)
- I.37 52.222-4 CONTRACT WORK HOURS AND SAFETY STANDARDS ACT - OVERTIME COMPENSATION. (JUL 2005) (Applies to Fixed-Price and Cost)
- I.38 52.222-19 CHILD LABOR - COOPERATION WITH AUTHORITIES AND REMEDIES. (JUL 2010) (Applies to Fixed-Price and Cost)
- I.39 52.222-21 PROHIBITION OF SEGREGATED FACILITIES. (FEB 1999) (Applies to Fixed-Price and Cost)
- I.40 52.222-26 EQUAL OPPORTUNITY. (MAR 2007) (Applies to Fixed-Price and Cost)
- I.41 52.222-29 NOTIFICATION OF VISA DENIAL. (JUN 2003) (Applies to Fixed-Price and Cost)
- I.42 52.222-35 EQUAL OPPORTUNITY FOR VETERANS. (SEP 2010) (Applies to Fixed-Price and Cost)
- I.43 52.222-36 AFFIRMATIVE ACTION FOR WORKERS WITH DISABILITIES. (OCT 2010) (Applies to Fixed-Price and Cost)

- I.44 52.222-37 EMPLOYMENT REPORTS ON VETERANS. (SEP 2010) (Applies to Fixed-Price and Cost)
- I.45 52.222-40 NOTIFICATION OF EMPLOYEE RIGHTS UNDER THE NATIONAL LABOR RELATIONS ACT. (DEC 2010) (Applies to Fixed-Price and Cost)
- I.46 52.222-41 SERVICE CONTRACT ACT OF 1965. (NOV 2007) (Applies to Fixed-Price and Cost)
- I.47 52.222-43 FAIR LABOR STANDARDS ACT AND SERVICE CONTRACT ACT - PRICE ADJUSTMENT (MULTIPLE YEAR AND OPTION CONTRACTS). (SEP 2009) (Applies to Fixed-Price)
- I.48 52.222-50 COMBATING TRAFFICKING IN PERSONS. (FEB 2009) (Applies to Fixed-Price and Cost)
- I.49 52.222-54 EMPLOYMENT ELIGIBILITY VERIFICATION. (JAN 2009) (Applies to Fixed-Price and Cost)
- I.50 52.223-2 AFFIRMATIVE PROCUREMENT OF BIOBASED PRODUCTS UNDER SERVICE AND CONSTRUCTION CONTRACTS. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.51 52.223-3 HAZARDOUS MATERIAL IDENTIFICATION AND MATERIAL SAFETY DATA. (JAN 1997) - ALTERNATE I (JUL 1995) (Applies to Fixed-Price and Cost)
- I.52 52.223-5 POLLUTION PREVENTION AND RIGHT-TO-KNOW INFORMATION. (MAY 2011) -- ALTERNATE I (MAY 2011) (Applies to Fixed-Price and Cost)
- I.53 52.223-6 DRUG-FREE WORKPLACE. (MAY 2001) (Applies to Fixed-Price and Cost)
- I.54 52.223-10 WASTE REDUCTION PROGRAM. (MAY 2011) (Applies to Fixed-Price and Cost)
- I.55 52.223-12 REFRIGERATION EQUIPMENT AND AIR CONDITIONERS. (MAY 1995) (Applies to Fixed-Price and Cost)
- I.56 52.223-15 ENERGY EFFICIENCY IN ENERGY-CONSUMING PRODUCTS. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.57 52.223-16 IEEE 1680 STANDARD FOR THE ENVIRONMENTAL ASSESSMENT OF PERSONAL COMPUTER PRODUCTS. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.58 52.223-17 AFFIRMATIVE PROCUREMENT OF EPA-DESIGNATED ITEMS IN SERVICE AND CONSTRUCTION CONTRACTS. (MAY 2008) (Applies to Fixed-Price and Cost)

- I.59 52.223-18 ENCOURAGING CONTRACTOR POLICIES TO BAN TEXT MESSAGING WHILE DRIVING. (AUG 2011) (Applies to Fixed-Price and Cost)
- I.60 52.224-1 PRIVACY ACT NOTIFICATION. (APR 1984) (Applies to Fixed-Price and Cost)
- I.61 52.224-2 PRIVACY ACT. (APR 1984) (Applies to Fixed-Price and Cost)
- I.62 52.225-1 BUY AMERICAN ACT - SUPPLIES. (FEB 2009) (Applies to Fixed-Price and Cost)
- I.63 52.225-8 DUTY-FREE ENTRY. (OCT 2010) (Applies to Fixed-Price and Cost)

(4) Notation "UNITED STATES GOVERNMENT, **NASA**, Duty-free entry to be claimed pursuant to Item No(s) [**TBD**], Harmonized Tariff Schedules of the United States. Upon arrival of shipment at port of entry, District Director of Customs, please release shipment under 19 CFR part 142 and notify **see block 7 SF33** for execution of Customs Forms 7501 and 7501-A and any required duty-free entry certificates.";
- I.64 52.225-13 RESTRICTIONS ON CERTAIN FOREIGN PURCHASES. (JUN 2008) (Applies to Fixed-Price and Cost)
- I.65 52.225-19 CONTRACTOR PERSONNEL IN A DESIGNATED OPERATIONAL AREA OR SUPPORTING A DIPLOMATIC OR CONSULAR MISSION OUTSIDE THE UNITED STATES. (MAR 2008) (Applies to Cost)

(ii) The Contracting Officer may issue Installation Accountable weapons and ammunition to the Contractor for issuance to specified Contractor employees.
- I.66 52.225-25 PROHIBITION ON ENGAGING IN SANCTIONED ACTIVITIES RELATING TO IRAN-CERTIFICATION. (SEP 2010) (Applies to Fixed-Price and Cost)
- I.67 52.227-1 AUTHORIZATION AND CONSENT. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.68 52.227-2 NOTICE AND ASSISTANCE REGARDING PATENT AND COPYRIGHT INFRINGEMENT. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.69 52.227-3 PATENT INDEMNITY. (APR 1984) (Applies to Fixed-Price and Cost)
- I.70 52.227-14 RIGHTS IN DATA--GENERAL. (DEC 2007) (Applies to Fixed-Price and Cost)
- I.71 52.228-5 INSURANCE - WORK ON A GOVERNMENT INSTALLATION. (JAN 1997) (Applies to Fixed-Price)
- I.72 52.228-7 INSURANCE - LIABILITY TO THIRD PERSONS. (MAR 1996) (Applies to Cost)

I.73 52.229-3 FEDERAL, STATE, AND LOCAL TAXES. (APR 2003) (Applies to Fixed-Price)

I.74 52.229-8 TAXES - FOREIGN COST-REIMBURSEMENT CONTRACTS. (MAR 1990) (Applies to Cost)

(a) Any tax or duty from which the United States Government is exempt by agreement with the Government of [TBD on a required basis], or from which the Contractor or any subcontractor under this contract is exempt under the laws of [TBD on a required basis], shall not constitute an allowable cost under this contract.

I.75 52.229-10 STATE OF NEW MEXICO GROSS RECEIPTS AND COMPENSATING TAX. (APR 2003) (Applies to Cost)

When the Type 15 Nontaxable Transaction Certificate is issued by the Revenue Division, the Contractor shall use these certificates strictly in accordance with this contract, and the agreement between the NASA and the New Mexico Taxation and Revenue Department

(g) The NASA may receive information regarding the Contractor from the Revenue Division of the New Mexico Taxation and Revenue Department and, at the discretion of the NASA, may participate in any matters or proceedings pertaining to this clause or the above-mentioned Agreement. This shall not preclude the Contractor from having its own representative nor does it obligate the NASA to represent its Contractor.

I.76 52.230-2 COST ACCOUNTING STANDARDS. (OCT 2010) (Applies to Fixed-Price and Cost)

I.77 52.230-6 ADMINISTRATION OF COST ACCOUNTING STANDARDS. (JUN 2010) (Applies to Fixed-Price and Cost)

I.78 52.232-1 PAYMENTS. (APR 1984) (Applies to Fixed-Price)

I.79 52.232-8 DISCOUNTS FOR PROMPT PAYMENT. (FEB 2002) (Applies to Fixed-Price)

I.80 52.232-9 LIMITATION ON WITHHOLDING OF PAYMENTS. (APR 1984) (Applies to Fixed-Price and Cost)

I.81 52.232-11 EXTRAS. (APR 1984) (Applies to Fixed-Price)

I.82 52.232-17 INTEREST. (OCT 2010) (Applies to Fixed-Price and Cost)

I.83 52.232-18 AVAILABILITY OF FUNDS. (APR 1984) (Applies to Fixed-Price and Cost)

I.84 52.232-22 LIMITATION OF FUNDS. (APR 1984) (Applies to Cost)

I.85 52.232-23 ASSIGNMENT OF CLAIMS. (JAN 1986) (Applies to Fixed-Price and Cost)

- I.86 52.232-25 PROMPT PAYMENT. (OCT 2008) (Applies to Fixed-Price)
  - I.87 52.232-25 PROMPT PAYMENT. (OCT 2008) -- ALTERNATE I (FEB 2002) (Applies to Cost)
  - I.88 52.232-33 PAYMENT BY ELECTRONIC FUNDS TRANSFER - CENTRAL CONTRACTOR REGISTRATION. (OCT 2003) (Applies to Fixed-Price and Cost)
  - I.89 52.232-35 DESIGNATION OF OFFICE FOR GOVERNMENT RECEIPT OF ELECTRONIC FUNDS TRANSFER INFORMATION. (MAY 1999) (Applies to Fixed-Price and Cost)
- NASA Shared Services Center  
Financial Management Division (FMD) – Accounts Payable  
Bldg. 1111  
C. Road,  
Stennis Space Center, MS 39529
- I.90 52.233-1 DISPUTES. (JUL 2002) - ALTERNATE I (DEC 1991) (Applies to Fixed-Price and Cost)
  - I.91 52.233-3 PROTEST AFTER AWARD. (AUG 1996) (Applies to Fixed-Price)
  - I.92 52.233-3 PROTEST AFTER AWARD. (AUG 1996) - ALTERNATE I (JUN 1985) (Applies to Cost)
  - I.93 52.233-4 APPLICABLE LAW FOR BREACH OF CONTRACT CLAIM. (OCT 2004) (Applies to Fixed-Price and Cost)
  - I.94 52.237-2 PROTECTION OF GOVERNMENT BUILDINGS, EQUIPMENT, AND VEGETATION. (APR 1984) (Applies to Fixed-Price and Cost)
  - I.95 52.237-3 CONTINUITY OF SERVICES. (JAN 1991) (Applies to Fixed-Price and Cost)
  - I.96 52.237-11 ACCEPTING AND DISPENSING OF \$1 COIN. (SEP 2008) (Applies to Fixed-Price and Cost)

- I.130 52.204-1 APPROVAL OF CONTRACT. (DEC 1989) (Applies to Fixed-Price and Cost)

This contract is subject to the written approval of **the JSC Procurement Officer** and shall not be

binding until so approved.

(End of clause)

I.131 52.215-19 NOTIFICATION OF OWNERSHIP CHANGES. (OCT 1997) (Applies to Cost)

(a) The Contractor shall make the following notifications in writing:

(1) When the Contractor becomes aware that a change in its ownership has occurred, or is certain to occur, that could result in changes in the valuation of its capitalized assets in the accounting records, the Contractor shall notify the Administrative Contracting Officer (ACO) within 30 days.

(2) The Contractor shall also notify the ACO within 30 days whenever changes to asset valuations or any other cost changes have occurred or are certain to occur as a result of a change in ownership.

(b) The Contractor shall -

(1) Maintain current, accurate, and complete inventory records of assets and their costs;

(2) Provide the ACO or designated representative ready access to the records upon request;

(3) Ensure that all individual and grouped assets, their capitalized values, accumulated depreciation or amortization, and remaining useful lives are identified accurately before and after each of the Contractor's ownership changes; and

(4) Retain and continue to maintain depreciation and amortization schedules based on the asset records maintained before each Contractor ownership change.

(c) The Contractor shall include the substance of this clause in all subcontracts under this contract that meet the applicability requirement of FAR 15.408(k).

(End of clause)

I.132 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES. (MAY 1989) (Applies to Fixed-Price and Cost)

In compliance with the Service Contract Act of 1965, as amended, and the regulations of the Secretary of Labor (29 CFR Part 4), this clause identifies the classes of service employees expected to be employed under the contract and states the wages and fringe benefits payable to each if they were employed by the contracting agency subject to the provisions of 5 U.S.C. 5341 or 5332.

*This Statement is for Information Only:*

*It is not a Wage Determination*

Employee Class  
*See Attachment J-4*

Monetary Wage - Fringe Benefits  
*See Attachment J-4*

(End of clause)

I.133 52.223-7 NOTICE OF RADIOACTIVE MATERIALS. (JAN 1997) (Applies to Fixed-Price and Cost)

(a) The Contractor shall notify the Contracting Officer or designee, in writing, 5 days prior to the delivery of, or prior to completion of any servicing required by this contract of, items containing either (1) radioactive material requiring specific licensing under the regulations issued pursuant to the Atomic Energy Act of 1954, as amended, as set forth in Title 10 of the Code of Federal Regulations, in effect on the date of this contract, or (2) other radioactive material not requiring specific licensing in which the specific activity is greater than 0.002 microcuries per gram or the activity per item equals or exceeds 0.01 microcuries. Such notice shall specify the part or parts of the items which contain radioactive materials, a description of the materials, the name and activity of the isotope, the manufacturer of the materials, and any other information known to the Contractor which will put users of the items on notice as to the hazards involved (OMB No. 9000-0107).

\* The Contracting Officer shall insert the number of days required in advance of delivery of the item or completion of the servicing to assure that required licenses are obtained and appropriate personnel are notified to institute any necessary safety and health precautions. See FAR 23.601(d).

(b) If there has been no change affecting the quantity of activity, or the characteristics and composition of the radioactive material from deliveries under this contract or prior contracts, the Contractor may request that the Contracting Officer or designee waive the notice requirement in paragraph (a) of this clause. Any such request shall -

(1) Be submitted in writing;

(2) State that the quantity of activity, characteristics, and composition of the radioactive material have not changed; and

(3) Cite the contract number on which the prior notification was submitted and the contracting office to which it was submitted.

(c) All items, parts, or subassemblies which contain radioactive materials in which the specific activity is greater than 0.002 microcuries per gram or activity per item equals or exceeds 0.01 microcuries, and all containers in which such items, parts or subassemblies are delivered to the Government shall be clearly marked and labeled as required by the latest revision of MIL-STD 129 in effect on the date of the contract.

(d) This clause, including this paragraph (d), shall be inserted in all subcontracts for radioactive materials meeting the criteria in paragraph (a) of this clause.

(End of clause)

I.134 52.223-9 ESTIMATE OF PERCENTAGE OF RECOVERED MATERIAL CONTENT FOR EPA-DESIGNATED ITEMS. (MAY 2008) (Applies to Fixed-Price and Cost)

(a) *Definitions.* As used in this clause -

"Postconsumer material" means a material or finished product that has served its intended use and has been discarded for disposal or recovery, having completed its life as a consumer item. Postconsumer material is a part of the broader category of "recovered material."

"Recovered material" means waste materials and by-products recovered or diverted from solid waste, but the term does not include those materials and by-products generated from, and commonly reused within, an original manufacturing process.

(b) The Contractor, on completion of this contract, shall -

- (1) Estimate the percentage of the total recovered material content for EPA-designated item(s) delivered and/or used in contract performance, including, if applicable, the percentage of post-consumer material content; and
- (2) Submit this estimate to the Contracting Officer.

(End of clause)

I.135 52.223-11 OZONE-DEPLETING SUBSTANCES. (MAY 2001) (Applies to Fixed-Price and Cost)

(a) Definition. Ozone-depleting substance, as used in this clause, means any substance the Environmental Protection Agency designates in 40 CFR part 82 as--

- (1) Class I, including, but not limited to, chlorofluorocarbons, halons, carbon tetrachloride, and methyl chloroform; or
- (2) Class II, including, but not limited to, hydrochlorofluorocarbons.

(b) The Contractor shall label products which contain or are manufactured with ozone-depleting substances in the manner and to the extent required by 42 U.S.C. 7671j (b), (c), and (d) and 40 CFR Part 82, Subpart E, as follows:

Warning

Contains (or manufactured with, if applicable) \* \_\_\_\_\_, a substance(s) which harm(s) public health and environment by destroying ozone in the upper atmosphere.

\* The Contractor shall insert the name of the substance(s).

(End of clause)

I.136 52.247-67 SUBMISSION OF TRANSPORTATION DOCUMENTS FOR AUDIT. (FEB 2006) (Applies to Cost)

(a) The Contractor shall submit to the address identified below, for prepayment audit, transportation documents on which the United States will assume freight charges that were paid--

- (1) By the Contractor under a cost-reimbursement contract; and

- (2) By a first-tier subcontractor under a cost-reimbursement subcontract thereunder.
- (b) Cost-reimbursement Contractors shall only submit for audit those bills of lading with freight shipment charges exceeding \$100. Bills under \$100 shall be retained on-site by the Contractor and made available for on-site audits. This exception only applies to freight shipment bills and is not intended to apply to bills and invoices for any other transportation services.
- (c) Contractors shall submit the above referenced transportation documents to--

General Services Administration

Attn: FWA

1800 F Street, NW

Washington, DC 20405

(End of clause)

I.137 52.252-2 CLAUSES INCORPORATED BY REFERENCE. (FEB 1998) (Applies to Fixed-Price and Cost)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

Federal Acquisition Regulation Internet address - <http://www.arnet.gov.far/>

NASA FAR Supplement Internet address

- <http://www.hq.nasa.gov/office/procurement/reg/nfstoc.htm>

(End of clause)

I.138 52.252-4 ALTERATIONS IN CONTRACT. (APR 1984) (Applies to Fixed-Price and Cost)

Portions of this contract are altered as follows: Clause 52.243-2, Changes - Cost-Reimbursement, is modified by deleting the 30-day reference and inserting a reference to 60 days in lieu thereof.

(End of clause)

I.139 52.252-6 AUTHORIZED DEVIATIONS IN CLAUSES. (APR 1984) (Applies to Fixed-Price and Cost)

(a) The use in this solicitation or contract of any Federal Acquisition Regulation (48 CFR Chapter 1) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the date of the clause.

(b) The use in this solicitation or contract of any NASA FAR Supplement (48 CFR Chapter 18) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the name of the regulation.

(End of clause)

I.140 1852.204-75 SECURITY CLASSIFICATION REQUIREMENTS. (SEP 1989)  
(Applies to Fixed-Price and Cost)

Performance under this contract will involve access to and/or generation of classified information, work in a security area, or both, up to the level of TOP SECRET and will require Sensitive Compartmented Information (SCI) access. See Federal Acquisition Regulation clause 52.204-2 in this contract and DD Form 254, Contract Security Classification Specification, Attachment J-5.

(End of clause)

I.141 1852.204-76 SECURITY REQUIREMENTS FOR UNCLASSIFIED  
INFORMATION TECHNOLOGY RESOURCES. (JAN 2011) (Applies to  
Fixed-Price and Cost)

(a) The Contractor shall protect the confidentiality, integrity, and availability of NASA Electronic Information and IT resources and protect NASA Electronic Information from unauthorized disclosure.

(b) This clause is applicable to all NASA contractors and sub-contractors that process, manage, access, or store unclassified electronic information, to include Sensitive But Unclassified (SBU) information, for NASA in support of NASA's missions, programs, projects and/or institutional requirements. Applicable requirements, regulations, policies, and guidelines are identified in the Applicable Documents List (ADL) provided as an attachment to the contract. The documents listed in the ADL can be found at: <http://www.nasa.gov/offices/ocio/itsecurity/index.html>. For policy information considered sensitive, the documents will be identified as such in the ADL and made available through the Contracting Officer.

(c) Definitions.

(1) IT resources means any hardware or software or interconnected system or subsystem of equipment, that is used to process, manage, access, or store electronic information.

(2) NASA Electronic Information is any data (as defined in the Rights in Data clause of this contract) or information (including information incidental to contract administration, such as financial, administrative, cost or pricing, or management information) that is processed, managed, accessed or stored on an IT system(s) in the performance of a NASA contract.

(3) IT Security Management Plan--This plan shall describe the processes and procedures that will be followed to ensure appropriate security of IT resources that are developed, processed, or used under this contract. Unlike the IT security plan, which addresses the IT system, the IT Security Management Plan addresses how the Contractor will manage personnel and processes associated with IT Security on the instant contract.

(4) IT Security Plan--this is a FISMA requirement; see the ADL for applicable requirements. The IT Security Plan is specific to the IT System and not the contract. Within 30 days after award, the Contractor shall develop and deliver an IT Security Management Plan to the Contracting Officer; the approval authority will be included in the ADL. All Contractor personnel requiring physical or logical access to NASA IT resources must complete NASA's annual IT Security Awareness training. Refer to the IT Training policy located in the IT Security Web site at <https://itsecurity.nasa.gov/policies/index.html>.

- (d) The Contractor shall afford Government access to the Contractor's and subcontractors' facilities, installations, operations, documentation, databases, and personnel used in performance of the contract. Access shall be provided to the extent required to carry out a program of IT inspection (to include vulnerability testing), investigation and audit to safeguard against threats and hazards to the integrity, availability, and confidentiality of NASA Electronic Information or to the function of IT systems operated on behalf of NASA, and to preserve evidence of computer crime.
- (e) At the completion of the contract, the Contractor shall return all NASA information and IT resources provided to the Contractor during the performance of the contract in accordance with retention documentation available in the ADL. The Contractor shall provide a listing of all NASA Electronic information and IT resources generated in performance of the contract. At that time, the Contractor shall request disposition instructions from the Contracting Officer. The Contracting Officer will provide disposition instructions within 30 calendar days of the Contractor's request. Parts of the clause and referenced ADL may be waived by the Contracting Officer, if the Contractor's ongoing IT security program meets or exceeds the requirements of NASA Procedural Requirements (NPR) 2810.1 in effect at time of award. The current version of NPR 2810.1 is referenced in the ADL. The Contractor shall submit a written waiver request to the Contracting Officer within 30 days of award. The waiver request will be reviewed by the Center IT Security Manager. If approved, the Contractor Officer will notify the Contractor, by contract modification, which parts of the clause or provisions of the ADL are waived.
- (f) The Contractor shall insert this clause, including this paragraph in all subcontracts that process, manage, access or store NASA Electronic Information in support of the mission of the Agency.

(End of clause)

**I.142 1852.215-84 OMBUDSMAN. (OCT 2003) (Applies to Fixed-Price and Cost)**

- (a) An ombudsman has been appointed to hear and facilitate the resolution of concerns from offerors, potential offerors, and contractors during the preaward and postaward phases of this acquisition. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman is not to diminish the authority of the Contracting Officer, the Source Evaluation Board, or the selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of formal contract disputes. Therefore, before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the Contracting Officer for resolution.
- (b) If resolution cannot be made by the Contracting Officer, interested parties may contact the installation ombudsman, which is posted at [http://prod.nais.nasa.gov/pub/pub\\_library/Omb.html](http://prod.nais.nasa.gov/pub/pub_library/Omb.html). Concerns, issues, disagreements, and recommendations which cannot be resolved at the installation may be referred to the NASA ombudsman, the Director of the Contract Management Division, at 202-358-0445, facsimile 202-358-3083, e-mail [ronald.a.poussard@nasa.gov](mailto:ronald.a.poussard@nasa.gov). Please do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the Contracting Officer or as specified elsewhere in this document.

(End of clause)

I.143 1852.219-76 NASA 8 PERCENT GOAL. (JUL 1997) (Applies to Fixed-Price and Cost)

(a) Definitions.

"Historically Black Colleges or University," as used in this clause, means an institution determined by the Secretary of Education to meet the requirements of 34 CFR Section 608.2. The term also includes any nonprofit research institution that was an integral part of such a college or university before November 14, 1986.

"Minority institutions," as used in this clause, means an institution of higher education meeting the requirements of section 1046(3) of the Higher Education Act of 1965 (20 U.S.C. 1135d-5(3)) which for the purposes of this clause includes a Hispanic-serving institution of higher education as defined in section 316(b)(1) of the Act (20 U.S.C. 1059c(b)(1)).

"Small disadvantaged business concern," as used in this clause, means a small business concern that (1) is at least 51 percent unconditionally owned by one or more individuals who are both socially and economically disadvantaged, or a publicly owned business having at least 51 percent of its stock unconditionally owned by one or more socially and economically disadvantaged individuals, and (2) has its management and daily business controlled by one or more such individuals. This term also means a small business concern that is at least 51 percent unconditionally owned by an economically disadvantaged Indian tribe or Native Hawaiian Organization, or a publicly owned business having at least 51 percent of its stock unconditionally owned by one or more of these entities, which has its management and daily business controlled by members of an economically disadvantaged Indian tribe or Native Hawaiian Organization, and which meets the requirements of 13 CFR 124.

"Women-owned small business concern," as used in this clause, means a small business concern (1) which is at least 51 percent owned by one or more women or, in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women, and (2) whose management and daily business operations are controlled by one or more women.

