

One-on-One Communications with Industry Guidance Center Safety and Fire Operations Contract (CSFO) Contract

NASA/JSC will conduct one-on-one meetings with industry on Wednesday, April 17 at the Gilruth Center to discuss the anticipated CSFO contract. The meetings will be held with the interested parties at the scheduled times and place provided in the response to the RSVP.

The goal of the CSFO Industry Day is to promote and facilitate open communication with industry. The purpose of the CSFO industry day one-on-one communication meetings are to allow industry the opportunity to openly communicate with the Government by providing comments and inputs early enough in the procurement process for consideration during the procurement strategy process.

Please note that neither side will be making a formal presentation during the one-on one communications meetings and recording devices are not permitted.

Acceptable Topics for One-on-One Communications with Industry

- The general purpose of the current contract
- Any information about JSC that NASA has already made accessible to the public or is otherwise being made available to all potential offerors
- Historical information about the general nature or scope of prior similar contracts whose requirements may be similarly addressed in whole or in part under the current acquisition
- Information that describes the federal procurement process as defined in the Federal Acquisition Regulations (FAR), NASA FAR Supplement (NFS) or other published procurement policy documents
- Procurement specific information already published such as information contained in the acquisition forecast, statement of work (SOW), and pre-solicitation synopses

Unacceptable Topics for One-on-One Communications with Industry

- Proprietary or confidential business information of contractor(s) or other business entities performing similar ongoing efforts
- Privacy Act protected information such as existing contractor employees' personal data
- Trade Secrets Act protected information
- Speculation on what the Government might be looking for in the proposals
- Different technical and management approaches
- Technical efficiencies
- Any particular Government emphasis
- Performance of contractors providing similar requirements that could become competitors
