

## Addendum to Multi-User Control System Specifications

**Solicitation Number:** NNK15536399R (Draft SOW)

**Subject:** Inclusion of a (1) Demonstration Test; (2) Options for Annual Maintenance/License Renewal; and (3) Additional External Interfaces.

The purpose of this addendum to the Multi-User Control System Specifications is to encourage industry to **comment** on any or all the following items. A response is not required. Responses are not offers and cannot be accepted by the government.

1. The government is contemplating including a “Demonstration Test” as part of the evaluation criteria. The offeror, using their test equipment and facility, shall perform a demonstration of the COTS solution which addresses the offerors approach to how they will meet/exceed the requirements.
2. The government is contemplating including options to cover annual maintenance and license renewal costs. The offeror shall provide a costing model which breaks down annual maintenance and license extension costs per year over a 5 year period.
3. The government is contemplating including options for the three (3) additional external interfaces. Currently, the offeror shall provide the engineering services required to design/implement / test the interfaces to the Kennedy Ground Control System (KGCS) (Ethernet/IP). The offeror shall provide a costing model to implement the three (3) additional external interfaces, as described in section 6.2.2.1 External Interface Definition section of the Multi-User Command and Control System statement of work, into three separate options.
