

**Welcome to the  
Johnson Space Center  
Multi-Purpose Crew Vehicle (MPCV)  
Program Integration Contract (MPIC)  
Virtual Industry Day**

**February 28, 2012  
9:00 am – 12:00 pm**

---

**Welcome to Multi-Purpose Crew Vehicle  
Program Integration Contract  
Virtual Industry Day**

**Geraldine B. Mason**  
**Contracting Officer**

# Agenda

Speaker	Subject
Geraldine Mason	Welcome to Virtual Industry Day
Jeffrey Cullen	Welcome
Lucy Kranz	Vision and Objectives Technical Overview
Sharyl Butler	Technical Overview
Charles Williams	Small Business Overview
Connie Pritchard	Safety Overview
Geraldine Mason	Current Contract Overview
Geraldine Mason	Procurement Schedule/Instructions for Submitting Input/Questions

# Disclaimer

---

- These slides are for information and planning purposes only. No solicitation exists at this time.
- This presentation shall not be construed as a commitment by the Government or as a comprehensive description of any future requirements.
- If a solicitation is released, it will be synopsised in the FedBizOpps website and on the NASA Acquisition Internet Service.

# Goals of Industry Day

---

- Promote competition on the proposed acquisition.
- Develop industry understanding of the Government's current vision and objectives.
- Provide industry with the opportunity to meet with the Government early enough in the procurement process to provide input into the Multi-Purpose Crew Vehicle Program Integration Services Contract (MPIC) procurement strategy.
- Encourage offerors to submit questions and comments in writing via the MPIC website. The Government will respond in writing to all questions submitted by posting them to NAIS and the MPIC procurement websites.

# Webinar Format

---

- Duration of the meeting: 3 hours allocated
- Questions or comments in response to the information presented at Industry Day may be submitted outside this event to the Contracting Officer at: [jsc-mpic@mail.nasa.gov](mailto:jsc-mpic@mail.nasa.gov) by March 5, 2012.
- Questions can also be submitted anonymously to the Contracting Officer by selecting the link titled Anonymous Questions to the Contracting Officer at the MPIC website:  
<http://procurement.jsc.nasa.gov/mpcv/questions.htm>
- All questions and responses will be posted via the MPIC website at <http://procurement.jsc.nasa.gov/mpcv> and NASA Acquisition Internet Service (NAIS) <http://procurement.jsc.nasa.gov>
- Oral questions will not be addressed

**Welcome**

**Jeffrey M. Cullen**

**Deputy Director, Office of Procurement**

---

## **Vision and Objectives Technical Overview**

**Lucy Kranz**  
**Project Planning and Control Manager,  
MPCV Program**

HUMAN EXPLORATION & OPERATIONS  
MISSION DIRECTORATE

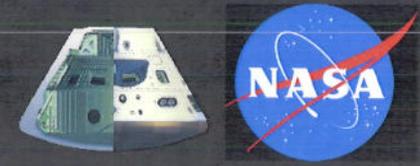

# MPCV Program Integration Contract (MPIC)

## *Industry Day*

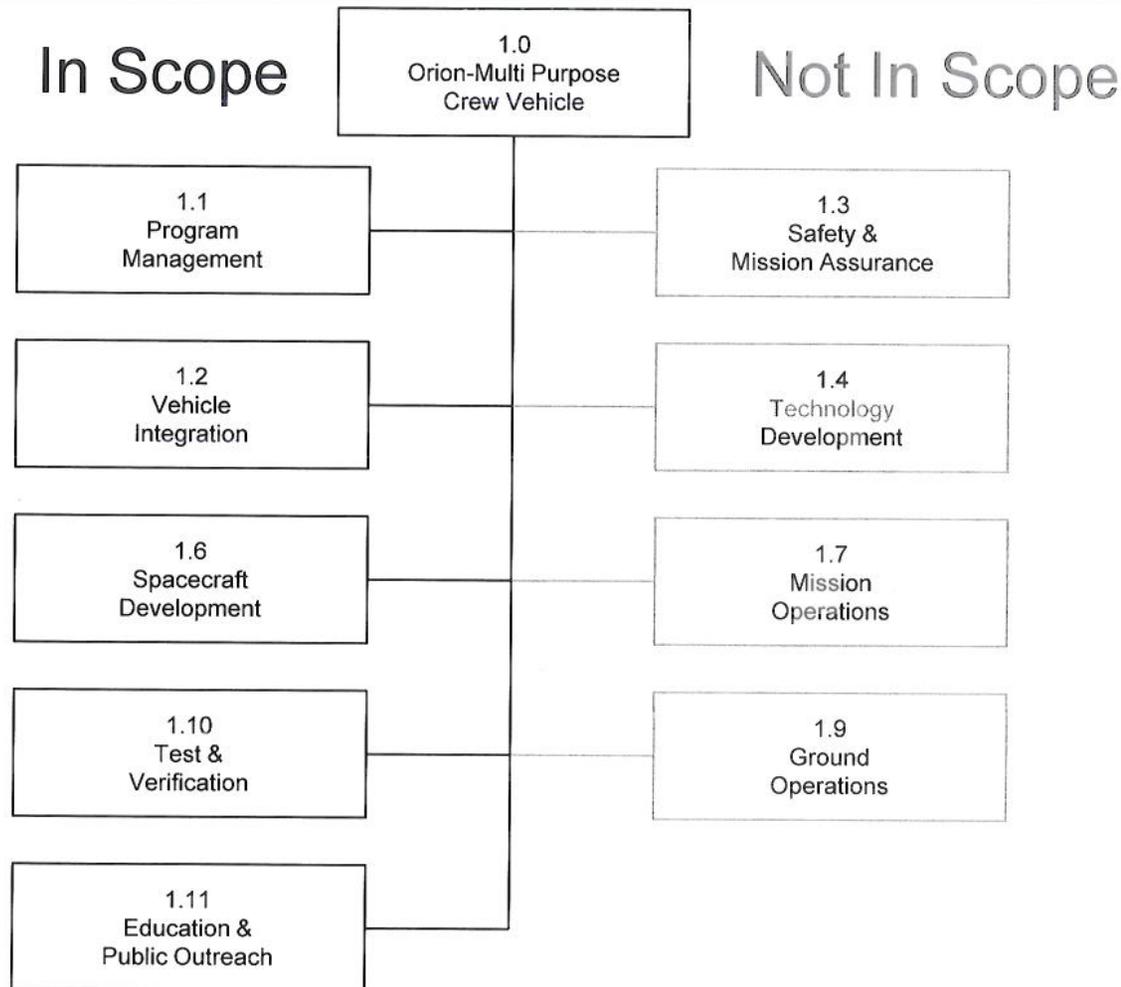

Lucy V. Kranz, Manager  
MPCV Program Planning & Control

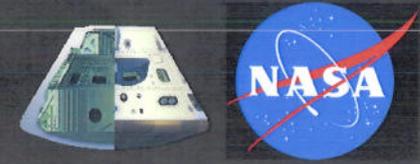

# MPIC Scope by WBS

CxP 72106, Work Breakdown Structure and Data Dictionary, Revision C, June 23, 2011

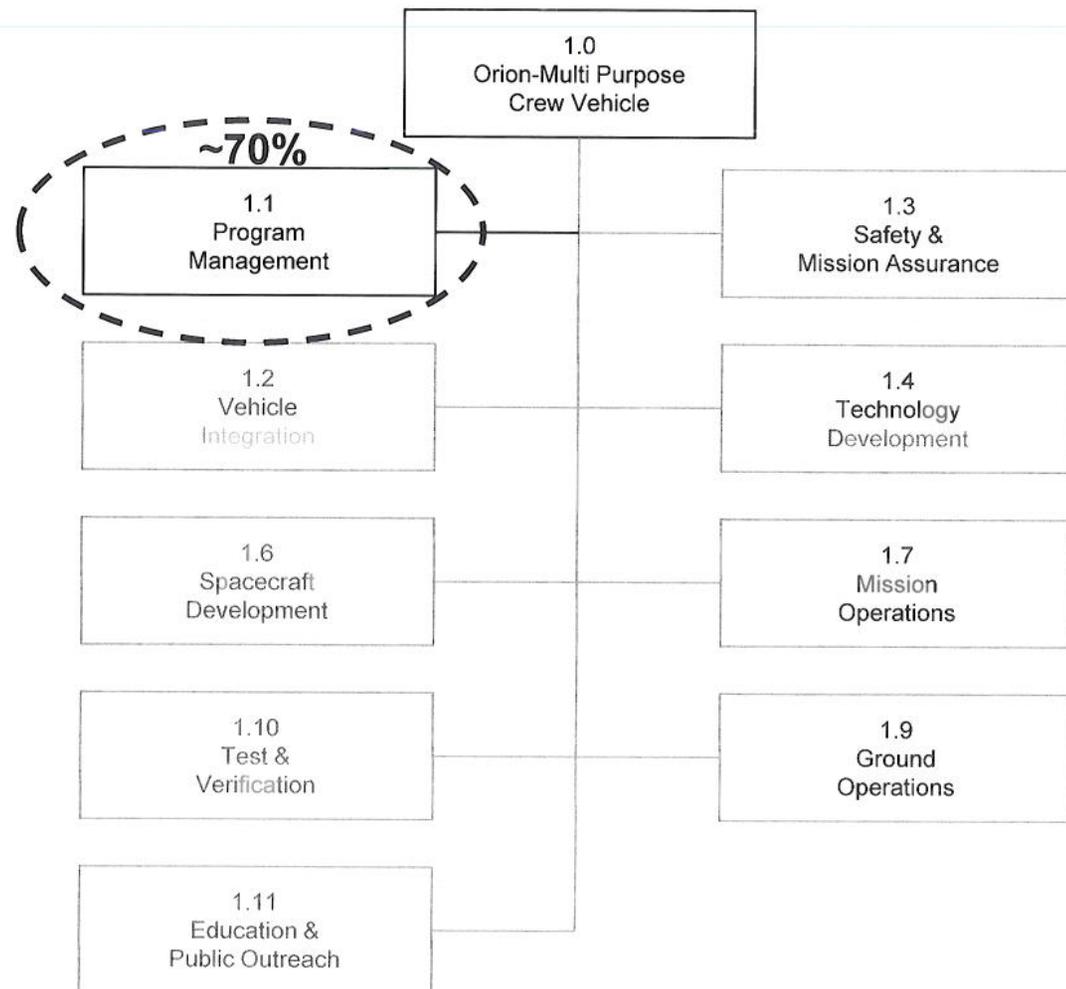

# PP&C Work is WBS Element 1.1

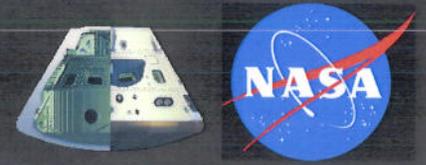

**Program Planning and Control (PP&C) is a subset of the Program Manager's Roles and Responsibilities**

**PP&C is about 70% of the total MPIC Statement of Work**

# PP&C Fundamentals

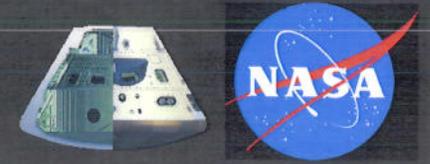

- **The Program Planning and Control function enables the Program Manager to fulfill his/her commitment to develop and deliver flight products that meet technical requirements within the schedule and budget provided**
- **Values for technical, schedule, and cost go together and equal the Program Manager's commitment to the Agency**
- **Program Manager responsibilities, including the Program Planning and Control function sub-set, are defined by the Agency (1)**