(b) The NASA Administrator is required by statute to establish annually a goal to make available to small disadvantaged business concerns, Historically Black Colleges and Universities, minority institutions, and women-owned small business concerns, at least 8 percent of NASA's procurement dollars under prime contracts or subcontracts awarded in support of authorized programs, including the space station by the time operational status is obtained.

(c) The Contractor hereby agrees to assist NASA in achieving this goal by using its best efforts to award subcontracts to such entities to the fullest extent consistent with efficient contract performance.

(d) Contractors acting in good faith may rely on written representations by their subcontractors regarding their status as small disadvantaged business concerns, Historically Black Colleges and Universities, minority institutions, and women-owned small business concerns.

(End of clause)

I.144 1852.219-79 MENTOR REQUIREMENTS AND EVALUATION. (MAY 2009) (Applies to Fixed-Price and Cost)

- (a) The purpose of the NASA Mentor-Protégé Program is for a NASA prime Contractor to provide developmental assistance to certain subcontractors qualifying as protégés.

Eligible protégés include certified small disadvantaged business concerns, women-owned small business concerns, veteran-owned or service-disabled veteran-owned small business concerns, HUBZone small business concerns, Historically Black Colleges and Universities, minority institutions of higher education, as defined in FAR Part 2, Definitions of Parts and Terms, active NASA SBIR Phase II companies and nonprofit agencies employing the blind or severely handicapped as defined in 41 CFR Chapter 51.

- (b) NASA will evaluate the Contractor's performance on the following factors. If this contract includes an award fee incentive, this assessment will be accomplished as part of the fee evaluation process.

- (1) Specific actions taken by the Contractor, during the evaluation period, to increase the participation of protégés as subcontractors and suppliers;
- (2) Specific actions taken by the Contractor during this evaluation period to develop the technical and corporate administrative expertise of a protégé as defined in the agreement;
- (3) To what extent the mentor and protégé have met the developmental milestones outlined in the agreement; and
- (4) To what extent the entities' participation in the Mentor-Protégé Program resulted in the protégé receiving competitive contract(s) and subcontract(s) from private firms and agencies other than the mentor.

- (c) Semiannual reports shall be submitted by the mentor and the protégé to the cognizant NASA center and NASA Headquarters Office of Small Business Programs (OSBP), following the semiannual report template found on the Web site at <http://www.osbp.nasa.gov>.

- (d) The mentor will notify the cognizant NASA center and NASA OSBP in writing, at least 30 days in advance of the mentor's intent to voluntarily withdraw from the program or upon receipt of a protégé's notice to withdraw from the Program;

- (e) At the end of each year in the Mentor-Protégé Program, the mentor and protégé, as appropriate, will formally brief the NASA Mentor-Protégé program manager, the technical program manager, and the Contracting Officer during a formal program review regarding Program accomplishments, as it pertains to the approved agreement.

- (f) NASA may terminate mentor-protégé agreements for good cause, thereby excluding mentors or protégés from participating in the NASA Mentor-Protégé program. These actions shall be approved by the NASA OSBP. NASA shall terminate an agreement by delivering to the Contractor a letter specifying the reason for termination and the effective date. Termination of an agreement does not constitute a termination of the subcontract between the mentor and the protégé. A plan for accomplishing the subcontract effort should the agreement be terminated shall be submitted with the agreement.

(End of clause)

I.145 1852.228-75 MINIMUM INSURANCE COVERAGE. (OCT 1988) (Applies to

Fixed-Price and Cost)

The Contractor shall obtain and maintain insurance coverage as follows for the performance of this contract:

- (a) Worker's compensation and employer's liability insurance as required by applicable Federal and state workers' compensation and occupational disease statutes. If occupational diseases are not compensable under those statutes, they shall be covered under the employer's liability section of the insurance policy, except when contract operations are so commingled with the Contractor's commercial operations that it would not be practical. The employer's liability coverage shall be at least \$100,000, except in States with exclusive or monopolistic funds that do not permit workers' compensation to be written by private carriers.
- (b) Comprehensive general (bodily injury) liability insurance of at least \$500,000 per occurrence.
- (c) Motor vehicle liability insurance written on the comprehensive form of policy which provides for bodily injury and property damage liability covering the operation of all motor vehicles used in connection with performing the contract. Policies covering motor vehicles operated in the United States shall provide coverage of at least \$200,000 per person and \$500,000 per occurrence for bodily injury liability and \$20,000 per occurrence for property damage. The amount of liability coverage on other policies shall be commensurate with any legal requirements of the locality and sufficient to meet normal and customary claims.
- (d) Comprehensive general and motor vehicle liability policies shall contain a provision worded as follows:  
  
"The insurance company waives any right of subrogation against the United States of America which may arise by reason of any payment under the policy."  
  
(e) When aircraft are used in connection with performing the contract, aircraft public and passenger liability insurance of at least \$200,000 per person and \$500,000 per occurrence for bodily injury, other than passenger liability, and \$200,000 per occurrence for property damage. Coverage for passenger liability bodily injury shall be at least \$200,000 multiplied by the number of seats or passengers, whichever is greater.
- (f) Insurance for emergency medical services and evacuation. See NFS 1852.242-78.

(End of clause)

I.146 1852.237-72 ACCESS TO SENSITIVE INFORMATION. (JUN 2005) (Applies to Fixed-Price and Cost)

- (a) As used in this clause, "sensitive information" refers to information that a Contractor has developed at private expense, or that the Government has generated that qualifies for an exception to the Freedom of Information Act, which is not currently in the public domain, and which may embody trade secrets or commercial or financial information, and which may be sensitive or privileged.
- (b) To assist NASA in accomplishing management activities and administrative functions, the Contractor shall provide the services specified elsewhere in this contract.

- (c) If performing this contract entails access to sensitive information, as defined above, the Contractor agrees to--
- (1) Utilize any sensitive information coming into its possession only for the purposes of performing the services specified in this contract, and not to improve its own competitive position in another procurement.
  - (2) Safeguard sensitive information coming into its possession from unauthorized use and disclosure.
  - (3) Allow access to sensitive information only to those employees that need it to perform services under this contract.
  - (4) Preclude access and disclosure of sensitive information to persons and entities outside of the Contractor's organization.
  - (5) Train employees who may require access to sensitive information about their obligations to utilize it only to perform the services specified in this contract and to safeguard it from unauthorized use and disclosure.
  - (6) Obtain a written affirmation from each employee that he/she has received and will comply with training on the authorized uses and mandatory protections of sensitive information needed in performing this contract.
  - (7) Administer a monitoring process to ensure that employees comply with all reasonable security procedures, report any breaches to the Contracting Officer, and implement any necessary corrective actions.
- (d) The Contractor will comply with all procedures and obligations specified in its Organizational Conflicts of Interest Avoidance Plan, which this contract incorporates as a compliance document.
- (e) The nature of the work on this contract may subject the Contractor and its employees to a variety of laws and regulations relating to ethics, conflicts of interest, corruption, and other criminal or civil matters relating to the award and administration of government contracts. Recognizing that this contract establishes a high standard of accountability and trust, the Government will carefully review the Contractor's performance in relation to the mandates and restrictions found in these laws and regulations. Unauthorized uses or disclosures of sensitive information may result in termination of this contract for default, or in debarment of the Contractor for serious misconduct affecting present responsibility as a government Contractor.
- (f) The Contractor shall include the substance of this clause, including this paragraph (f), suitably modified to reflect the relationship of the parties, in all subcontracts that may involve access to sensitive information

(End of clause)

**I.147 1852.237-73 RELEASE OF SENSITIVE INFORMATION. (JUN 2005) (Applies to Fixed-Price and Cost)**

- (a) As used in this clause, "Sensitive information" refers to information, not currently in the public

domain, that the Contractor has developed at private expense, that may embody trade secrets or commercial or financial information, and that may be sensitive or privileged.

- (b) In accomplishing management activities and administrative functions, NASA relies heavily on the support of various service providers. To support NASA activities and functions, these service providers, as well as their subcontractors and their individual employees, may need access to sensitive information submitted by the Contractor under this contract. By submitting this proposal or performing this contract, the Contractor agrees that NASA may release to its service providers, their subcontractors, and their individual employees, sensitive information submitted during the course of this procurement, subject to the enumerated protections mandated by the clause at 1852.237-72, Access to Sensitive Information.
- (c) (1) The Contractor shall identify any sensitive information submitted in support of this proposal or in performing this contract. For purposes of identifying sensitive information, the Contractor may, in addition to any other notice or legend otherwise required, use a notice similar to the following:

Mark the title page with the following legend:

This proposal or document includes sensitive information that NASA shall not disclose outside the Agency and its service providers that support management activities and administrative functions. To gain access to this sensitive information, a service provider's contract must contain the clause at NFS 1852.237-72, Access to Sensitive Information. Consistent with this clause, the service provider shall not duplicate, use, or disclose the information in whole or in part for any purpose other than to perform the services specified in its contract. This restriction does not limit the Government's right to use this information if it is obtained from another source without restriction. The information subject to this restriction is contained in pages [*insert page numbers or other identification of pages*]. Mark each page of sensitive information the Contractor wishes to restrict with the following legend:

Use or disclosure of sensitive information contained on this page is subject to the restriction on the title page of this proposal or document.

- (2) The Contracting Officer shall evaluate the facts supporting any claim that particular information is "sensitive." This evaluation shall consider the time and resources necessary to protect the information in accordance with the detailed safeguards mandated by the clause at 1852.237-72, Access to Sensitive Information. However, unless the Contracting Officer decides, with the advice of Center counsel, that reasonable grounds exist to challenge the Contractor's claim that particular information is sensitive, NASA and its service providers and their employees shall comply with all of the safeguards contained in paragraph (d) of this clause.
- (d) To receive access to sensitive information needed to assist NASA in accomplishing management activities and administrative functions, the service provider must be operating under a contract that contains the clause at 1852.237-72, Access to Sensitive Information. This clause obligates the service provider to do the following:
  - (1) Comply with all specified procedures and obligations, including the Organizational Conflicts of Interest Avoidance Plan, which the contract has incorporated as a compliance document.
  - (2) Utilize any sensitive information coming into its possession only for the purpose of performing the services specified in its contract.

- (3) Safeguard sensitive information coming into its possession from unauthorized use and disclosure.
- (4) Allow access to sensitive information only to those employees that need it to perform services under its contract.
- (5) Preclude access and disclosure of sensitive information to persons and entities outside of the service provider's organization.
- (6) Train employees who may require access to sensitive information about their obligations to utilize it only to perform the services specified in its contract and to safeguard it from unauthorized use and disclosure.
- (7) Obtain a written affirmation from each employee that he/she has received and will comply with training on the authorized uses and mandatory protections of sensitive information needed in performing this contract.
- (8) Administer a monitoring process to ensure that employees comply with all reasonable security procedures, report any breaches to the Contracting Officer, and implement any necessary corrective actions.
- (e) When the service provider will have primary responsibility for operating an information technology system for NASA that contains sensitive information, the service provider's contract shall include the clause at 1852.204-76, Security Requirements for Unclassified Information Technology Resources. The Security Requirements clause requires the service provider to implement an Information Technology Security Plan to protect information processed, stored, or transmitted from unauthorized access, alteration, disclosure, or use. Service provider personnel requiring privileged access or limited privileged access to these information technology systems are subject to screening using the standard National Agency Check (NAC) forms appropriate to the level of risk for adverse impact to NASA missions. The Contracting Officer may allow the service provider to conduct its own screening, provided the service provider employs substantially equivalent screening procedures.
- (f) This clause does not affect NASA's responsibilities under the Freedom of Information Act.
- (g) The Contractor shall insert this clause, including this paragraph (g), suitably modified to reflect the relationship of the parties, in all subcontracts that may require the furnishing of sensitive information.

(End of clause)

**I.148 1852.243-70 ENGINEERING CHANGE PROPOSALS. (OCT 2001) --  
ALTERNATE II (SEP 1990) (Applies to Fixed-Price and Cost)**

- (a) Definitions.

"ECP" means an Engineering Change Proposal (ECP) which is a proposed engineering change and the documentation by which the change is described, justified, and submitted to the procuring activity for approval or disapproval.

- (b) Either party to the contract may originate ECPs. Implementation of an approved ECP may occur

by either a supplemental agreement or, if appropriate, as a written change order to the contract.

- (c) Any ECP submitted to the Contracting Officer shall include a "not-to-exceed" TBD increase or decrease adjustment amount, if any, and the required TBD adjustment, if any, acceptable to the originator of the ECP. If the change is originated within the Government, the Contracting Officer shall obtain a written agreement with the Contractor regarding the "not-to-exceed" TBD and TBD adjustments, if any, prior to issuing an order for implementation of the change. An ECP accepted in accordance with the Changes clause of this contract shall not be considered an authorization to the Contractor to exceed the estimated cost in the contract Schedule, unless the estimated cost is increased by the change order or other contract modification.
- (d) After submission of a Contractor initiated ECP, the Contracting Officer may require the Contractor to submit the following information:
  - (1) Cost or pricing data in accordance with FAR 15.403-5 if the proposed change meets the criteria for its submission under FAR 15.403-4; or
  - (2) Information other than cost or pricing data adequate for Contracting Officer determination of price reasonableness or cost realism. The Contracting Officer reserves the right to request additional information if that provided by the Contractor is considered inadequate for that purpose. If the Contractor claims applicability of one of the exceptions to submission of cost or pricing data, it shall cite the exception and provide rationale for its applicability.
- (e) If the ECP is initiated by NASA, the Contracting Officer shall specify the cost information requirements, if any.

**DATA REQUIREMENTS LIST (DRL) AND DATA REQUIREMENTS DESCRIPTIONS (DRD)**

The following pages set out the documentation requirements of this contract, starting with a DRL, which is an index to the DRDs. Each DRD prescribes the required data product, content, schedule, type, and other particulars for specific data submission requirements.

Nothing contained in this DRL and DRD provision shall relieve the contractor from furnishing data not identified and described in the DRL and DRD attachment but called for by, or under the authority of, other provisions or as specified elsewhere in this contract. Except as otherwise provided in this contract, the cost of data to be furnished in response to the DRL attached to this contract or of data to be delivered under the authority of other sections (clauses/statement of work) are included in the price of this contract.

Subject to the Rights in Data clause, this DRL sets forth the data requirements in each Data Requirements Description (DRD) and shall govern that data required by the DRL for this contract. The contractor shall furnish data defined by the DRDs listed on the DRL by category of data. Such data shall be prepared, maintained, and delivered to NASA in accordance with the requirements set forth within this DRL. In cases where data requirements are covered by a Federal Acquisition Regulation (FAR) or NASA FAR Supplement (NFS) regulation or clause, the regulation will take precedence over the DRL, per FAR 52.215.33.

NASA-Owned/Contractor-Held records shall be managed by the contractor in accordance with Title 36 of the Code of Federal Regulations, Chapter XII B, Records Management, and NPD 1440.6, NASA Records Management Program. The records shall be organized in accordance with the instructions in NPR 1441.1, NASA Records Retention Schedules, as applicable. The contractor shall disposition records and non-records in accordance with NPR 1441.1, which has been approved by NASA and the National Archives and Records Administration (NARA). All questions on records management issues shall be directed through the Contracting Officer.

### **DATA TYPES**

For the purpose of this clause, the following information/documentation types are applicable:

**Type 1 Written Approval**

That information and documentation, which requires NASA approval prior to release. Approved Type 1 information and documentation shall be controlled, and deviations from or changes to the concepts, techniques, and/or requirements stated therein shall require NASA approval prior to implementation. All work under this contract covered by approved Type 1 documents shall be performed in accordance with those approved documents. Contractually binding documents will not be implemented nor revised without contractual authorization.

**Type 2 Mandatory Submittal**

Data submitted to NASA for coordination, information, review, and/or management control.

**Type 3 Submittal Upon Request**

Data prepared and retained by respondent to be made available to requiring organization upon request.

**NUMBER OF COPIES AND DISTRIBUTION REQUIREMENTS**

The contractor shall provide one copy of each DRD to the standard distribution list shown in Block 8 of the DRDs. Additional distribution shall be made as directed, in writing, by the Contracting Officer. The number of copies required will not exceed the limits set forth in NFS 1852.208-81, Restrictions on Printing and Duplicating, without prior Contracting Officer approval. Data Transmittal Forms will be used to confirm delivery of electronically resident DRD deliverables.

**ELECTRONIC FORMAT**

DRDs shall be maintained electronically in the contractor's own format, unless a specified format is defined in the DRD. Contractors shall use pertinent Microsoft Office programs for electronic submission unless otherwise stated in the DRD.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Management Plan	7/6/2011	DRD-M01	NNJ11061911R
4. Use <i>(Define need for, intended use of, and/or anticipated results of data)</i>		5. DRD Category: <i>(check one)</i>	
To provide a comprehensive plan that integrates all aspects of the SOW to accomplish efficient and effective management.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References <i>(Optional)</i>	7. Interrelationships <i>(e.g., with other DRDs) (Optional)</i>		
8. Preparation Information <i>(Include complete instructions for document preparation)</i> <p>a. Data Type: 1</p> <p>b. Scope: The Management Plan shall describe the basis for the Contractor’s management approach, organizational structure, and systems for accomplishing and managing all services and functions described in the contract. The systems shall include those specifically required to accomplish the Statement of Work, as well as those systems and procedures that are to be set in place by the Contractor.</p> <p>c. Content: The Contractor shall address the following elements in the Management Plan:</p> <ul style="list-style-type: none"> <li>i. Describe the organizational structure, including a chart depicting the organization.</li> <li>ii. Describe the communication channels, lines of authority (including the line of succession if the Executive Manager is unavailable), reporting relationships and responsibilities of all organizational elements. The narrative shall describe the relationships between subcontractors, team members, joint venture partners and external customers to illustrate their organization within the overall management structure and detail the Executive Manager’s decision making authority.</li> <li>iii. Describe the approach that will be used to ensure an effective Contractor/Government partnership and responsiveness to NASA and its customers throughout the life of the contract.</li> <li>iv. Describe in detail your organization, procedures, and surveillance methods that will be implemented to ensure that work performed under the fixed-price portion of the contract is not charged to the cost-reimbursable portion of the contract per SOW Subsection 1.3. In particular, the Contractor shall focus on work centers where both fixed price and cost work will occur simultaneously such as back shops.</li> <li>v. Describe the methods for establishing, tracking and adhering to schedules and budgets.</li> <li>vi. Describe the process for maintaining staffing flexibility to accommodate changes in requirements (including conflicts between fixed price and cost work) and fluctuations in workloads. The plan shall demonstrate their flexibility to meet changing, uncertain, urgent and surge requirements, such as adding multiple shifts and adjusting labor resources to meet operational requirements.</li> <li>vii. Describe your methodology for resolving potential conflicts between the fixed price and cost portions of the statement of work.</li> <li>viii. Describe your approach for performing operational risk management per SOW Subsection 4.</li> </ul>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

ix. Describe how the supplementary engineering services listed in SOW Subsection 8.8 will be implemented and managed.

x. Describe how the commercial procurement functions (purchasing and sub-contracting) will support Quick Reaction Capabilities associated with SOW Subsection 5.0

xi. Technical Efficiencies and Innovations

The Offeror shall capture technical innovations and efficiencies proposed in the Scenarios 1-5, Technical Approach, L.27.4, which may be incorporated into the SOW after award. In doing so, the Offeror shall:

1. Describe the efficiencies and innovations and why they will be of benefit to the Government.
2. Provide proposed SOW language to incorporate the efficiencies and innovations and where in the SOW it should be placed.

xii. Describe your organizational conflict of interest mitigation plan.

d. Format: Contractor's format is acceptable.

e. Distribution:

1. BJ4/Contracting Officer (Hard Copy)
2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
3. CC/Alternate Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
4. CC2/Assistant Branch Chief, Aircraft Quality Assurance Branch

f. Submission:

1. Initial: Paragraph c. Content: Sub-paragraphs i, ii, iv, vi, vii, ix, and xi are due with proposal.
2. Preliminary: Complete DRD submission due at Contract start.
3. Final: Contract start + 60 calendar days.
4. Approval: Contract start + 90 calendar days.
5. Update Frequency: As required.

g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue. The Contractor shall review the Plan on an annual basis or as directed by the CO, revise the Plan if necessary. Revisions are subject to CO approval.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Contractor Work Breakdown Structure (WBS) and Dictionary	7/21/2011	DRD-M03	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
To organize the tasks to be accomplished in this contract in a service-oriented structure. The WBS and dictionary shall provide the framework for structuring the program implementation plans, establishing and tracking budgets, preparing schedules, developing work force and material estimates, preparing work authorization documents, and reporting contract performance.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References ( <i>Optional</i> )	7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )		
	DRD-M05, NASA Contractor Financial Management Data, DRD-M16, Project Cost Reporting		
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Data Type: 1</p> <p>b. Scope: The Contractor Work Breakdown Structure (WBS) shall encompass all the services required to achieve all the requirements of this contract. The WBS shall subdivide the work to be accomplished into elements that serve as the basis for detailed planning and control, and in addition, permit collection of cost and schedule data for each element.</p> <p>c. Content: The WBS shall graphically depict the Contractor’s work breakdown and shall clearly separate Johnson Space Center managed work from Langley Research Center managed work. The Contractor may use the Government provided WBS shown in DRD-M03, Attachment A as guidance for Johnson Space Center managed work (See Note 1). The WBS Dictionary shall contain a concise description of contract tasks to be performed and products to be delivered, subdivided by Contractor WBS element. A Contractor WBS element may represent a task, a service, an identifiable product, a set of data, or a budget function. The WBS structure shall include elements listed in Section C, Aircraft Maintenance and Operational Support Statement of Work (SOW) with additional levels as required by the Contractor. Lower levels of detail, which the Contractor uses for its own management purposes, shall be accessible by NASA. The relationship between the WBS and the Contractor’s internal organizations and processes shall also be provided. The WBS and Dictionary shall also clearly indicate work elements assigned to subcontractors.</p> <p>d. Format: The Contractor WBS shall be in a graphical format and the associated WBS dictionary shall be in text or table form, arranged as depicted by the WBS.</p> <p>e. Distribution:</p> <ol style="list-style-type: none"> <li>1. BJ4/Contracting Officer (Hard Copy)</li> <li>2. CC/Alternate Contracting Officer’s Technical Representative (Electronic distribution in Microsoft Office or PDF format.)</li> <li>4. CC/Branch Chiefs (Electronic distribution in Microsoft Office or PDF format.)</li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

