

Supplemental information for the pre-solicitation notice for NNN16569003R Reinforce Catacomb Roof for SLS Block 1B Vehicle

The Government has been informed that we can no longer utilize FedBizOpps (FBO) to transmit EAR or ITAR export controlled documents.

Therefore, all contractors that will be interested in receiving drawings and specifications for this project will have to ensure they have been screened by the Defense Logistics Agency (DLA) Joint Certification Program (JCP) at <http://www.dlis.dla.mil/jcp/>

Note: This process does take time and the Government encourages contractors to start as soon as possible.

If a contractor has been previously screened by FBO they can verify if their status is still active by utilizing their cage code at:

<http://www.dlis.dla.mil/jcp/search.aspx>

Further guidance on how contractors will receive the documents will be sent out with the solicitation.

Notice is hereby provided that access to the drawings and specifications will be limited to offerors certified by DLA.

All contractual and technical questions must be submitted via email. Telephone questions will not be accepted.