---

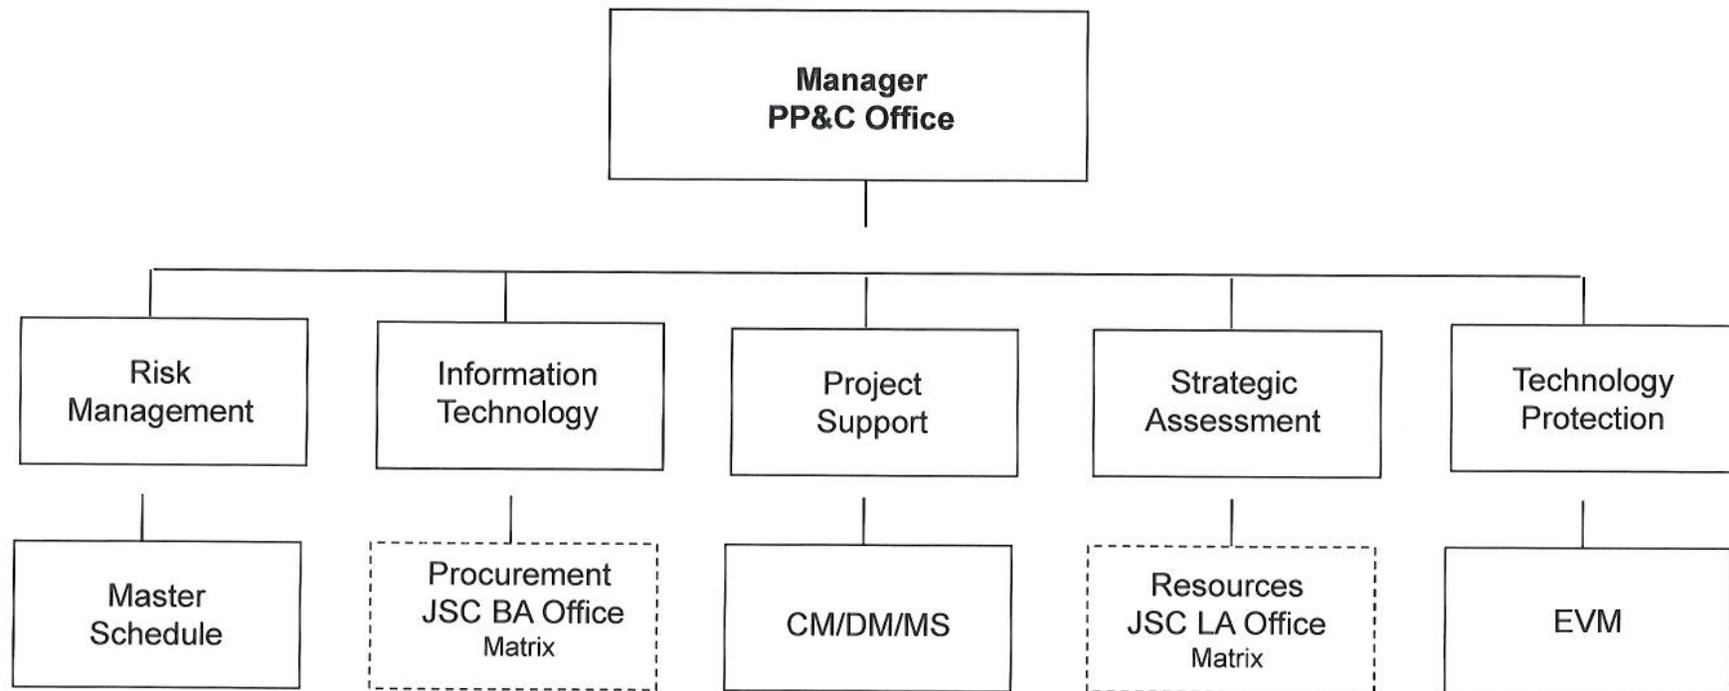

(1) The PP&C subset is provided as Table 1 in the *White Paper, MPCV Approach to Program Planning & Control*, available in the MPIC Technical Library

# Classic PP&C Implementation

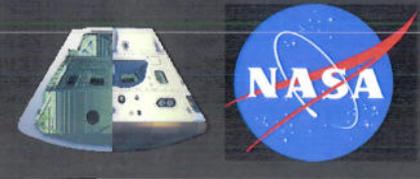

Traditional PP&C is a flat organization of individual planning and control functions together with support services, *not necessarily in the same organization*, each with its own expertise, data resources and tools, developing and reporting individual functional data products directly to Program management,

## Orion PP&C 2006 - 2010

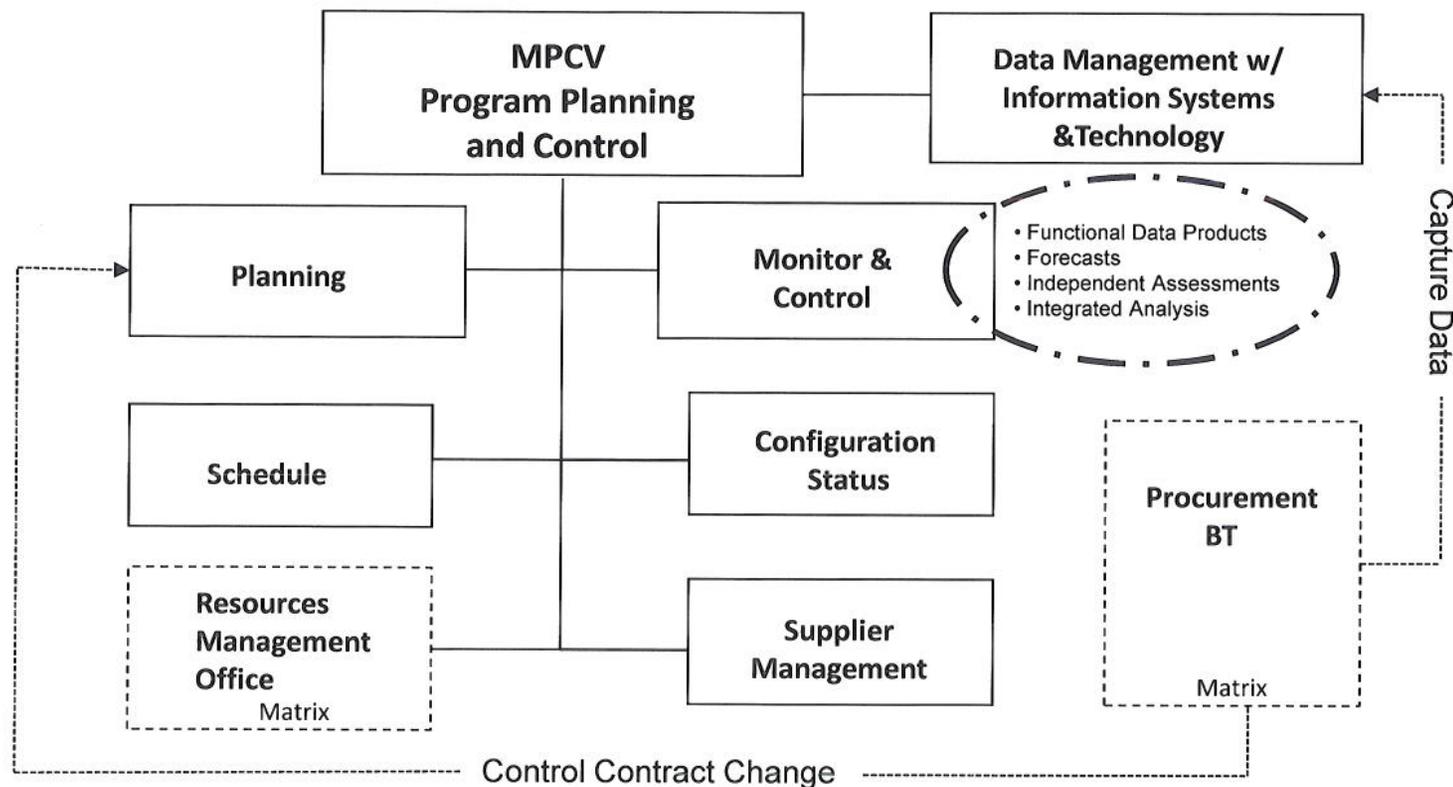

# MPCV PP&C Implementation

MPCV PP&C is single organization focused on analyzing integrated performance using functional data products as input along with forecasts and independent assessments to inform the Program Manager of status and threats

## Orion PP&C Oct. 2010 - Forward

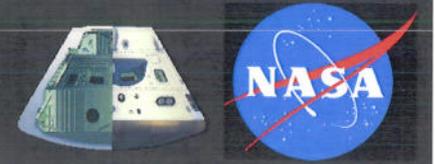

# MPCV PP&C captures twenty years of improvement in work definition

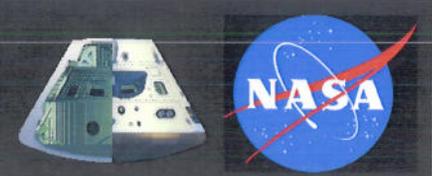

- **Since GAO designated NASA Programs a high-risk area in 1990**
  - Improved business practices and financial management systems
  - Established Baseline performance reporting at Center and HQ levels
  - Added integrated cost and schedule measures
- **Since the NASA Advisory Council evaluated International Space Station (ISS) management and cost performance in 2001**
  - Established Control Account Managers
  - Established a Quarterly performance reviews along with a Reserves Impact Notification system and an Early Warning System to monitor performance
- **Since NASA recommended more disciplined oversight to address key program management challenges in 2009**
  - Single definition for Program Baseline throughout the Agency
  - Strengthened requirements for program/project management, cost estimating and analysis and cost reporting
- **Since NRC reviewed cost growth in NASA Programs and NASA reviewed cost growth in the JWST in 2010**
  - See 'Recommended Readings' in the Technical Library

# MPCV PP&C captures twenty years of improvement in tools

- **Continuously over the past 20 years, the tools available to perform PP&C work have significantly improved, e.g.,**
  - Acquisition Management
  - Budget Process
  - Configuration management
  - Cost Estimating Risk Management
  - Data management
  - Earned Value Management
  - Information Technology
  - Integrated Financial Management
  - Joint Cost and Schedule Confidence Level (JCL)
  - Quality Management
  - Scheduling
  - Technology Protection

