

JUSTIFICATION FOR SOLE SOURCE ACQUISITION
RECOMMENDATION AND DETERMINATION TO SOLICIT FROM ONE SOURCE

PR 4200516125

NASA, John F. Kennedy Space Center, will purchase AccuRev and AccuBridge maintenance.

The LCS development project uses the AccuRev product for software configuration management as its core component. This product maintains the development source code versioning and configuration management of LCS delivery products through the development and testing phases of the LCS deliveries. AccuRev maintenance is required on the products in order to ensure technical support and software upgrades over the next year.

Pursuant to FAR 6.302-1(c), the acquisition of the referenced software and services is determined to be available from this maintenance agreement. Competition is impractical for the following reason:

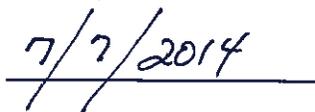

The maintenance for AccRev and AccuBridge can only be procured through Micro Focus, who has recently acquired AccuRev.

I hereby certify that this justification is accurate and complete to the best of my knowledge and belief.

Roger MacLeod