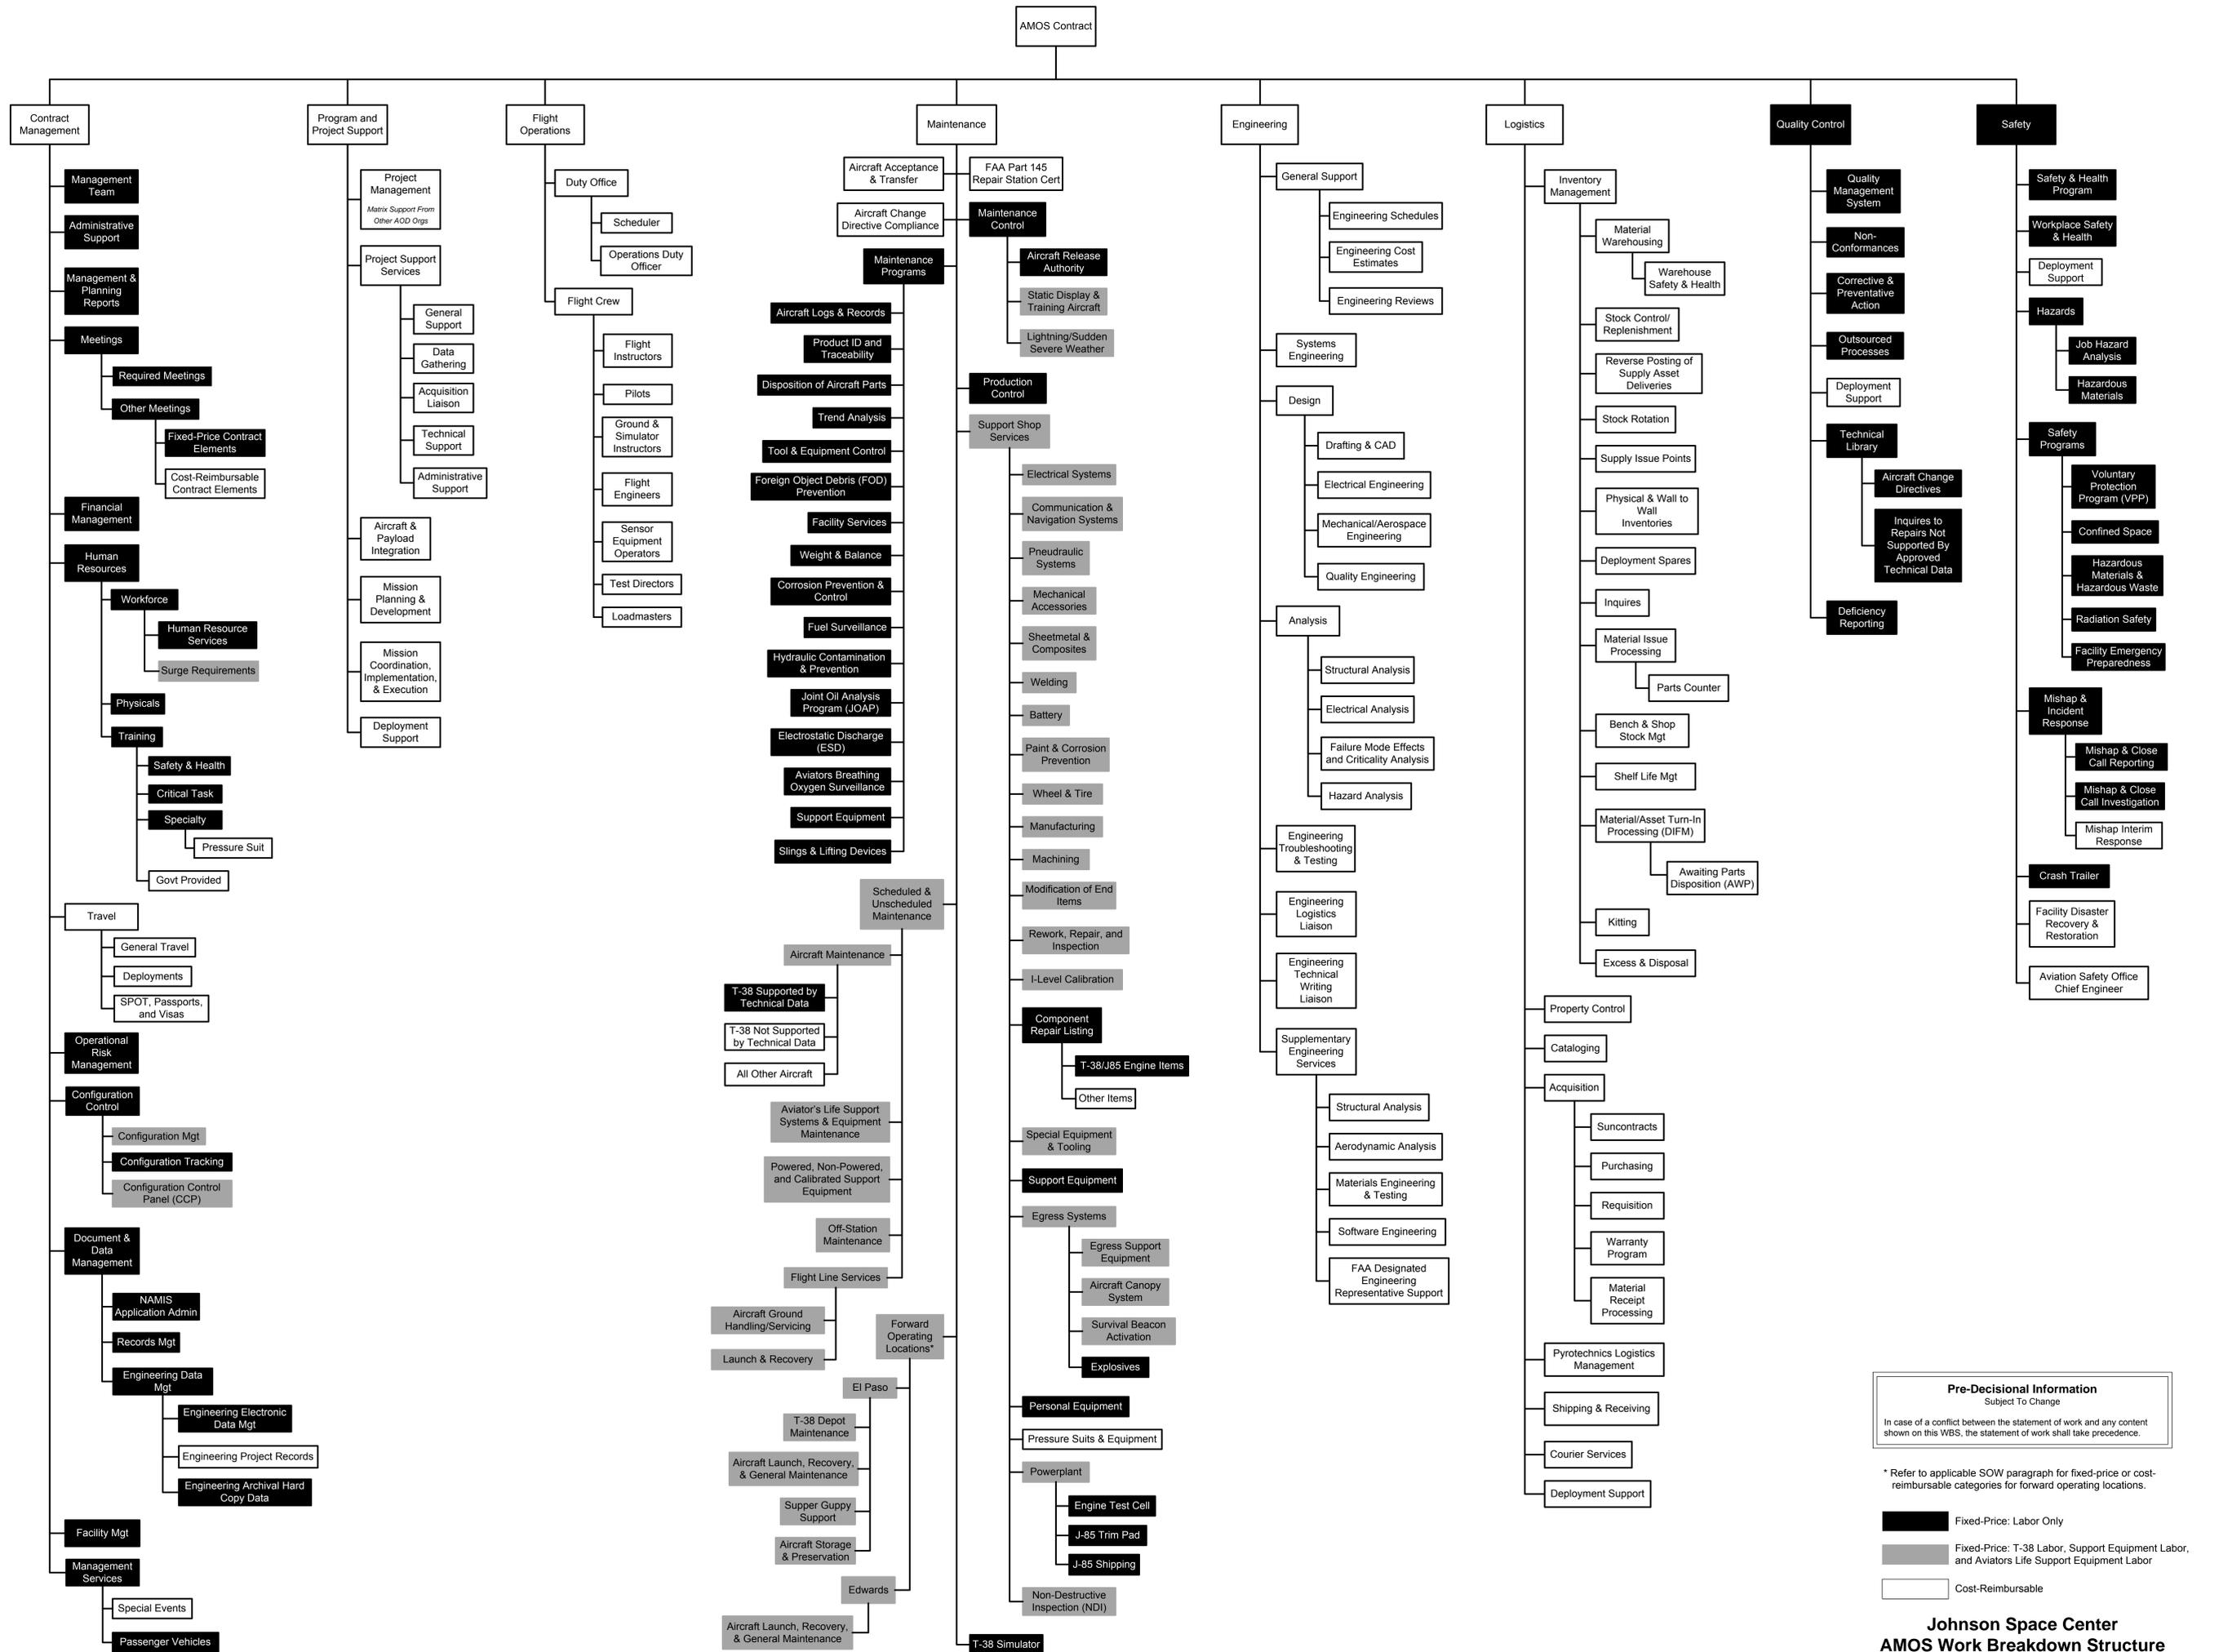

f. Submission:

1. Initial: Due with proposal.
2. Final: Contract start + 60 calendar days.
3. Approval: Contract start + 90 calendar days.
4. Update Frequency: As required.

g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

Note1:

The WBS shown in DRD-M03, Attachment A implies an organizational breakdown (i.e. organization chart) but should be used for reference only. The Contractor shall define their own organizational breakdown based on the Contractor's determination of the most effective organizational structure necessary to implement the requirements in Section C, Aircraft Maintenance and Operational Support Statement of Work.

**Pre-Decisional Information**  
 Subject To Change  
 In case of a conflict between the statement of work and any content shown on this WBS, the statement of work shall take precedence.

\* Refer to applicable SOW paragraph for fixed-price or cost-reimbursable categories for forward operating locations.

- Fixed-Price: Labor Only
- Fixed-Price: T-38 Labor, Support Equipment Labor, and Aviators Life Support Equipment Labor
- Cost-Reimbursable

Content:  <b><u>JSC Report Requirements:</u></b>                      The Contractor shall present a Monthly Progress Report to include the information indicated below. The Contractor shall submit progress reports of all work accomplished during each month of contract performance. Photographs and illustrations may be included as appropriate.</p> <p>The report shall include:</p> <ul style="list-style-type: none"> <li>a) A quantitative description of overall progress.</li> <li>b) A description of any new problems which may impede performance and proposed corrective actions.</li> <li>c) A graphic chart reflecting direct labor-hours (broken out by Fixed Price &amp; Cost) by month plus projected personnel-loading for the period of contract performance.</li> <li>d) Expenditure for emergency logistics support.</li> <li>e) Provide applicable self-assessment data per SOW Appendix E, Performance Standards.</li> </ul> <p>1. Section I--Executive Summary</p> <ul style="list-style-type: none"> <li>a) Contract Status</li> <li>b) Problem Areas/Proposed Resolutions</li> <li>c) Major Accomplishments</li> <li>d) Monthly Aircraft Summary Data</li> <li>e) Overtime Expenditure by Program/Project</li> <li>f) Performance Goal Statistics</li> <li>g) Hours Comparison (Compared to Contract Base Line)</li> <li>h) Overview of the wellbeing as related to Safety, Health, &amp; Environmental issues.</li> <li>i) Performance Recognition</li> <li>j) Travel</li> <li>k) Actual cost measured against government approved baseline cost estimates</li> </ul> <p>2. Section II--Text/Data</p> <ul style="list-style-type: none"> <li>a) Management                             <ul style="list-style-type: none"> <li>i. Mission impacts due to position vacancies or personnel qualifications</li> <li>ii. Scheduled Inspection Compliance</li> <li>iii. Support shops backlog</li> <li>iv. All T-38 fleet time (by tail number)</li> </ul> </li> </ul>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- v. All J-85 engine fleet time (by serial number)
  - vi. Project Management, Control and Support Services
  - vii. Training Reports: The Contractor shall submit a report of all training accomplished each month. The report format shall include, but is not limited to, the following:
    - 1. Type training scheduled versus training accomplished.
    - 2. The number of personnel and type due within 30 days.
    - 3. Overdue training
- b) Engineering
- i. Engineering Project Schedule and Summary
  - ii. Risks: Technical/Schedule
  - iii. Aircraft Alteration(s) Status
  - iv. 90 - Day Look Ahead
  - v. Engineering Cost Estimates – Cost
  - vi. Engineering Customer Support – Cost
- c) Technical
- i. Mission effectiveness – FP/Cost
  - ii. FCF effectiveness – FP/Cost
  - iii. Mishaps/close calls due to process failure – FP/Cost
  - iv. Operational check (OPS Check) flight effectiveness – FP
  - v. Aircraft delayed discrepancies – FP
- d) Quality Control
- i. Contractor generated audit conformance rate
  - ii. Corrective Action
    - 1. Repeat pilot discrepancies
    - 2. Recurring pilot discrepancies
    - 3. Tool control program violations
3. Section III--Logistics
- a) DoD Transaction Summary
  - b) Monthly Financial Summary
  - c) Spare Parts Utilized
  - d) Spare Parts Utilized Definitions
  - e) Inventory Management – Cost
4. Section IV--Direct Labor-Hour Distribution
- a) Total Program Summary
  - b) Total Contract Summary as applicable
  - c) T-38 Program
  - d) Mission Management Aircraft
  - e) DC-9 Program
  - f) Shuttle Carrier Aircraft (B-747) Program
  - g) Research (WB-57) Program/Project
  - h) Transient Aircraft Support
  - i) Other T-38 Center Support
  - j) Super Guppy (377 SGT) Program
  - k) T-38 Touch Labor
  - l) Special Purpose Touch Labor: Labor- Projected hours versus actual labor hours for LOE (AOD Forms 14, 25, 1298)
  - m) Labor-Hours by Department Summary/Project

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

5. Section V--Safety and Health and Environmental
  - a) Mishaps
  - b) Close-Call Reports
  - c) Lost Time Injury Severity
  - d) Recordable GSA Damage
  - e) OSHA/EPA Violations
  - f) Open Safety Discrepancies
  - g) Safety/Training Initiatives
  - h) Safety & Health
    - i. Employee Involvement
    - ii. Management & Leadership
6. Small Business  
Small business goals per contract requirements; report as follows:
  - a. Goals
  - b. Current Month
  - c. Current Award Fee Period
  - d. Total Contract
7. Acronym List

## **LaRC Report Requirements:**

1. 6 Month – 1 Year Forecast on Time Change/Life Limited Parts  
List all 781 D&E Time Change/Life Limited Part due within next 6 months to 1 year, list by Tail Number.
2. Mission Capable Aircraft  
Monthly listing of each aircraft's availability for scheduling flights. Percentage of days available out of total workdays per month. List by Tail Number.
3. Completed Flight Effectiveness Report  
Monthly listing of percentage of scheduled flights not canceled due to maintenance. List by Tail Number.
4. Successful FCF Completed  
Monthly listing of FCF's that are passed and do not require rework or grounding of the aircraft. Minor write-up's after major maintenance or modification are acceptable. List by Tail Number.
5. Percentage Calibrations Performed on Time  
Monthly report of calibrations of test equipment and tools (Maintenance, Avionics, Quality Assurance and Stockroom) that are complied with on time. List by Maintenance, Avionics, QA.
6. Status of Overdue Calibrations  
Monthly report on overdue calibrations of test equipment and tools. Reason they are overdue and schedule for completion.
7. Percentage Battery Maintenance Completed  
Monthly report of the scheduled Battery Shop Maintenance completed on time. Status and justification of any work not completed on time.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

8. Status of Ground Support Equipment plus 6-Month Forecast  
Monthly report of Ground Support Equipment, maintenance and inspections completed. Status and justification of any work not completed. Six-month forecast of upcoming requirements.
  9. Status of Personal Survival Equipment plus 6-Month Forecast  
Monthly report of Personal Survival Equipment maintenance and inspections completed. Status and justification of any work not completed. Six-month forecast of upcoming requirements.
  10. Monthly Report on Status of Outstanding Procurements  
Monthly report on status of all outstanding procurements. This report shall include:
    - a) When ordered by buyer
    - i) Estimated due date
    - j) Any problems holding up order
  11. Flight Hours by Tail Number to Date (FY and CY)  
Monthly report by Tail Number of cumulative flight hours, documented from Form LF 115, both FY and CY.
  12. Status of all Parts and Materials (estimated price, actual price, date due and date received)  
Monthly report of all parts and materials ordered by Tail Number to include:
    - a) Purchase Order #
    - k) Date Ordered
    - l) Estimated Price
    - m) Actual Price
    - n) Date Due
    - o) Date Received
- d. Format: Contractor's format is acceptable
- e. Distribution:
1. BJ4/Contracting Officer (Hard Copy)
  2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  3. CC/Alternate Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  4. Branch Chiefs (Electronic distribution in Microsoft Office or PDF format.)
- f. Submission:
1. Initial: Contract start + 15 calendar days.
  2. Final: Contract start + 30 calendar days.
  3. Frequency:: 10 days after the end of each month.

8. Preparation Information (Include complete instructions for document preparation).			

## NASA Form 533 (NF533) Reports

---

The NASA Form 533 (NF533) reports provide data necessary for the following:

1. Projecting costs and hours to ensure that dollar and labor resources realistically support project and program schedules.
2. Evaluating contractors' actual cost and fee data in relation to negotiated contract value, estimated costs, and budget forecast data.
3. Planning, monitoring, and controlling project and program resources.
4. Accruing cost in NASA's accounting system, providing program and functional management information, and resulting in liabilities reflected on the financial statements.

Cost is a financial measurement of resources used in accomplishing a specified purpose, such as performing a service, carrying out an activity, acquiring an asset, or completing a unit of work or project. NASA Procedural Requirements (NPR) 9501.2E entitled "NASA Contractor Financial Management Reporting," or its most current revision, identifies the cost reporting requirements for a contract.

NASA is required by law to maintain accrual accounting, which requires cost to be reported in the period in which benefits are received, without regard to time of payment.

The reports (NF533M [Monthly] and NF533Q [Quarterly]) are the official cost documents used at NASA for cost type, price determination, and Fixed Price Incentive contracts. The data contained in the reports must be auditable using Generally Accepted Accounting Principles (GAAP). Supplemental cost reports submitted in addition to the NF533 must be reconcilable to both the NF533M & NF533Q.

Reports shall be produced at two different levels and in two different categories (Fixed Price [FP] and Level of Effort [LOE]). Procedures to account for all FP and LOE areas and contract activities in the Technical Work Breakdown Structure (TWBS) shall be developed and maintained. Lower-level detail reporting on some areas/activities may be combined or accepted in supplemental reports to the 533M and 533Q upon Spaceflight Resource Management Office (SRMO) and Contracting Officer approval.

Detailed supplemental reporting is required as outlined in *Appendix A*.

# DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

## Common NF533 Cost Elements

Examples of accrual accounting for common cost elements reported on the NF533 follow:

<b>Cost Elements</b>	<b>Definitions</b>
<i>Labor</i>	<p>Reported to NASA as hours are incurred in the following classifications:</p> <ul style="list-style-type: none"> <li>• Total Straight Time Hours</li> <li>• Total Overtime Hours</li> <li>• Total Labor Hours</li> <li>• Straight Time Indirect Hours</li> <li>• Overtime Indirect Hours</li> <li>• Total Direct Hours</li> <li>• Straight Time Indirect Hours</li> <li>• Paid Leave Hours</li> <li>• Total Indirect Hours</li> </ul> <p>As a minimum, the LOE elements of labor cost shall be reported as follows:</p> <ul style="list-style-type: none"> <li>• Straight Time</li> <li>• Overtime</li> </ul>
<i>Equipment &amp; Materials (commercial off the shelf)</i>	Generally reported to NASA when received and accepted by the contractor.
<i>Manufactured Equipment</i>	Defined as any equipment that is produced to specific requirements that make it useless to anyone else without rework. Cost should be reported to NASA as the equipment is being manufactured. The straight-line method for estimating accrued costs, or the use of supplemental information obtained from the vendor, are acceptable methods used to calculate the cost accrual amount.
<i>Leases</i>	Reported to NASA using a proration over the life of the lease.
<i>Travel</i>	Reported to NASA as costs are incurred. Travel shall be reported under LOE and identified by applicable cost categories/activity.

## DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

---

<i>Subcontracts &amp; Other Direct Costs</i>	<p>Actual and estimated costs reported by prime contractors shall include subcontractors' incurred costs for the same accounting period. Where subcontract costs are material, they should be separately identified on NF533 reports. The prime contractor shall include in the total cost of each subdivision of work the accrued cost (including fee, if any) of related subcontractor effort. Subcontractors should, therefore, be required to report cost to the prime contractor, using the accrual method of accounting. If the G&amp;A and fee reported by a subcontractor are at the total subcontractor level, these costs must be allocated to specific sub- divisions of work. Data submitted by the subcontractor should be structured similar to the prime contractor's NF533 to enable the prime contractor to properly report to NASA. For Firm Fixed Price subcontracts with a contract value greater than \$500,000, the prime contractor is required to document the methodology used to generate the sub-contractor costs reported and provide this information to the NASA Contracting Officer and Center Deputy Chief Financial Officer of Finance. Subcontracts and Other Direct Costs will be reported under LOE and identified by applicable cost categories/activity.</p>
<i>Unfilled Orders</i>	<p>Reported as the difference between the cumulative cost incurred to date and amounts obligated to suppliers and subcontractors. Unfilled orders will be itemized within the cost category or activity generated in support of; with an estimated total cost and estimated delivery date.</p>
<i>Fee</i>	<p>Fee will be accrued at 100% of possible full award at both summary levels of reporting. Fee should be reported on the NF533 following the "Total Cost" line. Award fee must be reported by the following categories: Base Fee, Fee Earned, Interim Fee, Provisional Fee, Potential Additional Fee, and Total Fee. If any of the above fee categories do not pertain, they should not be included in the NF533.</p>
<i>Prompt Payment Discounts</i>	<p>Cumulative cost reported to NASA should be the full incurred cost. The prompt payment discount amount taken should be reported as a separate line item on the NF533 below the cumulative cost amounts for the contract.</p>

# DRD–M05 NF533 Cost Reporting - Contract # NNJ11061911R

## Common NF533 Data Elements

The following NF533 Data Elements shall be included:

<b>Data Element Name</b>	<b>Description</b>
<i>Reporting Category (RC)</i>	Task, Delivery Order, Work Breakdown Structure
<i>Cost Incurred for Month (7a)</i>	Prior month actual cost incurred for each RC (column 7a on NF533)
<i>HR/WYE Incurred for Month (7a)</i>	Prior month actual HR/WYE incurred for each RC (column 7a on NF533)
<i>Contract prior month planned cost (7b)</i>	Planned cost for prior month for each RC (column 7b on NF533)
<i>Contract ITD cost (7c)</i>	Contract ITD cost for each RC (column 7c on NF533)
<i>Contract planned ITD cost (7d)</i>	Contract planned ITD cost for each RC (column 7d on NF533)
<i>Current month estimated cost (8a)</i>	Cost estimate for the current month for each RC (column 8a on NF533)
<i>Current month estimated HR/WYE (8a)</i>	HR/WYE estimate for the current month for each RC (column 8a on NF533)
<i>Next month estimated cost (8b)</i>	Estimated cost for next month for each RC (column 8b on NF533)
<i>Balance of Contract (8c)</i>	Balance of contract for the remaining estimate to complete for each RC (column 8c on NF533)
<i>Contractor Estimate (9a)</i>	Contractor estimate for the total estimate to complete entire scope of contract for each RC (column 9a on NF533)
<i>Contract Value (9b)</i>	Contract value based upon contract modifications for each RC (column 9b on NF533)
<i>Unfilled orders outstanding (10)</i>	Unfilled orders outstanding at the end of the reporting period for each RC (column 10 on NF533)
<i>Reporting Category level</i>	Used by NASA's accounting system to determine the RC level
<i>Reporting Category Identifier</i>	Identifies if the RC is a actual Reporting Category or a Sub-Reporting Category

Column 7b (planned cost incurred/hours worked for the month) and 7d (cumulative planned cost incurred/hours worked) of the NF533M represent the negotiated baseline plan for the contract. There may not be a relationship between the estimates provided in columns 8 of the NF533M to columns 7b and 7d. Columns 7b and 7d represent the legally binding contract negotiated baseline plan plus all authorized changes.

## DRD–M05 NF533 Cost Reporting - Contract # NNJ11061911R

Uncompensated overtime hours worked should be reported on NF533 reports as a separate line item or in the footnotes.

Short and long-term cost estimates, which include all data entered in columns 8 and 9a on the NF533M and NF533Q reports, shall be based on the most current and reliable information available.

Prior period cost adjustments should be reported in column 7a and 7c of NF533M and column 7a of the NF533Q as soon as identified with a footnote discussing the reasons for and amounts of the adjustments and time period the adjustment relates to, delineated by government fiscal year, if affecting more than one fiscal year.