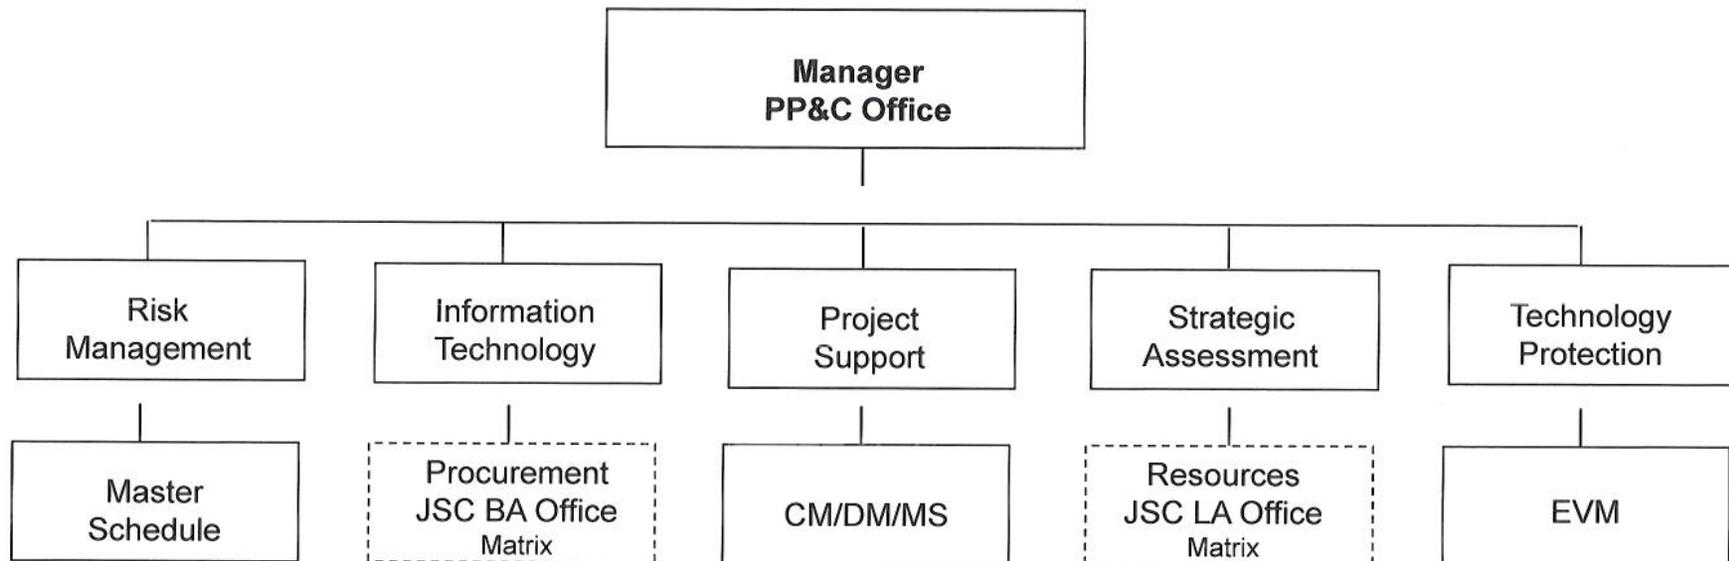

# MPCV PP&C is a next generation

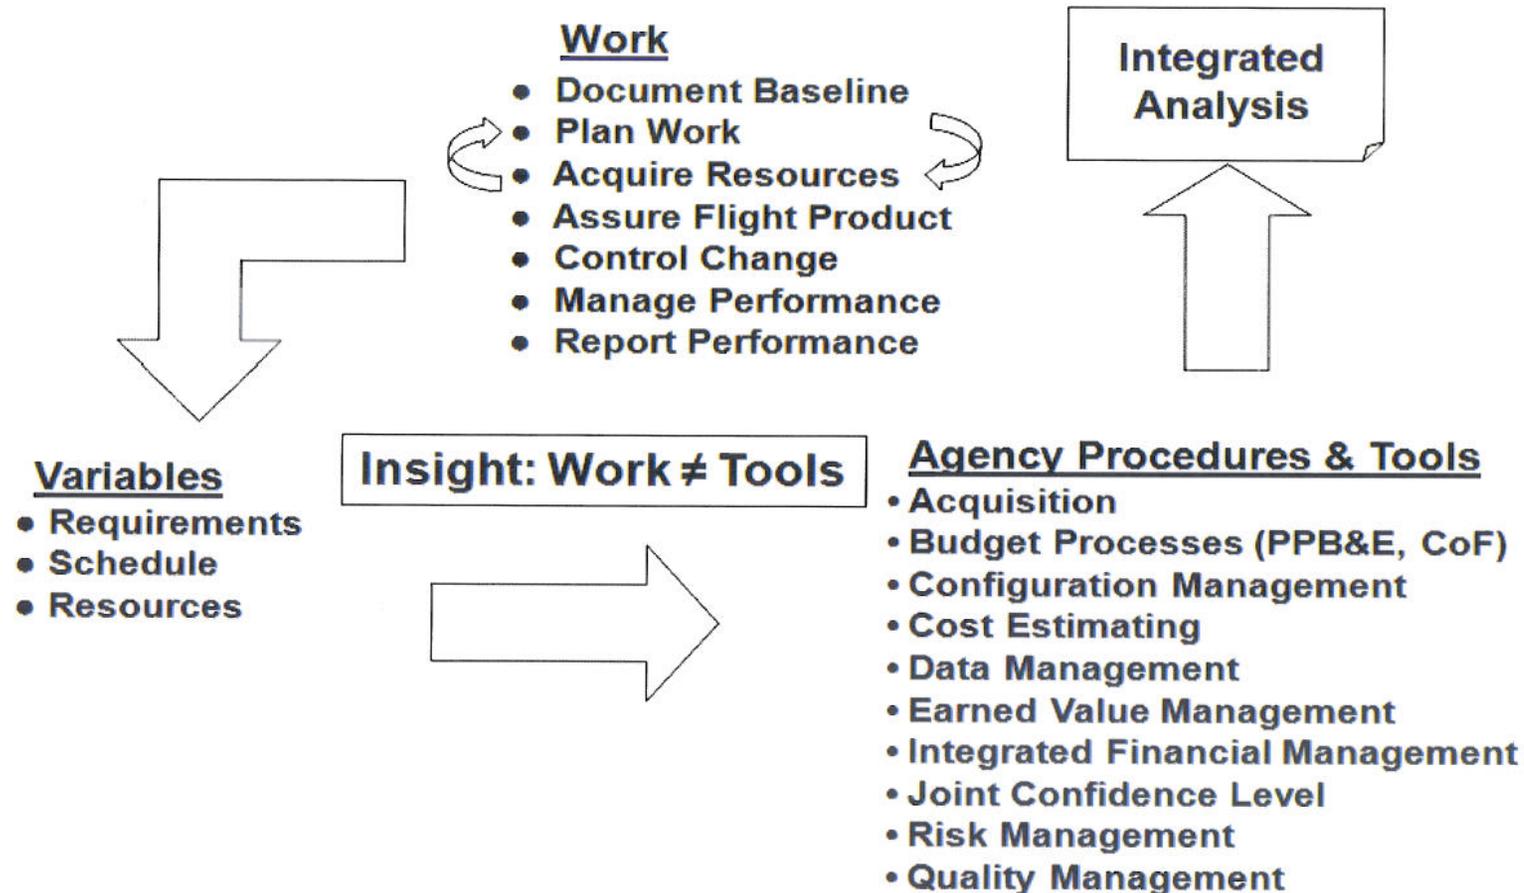

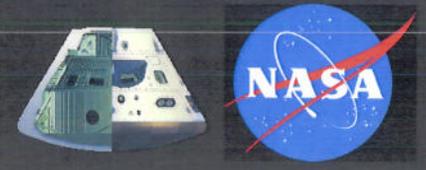

- **Because it is organized around the work**

- Document the Baseline
- Plan the Work
- Acquire Resources
- Assure Flight Product
- Manage Performance
- Report Performance
- Control Change

