Attachment 2
Visitor's Information and Site Maps

Thank you for choosing to visit Dryden Flight Research Center (DFRC) located on Edwards Air Force Base in the Mojave Desert of California.

DFRC is accessed after first gaining entry to Edwards Air Force Base (EAFB). There are 3 points of entry for the base; North Gate, West Gate and South Gate.

North Gate is for those approaching from areas north or west of Mojave, CA typically along CA Highway 58.

West Gate is for those approaching from areas south of Mojave, CA and other areas of Southern California, such as LAX or Burbank airport.

South Gate is not recommended, as it is in a very rural area without roadside services.

*****

While travelling on the base, be sure to wear your seatbelt, drive no faster than the posted speed limits and utilize a hands-free device for your cell phone. Driving infractions will be ticketed and your presence before a Federal Magistrate may be required.

Be aware of bike riders and joggers, especially during the morning and evening hours, as well as desert wildlife such as coyotes, rabbits and tortoises.

Reveille plays at 7:30 a.m. and Retreat at 4:30 p.m. You may notice vehicles pulled to the right of the roadway during these times. Please drive with caution and pull over only if there is no danger to you in doing so.

Some areas are prone to flooding after periods of heavy rain or snow.

Periodically, random vehicles are selected for inspection. This may cause a short delay in your arrival.

*****

When you arrive at the EAFB guard shack, park your car and go into the office. Be prepared to tell the guard what your destination is, show two forms of picture identification, (Driver's license, Passport, Company ID, etc.), proof of auto insurance with dates of coverage and current auto registration.

If you need assistance while you are attempting to get onto the base or enter through the DFRC security gate, please contact Susan Burright at (661) 276-3200 or Denise Orta-O'Neill at (661) 276-3209.

*****

You may use any mapping software (e.g. Google Maps, etc.) to get specific instructions to DFRC by using the following coordinates:

34.952117 latitude
-117.888917 longitude

If your travel occurs during times of inclement weather, you may contact the DFRC support line to determine if DFRC is open for business at (661) 276-2777.

You may also contact Cal-Trans to determine if the highways are open for travel or closed due to snow or ice at (800) 427-7623. You will need to enter the highway number (e.g. 14, 58, 395, etc.). You may be prompted to enter "Southern California Area", "Central California Area", "Eastbound", "Westbound", etc.

*****

When you arrive at DFRC on your first day, report to Building 4825, DFRC Security. You will receive your personal identification badge. You must wear this badge at all times and it must be clearly displayed on your upper torso.
