

Amendment #2
Solicitation NNC12442536Q
Automated Gas Management Panels

Since release of the RFQ, NASA GRC has determined that two extensions are needed. One is for the question submittal date, and the other is for the quote submittal date. Please see the following modifications:

- 1) The previous due date and time for submittal of questions is hereby deleted. In its place, the new due date and time for questions is no later than 4:30 pm on Tuesday, 8/21/12. If you submit questions after this time, NASA does not guarantee they will be answered. Also, it is anticipated that all answers to all questions submitted (this includes those already submitted) will be posted no later Thursday, 8/23/12.
- 2) The previous due date and time for submittal of quotes is hereby deleted. In its place, the new due date and time for quotes is no later than 4:30 pm on Tuesday, 8/28/12. If you submit a quote after this time, NASA WILL NOT evaluate it and it will be immediately considered late and unresponsive. It should be noted, a quote submitted before the due date and time, but which reaches the Contracting Officer after (due to, for example, an electronic delay in e-mail file forwarding), will still be considered late and unresponsive. All quotes must be to the Contracting Officer no later than the due date time.
- 3) All other aspects of the Solicitation remain unchanged.