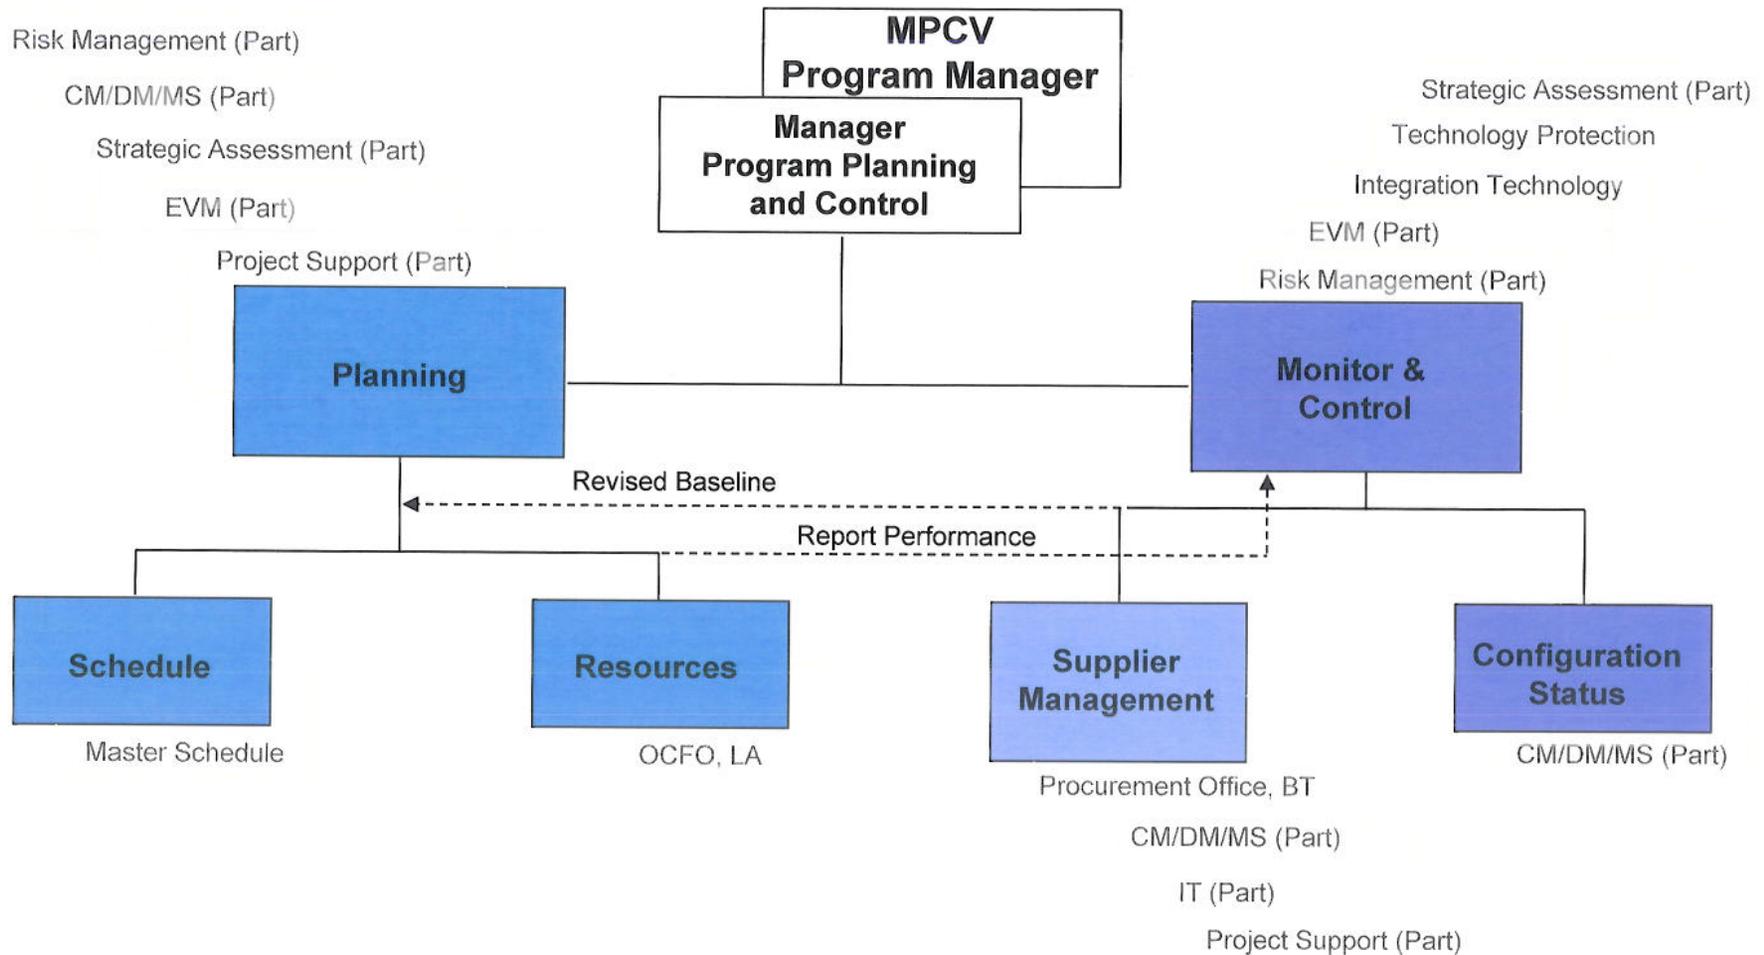

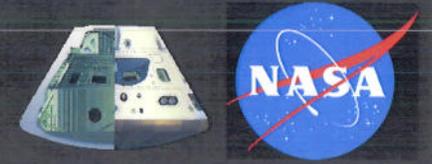

- **and not around the tools used to perform the work**

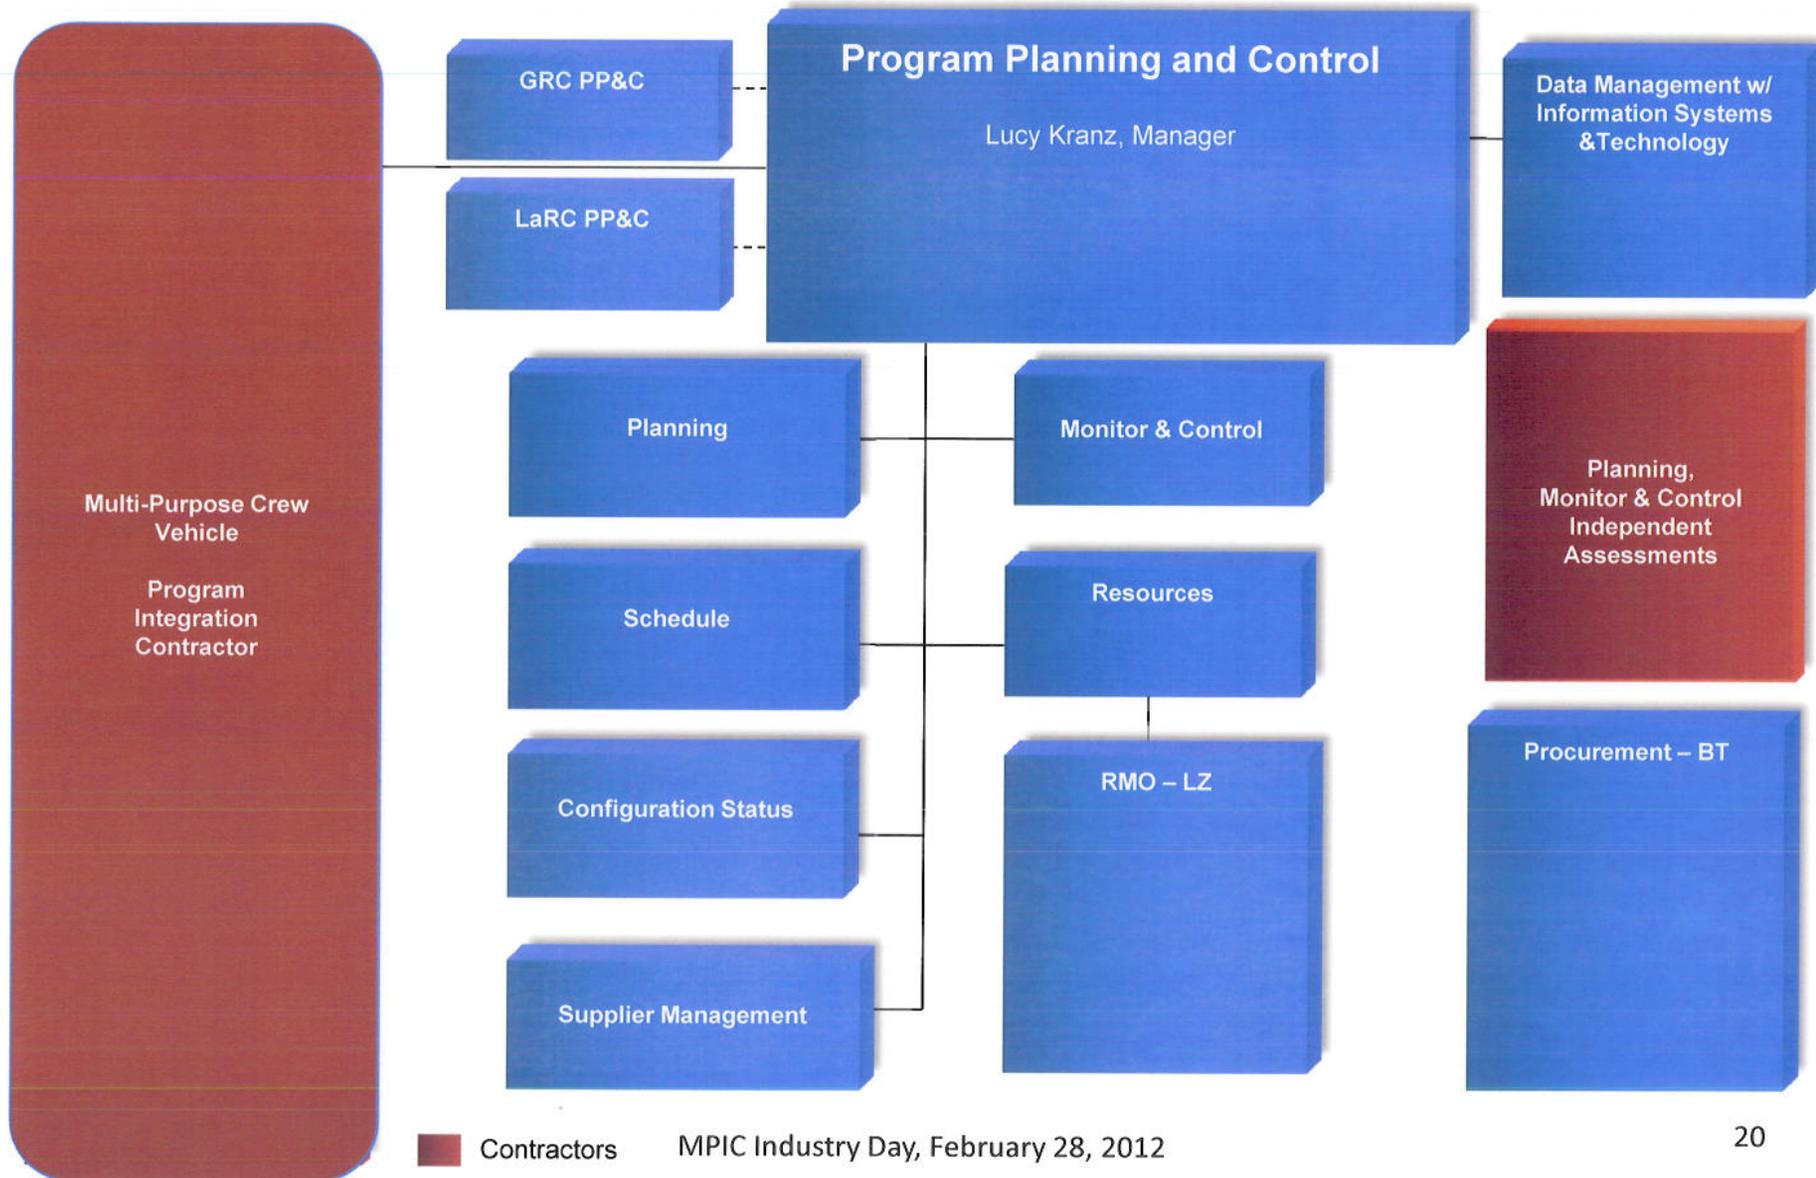

# But the work and tools go together to analyze Program performance

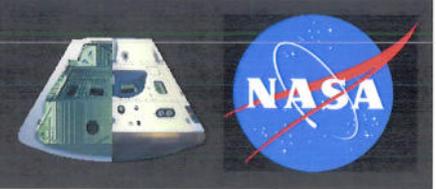

# Work performance defines the MPCV Organization

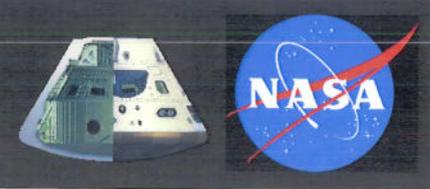

# Implemented in October 2010 (FY 2011)

# with the following results

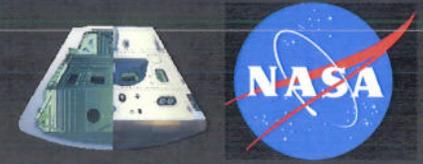

- **Achieved FY2011 affordability objectives**
  - Reduced the content under configuration control and streamlined the configuration control process
  - Reduced the number of DRDs and streamlined the data management process
  - Added assumptions as a performance measure
  - Added independent assessments and forecasts as input to integrated analysis
  - Implemented a more-focused system of management reviews

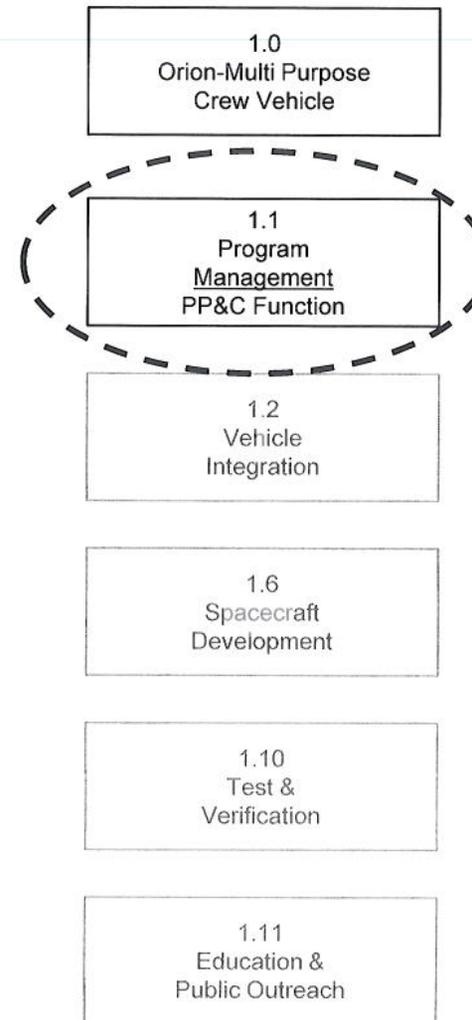

# WBS Element 1.1, Outline

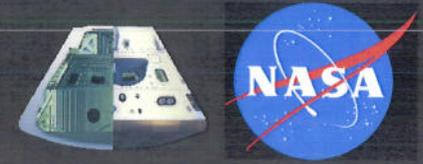

# Program Management PP&C Function

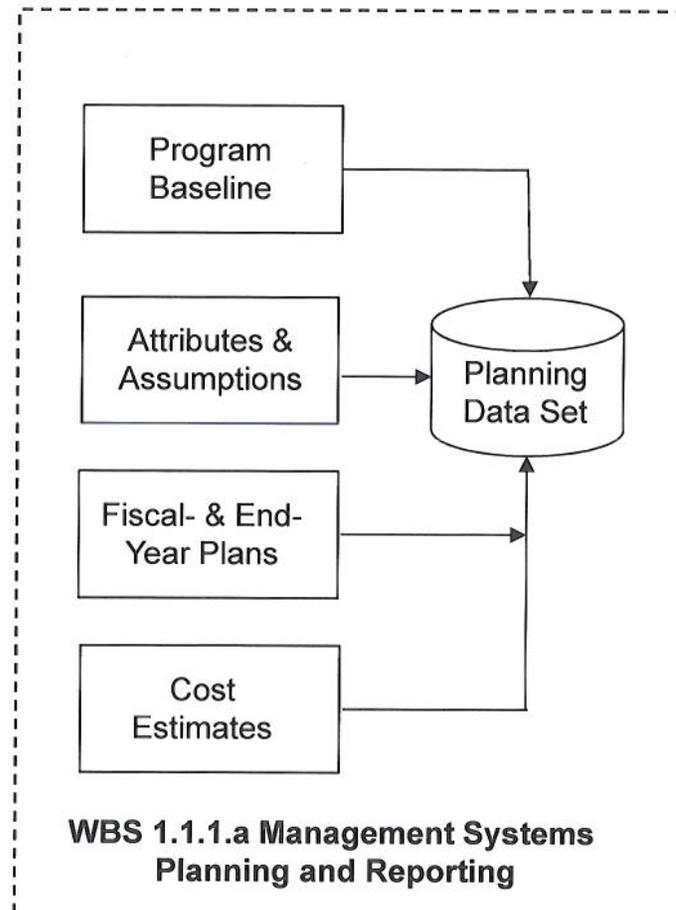

1. Establish the Program Baseline, attributes and assumptions, and the Fiscal- and End-Year plans as the basis for measuring and reporting performance
2. Capture Program data and develop functional data products
3. Prepare integrated assessments to inform the Program Manager of performance status and of threats to future performance, along with drivers

