

## Specifications

NASA/LaRC has a requirement for a tarp cover to be used in covering the Quonset Hut structure located at the Center's Landing & Impact Research Facility (LandIR), and that shall meet the minimum following specifications:

- Tarp cover shall be approx 105' Wide X 100' Long  
NOTE: Quonset Hut structure stands ~30' tall, ~72' wide, ~100' long (see NASA's Drawing A for reference)  
NOTE: Current cover was installed by Coverall –Load# 99344, SO# 27456 for reference.
- Tarp cover shall be white in color
- Tarp cover shall be open at each end, i.e. drive-thru type
- Tarp cover shall be fastened to existing structure through PVC and belting package (see below pictures for reference)
- Tarp cover shall include (2) end flap cables
- Installation shall consist of:
  - Removal of existing tarp cover
  - Installation of new cover on existing framework
  - **NOTE: NASA will assume responsibility for disposal of existing cover**
- Contractor shall provide all lifting devices (such as crane, genie boom, fork lift, and safety harnesses) for use in installation.
- Contractor shall provide all necessary hardware and tools for use in installation. Current hardware (such as tension straps, etc.) shall be examined to determine if they are salvageable or in need of replacement.
- Contractor shall furnish training certifications for vehicle use and safety equipment.
- Contractor's employees shall attend brief NASA training on security and on-site safety procedures.

Please refer to NASA's Drawing A for the dimensions of the Quonset Hut structure, and to the attached photos of the existing cover/structure for reference.

**NOTE: LaRC encourages all contractors to make a site visit before bidding. Visitation will be allowed on Monday, May 20 and Tuesday, May 21 for any contractors that choose to visit the Center for measurements and an evaluation of the site. Please contact Derek Bramble (757.864-6073) with any requests to set up a site visit.**