### **NF533 Reporting Categories**

A Reporting Category (RC) correlates to a task order, delivery order, or Work Breakdown Structure (WBS) and is the level at which cost is reported. Cost reporting shall be provided by individual aircraft tail number (exception T-38N type aircraft which may be reported as “type”). Each RC can have Sub-Reporting Category line items (detailed cost elements) that add up to a RC. **The Contractor is required to coordinate with the NASA Resource Analyst assigned to the contract in order to establish and maintain the Reporting Categories the contractor shall use to comply with this data requirement.**

All aircraft material, equipment, components, etc. transferred from under an Fixed-Price activity to Level-of-Effort for refurbishment, exchange, core refund, etc. will be identified by originating aircraft tail number regardless of type.

All delivery orders, task orders, projects, etc. will be estimated and reported in fiscal year divisions.

### **Project and Aircraft Cost Categories**

Project and aircraft cost categories include but are not limited to (does not include individual support shop activities):

- T-38 M&O: All activities related to the normal maintenance and operations of the T-38 aircraft.
- T-38 Obsolescence: All efforts and related costs in relation to the longevity (life-extension, obsolescence mitigation) of T-38 aircraft. Majority of this type work currently conducted at forward operating location, El Paso falls under this designation. In the past this classification of work/cost has been referred to as “production, inlets” as well.
- Shuttle Carrier Aircraft: All activities related to the normal maintenance and operations of the SCA aircraft.
- Douglas C-9B: All activities related to the normal maintenance and operations of the C-9B aircraft.
- WB-57 (by tail#): All activities related to the normal maintenance and operations of the individual WB-57 aircraft.

## DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

- Super Guppy: All activities related to the normal maintenance and operations of the Super Guppy aircraft.
- G-III N922: All activities related to the normal maintenance and operations of a Gulfstream (G-III, tail number: N992NA) aircraft.
- Bombardier XRS: All activities related to the normal maintenance and operations of a Bombardier XRS, GXLC, or similar aircraft.
- B-727 Zero-G: Transient aircraft services for a contractor supplied B-727 aircraft that can be expected to be present at Ellington approximately 6-8, 1-week periods within a fiscal year.
- Facilities: All activities and related cost in to the normal maintenance and operations of facilities (buildings, work spaces, infrastructure, etc) and usage of utilities utilized by the contractor or used in conjunction with accomplishing tasks under the AMOS contract.

### **Personal Property & Equipment Reporting**

For all Personal Property & Equipment purchases and fabrications, the NF533 reporting structure shall:

1. Report the costs of each unique item of acquired and/or fabricated property, which NASA defines as capitalizable property, as a separate reporting category on NF533.
2. Maintain a structure that allows for the accumulation and reporting of cost separately for each item of acquired or fabricated property, which NASA defines as capitalizable property.

Capitalizable property is personal property and equipment acquired and/or fabricated that NASA will have title to that:

1. Has a total acquisition cost equal to or greater than \$100,000.
2. Has a useful life equal to or greater than 2 years.
3. Is not intended for sale in the course of normal operations.
4. Has been acquired or constructed with the intention of being used, or available for use, by NASA.
5. Have a current or planned alternative future use on another project with a separate objective.

The Center Office of the Chief Financial Officer Property Accounting will provide the final capitalization determination based on information provided by the program or project manager in the NF1739 Alternative Future Use Questionnaire.

### **Project/Aircraft Type Reporting**

Contractor will provide an allocation of cost to the applicable project/aircraft type cost category. The allocation methodology will be developed and approved in accordance with paragraph [FAIRS requirements paragraph].

### **Activity Cost Categories**

Activity cost categories shall include but are not limited to:

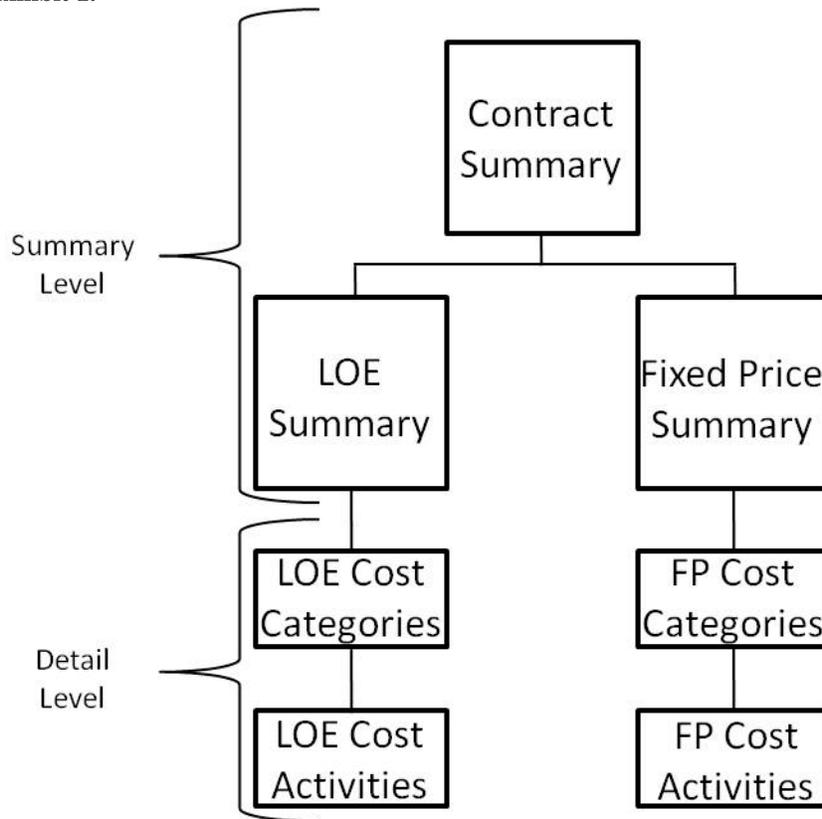

## DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

1. *Total Contract Level*, which shall contain summary data for the entire contract (FP and LOE) including (when applicable):
  - a. All individual years at fiscal year breaks
  - b. Complete initial award period
  - c. Any extension option period(s)
2. FP and LOE areas and activities must reconcile to the total contract level reporting.
3. Activity level reporting (aircraft and shops) will include a break-down of (not applicable to fixed price activities):
  - a. Labor cost (burdened by additional factors, i.e. fees, G&A, etc)
  - b. Subcontract hours
  - c. Subcontract cost, burdened
  - d. Travel cost, burdened
  - e. Any other direct costs (ODCs)
4. As applicable each level of break-down will be categorized by (not applicable to fixed price activities):
  - a. Project/task/mission identification (as defined by resource or technical representatives)
  - b. By department (where applicable, i.e. engineering, wheel shop, QA, etc.)
  - c. By hour types; to include straight-time, over-time, double-time, on-station, off-station

Note: Requirements in paragraphs 3-4 may be provided in supplemental reports but shall reconcile to the monthly form NF533.

# DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

**Exhibit 1.**

## **NF533 Due Dates**

The due dates for the NF533M and NF533Q reports are outlined in Chapter 3 of NPR 9501.2E. The following is a summary of the NF533 due date requirements:

<b>NF533 Report</b>	<b>Due Date</b>
<i>NF533M</i>	Due not later than 10 working days following the close of the contractor's monthly accounting period.
<i>NF533Q</i>	Due not later than the 15th day of the month preceding the quarter being reported.

The due dates reflect the date the NF533 reports are received by personnel on the distribution list, not the date the reports are generated or mailed by the contractor. It is critical that the NF533 reports are submitted in a timely manner to ensure adequate time for NASA to analyze and record the cost into the NASA accounting system.

An initial NF533 report is required in the NF533Q format to be used as a baseline for the life of the contract. The initial (baseline) NF533Q report shall be submitted by the contractor within 30 days after authorization to proceed has been granted. The initial report shall reflect the original contract value detailed by negotiated reporting categories and shall be the original contract baseline

## DRD–M05 NF533 Cost Reporting - Contract # NNJ11061911R

plan. In addition to the initial (baseline) report, monthly NF533 reporting shall begin no later than 30 days after the incurrence of cost.

### **Contractor Variance Report**

The contractor shall submit variance reports along with the NF533M when NF533M variances meet or exceed +/- 5% for each Reporting Category for the following items:

1. Column 7A current month to 8A previous month (actuals)
2. Column 7A current month (actuals) to 7B current month (plan)

### **NF533 Final Submission Upon Contract Completion**

Monthly NF533 reporting is no longer required once the contract is physically complete, provided the final cost report includes actual cost only (no estimates or forecasts). The contractor must continue to submit monthly NF533 reports as long as estimates for the following period are included. If the final cost of a contract changes after the submission of the "final" contractor cost report, the contractor must submit a revised NF533 report in the month the cost change is recognized.

### **NF533 Report Distribution**

LF6 Cost Accounting (1 hardcopy)  
BJ Contracting Officer (1 hardcopy)  
LG Budget/Program Analyst (1 hardcopy)  
CC Technical (1 hardcopy)  
LG E-Mail Account (1 electronic copy, account address will be provided)

### **Electronic NF533 Flat File**

Electronic NF533 Flat File Requirement will only be submitted, if requested, during the course of the contract in accordance with direction in *Appendix B*.

## Appendix A

---

### Required Supplemental Reporting

**Federal Aviation Inter-Active Reporting (FAIRS):** Contractor shall produce a cost report in accordance with the FAIRS required cost categories by individual aircraft tail number (Exception: at the discretion of the contractor, FAIRS cost for T-38N aircraft may be allocated by actual/estimated flight hours). Contractor cost identification and allocation procedure will be developed in accordance within aviation industry accounting standards.

FAIRS reporting procedures will be documented and submitted for review/approval by the Spaceflight Resources Management Office, due within calendar 60 days of contract award and thereafter at semi-annual periods from initial contract award, due with 533Q.

Current applicable FAIRS federal aircraft reporting cost categories (not inclusive):

- Administrative overhead
- Fuel, Oil, Lubricants & Gases
- Overhead
- Sched calendar labor
- Sched maint calendar refurb
- Sched maint refurb
- Unsched engine inspection

Current applicable FAIRS commercial aircraft services reporting cost categories (not inclusive):

See FAIRS reporting requirements in OMB Circular A-126, GSA FMR 102-33, and NPR 9130.1.

**Government Quarterly additional reporting requirements:** The contractor shall provide a supplemental report in the same structure as the 533M for all costs estimated to be accrued through the end of the calendar month ending a government fiscal quarter. Report will include all estimated costs to be accrued including materials and unfilled orders anticipated to be delivered within the fiscal quarter.

# DRD-M05 NF533 Cost Reporting - Contract # NNJ11061911R

## Appendix B

### Electronic NF533 Flat File Instructions

In addition to submitting the NF533M or NF533Q in a hardcopy format, the contractor, upon request, shall submit the NF533 electronically by the same due date as the hardcopy. The data shall be submitted via email using the Government prescribed flat file format (see attached Agency Defined File Format for an example of the layout details) and shall include the following header information from the hardcopy.

<b>Data Element</b>	<b>Description</b>
Contract Number	NASA assigned contract number
Modification Number	Latest definitive Modification Number
Accrual Date	Date the data was generated for
Report Period End Date	Period ending date of the NF533
Operating Days	Number of operating days for the current NF533
Date Received/Submitted	Date the report is submitted
CCR Format	Monthly (NF533M) or Quarterly (NF533Q)
Cost Unit of Measure	Unit of measure used to report cost on the NF533 report
HR/WYE Unit of Measure	Unit of measure used to report Hours/Work Year Equivalent (WYEs) on the NF533 report
Authorized Contractor Representative	Name of Contractor Approving Officer
Authorized Contractor Representative Date Signed	Date the NF533 is approved and signed by the authorized Contractor Representative
Monthly Grand Total Cost Incurred (7a)	Grand Total Actual Monthly cost for the prior month (column 7a on the NF533)
Monthly Grand Total HR/WYE (7a)	Grand Total Actual monthly hours/WYEs for the prior month (column 7a on the NF533)
Monthly Grand Total Cost Planned (7b)	Prior month planned cost (column 7b on the NF533)
Grand Total Cost Incurred ITD (7c)	Grand total contract cost from Inception to Date (ITD) (column 7c on the NF533)
Grand Total Planned Cost (7d)	Grand total planned contract cost (column 7d on the

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Notification of Potential Labor Dispute and Contingency Strike Plan	6/29/2011	DRD-M06	NNJ11061911R
4. Use <i>(Define need for, intended use of, and/or anticipated results of data)</i>		5. DRD Category: <i>(check one)</i>	
The Notification of Potential Labor Dispute and Contingency Strike Plan will be used by the NASA Contracting Officer and the Contractor Industrial Relations Officer to facilitate the coordination of activities between the Contractor and the affected NASA operational directorates to ensure that necessary steps are taken to prepare for any potential strike situations and to prevent the disruption of work.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References <i>(Optional)</i>	7. Interrelationships <i>(e.g., with other DRDs) (Optional)</i>		
FAR 52.222-1, Notice to the Government of Labor Disputes			
8. Preparation Information <i>(Include complete instructions for document preparation)</i>			
<p>a. Data Type: 1</p> <p>b. Scope:                      A Notification of Potential Labor Dispute must be submitted at the first indication of potential labor unrest and 45 days prior to the expiration of any Collective Bargaining Agreement. The Notification shall describe the situation, which has the potential of impacting the contract and provide the corrective actions initiated. A Contingency Strike Plan must be submitted at contract start and updated if there is any indication of potential labor unrest or potential picketing activity. The Notification of Potential Labor Dispute and Contingency Strike Plan are required for the prime and any subcontractors supporting this contract. Copies of all Collective Bargaining Agreements must be provided within 30 days of ratification to the Contracting Officer and the Contractor Industrial Relations Officer.</p> <p>c. Content:                      The Notification of a Potential Labor Dispute shall describe any situation that has the potential of impacting the timely performance of the contract; it should provide the planned negotiation dates with organized labor, and describe other corrective actions initiated. Notification should be made prior to the expiration of collective bargaining agreements, prior to any significant changes to existing working conditions or pay practices, or any situation that could impact the performance of the contract through labor unrest. The Contingency Strike Plan shall describe the Contractor's plan for assuring the timely performance of the work under this contract during a strike or work stoppage situation. As a minimum, contents should include: information on implementation of the strike plan, a pre-strike checklist for managers and supervisors, a description of how critical work will be performed, an organization chart of the strike committee membership, phone numbers of key management personnel, and standards of conduct policies during the strike.</p> <p>d. Format: Contractor format is acceptable</p> <p>e. Distribution:                      1. BJ4/Contracting Officer                      2. BB/Contractor Industrial Relations Officer</p> <p>f. # JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

## ii. Reports

1. All reports shall be submitted in accordance with FAR 52.219-9 and NFS 1852.219-75.
2. In lieu of submitting a paper copy of the SF 294 and SF 295 Subcontracting Report for Individual Contracts, the Contractor shall submit semi-annual and at contract completion to the NASA/JSC Contracting Officer electronically version of this data.
3. The contractor shall provide rationale for any small business goal that is not being met and a corrective action plan. Further, the contractor shall describe any Small Business outreach activities in which the contractor participated in roles such as speaker, sponsor, or exhibitor...
4. Contractors are required to register and file both types of subcontracting data in the Electronic Subcontracting Reporting System (eSRS) which has replaced the paper Standard Form 294 and 295 Summary Subcontracting Reports.
5. All contractors are required to register and file both types of subcontracting reports using the eSRS system. The website to register is [www.esrs.gov](http://www.esrs.gov).

g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Wage/Salary and Fringe Benefit Data	6/29/2011	DRD-M09	NNJ11061911R
4. Use <i>(Define need for, intended use of, and/or anticipated results of data)</i>		5. DRD Category: <i>(check one)</i>	
The Wage/Salary and Fringe Benefit Data will be used by the NASA Contracting Officer and the Contract Labor Relations Officer to assist in the monitoring of Service Contract Act compliance.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References <i>(Optional)</i>	7. Interrelationships <i>(e.g., with other DRDs) (Optional)</i>		
FAR 52.222-41 – Service Contract Act of 1965			
8. Preparation Information <i>(Include complete instructions for document preparation)</i>			
<p>a. Data Type: 2</p> <p>b. Scope: The Wage/Salary and Fringe Benefit Data must be submitted by the Contractor, and any subcontractors which are subject to the provisions of the Service Contract Act, to the Contracting Federal Agency. This requirement is in accordance with FAR regulations 22.1007 and 22.1000.</p> <p>c. Content: The Wage/Salary and Fringe Benefit Data should contain the data included in the enclosed DRD forms, titled “Wage/Salary Rate Information”, “Fringe Benefit for Service Employees”, and “Fringe Benefits per Collective Bargaining Agreement”. The Wage/Salary Rate Information shall contain a listing of all exempt and nonexempt labor classifications working on the contract. Separate forms should be utilized for classifications working in different geographic areas and for each subcontractor. Wage determination numbers, appropriation labor organization names, and subcontractor names, must be reflected. All nonexempt labor classifications must be matched to wage determination classes or to Collective Bargaining Agreement (CBA) classifications if union represented employees are working on the contract. Annotate exempt or nonexempt and union or nonunion. The current hourly rates should reflect the actual lowest and highest paid employees, along with a computed average rate. State the number of employees working in each category. Separate Fringe Benefit forms should be completed for non-represented classifications and for each separate CBA. A separate form must be completed for the prime and each subcontractor. Three copies and one electronic copy of each Collective Bargaining Agreement are required if organized labor is represented on your contract.</p> <p>d. Format: The Wage/Salary and Fringe Benefit Data should be in a format substantially the same as enclosed with this DRD. (Forms 1, 2, and 2A)</p> <p>e. Distribution:</p> <ol style="list-style-type: none"> <li>1. BJ4/Contracting Officer</li> </ol> <p>f. Submission:</p> <ol style="list-style-type: none"> <li>1. Initial: At Contract Start</li> <li>2. <p>a. Data Type: 1</p> <p>b. Scope: Equipment and resource/cost information shall be submitted in accordance with this Data Requirement Description (DRD).</p> <p>c. Content: <b><u>Catalog of Items</u></b></p> <p>1. A catalog of all models, tools, data systems, web-sites, equipment, and data items acquired, produced, or maintained during the performance of this contract shall be developed which contains the following information:</p> <ul style="list-style-type: none"> <li>• Unique name of item</li> <li>• Version number, revision number, or release date as appropriate</li> <li>• Brief description and purpose or use of item</li> <li>• Location of electronic or physical item</li> </ul> <p>2. Supporting documentation shall be submitted for the use of each item. The documentation shall include, at a minimum, the following information:</p> <ul style="list-style-type: none"> <li>• Inputs required</li> <li>• Governing assumptions or constraints, including definition of the configuration if pertinent to the model definition or its use</li> <li>• Acceptance or certification history, including description of validation methods used</li> <li>• Association or interrelationship with other items listed</li> <li>• Application or operating system requirements</li> <li>• Hardware/platform requirements</li> </ul> <p><b><u>Resource/Cost Information</u></b></p> <p>A data package shall be submitted containing the following resource/cost information:</p> <p>1. Labor Resources</p> <ul style="list-style-type: none"> <li>• List of all direct labor skills by labor category, segregated by current work breakdown structure (WBS)</li> <li>• Estimate of the number of indirect labor skills such as business or computer support normally charged through an indirect expense pool or through a service center expense</li> </ul>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- Current annual average straight time labor rates for all skills by labor category mapped by standard labor categories of the original RFP or the standard labor categories defined in the follow-on RFP if they differ from the original RFP and when these wages were last adjusted for escalation. Also indicate whether any adjustments are projected to be made prior to contract expiration
  - Number of Full Time Equivalents (FTEs) and the estimated number of productive hours for each labor category currently on contract mapped by standard labor category of the original RFP or the standard labor categories defined in the follow-on RFP if they differ from the original RFP, segregated by current WBS.
  - Seniority level of all skills on the current contract
2. Non-Labor Resources
- List of all materials, equipment, travel, supplies, etc., and the incurred annual cost by WBS.
  - Provide a discussion associated with the major items identified above, such as the materials estimate includes a prompt payment discount of TBD% due to large volume discounts you have negotiated with your vendors.
3. Liability Cost
- The projected liability cost associated with unused accrued paid leave associated with non-exempt personnel.
  - Provide a copy of any Collective Bargaining Agreements in place and a current status of any upcoming negotiations with a union.
4. Contractor-Owned Equipment
- List of all Contractor-owned equipment (at the time of delivery of this DRD) being used in the performance of the contract.
  - The list of equipment shall include:
    - Description of the equipment (include make and model #)
    - Location of the equipment (address, building, and room #)
    - Date purchased
    - Purchase price of the equipment
    - Current depreciated value of the equipment
- d. Format: Contractor's format is acceptable
- e. Distribution:
1. BJ4/Contracting Officer (Hard Copy)
  2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office format.)
  3. CC/Alternate Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office format.)
- f. Submission:
1. Initial: At the CO's direction.
  2. Final: Submit one year prior to contract end.
  3. Approval: Contracting Officer.
  4. Frequency: No periodic submissions required per this DRD (this does not relieve the requirement for periodic or incremental deliveries per other DRDs).
  5. Additional Submissions: End of period of performance – submission of current version of catalog, supporting documentation, and resource/cost information which have been updated since first submission.
- g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

## II.a. Waste Reduction Activity Report

The Contractor shall track and report each December 1 to the JSC Environmental Office any new process improvements or programs undertaken by the Contractor (or subContractors) that have contributed to waste reduction during the previous fiscal year. Waste reduction means preventing or decreasing the amount of waste being generated through waste prevention, recycling, or purchasing recycled and environmentally preferable products. This may be done through recycling\* or waste prevention\*\*. *This may be accomplished through source reduction and/or by increasing reuse and recycling of items that would normally go to the landfill (trash).* The information will be included in JSC's annual report to NASA HQ on waste reduction activities. Limit responses to one page or less per item. The response should include a description of the activity, the materials or wastes reduced, an estimated volume or weight of reduction, and a contact name and phone number for a person knowledgeable about the reduction activity.

\* Recycling means the series of activities, including collection, separation, and processing by which products or other materials are recovered from the solid waste stream for use in the forms of raw materials in the manufacture of products other than fuel for producing heat or power by combustion.

\*\*Waste prevention means any change in the design, manufacturing, purchase, or use of materials or products (including packaging) to reduce their amount or toxicity before they are discarded. Waste prevention also refers to the reuse of products or materials.

## III. Annual Energy Efficiency Product Procurement Report

The Contractor shall report to the JSC Energy Manager, on December 1 of each year, information on purchases of energy consuming products made by the Contractor (including subcontracts) beginning upon contract start. This includes the purchase of premium efficiency motors and efficiency lighting covered by the Energy Policy Act of 2005. The report shall provide the following:

- a) A list of all energy consuming products purchased during the previous fiscal year.
- b) The total purchase cost of each item on the list.
- c) A designation of which items were Energy Star or Federal Energy Management Program (FEMP)-sanctioned.
- d) For each Energy Star or FEMP-sanctioned product purchased, provide:
  - i. The simple payback value as determined by the Contractor's life cycle cost analysis.
  - ii. The annual savings in dollars and BTUs due to the purchase of the item
- e) Metrics which show the effectiveness of the Contractor's purchases
  - i. Percentage of purchased products that are Energy Star and FEMP-sanctioned against the total number of energy consuming products purchased.
  - ii. Total dollar value of the purchased products that are Energy Star and FEMP-sanctioned against the total dollar value of all energy consuming products purchased.

## IV. Ozone Depleting Substances (ODS) Reports

The Contractor shall track and report each December 1 to the JSC Environmental Office the following information for the previous fiscal year related to ODS equipment that the Contractor purchases, owns, operates, maintains, or repairs on-site:

- a) A list of the names of all EPA-Certified service technicians employed and their certification dates
- b) A list of any ODS recovery/recycling equipment that will be used and copy of the 40 CFR 82.162 EPA registration
- c) A list of any refrigeration/air conditioning units with a full charge of more than 50 pounds, not previously reported, including
  - i. any identifying equipment numbers
  - ii. the location of the equipment (building/room)
  - iii. the owning organization or contract name and number
  - iv. a narrative description of the equipment.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- v. refrigeration or air conditioning equipment with a full charge of > 50 pounds, permanently removed from service during the year.
  
- d) For each ODS chemical stored, purchased or used, track and report each December 1 for the previous fiscal year:
  - i. ODS Chemical Name;
  - ii. Quantity stored (pounds);
  - iii. Quantity purchased (pounds); and
  - iv. Quantity used (pounds).
  
- d. Format: Contractor's format is acceptable, but shall be delivered in an electronic format compatible with NASA standard software.
  
- e. Distribution:
  - 1. JE/JSC Environmental Office
  
- f. Submission:

The Contractor shall track and report the reports detailed in Sections I-V (detailed above) annually on December 1 to the JSC Environmental Office.
  