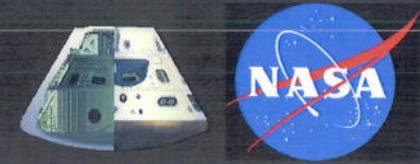

# MPIC Data Products (1 of 3): Planning Data Set

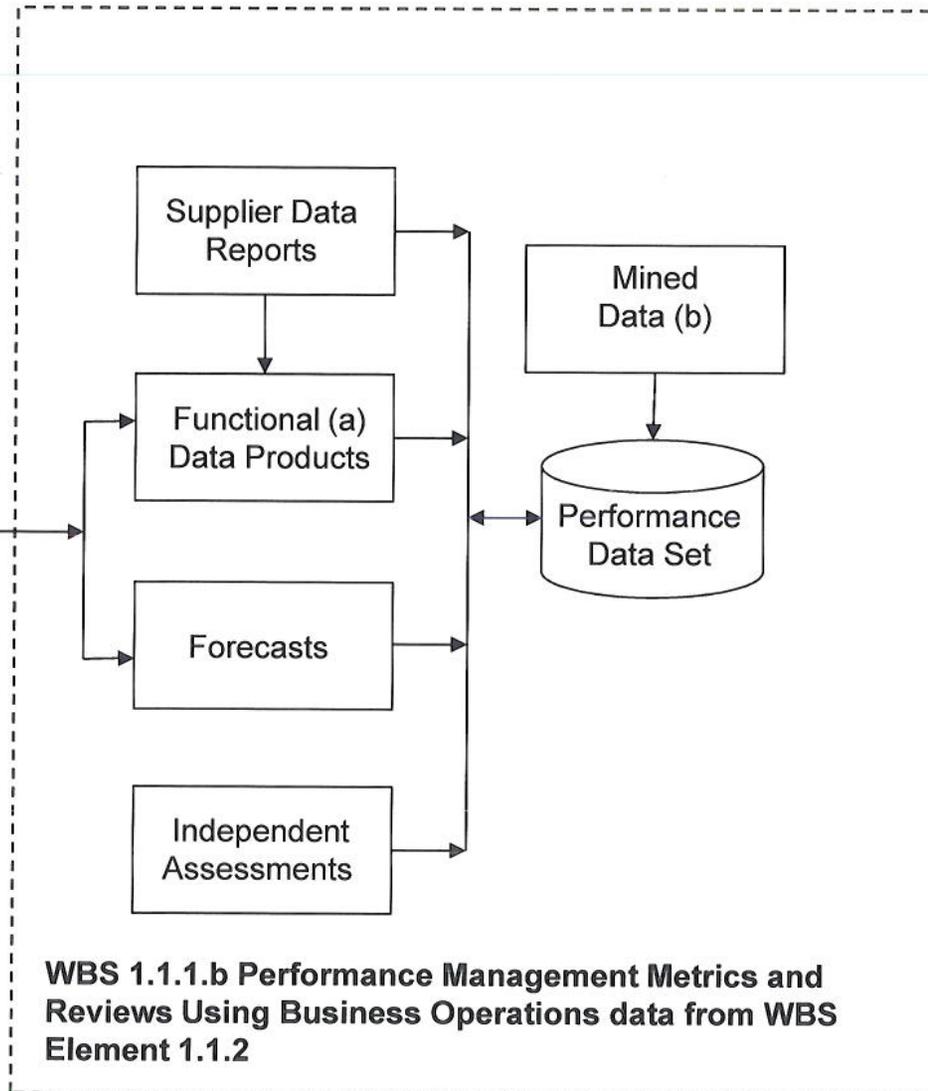

- 1. Establish the Program Baseline, attributes and assumptions, and the fiscal- and end-year plans as the basis for measuring and reporting performance***

# MPIC Data Products (2 of 3): Performance Data Set

## 2. Capture Program data and develop functional data products

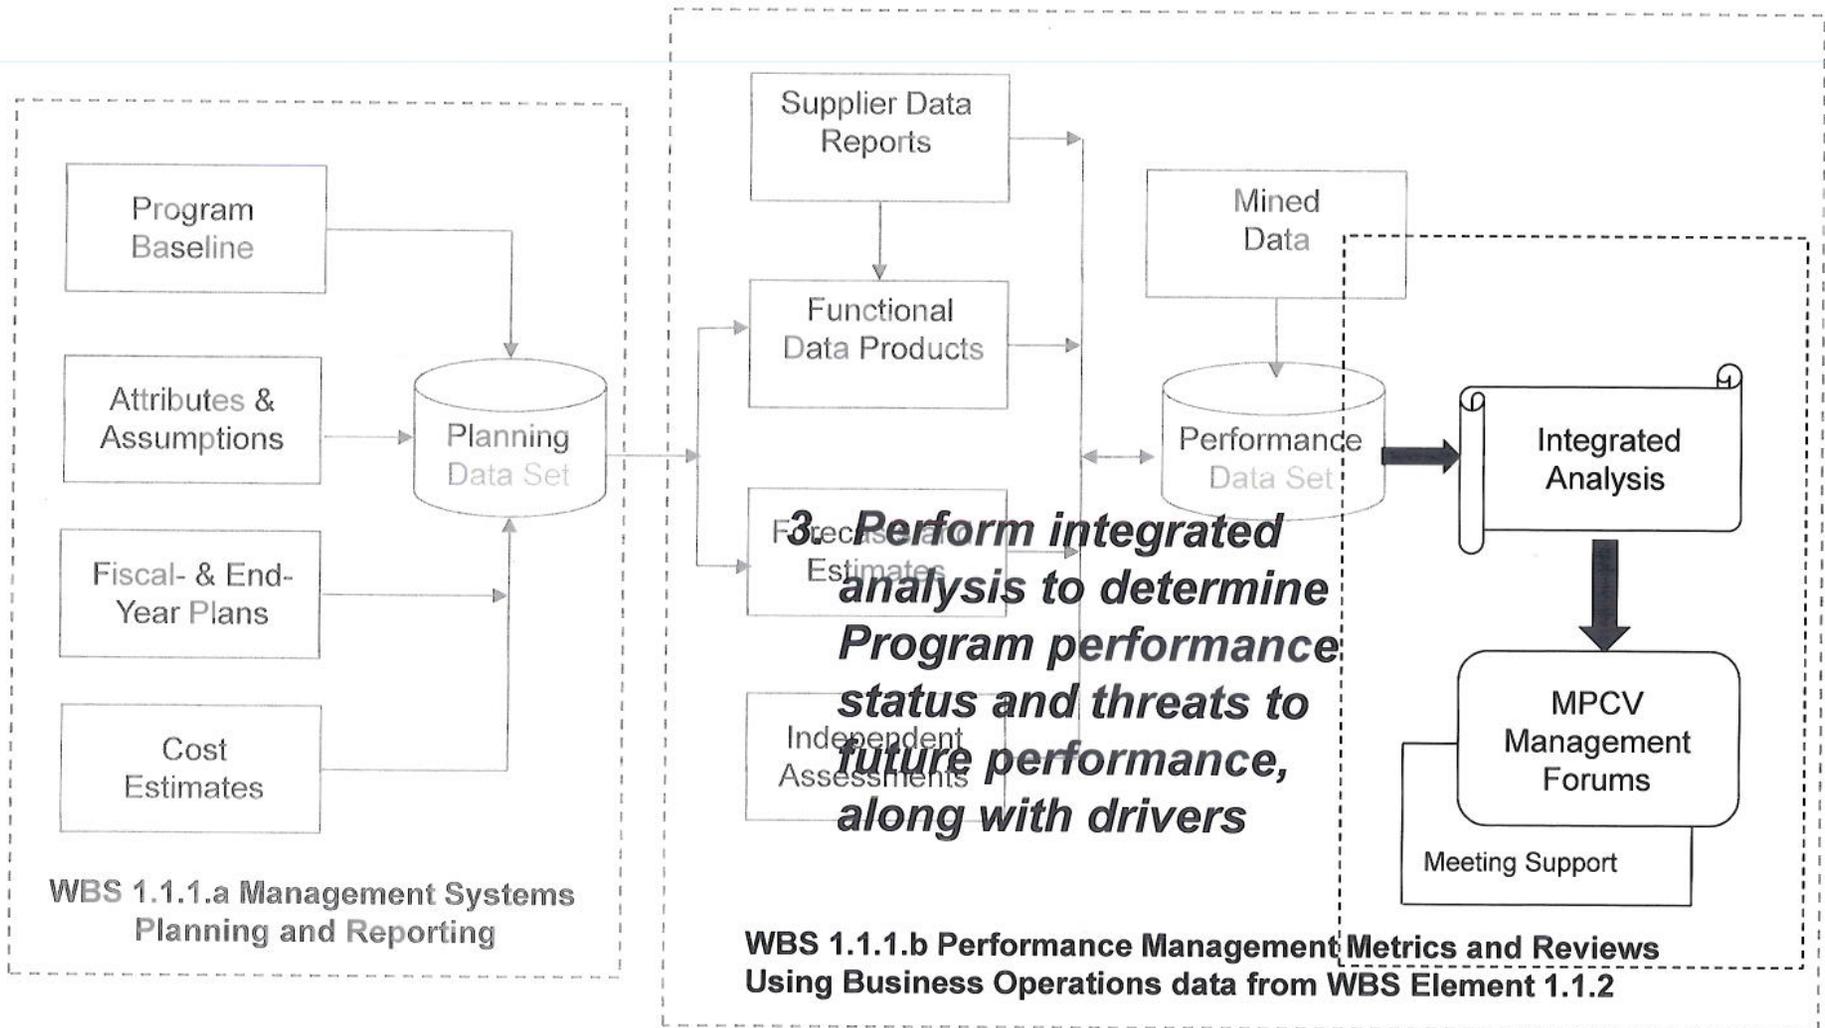

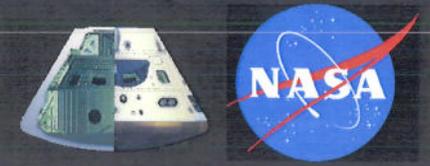

### (a) Functional Data Products

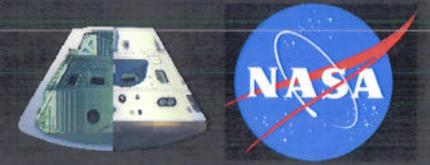

- Cost & Workforce
- Program Master Schedule
- Schedules Variance
- CAM Schedules
- Earned Value
- Assumption Validity
- Risk Assessment

(b) In performance of work under WBS Element 1.2, 1.6 and 1.10 Identify and acquire technical Performance data from Working Group-, Team-, Panel-, and Board-Presentations, and incorporate into the Performance Data Set to augment existing data stores

