

Aerospace Testing and Facilities Operations and Maintenance (ATOM-4)  
NNA14443194R (SLS)  
QUESTIONS AND ANSWERS SET 2

**Vertical Gun Range**

1. Are there any specific certifications that your crew needs to have to operate?

Reference: Industry Day/Pre-Proposal Conference

*Yes, contractor employees shall have various certifications such as: explosives handling, crane and rigging operations, confined space, hazardous materials handling and spill response and respirator. There are no specific certifications other than those required by OSHA and NASA safety regulations APR 8715.1.*

2. Does your crew get trained once or are they offered continuous learning opportunity to refine their skills?

Reference: Industry Day/Pre-Proposal Conference

*Contractor employees are required to have various training disciplines and refresher training requirements. For example, explosives handling training occurs every 3 years and crane and rigging is done annually. All refresher training and re-certifications are stipulated by OSHA and NASA safety regulations APR 8715.1.*