- g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

Provide a discussion of the qualification criteria (education and experience) that is normally associated with the labor classifications identified. Explain how the offeror’s proposed compensation plan recognizes the differences in skills and complexities of varied disciplines as well as job difficulty.</li> <li>2. Provide the offeror’s company’s salary range/wage information for each labor classification identified. Salary ranges will also reflect the impact of employment tenure. Describe planned escalations for exempt and non-exempt employees performing work under the cost portion of the contract. Indicate differences between the exempt and non-exempt employees performing work under the fixed-price portion of the contract and the cost portion of the contract.</li> <li>3. Discuss the offeror’s company’s fringe benefit policies and practices. Indicate any differences in fringe benefits exist among working groups. Address the offeror’s company policy on short and long term disability insurance, and life insurance, including information on the types of benefits offered, and the company share of premium costs.</li> <li>4. Describe the offeror’s company policy on health insurance coverage, including information on the types of health insurance benefits offered, the company share of premium costs, what co-pays are required, the effective date of coverage, and the anticipated escalation of insurance costs. Also include the offeror’s policy on assuming health insurance coverage for incumbent employees, including pre-existing medical conditions.</li> <li>5. Describe the offeror’s policy on retirement/savings plans, including how much the company provides toward the plan and information on vesting. Address escalation and employer/employee cost sharing ratios.</li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

6. Discuss other salary payment policies, such as cost-of-living adjustments, relocation expenses, and reduction in force including severance pay, overtime pay, holiday pay, and any other premium pay anticipated.
  7. If uncompensated overtime is proposed, it shall be in accordance with FAR 52.233-10, "Identification of Uncompensated Overtime". If proposed, the offeror shall discuss the effects of uncompensated overtime on the Total Compensation Plan, and provide a discussion as to whether the uncompensated overtime is voluntary or involuntary. Describe the possible effects that uncompensated overtime will have on employee morale and retention. The offeror will provide a copy of the company policy for uncompensated overtime with proposal.
  8. The offeror will discuss the policy for dealing with seniority and recognition of seniority if incumbents are hired. The discussion will include a statement regarding the offeror's intent with respect to paying incumbent employees the amount they are currently earning with salaries/wages and fringe benefits, including accrued leave.
  9. The offeror will describe incentives to motivate and reward performance and to encourage the retention of personnel. The offeror will describe the policies, procedures, and experience related to these incentives.
  10. If the offeror or other divisions of the parent company are performing a Government contract employing skills of a comparable professional level in the local area or at the same site of performance as this proposed contract, any differences in the TCP for the proposed effort and other contracts will be identified. The rationale for these differences will be explained.
  11. Explain how wage/salary ranges were established. Supporting information will include data, such as recognized national and regional compensation surveys and studies of professional, public and private organizations used in establishing this proposed TCP. The offeror shall describe their commitment for compliance with the Service Contract Act and all wage determinations.
  12. Provide a discussion of prior experience with this proposed TCP, including such information as the length of time the offeror (or other elements of the company) have used the TCP and the turnover experienced with this TCP compared to the National Average.
- d. Format: Contractor's format is acceptable traceable to the content listed above, but shall be delivered in an electronic format compatible with NASA standard software.
  - e. Distribution:
    1. BJ4/Contracting Officer
    2. Electronic distribution per CO letter.
  - f. Submission:
    1. Initial: Paragraph c. Content: Items 1-6 and 11 are due with Proposal
    2. Final: Due 30 days after contract award.
    3. Frequency: Update as requested per the Contracting Officer
  - g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Workload Data Plan and Workload Data Reports	7/27/2011	DRD-M18	NNJ11061911R
4. Use <i>(Define need for, intended use of, and/or anticipated results of data)</i>		5. DRD Category: <i>(check one)</i>	
Obtain the contractor’s plan to collect workload data and provide data in accordance with its plan to be used by the Government’s to more effectively plan or estimate future Aircraft Maintenance and Operation Support (AMOS) type work. Subsequent Workload Data Reports may also be useful in identifying opportunities to expand the use of fixed priced contract arrangements in the future.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References <i>(Optional)</i>		7. Interrelationships <i>(e.g., with other DRDs) (Optional)</i>	
8. Preparation Information <i>(Include complete instructions for document preparation)</i>			
<p>a. Data Type: Initial Workload Data Plan – Type 1; Semi-annual Workload Data Reports provided after Workload Data Plan approval – Type 3</p> <p>b. Scope:            The contractor shall develop a Workload Data Plan to collect accurate workload data associated with its accomplishment of all aspects of the AMOS contract for which the retention of historical data would be beneficial to more effectively plan for, manage or acquire similar services in the future. This Workload Data Plan is due one year after contract start.</p> <p>Upon submission, Government representatives will review the Workload Data Plan to ensure it will result in efficient and effective accumulation of accurate workload data needed for the Government to more effectively plan for, manage, or acquire similar work in the future. The plan will also be assessed to determine if the data collected in accordance with the approved plan is appropriate to explore additional opportunities to use fixed price contract arrangements in the future. The Contracting Officer shall provide written approval via a letter once the plan has been approved by all pertinent Government representatives.</p> <p>Once approved, the contractor shall then collect data in accordance with its approved Workload Data Plan and deliver that data to the Government in Workload Data Reports semi-annually.</p> <p>c. Content:            NASA has a goal to improve data available for future for work planning and estimating purposes. Maintenance of workload data on the AMOS contract is expected to facilitate future improvements in the efficient and effective acquisition of support services similar to AMOS. It is also expected that appropriate AMOS workload data may help identify opportunities to expand use of fixed pricing in the future acquisition of similar support services. To attain these goals, NASA will partner with the AMOS contractor to benefit from its expertise and overall and contract-specific experience in establishing the most appropriate content and format to be applied in the collection of AMOS workload data</p> <p>The Contractor shall prepare the initial Workload Data Plan and submit it to the Government for review. Once the Workload Data Plan is approved, the contractor shall comply with its Workload Data Plan to collect and report workload data in its subsequent Workload Data Reports. .</p> <p>d. Format: Contractor’s format is acceptable.</p>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

- e. Distribution:
  - 1. BJ4/Contracting Officer (Hard Copy)
  - 2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  - 3. CC/Alternate Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  - 4. CC2/Assistant Branch Chief, Aircraft Quality Assurance Branch
  
- f. Submission:
  - 1. The initial Workload Data Plan is due one year after Contract start.
  - 2. Frequency: Workload Data Reports prepared in accordance with the approved Workload Data Plan shall be delivered to the Government semi-annually after the Workload Data Plan has been approved by the Government.
  
- g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# **JSC DATA REQUIREMENTS DESCRIPTION (DRD)**

(Based on JSC –STD-123. See work page for instructions.)

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Information Technology (IT) Security Plan, Risk Assessment	March 2009	DRD-M19	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
The contractor shall be responsible for Information Technology Security for all systems connected to a NASA network or operated by a NASA contractor. This plan will ensure contractor awareness and compliance with the NASA regulations.		<input type="checkbox"/>	Technical
		<input checked="" type="checkbox"/>	Administrative
<input type="checkbox"/>		SR&QA	
6. References ( <i>Optional</i> )		7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )	
NFS 1852.204-76, Security Requirements for Unclassified Information Technology Resources (May 2007)			
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Data Type: 1-Written Approval by the Contracting Officer is required before contractor implementation of the IT Security Management Program Plan.</p> <p>b. Scope: The contractor shall submit an IT security management program plan for its unclassified technology information resources. This program plan shall describe the processes and procedures that will be followed to ensure appropriate security of IT resources that are developed, processed, or used under this contract. The Contractor’s IT security management program plan shall be compliant with the IT security requirements in accordance with Federal and NASA policies as referenced in OMB Circular A-130 (Management of Federal Information Resources), NPR 2810.1A (Security of Information Technology), and NPR 1620.1 (Security Procedures and Guidelines). See the CIO-Procurement Website for any supporting documentation.</p> <p><b>i) IT SECURITY PLAN(S)</b>  The contractor shall have a line manager who is responsible for the contractor’s systems in accordance with the definitions set forth in NPR 2810.1A. The IT security plan shall be kept up to date as changes to the baseline configuration of the system occur and shall be documented in the IT Security Plan.</p> <p>Note: An IT Security Plan is specific to a system or group of systems, while an IT Security Management Program Plan is defined as the elements a contractor has outlined to meet the IT Security requirements for interfacing with other contractors and NASA, training requirements and meeting the requirements in NPR 2810.1A.</p> <p><b>ii) TRAINING</b>  Per NASA requirements, employees subject to this contract shall complete the NASA provided IT security awareness training annually. Contractor provided IT security awareness training may be substituted but must be approved annually by NASA as a substitute. When substituted, per NPR 2810.1A, the contractor shall provide evidence that periodic IT security awareness training has been met for all employees subject to this contract. The contractor shall submit periodic reports (as requested by the CO) detailing the overall status of the annual training program. The Annual training program is defined as the period from Oct. 1<sup>st</sup> through Sept. 30<sup>th</sup>.</p> <p><b>iii) INFORMATION ON EMPLOYEES IN SENSITIVE AUTOMATED INFORMATION SYSTEMS (AIS) POSITIONS/ASSIGNMENTS REPORT</b>  The contractor shall submit an annual report on employees in sensitive IT positions/assignments which shall include information for personnel screening as required by the NASA Procurement Information Circular (PIC) 02-04, NPR 2810.1A, and NPR 1600.1 on position risk. This report shall be compiled on an annual basis.</p> <p>A list of all lead system administrators shall be updated by September 30 every year. This list will be used to ensure the contractor, as outlined in PN 04-03, has met the system administrator certification requirements.</p>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

## iv) **SYSTEM ADMINISTRATORS**

Within 30 days after contract award or notification from the Contracting Officer that a plan is required, system administrators shall be identified and their names submitted to the Contracting Officer and CIO Representative for Procurement.

- c. Format: Electronic Format consistent with NPR 2810.1A.
- d. Distribution:
  - 1. BJ4/Contracting Officer (Hard Copy)
  - 2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  - 3. Chief Information Officer (CIO) Representative to Procurement
- e. Submission:
  - 1. Initial: 30 days after contract start
  - 2. Approval: 60 days after contract start
  - 3. Frequency: Document shall be submitted annually by September 30
- f. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

## ATTACHMENT J-16 APPLICABLE DOCUMENTS LIST FOR NASA IT SECURITY REQUIREMENTS

The tentative list below presents NASA Policies, Procedures, Technical Standards and other guidance related to Information Security and IT Security at NASA. These documents cover all areas of the NASA IT environment, including IT infrastructure services, IT applications, and highly specialized IT. The requirements apply to all IT resources and information systems that store, process or transmit NASA data, or that connect to NASA networks or systems, or that are located on NASA facilities. The IT Security Plan required by NPD 2810.1A shall be delivered to and approved by the following:

JSC-IA  
Attn: Jon Symes  
2101 NASA Parkway  
Houston, TX 77058

This Attachment will be updated after approval of the Contract IT Security Management Plan to remove non-applicable documents cited herein.

An electronic copy of the plan will also be provided to the COTR and CO.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Organizational Conflict of Interest Mitigation Plan	9/20/2011	DRD-M20	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
Used when the contractor proposes to resolve an organizational conflict of interest by mitigation.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References ( <i>Optional</i> )	7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )		
FAR 9.5 “Organizational and Consultant Conflicts of Interest;” NFS 1852.209-71 Limitation of Future Contracting			
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Data Type: 1</p> <p>b. Scope: The Organizational Conflict of Interest (OCI) Plan describes the contractor’s approach to resolving the potential organizational conflict of interest found in 1852.209-71 Limitation of Future Contracting and any mitigation techniques it intends to use in performance of the work in the RFP.</p> <p>c. Content:  The Organizational Conflict of Interest (OCI) Mitigation Plan shall:</p> <ol style="list-style-type: none"> <li>1. Demonstrate an understanding of (1) OCI principles and (2) the full breadth of OCI issues and the types of harm that can result.</li> <li>2. Describe the actions the contractor intends to take to mitigate the OCIs identified in the RFP. If using a firewall, explain how these actions will operate to successfully address the conflict without adversely affecting performance of the contract. Additionally, identify any potential OCIs created by the requirements of this RFP which the contractor intended to resolve using methods other than mitigation. Specific mitigation strategies shall be appended to the mitigation plan; specific plans to limit future competition will be reflected in the clause at NFS 1852.209-71, —Limitation of Future Contracting.¶</li> <li>3. Require the reporting of all potential/actual OCIs during performance of the contract. An OCI report shall include (1) a description of the conflict, (2) the plan for resolving the conflict, and (3) the benefits/risks vis-à-vis contract performance associated with plan approval/acceptance.</li> <li>4. Include a requirement to update this plan as necessary to address specific OCIs. All updates to the plan must be approved by the contracting officer and the updates/changes must be incorporated in the contract to be effective.</li> <li>5. Define company roles, responsibilities, and procedures for screening (i.e., identifying/recognizing, analyzing/evaluating, resolving, and reporting) existing and new business opportunities for actual/potential OCIs.</li> <li>6. Identify any affiliated companies/entities (e.g., a parent company or a wholly-owned subsidiary) and procedures for coordinating OCIs with such affiliated companies/entities.</li> <li>7. Explain how the contractor will flow down the provisions of this mitigation plan to any subcontractor that may have a conflict with regard to performing the requirements of this contract. Discuss affected subcontractors’ OCI program as it relates to this contract and specifically explain how affected subcontractors will identify, resolve, and report OCIs associated with this contract.</li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

8. Establish and require entrance training for new employees, refresher training for existing employees, and exit training for departing employees.
  9. Define organizational and employee sanctions for violations of established OCI procedures/requirements/guidelines.
  10. Require periodic self-audits to ensure compliance with established OCI procedures/requirements/guidelines.
  11. Define records related to the OCI plan (e.g., training and audit records) that will be made available to the Government upon request.
- d. Format: Contractor format is acceptable.
- e. Distribution:
1. BJ4/Contracting Officer (Hard Copy)
  2. CC/Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
  3. CC/Alternate Contracting Officer's Technical Representative (Electronic distribution in Microsoft Office or PDF format.)
- f. Submission:
1. Initial: due with proposal
  2. Final: Contract start + 60 calendar days.
  3. Approval: Contract start + 90 calendar days.
  4. Update Frequency: As required.
- g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue. The Contractor shall review the Plan on an annual basis or as directed by the CO, revise the Plan if necessary. Revisions are subject to CO approval.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Monthly Maintenance Plan	5/27/11	DRD-N01	NNJ11061911R
4. Use <i>(Define need for, intended use of, and/or anticipated results of data)</i>		5. DRD Category: <i>(check one)</i>	
To establish and implement a Monthly Maintenance Plan to provide maintenance managers with forecasted maintenance and other key requirements in support of Aircraft Operations Division three-tier aircraft maintenance program.		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References <i>(Optional)</i>	7. Interrelationships <i>(e.g., with other DRDs) (Optional)</i>		
8. Preparation Information <i>(Include complete instructions for document preparation)</i>			
<p>a. Data Type: 2</p> <p>b. Scope: To establish and implement a Monthly Maintenance Plan</p> <p>c. Content: The Contractor shall:</p> <p>Produce a monthly maintenance plan that will be utilized by management and supervisory personnel to keep abreast of projected aircraft maintenance and other key requirements in support of NASA JSC Aircraft Operations three-tier aircraft maintenance program. The plan shall include the following minimum requirements:</p> <ol style="list-style-type: none"> <li>1. Projected flight hours by type/model/series aircraft</li> <li>2. Projected deployments by type/model/series aircraft</li> <li>3. Scheduled and forecasted calendar and hourly aircraft and engine inspections for the month. Format shall include:                     <ol style="list-style-type: none"> <li>a) Specific aircraft tail number and engine and support equipment serial number</li> <li>b) Serial number of specific item</li> <li>c) Nomenclature of end item due inspection</li> <li>d) Inspection type</li> <li>e) Current aircraft and engine time since new</li> <li>f) Inspection due time or date</li> <li>g) Inspection time remaining</li> </ol> </li> <li>4. Projected aircraft life limited componets (LLC) due time change force removal for the month. Format shall include:                     <ol style="list-style-type: none"> <li>a) Specific aircraft tail number</li> <li>b) Serial number of specific LLC item</li> <li>c) Part number of specific LLC item</li> <li>d) Nomenclature of LLC</li> <li>e) Date or time due</li> <li>f) Time remaining on reported LLC</li> </ol> </li> <li>5. Projected pyrotechnics due time change for the month. Format shall include:                     <ol style="list-style-type: none"> <li>a) Specific aircraft tail number</li> <li>b) Serial number of specific item</li> <li>c) Pyrotechnic nomenclature</li> <li>d) Expiration date</li> </ol> </li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

6. Technical directives (Aircraft Change Directives) forecasted for accomplishment during the month. Format shall include:
    - a) Specific aircraft tail number
    - b) Technical directive number
    - c) Title or description of ACD
    - d) Technical directive install no later than date
  7. Calibration equipment due for calibration during the month. Format shall include:
    - a) Nomenclature
    - b) Serial number of specific item
    - c) Calibration identification number
    - d) Due date
  8. Projected personnel general and certification training for the month. Format shall include:
    - a) Name of individual
    - b) Type Training (General or Certification)
    - c) Title or description of training
    - d) Projected training date
    - e) Location of training
    - f) If certification training, identify impacts on individual supporting mission requirements
  9. Personnel overdue general or certification training. Format shall include:
    - a) Name of individual
    - b) Type training overdue (General or Certification)
    - c) Title or description of training
    - d) Original scheduled training date
  10. Date of last full paint or major paint touch-up for each assigned aircraft tail number (whichever date is latest)
  11. T-38 rudder off-sets position (update required after each 450-hour periodic inspection or rudder off-set adjustment, whichever is the latest).
  12. Provide previous month's Trend Analysis data, to include matrix charts for the following:
    - a) Repeat discrepancies
    - b) Recurring discrepancies
    - c) High failure rate components
    - d) High useage materials
    - e) Process failures
- d. Format: Contractor's format is acceptable.
- e. Distribution:
  1. CC2/NASA Maintenance Manager (Hard Copy)
  2. Posted to the AOD Homepage, Maintenance Section (Electronic distribution)
- f. Submission:
  1. Initial: Contract start + 1 month.
  2. Final: Contract start + 3 months.
  3. Frequency: Posted to the AOD Homepage, Maintenance Section, by the 25th of each month for the forthcoming month.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Reports Required for Logistics	6/29/11	DRD-L01	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
These reports are required to determine the effectiveness of the Property Management System and as indicators of the volume of logistics activity. These reports will be forwarded to NASA Headquarters		<input type="checkbox"/> Technical <input checked="" type="checkbox"/> Administrative <input type="checkbox"/> SR&QA	
6. References ( <i>Optional</i> )	7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )		
NPR 4100, NASA Materials Inventory Management Manual	DRD-M03 Commercial Monthly Purchase Expenditures		
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Data Type: 2</p> <p>b. Scope: Logistics reports shall be submitted in accordance with this Data Requirement Description (DRD).</p> <p>c. Content: The following reports are required to be prepared when on site storage meets or exceeds \$75,000 for program stock in one location</p> <ol style="list-style-type: none"> <li>1. *Data Input for NASA Form 1324, Semi-annual Report of Personnel Property Management Operations                     <p style="margin-left: 40px;">This semi-annual report defines the following line item data elements as of 3/15 and 9/15 of each year:</p> <ol style="list-style-type: none"> <li>a. Material Inventory Status</li> <li>b. Material Inventory Activity</li> <li>c. Material Acquisition Activity</li> <li>d. Material Receiving Activity</li> <li>e. This report contains the</p> </li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

following data by Object Class Code ( See the JSC Stores Stock Catalog preface for a detailed explanation of these codes)

- a. Line items and dollar value of items inventoried.
- b. Number of line items with variance
- c. Dollar value of discrepant items, including overage, shortage, and gross discrepancies.
- d. Identify whether inventory items are stores, program, or standby stock, and also identify the staff hours and dollar value expended in accomplishing and reconciling the inventory.
- e. A brief explanation of cause of discrepancies and actions to minimize the chance for recurrence.

Reference: NPR 4100, NASA Materials Inventory Management Manual.

Due Date: 9/25

Note: All the above are to treat Contractor- Acquired Material (CAM) and Government-Furnished Material as one lot.

#### 4. Quarterly Report of Contractor-Acquired material (CAM)

This report will consist of two transfer documents (DD Form 1149) that identify material purchased and received by the Contractor for on-site use. The two documents will be differentiated as follows:

- a. Items bought for direct consumption on site.
- b. Items issued to storeroom(s) that will impact the dollar value of assets on hand.

The DD Form 1149 will be transferring accountability of these assets to NASA and will be accompanied by requisitions, issue documents, engineering work orders (if flight material destined for a bond room), or any other similar form approved for use by the JSC Property Administrator. The DD Form 1149 shall identify total number of line items and total value.

Due Date: 15 working days after the end of Fiscal Year Quarter.

#### 5. (NOT STANDARD) Annual Report of Exchange/Sale:

As defined by the NASA Property Administrator Transaction submitted 15 days after the end of each government fiscal/year.

- d. Format: \*Forms for Data Input are available through JB3/Contract Property Management Branch web page:  
<http://www6.jsc.nasa.gov/ja/jb/jb3.cfm>
- e. Distribution:  
Property Administrator  
Reference: NPR 4100, NASA Materials Inventory Management Manual
- f. Submission:  
Due Dates: Semiannually on 3/25 and 9/25
- g. Maintenance: Reference: NPR 4100, NASA Materials Inventory Management Manual

  4. CC2 Assistant Branch Chief, Aircraft Quality Assurance Branch
- f. Submission:
1. Initial: Paragraph c. Content, Sub-paragraphs 1. is due with Proposal
  2. Preliminary: Complete DRD submission due at Contract start.
  3. Final: Contract start +20 days
  4. Approval: Contracting Officer
  5. Frequency: As required
- g. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Government Industry Data Exchange Program (GIDEP) and NASA Advisory Problem Data Sharing and Utilization Program Documentation and Reporting	06/30/2011	DRD-Q02	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
To establish common, general requirements and procedures to ensure that information concerning significant problems involving parts, materials, and safety are exchanged both internal and external to NASA.		<input type="checkbox"/> Technical <input type="checkbox"/> Administrative <input checked="" type="checkbox"/> SR&QA	
6. References ( <i>Optional</i> )		7. Interrelationships ( <i>e.g., with other DRDs</i> )	
1) SO300-BT-PRO-010, GIDEP Operations Manual and Policy 2) SO300-BU-GYD-010, GIDEP Requirements Guide 3) NPR 8735.1, NASA Procedure Requirements, "Procedure for Exchanging Parts, Materials, and Safety Problem Data Utilizing the Government-Industry Data Exchange Program and NASA Advisories."			
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p><b>NOTE:</b>            Special controls shall be implemented to comply with the confidentiality of the problem reports involving criminal investigations. The implementation procedures must address this special need for the control of information with the restricted distribution as well as the need to track and report the cost of the problem investigation and resolution.</p> <p>a. Data Type: 3</p> <p>b. Scope:            Generic problems reported by the Government Industry Data Exchange Program (GIDEP) or NASA Advisory distribution networks shall be assessed to determine if there is a real or potential impact on the program or program assets. Generic problems experienced by the program or by program assets shall be reported in the GIDEP or NASA Advisory network, as required.</p> <p>c. Content:</p> <ol style="list-style-type: none"> <li>The Contractor and sub-tier implementation procedures shall provide details that will ensure that the Contractor understands and will implement these procedures, which cover the scope; task importance; management responsibilities; technical expertise to identify and resolve any impacts; "special problem" information sensitivity; and documentation necessary to comply with GIDEP and NASA policies.</li> <li>GIDEP documents are to comply with the GIDEP Operations Manual and Policy requirements for the appropriate document being prepared and released.</li> <li>Implementation documentation shall include an index of problem reports received and assessed for impact; hardware/systems/subcontractors subject to the assessments; status of the impact assessments by problem report by hardware/system/subcontractor; and corrective actions for problems with identified impacts, including (1) NASA program management involvement and concurrence, (2) required supporting documentation for all problems experienced on the program/project that meet the criteria for release of a GIDEP report or NASA Advisory and the released GIDEP reports and NASA Advisories, and (3) any other data required to comply with the applicable GIDEP and NASA documents.</li> <li>Details of the required milestone/mission support efforts and reports with the associated roles and responsibilities shall be provided.</li> <li>Financial data to justify and substantiate any reported "cost impacts" are to be included.</li> </ol> <p>d. Format:</p> <ol style="list-style-type: none"> <li>The Contractor shall utilize an electronic database with access permissions provided to AOD NASA Quality</li> </ol>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