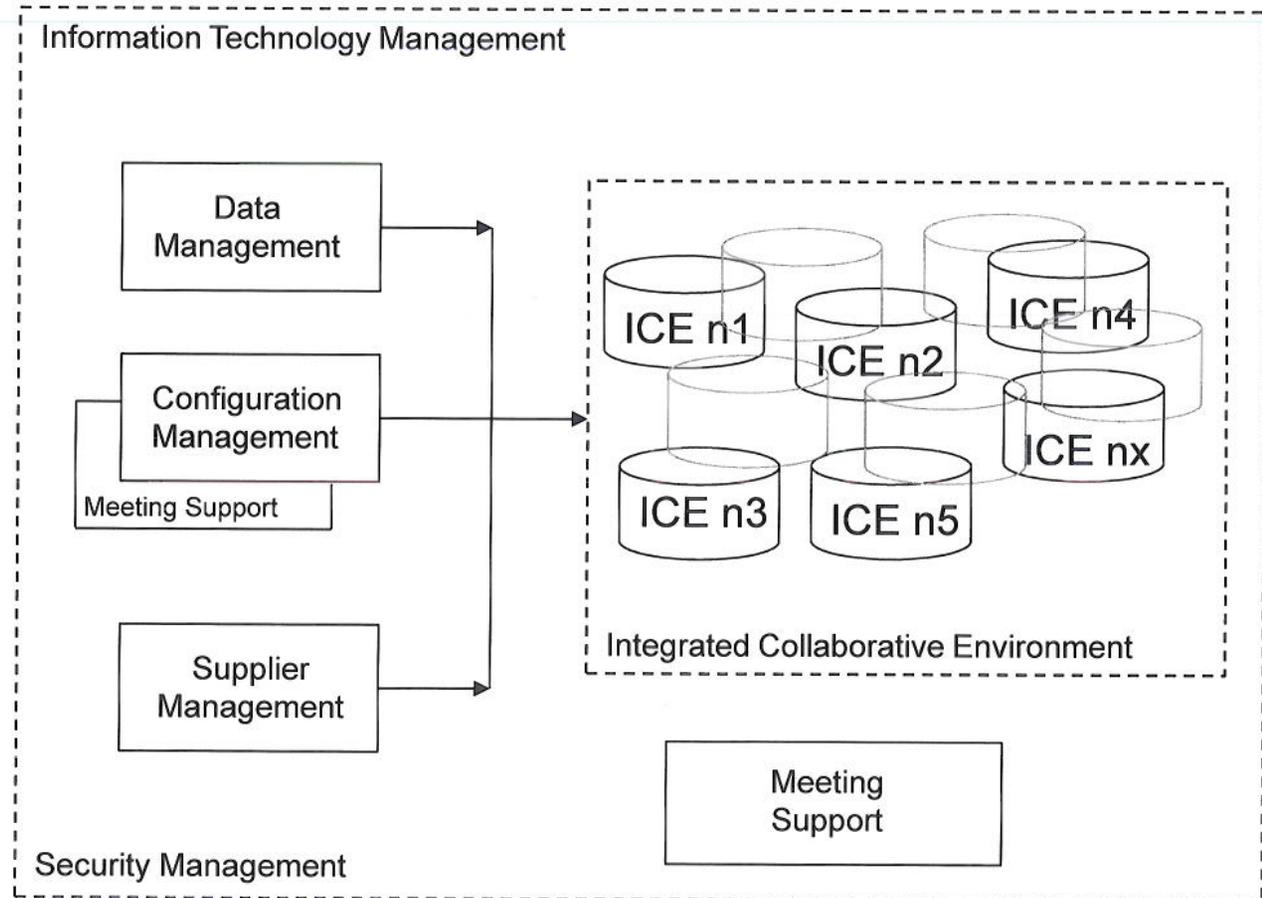

# MPIC Data Products (3 of 3): Integrated Analysis

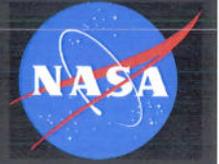

# Professional Services

- Services**
- Information Technology
  - Data Management
  - Configuration Management
  - Meeting Support
  - Supplier Management
  - Security Management

# Technical Library

- White Paper on Affordability in the MPCV Program
- White paper on the MPCV Approach to PP&C
- Learning Curve: Evolution of the Next Gen approach to PP&C

Potential offerors should continue to monitor the Technical Library as additional documents may be posted.

---

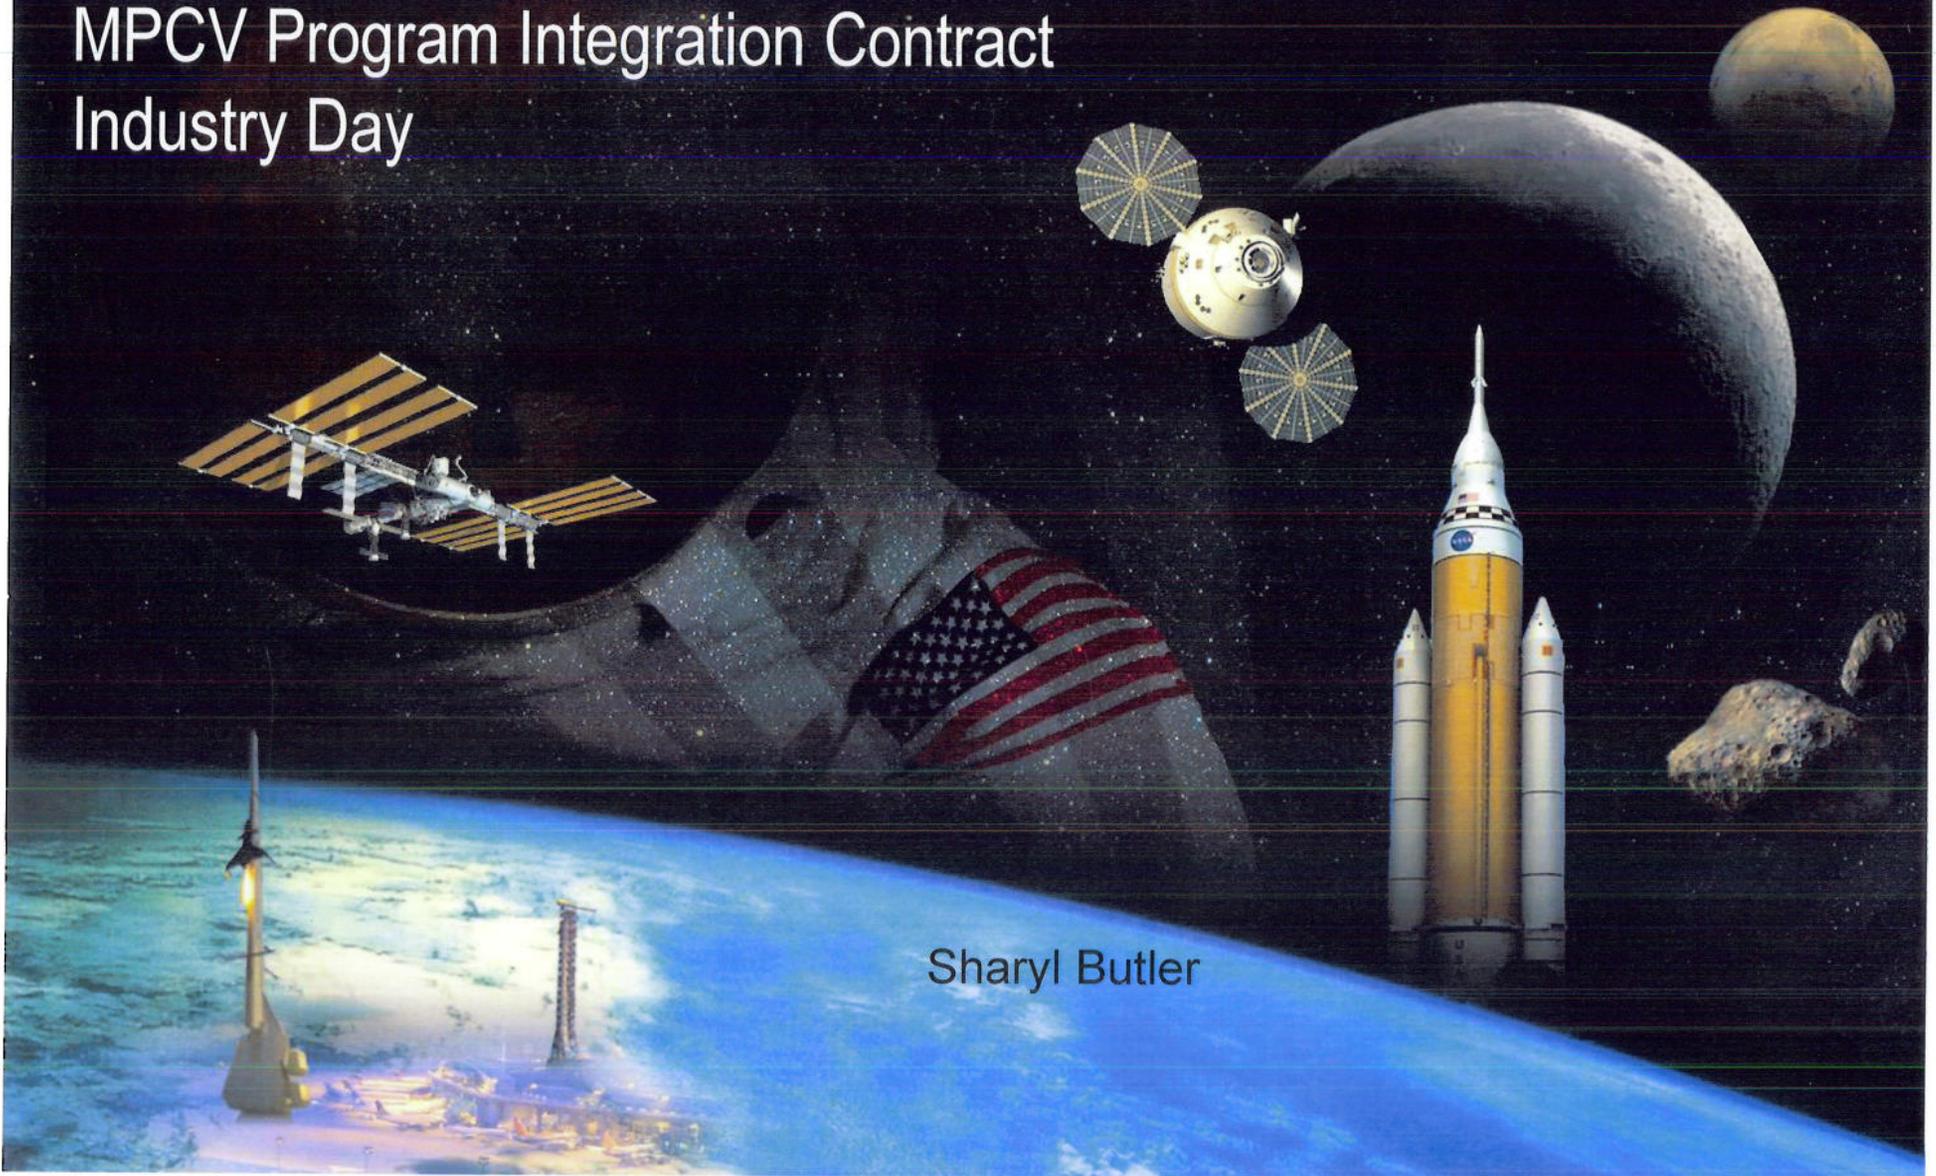

## **Technical Overview**

**Sharyl Butler**  
**Chairperson, MPCV Program**

HUMAN EXPLORATION & OPERATIONS  
MISSION DIRECTORATE

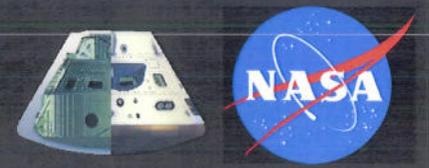

MPCV Program Integration Contract  
Industry Day

Sharyl Butler

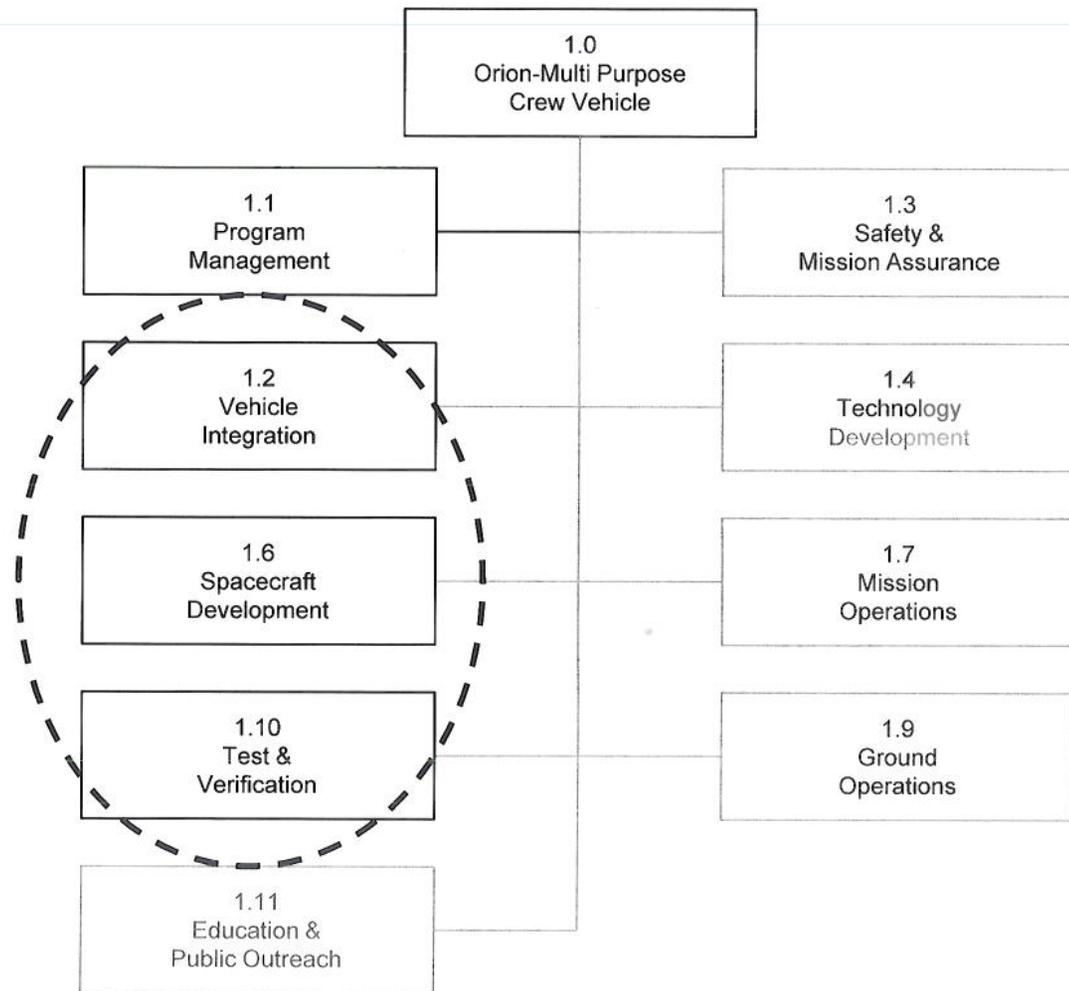

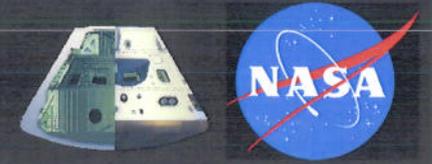

# Statement of Work (SOW) Overview

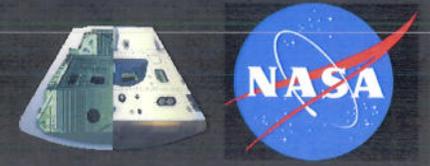

The MPIC will provide professional business and engineering functions for the Johnson Space Center (JSC) MPCV Program Office, including the integration of MPCV Program Office work performed at other NASA centers and with the MPCV Program's prime contractor.

- Business management functions include cost, schedule and performance assessments
- Technical functions include trade studies, analyses and assessments in support of Orion contract management

# WBS Elements 1.2, 1.6, and 1.10

# SOW – Technical Requirements

The tasks below are performed in these areas:

- 1.2 Orion Vehicle Integration
- 1.6 Spacecraft Development
- 1.10 Test & Verification

- Development, process improvement and documentation of system requirements
- Risk identification and mitigation planning and reporting
- Evaluations of Engineering Change Proposal and Change Requests
- Planning, coordination and review of design review products
- Requirements analysis, traceability and verification
- Schedule management and reporting
- Management and definition of metrics
- Action tracking and responses
- Performance of special studies

# SOW – Technical Requirements (continued)

Additional unique tasks for each office include:

## 1.2 MPCV Office Vehicle Integration

### 1.2.7 Flight and Ground Operations

- Definition, planning, and documentation of the concept of operations processes, and procedures
- Development of flight, ground, payload and cargo integration plans

### 1.2.8 Specialty Engineering

- Perform systems engineering and integration for human engineering, materials and processes, electromagnetic compatibility, EEE parts, natural and induced environments, MMOD, and radiation

### 1.2.10 Assembly, Integration and Production

- Definition, planning and documentation of the production of the fully integrated, verified and validated vehicle

# SOW – Technical Requirements (continued)

Additional unique tasks for each office include:

## 1.6 MPCV Office Spacecraft Development

### 1.6.1 Crew and Service Module (CSM)

#### 1.6.1.2 CSM Systems Engineering and Integration

- Management of the integrated crew module architecture definition and engineering functions
- Provide independent assessment and validation of CSM subsystems and components to meet module level and interface requirements
- Participation and review in Interface Control Document (ICD) development

#### 1.6.1.4 CSM Government Furnished Equipment (GFE) Products

- Tracking of GFE and government in-line activity

#### 1.6.1.6 Crew Module Assembly, Integration, and Production

- Definition and documentation of CSM certification and acceptance process, assembly and integration requirements, hardware and software integration and test strategies for acceptance and sustaining engineering
- Development of testing and verification processes for the checkout facility and equipment interface

# SOW – Technical Requirements (continued)

Additional unique tasks for each office include:

## 1.10 MPCV Program Office Test and Verification (T&V)

### 1.10.1 Test & Verification Management and Administration

- Assessment of master verification strategy for flight and ground interface systems
- Criteria and methodology requirements verification

### 1.10.2 Verification Management

- Develop and manage the Master Verification Plan, SRD verification requirements, and Verification Logic network
- Coordinate the Verification Closure process
- Definition and management of the spacecraft certification and acceptance process

### 1.10.4 Facilities

- Assessment of development, management and maintenance of Program labs, test beds and test facilities
- Definition and documentation of interface tooling and test equipment requirements

# SOW – Technical Requirements (continued)

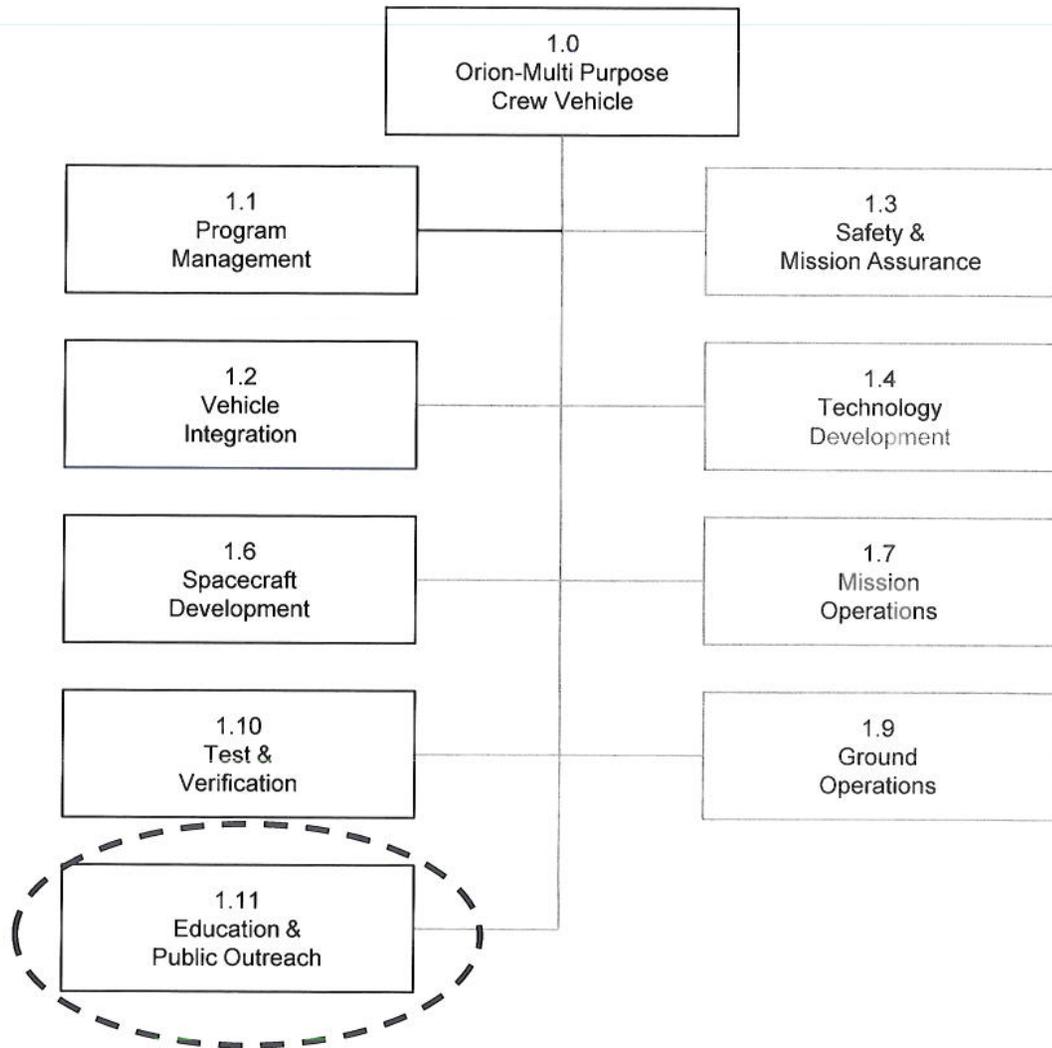

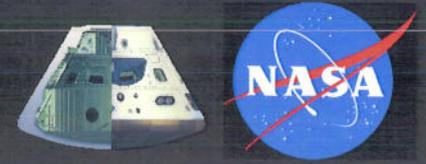

## 1.10.6 Flight Test

- Development of integrated flight test strategies, objectives, requirements and plans
- Planning and documentation of integrated safety and crew survival-function flight testing
- Identification and arrangement for facilities and associated assets required for flight tests

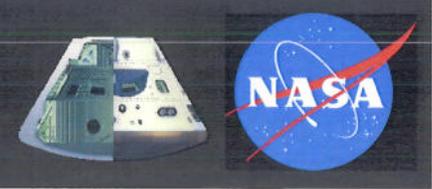

## 1.10.7 Special Studies – T&V

- Design and development of analysis tools
- Perform as technical advisor and consultant in use of the tools, including training

# WBS Element 1.11

# SOW – Technical Requirements

## 1.11 Education and Public Outreach

- Development of products to communicate program accomplishments to the public. Products include videos, animations, printed media, social media, website content, exhibits and broadcast media
- Development of program communication products for updates to the NASA headquarters and other team members