Assurance personnel and JSC GIDEP Advisory Coordinator

2. The Contractor's format is acceptable but shall provide the "Task Management, Control, and Tracking Status," information required to satisfy requirements contained in above referenced material
  3. GIDEP documents shall be prepared on the appropriate GIDEP form found in the SO300-BT-PRO-010, GIDEP Operations Manual and Policy.
  4. NASA Advisories shall be coordinated with the JSC NASA Advisory Coordinator and comply with contents required to complete the JSC NASA Advisory Form, JSC Form 1159 (JF1159) and to accurately report the problem and conditions.
- e. Distribution:  
Distribution will comply with the Contracting Officer letter (shall include the JSCGIDEP/NASA Advisory Coordinator, as a minimum).
- f. Submission:  
Non-Conforming Parts and Materials Reports - Incidents involving non-conforming products or materials are to be reported through the GIDEP Reporting System to comply with Government Policy as defined by Office of Federal Procurement Policy, Policy Letter No. 91-3 (Appendix D of GIDEP Operation Manual, SO300-BT-PRO-010) as required.
- g. Maintenance:  
The Contractor shall ensure a procedure is in place to support all GIDEP and NASA Advisory information to include:
1. Documentation of the current implementation procedures and GIDEP and NASA Advisory policies
  2. Procedures to ensure released GIDEP and NASA Advisory information is gathered, tracked, reviewed, captured, and retained in a Contractor electronic database for AOD applicability to ensure factual investigation and reporting of suspect parts
  3. Methodology that will be utilized to receive, distribute, and thoroughly assess the GIDEP and NASA Advisory for AOD impacts and follow-through actions to ensure impacts noted are promptly reported, tracked, and corrected with NASA Program Management assistance and concurrence.
  4. Cost data tracking reporting for GIDEP and NASA Advisory impact issues
  5. Logistics parts tracking, tagging, and retention of suspect items pending final disposition instructions from the NASA GIDEP and Advisory Coordinator, to include updating the NASA automated database, NAMIS.
- h. Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Lessons Learned Program Plan and Lessons Learned	02/10/11	DRD-S01	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
Establishes Process for obtaining Lessons Learned from Contractor for possible publication in JSC Lessons Learned Database and NASA Lessons Learned Information System (LLIS)		<input type="checkbox"/>	Technical
		<input type="checkbox"/>	Administrative
		<input checked="" type="checkbox"/>	SR&QA
6. References ( <i>Optional</i> )		7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )	
JPR 2310.1, "JSC Organizational Learning Plan," NPR 7120.5C, "NASA Program and Project Management Processes and Requirements;" NPR 7120.6, "Lessons Learned Process" NPR 8621.1, "NASA Procedural Requirements for Mishap Reporting, Investigating, and Recordkeeping" NPR 8715.3, "NASA Safety Manual"		DRD-S02 Safety and Health Plan, JSC & LaRC	
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Initial Lessons Learned Program Plan – Type 1; Lessons Learned – Type 2</p> <p>b. Scope: Lessons Learned Program Plan. The contractor shall develop and implement a lessons learned program plan consistent with the areas defined in the statement of work and/or the work breakdown structure.</p> <p>c. Content: The lessons learned program plan shall include:</p> <ol style="list-style-type: none"> <li>1. Lessons learned program structure and management responsibility for lessons learned.</li> <li>2. Lessons Learned advocacy throughout the contracted effort.</li> <li>3. Approach to selection, review, and validation of lessons learned using contract and government assets.</li> <li>4. Approach used to balance trade secret and security imperatives vice government rights in data and the need to capture lessons for publication in Government information systems and processes.</li> <li>5. The dissemination of lessons learned throughout appropriate NASA programs including the retrieval and dissemination of lessons published in the JSC Lessons Learned Database and the NASA Lessons Learned Information System.</li> <li>6. Information on the successful use of retrieved lessons including how they were used, by whom, for what purpose, and implementation detail delivered to the Government as additional recommendations for previously published lessons.</li> <li>7. Goals for the contractor's lessons learned program including schedules, scope, breadth, quality, and quantity of lessons the government can expect as delivered lessons. Appropriate metrics for identification, publication, and dissemination are highly desirable.</li> <li>8. The approach to the selection of media to be used for of supporting data inclusion with each lesson learned (such as photographs, analyses, diagrams, schematics, drawings, and streamed video.)</li> </ol> <p>Access to the JSC Lessons Learned Database and the NASA Lessons Learned Information System.</p> <ol style="list-style-type: none"> <li>1. To obtain access privileges to the JSC Lesson learned Database, JSC Domain Internet access is required to enter and review lessons learned information. The JSC lessons learned databases is accessible at <a href="https://lldb.jsc.nasa.gov/index.cfm?&amp;CFID=635927&amp;CFTOKEN=72741895">https://lldb.jsc.nasa.gov/index.cfm?&amp;CFID=635927&amp;CFTOKEN=72741895</a></li> <li>2. To obtain access to the NASA Lessons Learned Information System, go to <a href="http://nen.nasa.gov/portal/site/llis/LL/">http://nen.nasa.gov/portal/site/llis/LL/</a> and follow instructions.</li> </ol> <p>Criteria for Selecting Lessons Learned.</p> <p>Uncommon insight arising from any event or observation that will benefit from sharing with a larger community of interested parties. Lessons learned are intended to prevent recurrence of undesirable events and to allow NASA and its team members to capitalize to the greatest extent practical on unique successes requiring documented insight for retrieval on demand. Sharing of lessons with other Government agencies is also expected.</p>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

Evaluation of Contactor Lessons Learned Program performance. The following characteristics are evaluated by the Government in order of decreasing importance:

1. Effectiveness of approach to lessons learned advocacy.
2. Ability to recognize and capitalize on lessons learned in a timely manner.
3. Breadth of participation by the contracted effort to include from where lessons originate for publication and to whom lessons are disseminated for use by contract assets.
4. Technical quality of lessons submitted including thoroughness and readiness of supporting documentation for publication.

Definitions: Refer to NASA LLIS at <http://llis.gsfc.nasa.gov/> and AG-CWI-001 for definitions of terms used.

d. Format:

Subject - one line subject of the lesson.

Lesson Learned - usually one sentence that describes insight gained.

Description of Event - narrative that describes what happened.

Recommendations - may be an action plan, suggestion, etc., that was adopted at event source.

Supporting documentation – submit as needed to augment understanding of lesson (photographs with or without pointers and text labels), illustrations, drawings, etc.).

Contact name and e-mail address (for follow up by Government prior to publication of lesson).

Contractor's format is acceptable, but shall be delivered in an electronic format compatible with NASA standard software.

e. Distribution:

1. Lessons are distributed by entry into the JSC Lessons Learned Database which submits lessons to the NASA Lessons learned Information System once approved and published. The NASA Lessons Learned Information System may be used directly if the contractor is outside the JSC domain or firewall.
2. Contracting Officer's Technical Representative (COTR) (1 copy).

f. Submission:

Frequency for lessons learned. As follows (in order of decreasing Government preference):

1. Data entry to the JSC LLDB or NASA LLIS within 30 days of a triggering event;
2. Within 30 days of a program milestone, mishap investigation, or hazard or other engineering analysis / evaluation is completed; or
3. 30 days prior to end of contract evaluation period or 45 days prior to end of contract, whichever is applicable.

g. Maintenance: Revisions to this DRD shall be incorporated by change page or complete reissue.

<p>a. Data Type: 1</p> <p>b. Scope:</p> <p>Other Deliverables: The requirements for this plan as detailed in the instructions on plan content below include instructions for specific reports and data to be submitted to the Government. These instructions are to be included in the plan and represent contractual commitments by the Contractor to provide this information. The reports and deliverables include the following (along with paragraph references):</p> <ul style="list-style-type: none"> <li>1.5.2 Company Physician/Occupational Injury/illness case manager – at contract start and as revised.</li> <li>1.5.3 Building Fire Wardens (Roster)</li> <li>1.5.4 Designated Safety Official</li> <li>1.8.2 Safety and Health Self Evaluation Report</li> <li>1.9.1 Roster of Terminated Employees</li> <li>1.9.2 Material Safety Data Sheets (MSDS)</li> <li>1.9.3 Hazardous Materials Inventory</li> <li>2.1.1 Job Hazard Analysis for Offices (when revised after contractor review)</li> <li>2.3 Inventory of Hazardous Operations</li> <li>2.4 Inspection results entered in Building Inspection Tracking System (BITS)</li> <li>2.4.2 Monthly Metrics Report – inspection finding and corrective actions</li> <li>2.4.2 Hazard Abatement Tracking System – for hazards open more than 30 days.</li> <li>2.6 Close calls forwarded to JSC close call tracking system.</li> <li>2.7.1 Mishap reporting and Lessons Learned.</li> <li>2.7.2.a JSC Form 288, “Accident/Incident Statistics”</li> <li>2.7.2.b OSHA logs</li> <li>3.1, 3.12 Hazards recorded in JSC Hazard Abatement Tracking System.</li> <li>3.12.3 Interim and Final Abatement Plans.</li> </ul> <p>c. Content:</p> <p>Details:</p> <p>1. MANAGEMENT LEADERSHIP AND EMPLOYEE PARTICIPATION</p> <p>1.1 Policy: Provide the Contractor’s safety and health compliance policy statement with the plan. Compare the Contractor’s policy statement with those of NASA and OSHA and discuss any differences.</p>			

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- 1.2 Goals and Objectives. Describe your approach to the following:
  - 1.2.1 Specific annual safety and health goals and objectives to be met.
  - 1.2.2 Methods to be used, if any, to improve on the Days Away Case Rate (DACR), the Total Recordable Injury Rate (TRIR), and the total Days Away plus Restricted Duty plus Job Transfer (DART).
- 1.3 Management Leadership.

Describe management's procedures for implementing its sustaining commitment to safety and health compliance through visible management activities and initiatives including a commitment to exercise management prerogatives to ensure workplace safety and health. Describe processes and procedures to making this visible in all Contract and subcontract activities and products. Include a statement from the project manager or designated safety official indicating that the plan will be implemented as approved and that the project manager will take personal responsibility for its implementation.
- 1.4 Employee Involvement. Describe procedures to promote, implement, and sustain employee (e.g., non-supervisory) involvement in safety and health compliance program development, implementation and decision-making. Describe the scope and breadth of employee participation to be achieved so that approximate safety and health risk areas of the Contract are equitably represented. Describe methods to be used to obtain employee buy in and address the behavioral aspects of safety.
- 1.5 Assignment of Responsibility. Describe line and staff responsibilities for safety and health program implementation. Identify any other personnel or organization that provides safety services or exercises any form of control or assurance in these areas. State the means of communication and interface concerning related issues used by line, staff, and others (such as documentation, concurrence requirements, committee structure, sharing of the work site with NASA and other Contractors, or other special responsibilities and support). As a minimum, the Contractor will identify the following:
  - 1.5.1 Safety Representative - identify by title, the individual who will be trained and certified in accordance with JPR 1700.1 to be responsive to Center-wide safety, health and fire protection concerns and goals, and who will participate in meetings and other activities related to the JSC Safety and Health program.
  - 1.5.2 Company Physician/Occupational Injury/illness case manager - identify a point of contact who is responsible for the transfer or receipt of company medical data and who will be the primary contact for the company in the event any employee suffers a work related injury or illness (such as the company physician) by name, address, and telephone number to the JSC Occupational Medicine Clinic, mail code SD32. This will facilitate communication of medical data to Contractor management. Prompt notification to the JSC Occupational Medicine Clinic shall be given of any changes that occur in the identity of the point of contact.
  - 1.5.3 Building Fire Wardens - provide a roster of fire wardens at the start of each Contract year (their names, telephone numbers and pagers, and mail codes). Contractor fire wardens are needed to facilitate the JSC fire safety program, including coordination of related issues with NASA facility managers and emergency planning and response officials and their representatives. Fire wardens will be trained in accordance with JPR 1700.1. The Roster shall be maintained by letter to the JSC Safety and Test Operations Division, mail code NS2, with copies to the Contracting Officer and the Contracting Officers Technical Representative. The initial letter shall be received by the Government not later than 15 days after contract start.
  - 1.5.4 Designated Safety Official - identify by title the official(s) responsible for implementation of this plan and all formal contacts with regulatory agencies and with NASA.
- 1.6 Provision of Authority. Describe consistency of the plan for compliance with applicable NASA and JSC requirements and contractual direction as well as applicable Federal, State, and Local regulations and how compliance will be maintained throughout the life of the contract.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- 1.7 Accountability. Describe procedures for ensuring that management and employees will be held accountable for implementing their tasks in a safe, healthful, and environmentally compliant manner. The use of traditional and/or innovative personnel management methods (including discipline, motivational techniques, or any other technique that ensures accountability) will be referenced as a minimum and described as appropriate.
- 1.8 Program Evaluation. Describe your approach to safety and health program evaluation. The program evaluation consists of:
  - 1.8.1 [RESERVED.]
  - 1.8.2 A written self-evaluation report to be delivered once per year. The self evaluation shall be provided for the Contractor performance evaluation. The self-evaluation shall follow the VPP program evaluation report format found in OSHA CSP 03-01-003, Voluntary Protection Program (VPP): Policies and Procedures Manual, Appendix C, “Format for Annual Submissions”, as mandated by the cognizant OSHA regional office. Contractors who have submitted a written self-evaluation as a VPP site may submit their original report to OSHA in lieu of writing a new self-evaluation provided that all action plans and status are updated. The self-evaluation shall as a minimum cover the elements of the approved safety and health plan.
- 1.9 Miscellaneous Reports. The Contractor will acknowledge the following as standing requests of the Government and to be handled as described below.
  - 1.9.1 Roster of Terminated Employees. Identify personnel terminated by the contractor. Send to the JSC Occupational Health Officer, no later than 30 days after the end of each contract year. At the contractor’s discretion, the report may be submitted for personnel changes during the previous year or cumulated for all years. Information required:
    - a) Date of report, Contractor identity, and Contract number.
    - b) For each person listed, provide name, social security number, and date of termination.
    - c) Name, address, and telephone number of Contractor representative to be contacted for questions or other information.
  - 1.9.2 Material Safety Data Sheets (MSDS). The Contractor shall prepare and/or deliver MSDS for hazardous materials brought onto Government property or included in products delivered to the Government. This data is required by the Occupational Safety and Health Administration (OSHA) regulation, 29 CFR 1910.1200, “Hazard Communication”, EPA “Emergency Planning and Community Right-to-Know (EPCRA, ref. 40 CFR 302, 311, 312); and the Texas Department of Health (TDH, ref. Chapters 505-507 of the Health and Safety Code), and Federal Standard 313 (or FED-STD-313), “Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities”, as revised. This inventory is also required by JPR 1700.1, “JSC Safety and Health Handbook”, as revised. 1 copy of each MSDS will be sent upon receipt of the material for use on NASA property to the JSC Central MSDS Repository, maintained by the JSC Occupational Medicine Occupational Health contractor, along with information on new or changed locations and/or quantities normally stored or used. If the MSDS arrive with the material and is needed for immediate use, the MSDS shall be delivered to the Central MSDS Repository by close of business of the next working day after it enters the site.
  - 1.9.3 Hazardous Materials Inventory. The Contractor shall compile an inventory report of all hazardous materials it has located on Government property quarterly, and which is within the scope of 29 CFR 1910.1200, “Hazard Communication”; and Federal Standard 313 (or FED-STD-313), “Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities”, as revised. This inventory is also required by JPR 1700.1, “JSC Safety and Health Handbook”, as revised. The call for this inventory and instructions for delivery will be issued by the JSC Occupational Medicine Occupational Health contractor, mail code SD33. This information shall use the format used by JSC for chemical inventory compilation to provide the following:
    - a) The identity of the material (product number, chemical, manufacturer, and NSN as available.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- b) The location of the material by building, room and area/cabinet number.
  - c) The quantity of each material normally kept at each location (number of containers, container size, type container, unit of measure, conversion factor, storage temp & pressure, physical state/form, specific gravity, total pounds).
  - d) Peak quantity stored.
  - e) Actual or estimated rate of annual usage of each chemical.
- 1.10 Government Access to Safety and Health Program Documentation. The Contractor shall recognize, in its plan, that all safety and health documentation (including relevant personnel records) be available for inspection or audit at the Government's request. Electronic access by the Government to this data is preferred as long as Privacy Act requirements are met and Government safety and health professionals and their representatives have full and unimpeded access for review and audit purposes. For Contractor activities conducted on NASA property, the Contractor will identify what records will be made available to the Government in accordance with the criteria of OSHA as implemented in JPR 1700.1, "JSC Safety and Health Handbook", as revised. For the purpose of this plan, safety and health documentation includes but is not limited to: logs, records, minutes, procedures, checklists, statistics, reports, analyses, notes, or other written or electronic document which contains in whole or in part any subject matter pertinent to safety, health, or emergency preparedness.
- 1.11 Review and Modification of Safety Requirements. The Contractor may be requested to participate in the review and modification of safety requirements that are to be implemented by the Government including any referenced documents therein. This review activity will be implemented at the direction of the NASA Contracting Officer's Technical Representative (COTR) in accordance with established contractual procedures.
- 1.12 Procurement. Identify procedures used to assure that procurements are reviewed for safety and health compliance considerations and that specifications contain appropriate safety criteria and instructions. Set forth authority and responsibility to assure that safety tasks are clearly stated in subcontracts.
- 1.13 Certified Professional Resources. Discuss your access to certified professional resources for safety and health protection. Discuss their roles in motivation/awareness, worksite analysis, hazard prevention and control, and training.

## 2. WORKSITE ANALYSIS

- 2.1 Analysis of Worksite Hazards. Contractor worksite hazards shall be systematically identified through a combination of surveys, analyses, and inspections of the workplace, investigations of mishaps and close calls, and the collection and trend analysis of safety and health data such as: records of occupational injuries and illnesses, findings and observations from preventive maintenance activities, facilities related incidents related to partial or full loss of systems functions; etc. Describe how hazards identified by any of the techniques identified below shall be ranked, processed, and mitigated in accordance with JPR 1700.1. All hazards on NASA property, which are immediately dangerous to life or health, shall be reported immediately to the Safety and Test Operations Division. All safety engineering products that address operations, equipment, etc., on NASA property will be subject to JSC Safety and Test Operations Division review and concurrence unless otherwise waived by the JSC Safety and Test Operations Division.
- 2.2 Industrial Hygiene. Describe your industrial hygiene program and how it will be coordinated with the JSC Government provided resources for industrial hygiene. In the event corporate resources are used to determine workplace exposures, copies of all monitoring data shall be provided to JSC Occupational Medicine Occupational Health contractor within 15 days of receipt of results.
- 2.3 Hazard Identification. Describe the procedures and techniques to be utilized to compile an inventory of hazards associated with the work to be performed on this Contract. This inventory of hazards shall address the work specified in this Contract as well as operations and work environments in the vicinity or in close proximity to Contract operations. The results will be reported to the Government in a manner suitable for inclusion in facilities baseline documentation as a permanent record of the facility. Specific techniques to be considered include:

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- 2.3.1 Comprehensive Survey - A “wall to wall” engineering assessment of the Contractor’s worksite, which includes the Government furnished facilities to be used by the contractor and the immediate vicinity in which contractual work or tasks will be performed. This assessment encompasses facilities, equipment, materials, and processes.
- 2.3.2 Change (Pre-use) Analysis - Typically addresses modifications in facilities, equipment, processes, and materials (including waste); and related procedures for operations and maintenance. Change analyses periodically will be driven by new or modified regulatory and NASA requirements.
- 2.3.3 Hazard Analysis - May address facilities, systems/subsystems, operations, processes, materials (including waste), and specific tasks or jobs. Analyses and report formats will be in accordance with JSC 17773, "Preparing of Hazard Analyses for JSC Ground Operations."
- 2.3.4 The Contractors safety plan will describe the flow of the findings of the comprehensive survey of hazards into hazard analyses and job hazard analyses and subsequently into controls such as design, operations, processes, procedures, performance standards, and training. The contractor will discuss its approach to notify NASA and other parties external to the contract work of its identified hazards and subsequent analyses and controls.
- 2.4 Inspections. Includes assignments, procedures, and frequency for regular inspection and evaluation of work areas for hazards and accountability for implementation of corrective measures. The Contractor will describe administrative requirements and procedures for control of regularly scheduled inspections for fire and explosion hazards. The Contractor has the option, in lieu of this detail, to identify policies and procedures with the stipulation that the results (including findings) of inspections conducted on NASA property or involving Government furnished property will be documented in safety program evaluations or the monthly Accident/Incident Summary reports. Inspections will identify:
  - a) Discrepancies between observed conditions and current requirements, and,
  - b) New (not previously identified) or modified hazards.
  - c) Use of JSC’s Hazard Abatement Tracking System to manage hazards onsite at JSC (see paragraph 3.12 below).
- 2.5 Protective Equipment - Set forth procedures for obtaining, inspecting, and maintaining all appropriate protective equipment, as required, or reference written procedures pertaining to this subject. Set forth methods for keeping records of such inspections and maintenance programs.
- 2.6 Employee Reports of Hazards - Identification of methods to encourage employee reports of hazardous conditions (e.g., close calls) and analyze/abate hazards. The Contractor will describe steps it will take to create reprisal-free employee reporting with emphasis on management support for employees and describe methods to be used to incorporate employee insights into hazard abatement and motivation/awareness activities.
- 2.7 Accident and Record Analysis
  - 2.7.1 Mishap Investigation – identification of methods to assure the reporting and investigation of mishaps including corrective actions implemented to prevent recurrence. The Contractor will describe the methods to be used to report and investigate mishaps on NASA property and on Contractor or third party property. The Contractor will describe its procedures for implementing immediate notification of NASA using the call tree in 2.7.1.a below. The use of the quick incident reports found at the lower center of the home page of the NASA Incident Reporting Information System (IRIS) at <https://nasa.ex3host.com/iris/newmenu/login.asp> and use of NASA forms as specified in JPR1700.1 or any alternate forms used by Contractor. The contingency plan will emphasize timely notification of NASA; preliminary and formal investigation procedures; exercise of jurisdiction over a mishap investigation involving NASA and other contractor personnel; preparation and submission of a formal report to NASA; follow up of corrective actions; communication of lessons learned to NASA; and solutions to minimize duplications in reporting and documentation including use of alternate forms, etc. The Contractor will discuss its procedures for immediate notification requirements for fires, hazardous materials releases, and other emergencies. The Contractor will include appropriate details to address the following:

JSC Form 2341 (Rev February 26, 2002) (MS Word August 1995) (Previous editions are obsolete.)

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

Note: the NASA Form 1627 is not attached since it is a three part carbonless form not conducive to reproduction. This form is NOT available from JSC or NASA forms management; it can be obtained from the following link: <http://jschandbook.jsc.nasa.gov/>.

- a) The Contractor will include a mishap contingency plan as part of the Safety and Health Plan which meets the requirements of NPR 8621.1B, “NASA Procedural Requirement for Mishap and Close Call Reporting, Investigating, and Recordkeeping”, and JPR 1700.1, “\*\*JSC Safety and Health Handbook”. The plan will identify the method of immediately notifying NASA in the advent of a type A or B mishap or C property damage mishap and close call with equivalent potential so NASA may take custody of the mishap scene and initiate its investigation as soon as it is safe following the mishap. The Contractor will immediately contact the JSC Safety and Test Operations Division at 281-483-1935 for guidance when a Type A or B mishap or Type C property damage mishap occurs in the course of performing work on a NASA Contract in whole or in part. The contingency plan will clearly identify the Government investigation as taking precedence over any contractor investigation.
- b) For Type C injuries and all lower level mishaps, the Contractor will perform its own investigation and submit a report to NASA in accordance with the requirements of NPR 8621.1. The Contractor will ensure that NASA is promptly notified of any Type D mishap so that NASA provides a civil servant to oversee the investigation in an ex officio capacity prior to start of any formal investigation. All initial reports and selected follow up reporting will be accomplished using IRIS.
- c) When a NASA investigation is required, witnesses will be identified and their names and contact information provided to NASA investigator but witness statement must be requested and collected by NASA. Such statements will be retained by the Government as part of the mishap file in accordance with NPR 8621.1.
- d) The Contractor will deliver to NASA mishap reports which shall include the data specified in NPR 8621.1 for the level of mishap. NASA approval and endorsements will be required as specified in NPR 8621.1 and included in the approved Safety and Health Plan.

2.7.2 Trend Analysis – Describe approach to performing trend analysis of data (occupational injuries and illnesses; facilities, systems, and equipment performance; maintenance findings; etc.). Discuss methods to identify and abate common causes indicated by trend analysis. In support of site-wide trend analysis to be performed by the Government, the Contractor will discuss method of providing data as follows.

- a) Accident/Incident Summary Report - The Contractor shall prepare and deliver Accident/Incident Summary Reports as specified in DRD-SA04 , “Accident/Incident Statistics” as revised. All new and open mishaps, including vehicle accidents, incidents, injuries, fires, and close calls shall be described in summary form along with current status. Negative reports are also required monthly. Report frequency is monthly; date due is the 10th days of the month following each month reported. Report to be delivered to the JSC S & MA Directorate through the Safety and Test Operations Division, mail code NS2, by fax to 281-244-0426 or by attaching to an e-mail and transmitting to [JSC-Safety-Report-Submittals@mail.nasa.gov](mailto:JSC-Safety-Report-Submittals@mail.nasa.gov).
- b) Log of Occupational Injuries/Illnesses
  - i. For each establishment on and off NASA property that performs work on this Contract, the Contractor shall deliver, to the Government, a copy of its annual summary of occupational injuries and illnesses (OSHA 300 and OSHA 300A or equivalent) as described in Title 29, Code of Federal Regulations, Subpart 1904.5 If the Contractor is exempt by regulation from maintaining and publishing such logs, equivalent data in Contractor’s format is acceptable (such as loss runs from insurance carrier) which contains the data required by JSC Form 288.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- ii. Data shall be compiled and reported by calendar year and provided to the Government within 45 days after the end of the year to be reported (e.g. not later than February 15 of the year following).

## 3. HAZARD PREVENTION AND CONTROL

- 3.1 Identified hazards must be eliminated or controlled. In the multiple employer environment of the Center, it is required that hazards including discrepancies and corrective actions be collected in a Center wide information system Hazard Abatement Tracking System (HATS) for risk management purposes. Describe your approach to implementing this requirement.
- 3.2 Appropriate Controls. Discuss approach to consideration and selection of controls. Discuss use of hazard reduction precedence sequence (see JPR 1700.1). Discuss approach to identifying and accepting any residual risk. Discuss implementation of controls including verifying effectiveness. Discuss scope of coverage (hazardous chemicals, equipment, energies, etc.). Discuss need for coordination with safety, health, and emergency authorities at NASA.
- 3.3 Hazardous Operations and Processes. Establish methods for notification of personnel when hazardous operations and processes are to be performed in their facilities or when hazardous conditions are found to exist during the course of this Contract. JPR 1700.1 will serve as a guide for defining, classifying, and prioritizing hazardous operations; 29 CFR 1910.119 will be the guide for hazardous processes when the material or process meets the requirements therein. Develop and maintain a list of hazardous operations and processes to be performed during the life of this Contract. The list of hazardous operations and processes will be provided to JSC as part of the plan for review and approval. JSC and the Contractor will decide jointly which operations and processes are to be considered hazardous, with JSC as the final authority. Before hazardous operations or processes commence, the Contractor will develop a schedule to develop written procedures with particular emphasis on identifying the job safety steps required. NASA will have access on request to any Contractor data necessary to verify implementation. For all identified operations or processes that may have safety or health implications outside Contract operations, the Contractor shall identify such circumstances to the JSC Safety and Test Operations Division and Occupational Health Officer who will provide additional instructions for further NASA management review and approval.
- 3.4 Written Procedures. Identification of methods to assure that the relevant hazardous situations and proper controls are identified in documentation such as inspection procedures, test procedures, etc., and other related information. Describe methods to assure that written procedures are developed for all hazardous operations, including testing, maintenance, repairs, and handling of hazardous materials and hazardous waste. Procedures will be developed in a format suitable for use as safety documentation (such as a safety manual) and be readily available to personnel as required to correctly perform their duties.
- 3.5 Hazardous Operations Permits. Identify facilities, operations and/or tasks where hazardous operations permits will be required as specified in JPR 1700.1 such as confined space entry, hot work, etc. Set forth guidance to adhere to established NASA JSC procedures. Clearly state the role of the safety group or function to control such permits.
- 3.6 Operations Involving Potential Asbestos Exposures. Set forth method by which compliance is assured with JSC Asbestos Control Program as established in JPR 1700.1, as revised.
- 3.7 Operations Involving Exposures to Toxic or Unhealthful Materials. Such operations must be evaluated by the JSC Occupational Health Office and must be properly controlled as advised by same. JSC Occupational Medicine must be notified prior to initiation of any new or modified operation potentially hazardous to health.
- 3.8 [RESERVED.]
- 3.9 Baseline Documentation. Discuss the Contractor's responsibilities for maintaining facilities baseline documentation in accordance with JSC requirements. The Contractor will implement any facilities baseline documentation tasks (including safety engineering) as provided in the Contractor's plan approved by NASA or as

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

required by Government direction.

- 3.10 Preventive Maintenance. Discuss approach to preventive maintenance. Describe scope, frequency, and supporting rationale for your preventive maintenance program including facilities and/or equipment to be emphasized or de-emphasized. Discuss methods to promote awareness in the NASA community (such as alerts, safety flashes, etc.) when preventive maintenance reveals design or operational concerns in facilities and equipment (and related processes where applicable).
- 3.11 Medical (Occupational Healthcare) Program. Discuss the Contractor's medical surveillance program and injury/illness case management to evaluate personnel and workplace conditions to identify specific health issues and prevent degradation of personnel health as a result of occupational exposures. Discuss approach to Cardiopulmonary Resuscitation (CPR), first aid, and, return to work policies and the use of Government provided medical and emergency facilities for the initial treatment of occupational injuries/illnesses.
- 3.12. Hazard Correction and Tracking. Discuss your system for correcting and tracking safety, health, and environmental hazards with particular emphasis on integration with JSC's Hazard Abatement Process (found on line @ <http://www.srqa.jsc.nasa.gov/HATS/>). (The scope is restricted to establishments at JSC, Sonny Carter Training Facility, and Ellington Field.) This includes the following:
  - 3.12.1 Personnel Awareness of Hazards. Discuss your approach to communicate unsafe conditions and approved countermeasures to your employees. Discuss your approach to communicating such conditions to the Government and other Contractors whose personnel may be exposed to such unsafe conditions. Discuss communications with Facility Managers. Discuss use of the NASA Lessons Learned Information System for both obtaining lessons from other sources and as a repository for lessons learned during performance of the Contract.
  - 3.12.2. Interim and Final Abatement Plans - Describe how you will approach interim and final abatement of hazards. Describe how you will provide data to the JSC HATS for all hazards within Contractor-occupied facilities that are not finally abated (all interim and final abatement actions completed) within 30 days of discovery. Discuss your approach to posting such plans using JSC Form 1240, "JSC Notice of Safety or Health and Action Plan", or equivalent. Discuss compatibility of your system with JSC's role of facility managers in abatement planning, implementation, and verification.
- 3.13 Disciplinary System. Describe your system for ensuring safety and health discipline in your personnel (including subcontractors). Describe your approach to modifying personnel behaviors when personnel are exhibiting discrepant safety and health performance.
- 3.14 Emergency Preparedness. Discuss approach to emergency preparedness and contingency planning which addresses fire, explosion, inclement weather, etc. Discuss compliance with 29 CFR 1910.120 (HAZWOPER) and role in JSC Incident Command System (see JPR 1700.1 for details). Discuss methods to be used for notification of JSC emergency forces including emergency dispatcher, safety hotline, director's safety hotline, etc. Discuss establishment of pre-planning strategies through procedures, training, drills, etc. Discuss methods to verify emergency readiness.

## 4. SAFETY AND HEALTH TRAINING

4. Discuss the following:
  - 4.1 Describe the Contractor's training program including identification of responsibility for training employees to assure understanding of safe work practices, hazard recognition, and appropriate responses for protective and/or emergency countermeasures, including training to meet Federal, State, and Local regulatory requirements.
  - 4.2 Describe approach to identifying training needs including traceability to exercises such as job safety analyses, performance evaluation profiles, hazard analyses, mishap investigations, trend analyses, etc.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

- 4.3 Describe approach to training personnel in the proper use and care of personal protective equipment (PPE).
- 4.4 Discuss tailoring of training towards specific audiences (management, supervisors, and employees) and topics (safety orientation for new hires, specific training for certain tasks or operations).
- 4.5 Discuss approach to ensure that training is retained and practiced. Discuss personnel certification programs. Certifications should include documentation that training requirements and physical conditions have been satisfied (examples include physical examination, testing, and on-the-job performance).
- 4.6 Address utilization of JSC safety and health training resources (such as asbestos worker training/certification, hazard communication, confined space entry, lockout/tag-out, etc.) as appropriate with particular emphasis on programs designed for the multiple employer work environment on NASA property. If the Contractor wishes to train their personnel in any regulatory mandated training, an agreement will be secured with JSC Occupational Safety Branch and Occupational Health and Test Operations Division and the JSC Occupational Health Officer Support office prior to beginning training. The agreement will ensure that safety and health training resources available from NASA are utilized where appropriate.
- 4.7 Discuss approach to making all training materials and training records available to NASA, and other Federal, state, and local agencies for their review upon request.

d. Format:

1. Cover page - to include as a minimum, blocks for the signatures of Contractor's project manager and designated safety official; NASA COTR; JSC Safety and Test Operations Division: JSC Occupational Health Officer; and the NASA Contracting Officer. Other signatures may be required at the discretion of the Government. Once approved by NASA, signatures will be collected and the plan placed on the contract.
2. Table of Contents. See content above.
3. Body of plan - as required. Contractor's format is acceptable but should be aligned with the elements of the content above.
4. When preparing its plan, the Offeror/Contractor is expected to review all the items above and tailor its plan accordingly. Tailoring is the process of identifying those items that must be performed to assure the safety of the contractor's employees while performing work on the contract. The contractor is part of a larger program – the NASA safety program – which has other contracted employees, civil servants, and other third parties that must be protected from any hazard in the workplace wherever they arise. This includes the following:
  - a. Hazards associated with work done on contractual tasks.
  - b. Hazards that arise from non-contractual operations in the vicinity of contractor's workers.
  - c. Hazards that arise from contractual operations which may affect the safety and health of individuals and assets outside this contract.
5. The plan will clearly identify those resources to be provided by the Contractor and proposed resources to be provided by the Government. This review and supporting rationale is to be made available to the Government as part of this plan. It can be documented as a checklist or outline, inserted directly in the body of the plan, or in any format developed by the Contractor that clearly conveys the results of this review including the basis for any underlying assumptions. For further information, see the LIST OF INSTALLATION PROVIDED FACILITIES AND SERVICES provided in this RFP.

e. Distribution:

After the plan is approved by NASA, the CO will incorporate the plan into the Contract (See Attachment J-14). The Contractor will send additional copies to each of the following:

1. Contracting Officer (1 hard copy, 1 electronic copy)
2. NS/Safety and Test Operations Division (2 hard copies, 1 electronic copy)
3. JSC Occupational Health Officer (1 hard copy)

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

4. JSC Emergency Preparedness Office (1 hard copy)

f. Submission:

Initial submission with the proposal. Upon NASA approval, the Contractor's Safety and Health Compliance Plan become a Contractual Requirement.

g. Maintenance:

**Subsequent Revisions to the Plan:** Review the plan annually or as directed by the CO. The plan shall be updated to meet the latest OSHA, JSC, and VPP requirements. Provide a copy of the updated plan with the changes highlighted to the distribution list above at the start of each Contract year. If no changes are required after the annual review, notify the individuals in the distribution list in writing to that affect.

# JSC DATA REQUIREMENTS DESCRIPTION (DRD)

(Based on JSC –STD-123. See work page for instructions.)

1. DRD Title	2. Date of current version	3. DRL Line Item No.	RFP/Contract No. (Procurement completes)
Safety and Health Program Self Evaluation	10/03 (replaces 04/03 version)	DRD-S03	NNJ11061911R
4. Use ( <i>Define need for, intended use of, and/or anticipated results of data</i> )		5. DRD Category: ( <i>check one</i> )	
Self evaluation of Contractor's safety and health program performance.		<input type="checkbox"/>	Technical
		<input type="checkbox"/>	Administrative
		<input checked="" type="checkbox"/>	SR&QA
6. References ( <i>Optional</i> )		7. Interrelationships ( <i>e.g., with other DRDs</i> ) ( <i>Optional</i> )	
		DRD-S02 Safety and Health Plan, JSC & LaRC	
8. Preparation Information ( <i>Include complete instructions for document preparation</i> )			
<p>a. Data Type: 2</p> <p>b. Scope: The Contractor shall conduct an annual self-evaluation of its safety and health program as required by its safety and health plan.</p> <p>c. Content: Information required:</p> <ol style="list-style-type: none"> <li>1. The internal assessment of safety and health program effectiveness during the report period (i.e., the previous year) indicating the status of goals or objectives previously established and areas of strength and weakness in Contractor safety program performance.</li> <li>2. Safety and health concerns and resolutions relating to JSC operations which may have been identified during the report period.</li> <li>3. Unresolved safety and health concerns relating to JSC operations which the Contractor feels merit attention of JSC safety and health management.</li> <li>4. The goals and objectives of the Contractor safety and health program for the next report period.</li> <li>5. An analysis of the Contractor's performance at JSC-administered establishments in each of the 32 Voluntary Protection Program sub-elements found in the Federal Register Notice 65:45649-45663, July 24, 2000.</li> <li>6. Attach action plans for identified problem areas. Action plans must include schedule for periodic progress reports to the Government on a frequency agreed to by the Government and the Contractor for each problem area.</li> </ol> <p>d. Format: Format to be as required by the cognizant OSHA regional office. Contractors who have submitted a written self-evaluation as a VPP site may submit their original report to JSC in lieu of writing a new self-evaluation provided that all action plans and status are updated.</p> <p>e. Distribution: See Item D. Format (shown above)</p> <p>f. Submission: Report due September 30<sup>th</sup> of each year.</p> <p>g. Maintenance: Revisions: Revisions to this DRD shall be incorporated by change page or complete reissue.</p>

Natural Phenomena - Cost												

OTHER:	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Close Calls Reported (Count)												
OSHA Inspections (Count)												
EPA Inspections (Count)												

### Section IV. Mishap Case Updates.

File Number NASA USE ONLY	Date Of Event	First & Last Name of Injured Employee (If applicable)	Brief Description of event	CHECK (X) CASE STATUS New = N Continuing = CO Change = CH			CHECK (X) ONLY ONE PER LINE FA = first aid; ILL = Illness; MT = medical treatment; RWD = Restricted; DA = Days Away; DAM = Damage						Number of RESTRICTED WORK DAYS		Number of DAYS AWAY		COST OF DAMAGE Enter single \$ amount for all items		
				N	CO	CH	FA	ILL	MT	RWD	DA	DAM	Previous (to date)	NEW (this month)	Previous (to date)	NEW (this month)	Estimate \$	Final \$	

**Section V. Management Commitment and Employee Involvement.** Identify the month's events that supported Safety and Health Program Implementation. Such events typically have both management and employee involvement. Examples include safety and health meetings, safety and health days, special committees or working groups.

Event or Activity	Purpose and Benefit	# Managers participating	# Employees participating

## Statistical Information - Contractor Safety and Health Program

This form is due in the Mishaps Safety Office before the Close of Business on the 10th of each calendar month. Submittal must be made to JSC-Safety-Report-Submittals (Global List) or [JSC-Safety-Submittals@mail.nasa.gov](mailto:JSC-Safety-Submittals@mail.nasa.gov)

Information and instructions are provided via mouse over of text or on pages 4 & 5

**Section VI. Worksite Analysis.** Identify the percentage of worksite analyses (audits/inspections) completed for the current month and quarter. Refer to JPR 1700.1 for definitions of terms.

% Worksites Inspected this Month:	% Worksites Inspected this Quarter <sup>1</sup> :	Inspections entered into JSC BITS? (Y/N)

Worksite Analysis Notes<sup>2</sup>:

<sup>1</sup>Worksite Analysis (Audits/Inspections) shall be conducted monthly with 100% of the worksites inspected by the end of each quarter.

<sup>2</sup>Provide explanation in the notes if inspection coverage is less than 100% for the quarter. Provide comments in the notes as needed to highlight or clarify items such as: additional or focused inspections; industrial hygiene sampling; annual program audits (such as lockout/tagout, PPE, etc.) completed.

**Section VII. Hazard Prevention and Control.** List below any hazards that were discovered or found to be inadequately controlled during routine and special inspections, close calls, mishap investigations, etc., and require correction. Include interim abatement if final abatement cannot be readily accomplished to protect employees and assets. Complex corrective action (abatement) plans may be attached. Hazards not finally abated within 30 days must be reported to JSC Safety for inclusion in HATS/SRTS.

Identify/describe new hazards found this month and ongoing hazards carried over from previous months	Open/Closed	JSC HATS/SRTS # if open > 30 days

Hazard Abatement Notes<sup>3</sup>:

<sup>3</sup>Include discussion of any issues associated with correcting hazards in a timely manner.

**Section VIII. Safety and Health Training.** List training opportunities. List expected size of target training population and percent trained at end of month. The core training opportunities should be found in the contract safety and health plan.

Training Opportunity	% of Employees trained
Core Safety and Health Training	
Other Significant Training (Specify in notes)	

Safety and Health Training Notes<sup>4</sup>:

<sup>4</sup>Include any new or modified training requirements and accompanying rationale (new requirements, etc.) arising from new requirements or mandated by investigations or audits. Indicate if new requirements have been included in contractual safety and health plan.

**Section IX. Significant Safety Activities and Accomplishments this past month.** List any significant safety activities and accomplishments noted this past month. Examples include safety and health program milestones such as VPP certification/recertification, trend analyses with accompanying recommendations, lessons learned used from other corporate resources, etc.

Date	Activity / Accomplishment

## Statistical Information - Contractor Safety and Health Program

This form is due in the Mishaps Safety Office before the Close of Business on the 10th of each calendar month.  
Submittal must be made to JSC-Safety-Report-Submittals (Global List) or [JSC-Safety-Submittals@mail.nasa.gov](mailto:JSC-Safety-Submittals@mail.nasa.gov)

Information and instructions are provided  
via mouse over of text or on pages 4 & 5

### Instructions for Completing JSC Form 288

NASA follows OSHA record keeping guidelines:

"1904 - Recording and Reporting Occupational Injuries and Illness" - on-line link:  
[http://www.osha.gov/pls/oshaweb/owastand.display\\_standard\\_group?p\\_toc\\_level=1&p\\_part\\_number=1904](http://www.osha.gov/pls/oshaweb/owastand.display_standard_group?p_toc_level=1&p_part_number=1904)  
NAICS Codes – on line link: <http://www.census.gov/eos/www/naics/>

**Other Resources:**

NPR 8715.3, NASA General Safety Program Requirements – on line link: <http://www.hq.nasa.gov/office/codeq/doctree/87153.htm>  
JPR 1700.1, "JSC Safety And Total Health Handbook" - on-line link: <http://jschandbook.jsc.nasa.gov/>

#### PAGE 1:

#### SECTION I. BASIC INFORMATION.

**Month / Year being Reported** – the calendar month and year being reported.

**Contract Reporting Period (Month / Year - to - Month / Year)** – the first and last calendar month and year of the contractual reporting period in which this monthly report falls. Initially, this is the same as the first year of your contract.

**Prime Contractor Name** – the official full name of the prime contractor for the contract being reported.

**Date Report was Prepared** – self explanatory. May be different from date report was due to the Government.

**Supported Directorate** – the JSC directorate that is the primary customer for the work done on this contract.

**Prime Contractor Phone** – the phone number of the person who prepared this report.

**Prime Contract Number** – the official NASA contract number assigned to the contract.

**Prepared By** – the name and email address of the person who prepared the report.

#### PAGE 1:

#### SECTION II. CONTRACT TEAM INFORMATION.

**General Information** (Name of Prime and Sub-Contractor (1, 2, etc.) – The name of the prime contractor was already entered in Section 1 and is blacked out in this section as unneeded. Each subcontractor shall be listed. List all subcontractors with annual subcontract value of \$1,000,000 or more for contract year or contribute 20% or more of the direct labor hours on the contract. For subcontracts with annual value less than \$1M and which contribute less than 20% of the direct labor hours of this contract need not be listed.

**NAICS Code** - The Industry Group number (according to the North American Industrial Classification System which best describes the work done by the listed prime and subcontractor. This may vary between the prime and subcontractors. Further information can be found at: <http://www.census.gov/eos/www/naics/>

**Direct Labor Hours Worked This Month** – for the prime and each sub contractor. Enter hours worked by all unlisted contractors in next to last line and include in total.

#### PAGES 1 AND 2:

#### SECTION III. LOSS DATA.

NOTE ON LAYOUT AND FORMAT: Each required data point is recorded under each month and retained on the form each month to the end of the calendar year. Each item is recorded on separate rows for onsite and offsite. Format for colunts will be in units. Format for cost will be in dollars (no decimals).

**Occupational Injuries/Illnesses** - To include data from all team members when incurred while doing contract work (not just that from the contractors listed in Section II, Contract Team Information.)

**Basic requirement** - Excerpt taken from § 1904.7(a)

You must consider an injury or illness to meet the general recording criteria, and therefore to be Recordable, if it results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid, or loss of consciousness. You must also consider a case to meet the general recording criteria if it involves a significant injury or illness diagnosed by a

physician or other licensed health care professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid, or loss of consciousness.

(NOTE: NASA requires reports of first aid injuries that occur on NASA property.)

**Number Of Employees** - Record the number of different employees on payroll who are doing work on this contract. The Government may have required the contract to submit each month a personnel strength report; the contractor may attach a copy of its personnel strength report instead of completing this line.

**Man-hours Worked** - Record the total direct labor hours worked on NASA property (e.g., onsite) and non-NASA property (e.g., offsite). The contractor may NOT attach a copy of its JSC Form 533 instead of completing this line ; this information is used by NASA to calculate INCIDENCE RATES.

**Days Away, Restriction, Medical Treatment, and First Aid Cases; Injury versus Illness** – NASA uses the OSHA definitions defined in 29 CFR 1904.7 and 29 CFR 1960.2. Mouse over each line for a definition of the term.

## Statistical Information - Contractor Safety and Health Program

This form is due in the Mishaps Safety Office before the Close of Business on the 10th of each calendar month.  
Submittal must be made to JSC-Safety-Report-Submittals (Global List) or [JSC-Safety-Submittals@mail.nasa.gov](mailto:JSC-Safety-Submittals@mail.nasa.gov)

Information and instructions are provided  
via mouse over of text or on pages 4 & 5

### PAGE 2: SECTION III. (continued)

**Damage Data. (Damage Incurred by)** - Will include count and cost of losses (including repair) for each month while doing contract work. They may or may not have been charged off as contract cost. Each damage event will be counted regardless of the number of items damaged.

**VEHICLE MISHAP** - using any vehicle on business and intended for routine transportation

**FIRE MISHAP** - self-explanatory. Does not include explosions except as the direct result of a fire.

**PROPERTY** (other than vehicle or fire) – includes facilities and equipment.

Does not include personal equipment or property unless loss is covered by contractor through reimbursement or insurance

**NATURAL PHENOMENON** ("Acts of God") - self-explanatory

### Other Data

**Close Calls Reported** – Close calls as defined by JPR 1700.1 chapter 2.7, "Employee Reports of Hazards" and which were NOT submitted to NASA. This includes all such reports while doing contract work and handled internally by the contractor as specified in the contractual safety and health plan.

**No. OSHA Inspections (by OSHA)** - These may be focused inspections, compliance inspections, visits in response to an injury or complaint, etc. Indicate date and purpose of inspection in status block at bottom of form 288 and forward a copy of OSHA findings to the Safety and Test Operations Division / NS2 - Occupational Safety Team Office, by attachment to this report, or a future issue of this report, or by separate letter.

**No. EPA Inspections (by the U.S. EPA or its agents including regional or state agencies)** - Indicate date and purpose of inspection in status block at bottom of form 288 and forward a copy of EPA findings to the Safety and Test Operations Division / NS2 - Occupational Safety Team Office, by attachment to this report, or a future issue of this report, or by separate letter.

### PAGE 2: SECTION IV. MISHAP CASE UPDATES

This section allows contractors to provide the status of new and ongoing mishaps. The data required is self explanatory.

### PAGE 2: SECTION V. MANAGEMENT COMMITMENT AND EMPLOYEE INVOLVEMENT.

**Event or Activity** – Identify the event or activity by title.

**Purpose or Benefit** – What was the reason for the event and what benefit can be derived from participating.

**Number of managers participating** – includes first-line supervisors but not group leads or staff.

**Number of employees participating** – includes all employees other than managers or supervisors.

### PAGE 3: SECTION VI. WORKSITE ANALYSIS

Instructions provided with block on form.

## Award Fee Evaluation Plans

The AMOS contract is a hybrid contract comprised of two contract types, a fixed-price (FP) award fee portion and a cost-reimbursable (Cost) award fee portion. There are individual performance evaluation plans for each contract type. The evaluation to be performed by the Government will be based on the Government's assessment of the Contractor's accomplishment of the various areas of work covered by the Statement of Work, in accordance with the criteria, weightings, procedures set forth in the performance plans listed below.

The payment of any FPAF is contingent upon the contractor improving their performance over and above the performance standards listed in Section C, Statement of Work, Appendix E-1, *Fixed Price Performance Standards*; but not at the expense of the contractor providing only minimally acceptable performance in all areas.

Safety and quality metrics appear as elements in both performance plans due to their importance in the effective execution of this contract even though these appear primarily as fixed priced elements in the statement of work.

## **1.0 INTRODUCTION**

In accordance with the provisions of NASA Award Fee Contracting Guide, FAR 16.405-2, and NFS 1816.405-270, an award fee evaluation procedure is hereby established for determination of award fee(s) payable under this contract. The payment of any award fee is contingent upon compliance with contractual requirements and performance to the degree specified in Appendix 1.

The Contractor's performance will be evaluated by the Government, in accordance with the procedures set forth below, at the expiration of each period specified in Appendix 2. The evaluation to be performed by the Government will be based on the Government's assessment of the Contractor's accomplishment of the various areas of work covered by the Statement of Work, in accordance with the criteria, weightings, procedures set forth below.