---

## **Small Business Overview**

**Charles Williams**  
**Senior Small Business Specialist**

---

# **Safety Overview**

**Connie Pritchard**  
**Safety and Health Specialist**

# Overview of the NASA Safety Program

---

- NASA safety objective is to avoid loss of life, personal injury and illness, property loss or damage, environmental harm resulting from any of its activities and to ensure safety and healthful conditions for persons working at or visiting NASA facilities
- NASA shall comply with all applicable regulations
  - NASA Safety & Health requirements
  - Requirements of those federal agencies with regulatory authority over NASA such as OSHA, EPA, and DoT
- NASA requires every employee to report workplace hazards
  - NASA ensures that there is no reprisal to personnel for reporting unsafe or unhealthy conditions

# Overview of the NASA Safety Program

---

- The NASA Safety Policy stresses the individual responsibility of each employee for their own safety and that of their co-worker. Risk within the work environment must be managed to control hazards and continuously improve workplace conditions
- The Occupational Safety & Health Administration (OSHA) has recognized JSC as a leader in health and safety by awarding the “Star” designation level of achievement in the Voluntary Protection Program (VPP)
- As a VPP Star, JSC has a comprehensive and successful safety and health program, is below the national average for the industry in injury/illness rates, has demonstrated good faith in dealing with OSHA, and serves as a safety & health mentor to regional industry

# What would be expected of you at JSC

---

- All contractors performing work at JSC shall comply with all applicable safety and health regulations
- JSC does not assume the responsibility of the “employer” for contractor employees
- Every major onsite contractor shall have a designated safety official and shall conform to a written safety and health plan
- Failure to comply with safety and health requirements may result in contract termination, lower fee, and exclusion from future contract awards

# The Safety & Health Deliverables

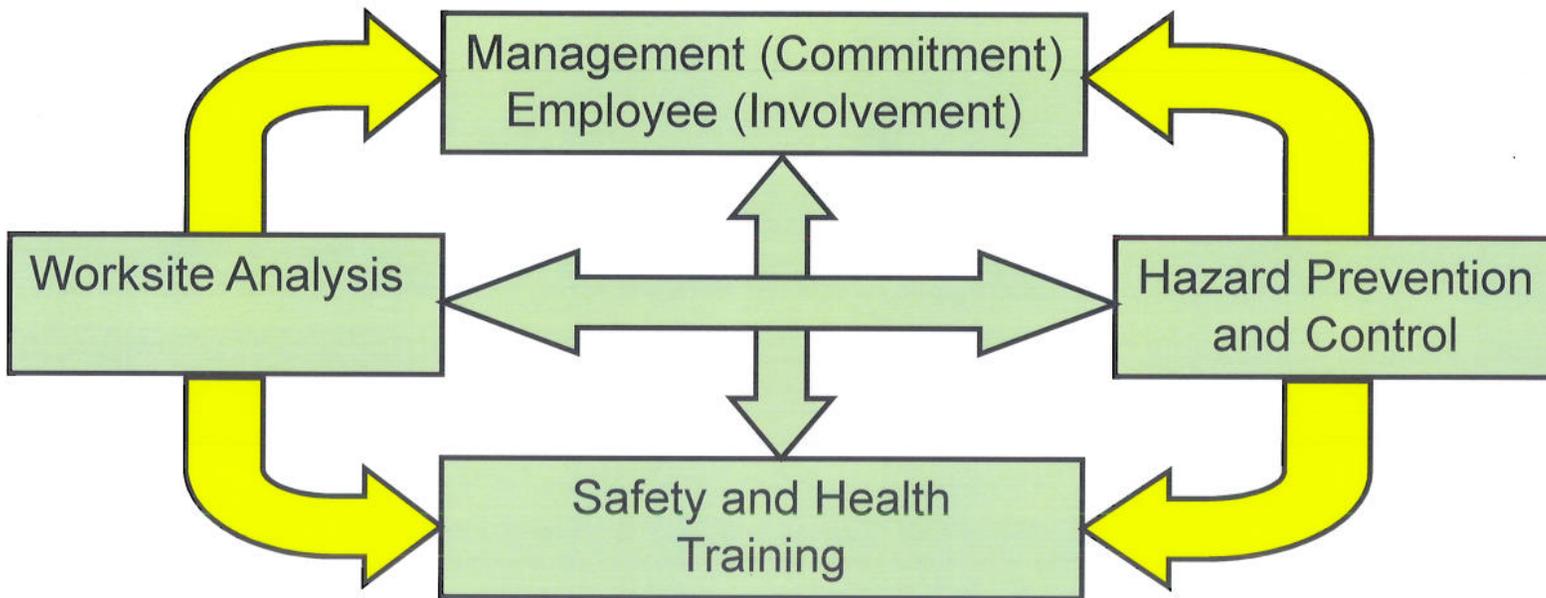

---

- Safety & Health Plan shall include detailed discussion of the policies, procedures, and techniques that will be used to ensure the safety and occupational health of your employees and to ensure the safety of all working conditions throughout the performance of the contract.
- Statement regarding past OSHA citations will be required
- Records of OSHA recordable injuries (OSHA Logs & calculated frequency rates)
- Insurance carrier information including experience modifier

# A Successful Safety Program Model

- Based on 4 Basic VPP elements defined by OSHA Region VI

# The Safety & Health Plan

---

Safety & Health Plan provisions you should expect to address on a typical JSC service contract

- Management Leadership and Employee Participation
  - Management Commitment – demonstrable leadership via goals, objectives, and policy statements
  - Planning – safety is planned, it doesn't just happen
  - Written Safety & Health Program
  - Authority and Resources – roles and responsibilities, funds, manpower (designated safety and health official, safety representative, medical contact, fire wardens)
  - Employee Involvement – participation at all levels
  - Safety & Health Program Evaluation – how is the program doing

# The Safety & Health Plan

---

- Worksite Analysis
  - Management Understanding – of hazards (recognition and response)
  - Industrial Hygiene – specialized area requiring technical support and coordination
  - Pre-use Analysis – before you use a new or modified piece of equipment or process, what has changed with respect to the hazards involved?
  - Hazard Analysis – of jobs, equipment, systems, processes
  - Routine Inspections – to catch hazardous conditions before someone is hurt
  - Employee Hazard Reporting – ways to encourage reporting
  - Accident/Incident Investigations - response, reporting and correcting negative findings

# The Safety & Health Plan

---

- Hazard Prevention and Control
  - Certified Professional Resources – safety professionals, industrial hygienists, trainers, system safety practitioners
  - Hazard Elimination or Control
    - Maintain a list of hazardous operations and processes
    - Develop written procedures to identify safety procedures
    - Methods for notification of personnel
  - Hazard Control Programs – such as lockout/tagout, confined space entry, asbestos/toxic exposure, PPE
  - Occupational Healthcare Program – medical surveillance program, treating injuries & illnesses, case management
  - Prevention Maintenance – of equipment and systems
  - Disciplinary System – approach to modify behaviors
  - Emergency Preparedness – fire, explosion, weather

# The Safety & Health Plan

---

- *Safety and Health Training*
  - Program Description – describe your training program to ensure safe work practices, hazard recognition and to meet all regulatory requirements
  - Tailor training toward specific audiences – managers, supervisors, employees (crafts, office workers, etc.)
  - Discuss certification programs – training requirements and physical conditions
  - Train for emergencies – fire drills, evacuation drills, site emergencies
  - Personal Protective Equipment – training in the use and care of PPE
  - Training in hazard communication, confined space entry, lockout/tagout, etc.

# The Safety & Health Plan

---

- Safety and Health Goals – should be measurable
- Miscellaneous reports contained in body of the Data Requirement – statistics; mishap reports; close call reports; hazard reports; inspection reports; building fire wardens; hazardous materials inventory; roster of terminated employees; material safety data sheets; OSHA logs; program self evaluation.

# Recommendations

---

- For the good of your employees and your business, take safety seriously and proactively plan to PREVENT injuries
- Understand the data requirements
- Tailor your plan to what you will do on the contract
- Contact the procurement point of contact on this solicitation if you have any questions
  - Any RFP requirement you feel is inappropriate for the plan, tell us why

# Procurement Overview

**Geraldine Mason**  
**Contracting Officer**

# Current Contract Overview – Orion Project Integration Contract

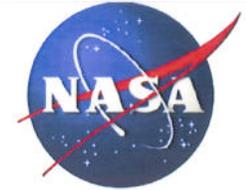

---

- Contract Number: NNJ08TA13C
- Prime Contractor: Barrios Technology, Ltd.
- Contract Type: Cost-Plus-Fixed-Fee, Indefinite Delivery/Indefinite Quantity
- Period of Performance: 4/11/08 - 4/10/13
- Skills currently provided on contract include:  
Professional Engineering Services
- A copy of the current contract is available at:  
[http://www.nasa.gov/centers/johnson/pdf/222233main\\_CONTRACT\\_NNJ08TA13C.pdf](http://www.nasa.gov/centers/johnson/pdf/222233main_CONTRACT_NNJ08TA13C.pdf)

# Proposed Contract - MPIC

---

- **NAICS Code:** 541712
- **Size Standard:** 1,000 employees
- **Set-aside:** Total Small Business

# Special Consideration

---

## NOTE TO PROSPECTIVE OFFERORS

Prospective offerors are reminded not to contact incumbent personnel (either directly or through electronic means) during duty hours or at their place of employment, as such contacts are disruptive to the performance of the current contract.

# Procurement Schedule

---

- The MPIC procurement schedule is posted to the MPIC procurement website at <http://procurement.jsc.nasa.gov/mpcv>.
- Following the release of the Draft SOW, Industry will have an opportunity to submit questions in writing so that the Government may officially respond.
- The Government intends to issue an RFP.

Milestone	Planned
Request for Information	11/10/2011
Draft Statement of Work	2/22/2012
Industry Day	2/28/2012
RFP	6/1/2012
Contract Award	11/15/2012

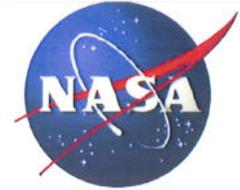

# Get Connected

---

It is your responsibility to monitor the websites for release of any information regarding this procurement and downloading your own copy of this information.

The Industry Day presentation is posted to the MPIC website at:  
<http://procurement.jsc.nasa.gov/mpcv>.

# How to Get Connected

---

- **Multi-Purpose Crew Vehicle Program Integration Contract Website**

<http://procurement.jsc.nasa.gov/mpcv>

- Click on Interested Parties Link
  - Fill-out requested information
  - All interested parties will be posted on the MPIC website

- **NASA/JSC Business Opportunities Home Page**

Set up your user profile

<http://prod.nais.nasa.gov/cgi-bin/eps/bizops.cgi?gr=D&pin=73>

- **NASA Acquisition Internet Service (NAIS)**

<http://procurement.nasa.gov>

- **JSC Procurement Website**

<http://procurement.jsc.nasa.gov/>

- **Industry Assistance – Bldg. 111 – JSC**

- Phone number: (281) 483-4511

# Contractor Input is Encouraged

- We encourage contractors to provide input regarding such things as technical requirements, contract type, contract duration, etc. Please send your inputs or questions to the following e-mail address by no later than COB March 5, 2012 to: [jsc-mpic@mail.nasa.gov](mailto:jsc-mpic@mail.nasa.gov).
- Anonymous questions to the Contracting Officer may also be sent to: <http://procurement.jsc.nasa.gov/mpcv/questions.htm>.
- All questions and responses will be posted via the website at <http://procurement.jsc.nasa.gov/mpcv> and NASA Acquisition Internet Service (NAIS) <http://procurement.jsc.nasa.gov>.
- An interested parties list will be posted to the MPIC website at <http://procurement.jsc.nasa.gov/mpcv> . Unless the Contracting Officer is notified in writing that they do not want to be listed, all participants will be posted to the list. Please send the request titled, "Please do not post to Interested Parties List" to: [jsc-mpic@mail.nasa.gov](mailto:jsc-mpic@mail.nasa.gov).

---