Performance determinations will be made at the end of each evaluation period as shown in Appendix 2.

## **2.0 ORGANIZATIONAL STRUCTURE**

The following organizational structure is established for administering the award fee provisions of the contract.

- a. Fee Determination Official (FDO) - The FDO, a senior NASA official, will determine the award fee earned and payable for each evaluation period.
- b. Performance Evaluation Board (PEB) - A PEB, including a Chairman, will be appointed by the FDO. The Board will conduct an evaluation of the contractor's performance and submit a Performance Evaluation Report to the FDO covering the Board's findings and recommendations for each evaluation period.
- c. Performance Monitors - One or more monitors will be assigned to each performance area to be evaluated. The assignment will be made by the PEB Chairman. The performance monitors will monitor, evaluate, and assess contractor performance in assigned areas. The performance monitors will prepare a Performance Monitor Report for the PEB.

## **3.0 EVALUATION PROCEDURES**

- a. A determination of the award fee earned for each evaluation period will be made by the FDO within 45 days after the end of the period. The method to be followed in monitoring, evaluation, and assessing contractor performance during the period, as well as for determining the award fee earned or paid, is described below.
- b. On a monthly basis, monitors will evaluate and assess contractor performance, for the preceding month, and discuss the results, both orally and in writing, with contractor personnel. This performance assessment will discuss specific areas, if any, where contractor performance has excelled and where future Contractor emphasis is necessary. The performance monitors will submit a monitor report and make an oral presentation to the PEB at the end of each evaluation period.
- c. The PEB will consider the performance monitor report and other performance information it obtains. The PEB will summarize its findings and recommendations in the Performance Evaluation Board Report. The report will include an adjective rating and recommended overall performance score with supporting documentation.

- d. The contractor may furnish a self-evaluation report within 10 calendar days after the expiration of each evaluation period to the Contracting Officer. The PEB will not submit its recommendation to the FDO until (1) the contractor's self-evaluation report has been received and considered, or (2) the contractor has provided written notification that a self-evaluation report will not be submitted, or (3) the 10-day period provided for submission of the report has expired.
- e. The contractor will be notified by the Contracting Officer of the PEB evaluation and recommended rating and score and will be provided a summary of the Performance Evaluation Board Report. The contractor may be required to submit a corrective action plan by the PEB. The contractor may provide additional information for consideration by the FDO by notifying the Contracting Officer. Any additional information must be provided to the Contracting Officer within 7 calendar days of contractor receipt of the PEB recommended rating and score. This additional contractor information will be provided to the FDO by the Contracting Officer through the PEB Chairman.
- f. The FDO will consider the recommendation of the PEB, information provided by the contractor, if any, and any other pertinent information in determining the amount of award fee for the period. The FDO's determination of the amount of award fee and the basis for this determination will be stated in a written Award Fee Determination.
- g. The Contracting Officer will issue a unilateral modification to recognize the award fee earned by the contractor in accordance with Appendix 1 which includes adjective ratings, as well as, a numerical scoring system from 0 - 100. Earned award fee dollars are calculated by applying the total numerical score to available dollars. Notwithstanding the preceding, the contractor will not earn award fee for any evaluation period when the performance score is "unsatisfactory" (less than 50).

#### **4.0 AWARD FEE EVALUATION CRITERIA AND WEIGHTING**

- a. In evaluating the performance of the Contractor, the Government will evaluate major elements of Contractor performance including *Technical Performance*, *Small Business Performance*, and *Cost Performance*.
  - b. The criteria for evaluation of Contractor performance for determination of award fee are defined below. The technical, small business performance, and cost evaluation criteria will be considered independently to determine the degree of success the Contractor has demonstrated in arriving at well-balanced contract performance. The specific weightings may be changed unilaterally by the Government, who will give the Contractor written notice prior to the beginning of the applicable evaluation period.
-

<u>Evaluation Criteria</u>	<u>Weight</u>
1. Technical Performance	65%
a. Quality and Quantity of Work	
b. Response and Schedules	
c. Safety and Health Requirements	
2. Small Business Subcontracting Goals	10%
3. Cost Performance	25%

Cost performance evaluation shall be based on the following criteria:

- a. The basis of the actual wrap rate compared to the contract baseline wrap rate. Wrap Rate is defined as follows. Total cost through G&A, and “Cost of Money”, if applicable, less material, travel and their associated G&A, divided by total number of LOE hours expended during that evaluation period.
- b. Cost performance measured against Government approved Contractor provided baseline estimates for projects and activities.

Cost will never be below 25%.

The Contractor will be evaluated in the Award fee periods 1 and 10 for Phase-In/Phase-Out services, if appropriate.

A zero award fee may be given to a major safety violation or for a major breach of security during the performance period (See Section H, Clause H.2).

In order to earn any award fee, the Contractor must receive a numerical rating higher than 50. Appendix 1 hereto provides the performance level definition adjective ratings and corresponding numerical scores that will be used in evaluating performance. The numerical grade ranges corresponding to these adjective ratings, and their conversion to total percent of award fee earned are set forth in Appendix 3. Appendix 2 provides the distribution of the available maximum award fee for each evaluation period. Achievement of the performance goals set forth in Appendix E to the Statement of Work equates to an adjective rating of Satisfactory and a corresponding numerical score of 50.

## **5.0 SEPARATE AWARD FEE EVALUATIONS**

No FPAF evaluations will be made for LaRC.

## Appendix 1: CPAF Evaluation Scale

ADJECTIVE RATING	RANGE OF POINTS	DESCRIPTION
Excellent	100 - 91	Contractor has exceeded almost all of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.
Very Good	90 - 76	Contractor has exceeded many of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.
Good	75 - 51	Contractor has exceeded some of the significant award-fee criteria and has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.
Satisfactory	50	Contractor has met overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee for the award-fee evaluation period.
Unsatisfactory	Below 50	Contractor has failed to meet overall cost, schedule, and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.

## 1.0 INTRODUCTION

In accordance with the provisions of NASA Award Fee Contracting Guide, FAR 16.404 “*Fixed-Price Contracts with Award Fees*,” and NFS 1816.405-270, an award fee evaluation procedure is hereby established for determination of the FPAF (FPAF) payable under this contract. The payment of any significant FPAF is contingent upon the contractor improving their performance over and above the performance standards listed in Section C, Statement of Work, Appendix F, *Fixed Price Performance Standards*; but not at the expense of the contractor providing only minimally acceptable performance in all areas.

The Contractor’s performance will be evaluated by the Government, in accordance with the procedures set forth below, at the expiration of each period specified in Appendix 3. To the maximum extent possible, the final subjective assessment will be additionally supported by objective data assessments. The evaluation to be performed by the Government will be based on the Government’s assessment of the Contractor’s accomplishment in the areas as defined in Appendix 2 – *Evaluation Criteria, Definitions, and Weights*. Performance determinations will be made at the end of each evaluation period as shown in Appendix 3.

## 2.0 ORGANIZATIONAL STRUCTURE

The following organizational structure is established for administering the award fee provisions of the contract.

- a. Fee Determination Official (FDO) - The FDO, a senior NASA official, will determine the award fee earned and payable for each evaluation period.
- b. Performance Evaluation Board (PEB) - A PEB, including a Chairman, will be appointed by the FDO. The Board will conduct an evaluation of the contractor’s performance and submit a Performance Evaluation Report to the FDO covering the Board’s findings and recommendations for each evaluation period.
- c. Performance Monitors - One or more monitors will be assigned to each performance area to be evaluated. The assignment will be made by the PEB Chairman. The performance monitors will monitor, evaluate, and assess contractor performance in assigned areas. The performance monitors will prepare a Performance Monitor Report for the PEB.

## 3.0 EVALUATION PROCEDURES

- a. A determination of the award fee earned for each evaluation period will be made by the FDO within 45 days after the end of the period. The method to be followed in monitoring, evaluating, and assessing contractor performance during the period, as well as for determining the award fee earned or paid, is described below.
- b. On a monthly basis, performance monitors will evaluate and assess contractor performance, for the preceding month and discuss the results, both orally and in writing, with contractor personnel. See Appendix 5 entitled *Award Fee Inputs* for information on how the contractor’s performance will be monitored. These monthly evaluations and assessments will provide performance feedback to the contractor. Additional feedback maybe conducted at any time if the Government detects a positive or negative trend in performance, or if requested by the contractor. The contractor shall understand that any information provided during the monthly meetings is for feedback purposes only, and no award fee rating will be provided in connection with this effort. If performance problems are indicating the possibility of an award fee rating for the period less than ‘Good’, the contractor will

be notified in writing as part of the contract administration process prior to the Performance Evaluation Board Meeting. The performance monitors will submit a monitor report for the period and make an oral presentation to the PEB at the end of each evaluation period.

- c. The Government will utilize several forms of award fee input to evaluate and make an award fee recommendation. See Appendix 6 for examples of the input format.
- d. The PEB will consider the Performance Monitor Report and other performance information it obtains. The PEB will summarize its findings and recommendations in the Performance Evaluation Board Report. The report will include an adjective rating and recommended overall performance score with supporting documentation.
- e. The contractor may furnish a self-evaluation report within 10 calendar days after the expiration of each evaluation period to the Contracting Officer; and be provided the opportunity to brief. If the brief is given, it shall not exceed 30 minutes. The PEB will not submit its recommendation to the FDO until (1) the contractor's self-evaluation report has been received and considered, or (2) the contractor has provided written notification that a self-evaluation report will not be submitted, or (3) the 10-day period provided for submission of the report has expired.
- f. The contractor will be notified by the Contracting Officer of the PEB evaluation and recommended rating and score and will be provided a summary of the Performance Evaluation Board Report. The contractor may provide additional information for consideration by the FDO by notifying the Contracting Officer. Any additional information must be provided to the Contracting Officer within 7 calendar days of contractor receipt of the PEB recommended rating and score. This additional contractor information will be provided to the FDO by the Contracting Officer through the PEB Chairman.
- g. The FDO will consider the recommendation of the PEB, information provided by the contractor, if any, and any other pertinent information in determining the amount of award fee for the period. The FDO's determination of the amount of award fee and the basis for this determination will be stated in a written Award Fee Determination.
- h. The Contracting Officer will issue a unilateral modification to recognize the award fee earned by the contractor in accordance with Appendix 1, which includes adjective ratings, as well as, a numerical scoring system from 0 - 100. Earned award fee dollars are calculated by applying the total numerical score to available dollars. Notwithstanding the preceding, the contractor will not earn award fee for any evaluation period when the performance score is less than 'Satisfactory.'
- i. Assessing contractor performance and determining award fee eligibility under this plan is subjective. Actual award fee determinations and the methodology for determining award fee are unilateral decisions made solely at the discretion of the Government.
- j. The Government reserves the right to either consider or not consider award fee inputs for actions accomplished outside of the fixed price portion of the Aircraft Maintenance and Operational Support (AMOS) contract.
- k. **Special Interest Item (SII).** Up to 20 percent of the total award fee may be designated for SIIs. If there is not an SII for an award fee period, the remaining percentage will be redistributed to the other criteria in Appendix 2. When identified, a SII is an area of performance that the Government deems critical and/or requires special attention. Proposed SIIs will include recommended evaluation criteria, desired results, and proposed weight percentage. The SII will be furnished to the CO, who will notify the contractor 15 days prior to the start of the affected award fee period. *After* the start of an award fee period, a SII can only be implemented by a bilateral modification between the contractor and Government. Appendix 8 will be updated to include SIIs that apply to an Award Fee Period.

#### **4.0 AWARD FEE EVALUATION CRITERIA AND WEIGHTING**

- a. In evaluating the performance of the Contractor, the Government will evaluate major elements of Contractor performance including Technical Performance, Management Performance, and Special Interest Item, if used during an evaluation period.
- b. The criteria for evaluation of Contractor performance for determination of award fee are defined in Appendix 2. The Technical, Management, and Special Interest Item (if applicable) criteria will be considered independently to determine the degree of achieving both improved mission support and resource savings through the life of this contract. The specific weightings, as shown in Appendix 2 may be changed unilaterally by the Government, who will give the Contractor written notice prior to the beginning of the applicable evaluation period.

A zero award fee may be given to a major safety violation or for a major breach of security during the performance period (See Section H, Clause H.2).

In order to earn any FPAF, the Contractor must receive a numerical rating higher than 0. Appendix 1 hereto provides the performance level definition adjective ratings and corresponding numerical scores that will be used in evaluating performance. The numerical grade ranges corresponding to these adjective ratings, and their conversion to total percent of award fee earned are set forth in Appendix 4. Appendix 3 provides the distribution of the available maximum award fee for each evaluation period. Achievement of the performance goals set forth in Appendix C to the Statement of Work equates to an adjective rating of Satisfactory and a corresponding numerical score of 1.

#### **5.0 SEPARATE AWARD FEE EVALUATIONS**

No FPAF evaluations will be made for LaRC.

## Appendix 1: FPAF Overall Evaluation Scale

ADJECTIVE RATING	RANGE OF POINTS	DESCRIPTION
Excellent	91 - 100	Contractor has exceeded almost all of the significant award-fee criteria and has met overall schedule and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the aware-fee plan for the award-fee evaluation period.
Very Good	76 - 90	Contractor has exceeded many of the significant award-fee criteria and has met overall schedule and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.
Good	51 - 75	Contractor has exceeded some of the significant award-fee criteria and has met overall schedule and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.
Satisfactory	1 - 50	Contractor has met overall schedule and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee for the award-fee evaluation period.
Unsatisfactory	0	Contractor has failed to meet overall schedule and technical performance requirements of the contract in the aggregate as defined and measured against the criteria in the award-fee plan for the award-fee evaluation period.

## Appendix 2 – Evaluation Criteria, Definitions, and Weights

EVALUATION CRITERIA	UNSATISFACTORY ( 0 )	SATISFACTORY ( 1 - 50 )	GOOD ( 51 - 75 )	VERY GOOD ( 76 - 90 )	EXCELLENT ( 91 - 100 )
<b>1. Technical Performance (40%)</b>					
<b>1a. Responsiveness to Contract Requirements (50%)</b>					
<i>Mission Effectiveness/Risk Management</i>	<i>Failed to meet contract requirements.</i>	<i>Meets basic contract requirements.</i>	<i>Meets all contract requirements; exceeds some.</i>	<i>Meets all contract requirements; exceeds many.</i>	<i>Meets all contract requirements with substantial benefits to the Government.</i>
<b>1b. Innovation/Improvement (50%)</b>					
<i>Benefit to the Government/Realizing Resource Savings</i>	<i>Failed to provide innovation/improvement.</i>	<i>Meets basic contract requirements.</i>	<i>Provided some innovation/improvement that benefited the Government.</i>	<i>Provided comprehensive innovation/improvement that benefited the Government.</i>	<i>Provided substantial and consistent innovation/improvement that benefited the Government.</i>
<b>2. Management Performance (40%)</b>					
<b>2a. Customer Relations (35%)</b>					
<i>Mission/Customer Support</i>	<i>Failure to maintain customer relations resulted in significant problems. Management style was sub-standard and the contractor frequently failed to follow normally acceptable management practices.</i>	<i>Customer relations resulted in some problems, none major. Management style was adequate and the contractor rarely deviated from normally acceptable management practices.</i>	<i>Customer relations resulted in no problems. Management style was suitable and the contractor always followed normally acceptable management practices.</i>	<i>Customer relations were positive &amp; helpful. Management style was superb and the contractor always followed normally acceptable management practices.</i>	<i>Customer relations were superior, timely, and effective. Management style was exceptional and greatly assisted the Government in making program decisions.</i>

<b>EVALUATION CRITERIA</b>	<b>UNSATISFACTORY ( 0 )</b>	<b>SATISFACTORY (1 - 50)</b>	<b>GOOD (51 - 75)</b>	<b>VERY GOOD (76- 90)</b>	<b>EXCELLENT (91 - 100)</b>
<b>2b. Responsiveness (35%)</b>					
<b><i>Mission/Customer Requirements</i></b>	<i>Failure to respond or inadequate responses to Contracting Officer or COTR on contractual issues resulted in significant problems.</i>	<i>Management style was adequate. Sufficient response to Contracting Officer or COTR due to contractual issues.</i>	<i>Management style was competent. Occasionally required Management response to Contracting Officer or COTR due to contractual issues. Response always positive and expeditious.</i>	<i>Management style was superb. Rarely required Management response to Contracting Officer or COTR due to contractual issues. Exceptional Contractor/Government relationship.</i>	<i>Management style was superior. Contractor/Government relationship was extremely noteworthy.</i>
<b>2c. Innovation/Improvement (30%)</b>					
<b><i>Benefit to the Government/Realizing Resource Savings</i></b>	<i>Failed to provide innovation/improvement</i>	<i>Meets basic contract requirements.</i>	<i>Provided some innovation/improvement that benefited the Government.</i>	<i>Provided comprehensive innovation/improvement that benefited the Government.</i>	<i>Provided substantial and consistent innovation/improvement that benefited the Government.</i>
<b>3. Special Interest Item. See Appendix 8 for criteria and weighting percentage if used during an evaluation period (20%).</b>

## Appendix 5: Award Fee Inputs

The Government will utilize several forms of award fee input to evaluate and make an award fee recommendation. Examples of award fee input are:

- (1) **Contract Performance Monitoring:** Contractor performance will be continually monitored utilizing the five methods described below:
  - (a) **Contract Surveillance:** PMs will perform contract surveillance, in accordance with the CO, approved AMOS Surveillance Plan.
  - (b) **Customer Feedback:** Customer feedback is a critical part of the award fee process and is highly encouraged. Customer surveys/feedback can be administered by government personnel or contractor personnel, to assess the quality of services provided by the contractor as it applies to the evaluation criteria. Any customer feedback/survey program administered by the contractor shall be reviewed, validated, and approved by the COTR before the results are submitted to the PEB for consideration.
  - (c) **Contractor Award Fee Inputs (CAFI):** The Government is interested in the quality of the submitted CAFI vs. quantity of submissions. CAFI submitted that do not provide innovation, increased mission effectiveness, risk mitigation, and/or benefit to the Government will be returned to the contractor and not given any consideration by the Government.
    - (i) The contractor shall:
      1. Submit CAFI to the COTR via email no later than 10 calendar days following the completion of the event/occurrence.
      2. Contact the COTR and obtain approval via email (no verbal approvals will be accepted) for a late submission if unusual circumstances prevent CAFI submission later than 10 calendar days from completion of the event/occurrence.
      3. Submit CAFI's receiving late submission approval from the COTR no later than 10 calendar days from date email approval or they will not be accepted for consideration by the Government.
      4. Ensure all CAFI are submitted and emailed to the COTR no later than the fifth (5<sup>th</sup>) calendar day following the end of an award fee period.
        - a. CAFIs submitted to the Government that do not contain sufficient documentation to substantiate/validate contractor claims will be returned to the contractor for correction and resubmission. The contractor shall resubmit these CAFI within 3 business days.
        - b. Incomplete resubmitted CAFIs will be returned to the contractor and cannot be resubmitted without approval of the COTR.
    - (ii) The Government will:
      1. Evaluate, verify and validate the CAFIs (e.g., monetary savings, man-hours avoided on other than the fixed price portion of the contract, etc.). The COTR is responsible for providing a coordinated evaluation and recommendation rating for each CAFI using the rating guidelines contained in Appendix 3.

2. Use the rating ranges identified in Appendix 1, of this award fee plan for rating CAFI. The COTR will consider all evaluations and recommended ratings and assign a single rating of record for each CAFI.

(d) **Government Award Fee Inputs (GAFI):** Government PMs will, in general, follow the process outlined below.

1. Submit GAFI (see Appendix 4 for format) to their respective Branch Chief for review and concurrence via e-mail no later than 10 calendar days following the completion of the event/occurrence.
2. Branch Chiefs will review the GAFI and subsequently route them to the COTR with comments and approval/disapproval recommendations within 3 business days.
3. Ensure all GAFI are submitted and emailed to the COTR no later than the fifth (5<sup>th</sup>) calendar day following the end of a 6-month award fee period.
4. The COTR will make final evaluation, verification, validation and recommendation rating on the GAFI to the PM for each GAFI using the rating guidelines contained in Appendix 3.
5. Use the rating ranges identified in Appendix 1 of this award fee plan for rating GAFI. The COTR will consider all evaluations and recommended ratings and assign a single rating of record for each GAFI.

(e) **Significant Events:** Significant events, positive or negative, are tied to the Statement of Work (SOW) requirements. They are assessed by the COTR during the award fee period separate from the evaluation criteria in Appendix 2.

(i) **Positive Significant Improvement (PSI)** may lead to increasing the overall PEB recommendation to the FDO. Examples of PSIs include:

- Improvements that directly result in efficiencies for the Government
- Improvements in processes that contribute to productivity and/or responsiveness.

(ii) **Negative Significant Incidents (NSI)** may lead to decreasing the overall PEB recommendation to the FDO. Significant NSI(s) may result in an “Unsatisfactory” rating. Examples of significant events may include, but are not limited to:

- Damage/destruction to Government property as a result of the contractor’s actions.
- Process failure(s) in following approved technical data
- Management problem(s) that can be reasonably attributed to a general lack of contractor management oversight

If the cause of a NSI (i.e., aircraft mishap) is determined a contractor responsibility after the award fee period in which the event occurred, then the government can consider the finding in the next award fee period. The PEB should consider if any

action was already taken in regard to the NSI. The Government will ensure the contractor is aware of any NSI that will be reviewed by the PEB.

## **Appendix 6: Government Award-Fee Input Format (Use Microsoft Word)**

**CRITERIA AND SUBCRITERIA HEADING:** *(e.g. Technical, Mission Effectiveness)*

**ACTION:** *(Specifically state what, where, how, and why – must be detailed)*

**DATE (S):** *(Self explanatory)*

**JUSTIFICATION:** *(Bullet format – state why the action was accomplished and how the action exceeded contract requirement; must be specific)*

**IMPACT:** *(Bullet format – state how this action will improve the program; at what level the action was incorporated, the resulting cost savings, increased availability hours, recurring gains, efficiencies, etc.; how did this action improve quality, safety, etc.)*

**WHO:** *(Name, Location, and Phone)*

## **Appendix 7: Contractor Award-Fee Input Format (Use Microsoft Word)**

**CRITERIA AND SUBCRITERIA HEADING:** *(e.g. Technical, Mission Effectiveness)*

**ACTION:** *(Specifically state what, where, how, and why – must be detailed)*

**DATE (S):** *(Self explanatory)*

**JUSTIFICATION:** *(Bullet format – state why the action was accomplished and how the action exceeded contract requirement; must be specific)*

**IMPACT:** *(Bullet format – state how this action will improve the program; at what level the action was incorporated, the resulting cost savings, increased availability hours, recurring gains, efficiencies, etc.; how did this action improve quality, safety, etc.)*

**WHO:** *(Name, Location, and Phone)*

## Appendix 8: Special Interest Items (SII)

**SII Criteria Title:** *[Phase-In Performance]*

**Relative Weight:** *[Specify percentage. Remember to adjust rating table as appropriate.]*

**Description:** *[Insert language. Example: This SII will evaluate the contractor’s efforts in transitioning from the current contract NNJ09JE44C while effectively supporting contract and mission requirements in accordance with the contractor’s approved Transition Plan.]*

**Method of Evaluation:** *The SII will be subject to contractor/Government award fee inputs and customer feedback just as the other evaluation criteria are. The government will rate the SIIs using the rating ranges defined below.*

*[Insert criteria language. Example is below.]*

<b>UNSATISFACTORY ( 0 )</b>	<b>SATISFACTORY (1 - 50)</b>	<b>GOOD (51 - 75)</b>	<b>VERY GOOD (76- 90)</b>	<b>EXCELLENT (91 - 100)</b>
<i>Failed to meet the objectives for transition plan to allow a smooth transition with the incumbent contractor, provide required staffing and an orderly assumption of contract</i>	<i>Met objectives of transition plan for a smooth transition. Provided most of required staffing and assumed most contract requirements in an acceptable manner</i>	<i>Fully met all objectives of transition plan. Fully met all staffing requirements and assumption of risks.</i>	<i>Fully met all objectives of transition plan and exceeded some. Fully met all staffing requirements in time required and maintained a stable workforce.</i>	<i>Exceeded most objectives of the transition plan in a beneficial manner to the customer. Exceeded all staffing requirements and correctly ensured Government needs were met. Maintained an extremely stable workforce.</i>

DDAA	M231136	M231136	GAGE PRESSURE OXYGEN		GP	0-100 PSI	N/L 31AUG07. Per J. Lankford, please remove gage M231136 from active status and file the below email in the records for that unit. GSE Shop internal records show that gage M231136 had been installed on LOX Cart #2818. In NAMIS history, W.O. #Z-0025987 documents this cart having a broken pressure gage. The repair was completed 10/31/2008.  Pressure gage M231136 was removed and should have been turned in to Mayra for disposition, but was inadvertently thrown in the trash.  GSE Shop personnel have been reminded that COM 2241 states that unserviceable calibrated items will be turned in, and removed from the calibration records.
